Exam Code: 700-303

Exam Name: Advanced Borderless Network Architecture Systems Engineer test

Certdumps

QUESTION 1

Which two statements are correct about Cisco Validated Design or CVD? (Choose two)

- A. CVD consists of systems and solutions that are designed tested and documented to facilitate and improve customer deployments
- B. CVD is a prescriptive, scalable, flexible design to quickly deploy a full-service network.
- C. CVD gets the design working the first time by using validated configurations and topologies.
- D. CVD implementations are mainly partner-led
- E. CVD consists of three primary modular yet interdependent components

Correct Answer: AB

Section: (none)

Explanation

Explanation/Reference:

QUESTION 2

Which is a software feature available in Cisco IOS Software recommended to be positioned at the network access layer?

- A. Flow Metadata
- B. Media Services Proxy
- C. NBAR2
- D. Mediatrace

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 3

In which wireless deployment mode is no wireless controller used?

- A. Autonomous
- B. FlexConnect
- C. Centralized
- D. Converged Access

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 4

Which high availability design consideration produces savings by reducing the number of power supplies required per switch and the number of outlets required in the wiring closet?

- A. StackPower

- B. Spanning VLANs
- C. QoS
- D. Gateway redundancy

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 5

Which option touches on the data flows involved with management applications of the Cisco EnergyWise architecture?

- A. Protocol Operation
- B. Monitoring Power
- C. Controlling Power
- D. Cisco Prime LMS

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 6

The concern of one of your customers is, "How do I quickly isolate and resolve application performance problems with the Cisco ISR-AX solution?" Which feature of the Cisco solution is a response to this query?

- A. With the Cisco solution, you can reduce Application Latency by accelerating applications with full optimization across the WAN
- B. With the Cisco solution, you can gain Visibility into encrypted wireless traffic
- C. With the Cisco solution, you can provide application visibility to 1000+ applications with metrics such as Application Response Time, Jitter and bandwidth
- D. The Cisco solution provides WAN optimization for every size site

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 7

Which is a feature of Cisco AnyConnect Secure Mobility Client?

<http://www.gratisexam.com/>

- A. Is available across the broadest set of platforms, such as Windows, Mac OS X. Linux. iOS Android, and more
- B. Analyzes every Web request to determine if content is malicious inappropriate or acceptable based on the defined security policy
- C. Provides superior connectivity features by giving administrators the ability to control which networks or resources endpoints are able to connect to
- D. Offers a comprehensive suite of powerful security features except VPN access features

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 8

One of your customers is looking for small deployments especially in high-usage areas of their network While all of the following hold true for Cisco Medianet which is a point to highlight so that your customer is encouraged to buy our solution'?

- A. Cisco Medianet is designed to work with third-party end points
- B. Cisco Medianet can co-exist with legacy network elements
- C. Cisco Medianet provides greater visibility and granularity
- D. Cisco Medianet can be deployed in phases allowing customers to realize benefits quickly

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 9

Which advanced WAN optimization functionality is provided by WAAS?

- A. Application-specific acceleration
- B. Optimum resource usage
- C. Visualization platform
- D. Automatic route optimization

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 10

In designing a BYOD solution, which implementation is based on extending traditional guest wireless access and providing similar guest-like wireless access for employee personal devices'?

- A. Enhanced
- B. Limited
- C. Basic
- D. Advanced

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 11

What is the first step in implementing Cisco EnergyWise?

- A. Reduce consumption by optimizing power delivery policies
- B. Analyze data to make decisions on cost-saving policy actions
- C. Measure how much power is being consumed by each device on the network
- D. Show cost savings

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 12

Which item identifies how customers can leverage the Cisco Cloud Intelligent Networks framework'?

- A. WAN refresh and WAN optimization as part of DC consolidation
- B. Physical and virtual platforms integrated for end-to-end Application and User Experience
- C. Simplified operational model across the enterprise and cloud
- D. WAN add-on capabilities such as application survivability

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 13

What is the goal of Cisco Borderless Network?

