QUESTION 28

A technician has had several support requests for one PC. The technician has reseated the PCI cards and replaced the hard drive in the PC located in a school cafeteria kitchen. PCs located in the business office or the classrooms have not had this issue. Which of the following is MOST likely causing this PC's issue?

- A. Faulty RAM
- B. 240 volt Kitchen outlets
- C. Power Brownouts
- D. Excessive Heat

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 29

A technician installs an additional hard drive controller. Which of the following processes will MOST likely prevent errors?

- A. 1) Apply System Updates
2) Update the BIOS
3) Install the card
4) Install the driver
5) Upgrade the Card Firmware
- B. 