- A. To promote energy efficiency in data centers
- B. To connect anyone anywhere, on any device
- C. To allow people to communicate on any device within the parameters of their networks
- D. To allow people to keep in touch with family members all around the world

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 14

Which application consideration is important for collaboration capabilities, including voice video and instant messaging to users of mobile devices such as Android and Apple iOS smartphones and tablets?

- A. Quality of Service
- B. Dual SSID Design
- C. Rate Limiting
- D. Single SSID Design

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 15

Which solution is a classification engine that recognizes and classifies a wide variety of protocols and applications?

- A. Next Generation NBAR (NBAR2)
- B. Application Visibility and Control (AVC)
- C. Performance Routing (PfR)
- D. Medianet

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 16

Which service helps in providing cloud-based security services?

- A. Cisco Hosted Collaboration Solution Connector
- B. Cisco Cloud Web Security Connector
- C. CTERA Connector
- D. Cisco WAAS

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 17

What are two characteristics of the campus architecture hierarchy tiers? (Choose two)

- A. A network may have four or more physical tiers of switches if necessary
- B. There are absolute rules for how a campus network is physically built
- C. Having three physical tiers is a strict requirement
- D. The network can have two tiers of switches combined into one
- E. Each layer in the hierarchy can perform the functions of the other layers

Correct Answer: AD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 18

Your target customer is looking to deploy video, but has concerns. As a sales strategy, which benefit should you focus to sell the Cisco solution?

- A. Suggest starting with migrating to Cisco Medianet in strategic locations
- B. Inform the customer that Cisco Medianet can give visibility to understand the impact of each application on the network
- C. Focus on the benefits of measuring and troubleshooting for business-critical applications
- D. Highlight that Cisco Medianet enables faster troubleshooting for video voice and data applications

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 19

Which two statements about Cisco Cloud Web Security are correct? (Choose two)

- A. Cisco Cloud Web Security can only be integrated with Cisco switches
- B. Cisco Cloud Web Security is powered by Cisco Security Intelligence Operations (SIO), a cloud-based service
- C. Cisco Cloud Web Security provides unmatched cloud-based Web security and control only to very small-sized organizations
- D. Cisco Cloud Web Security extends Web security to users on the go with the Cisco AnyConnect Secure Mobility Client

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 20

You need to easily manage the security risks of borderless networks. Which mobility solution uses next-generation remote-access technology to allow users to securely access the network with their device of choice?

- A. Cisco AnyConnect Secure Mobility Client
- B. Virtual Desktop Infrastructure Access
- C. Cisco Medianet
- D. Cisco TrustSec

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 21

Which two statements are correct about Performance Monitor? (Choose two)

- A. Performance Monitor fails to maintain the historical data about analyzed flows traversing routers
- B. Performance Monitor analyzes RTP-based audio and video flows and reports on service- affecting metrics
- C. Performance Monitor does not facilitate cross-vendor application support
- D. Performance Monitor is one of the features of Media Monitoring solution
- E. Performance Monitor can be applied only to Cisco WebEx client applications

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 22

Which Application Experience technology is a converged networking, computing, and virtualization platform for hosting essential infrastructure services and mission-critical business applications in the lean branch office?

- A. WAAS
- B. UCS Express
- C. NetFlow
- D. NetworkBAR

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 23

Which switch offers the industry's highest 480 Gbps stacking bandwidth to meet network demand?

- A. Cisco Catalyst 3850 Series Switches
- B. Cisco Catalyst 2960 C Series Switches
- C. Cisco Catalyst 3560 C Series Switches
- D. Cisco Catalyst Access Switches

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 24

Which two options describe the business benefits of Borderless Networks for end users'? (Choose two)

- A. Privacy and security
- B. Compliance and policy
- C. Bandwidth costs
- D. Budget constraints

E. Better video quality

Correct Answer: AB

Section: (none)

Explanation

Explanation/Reference:
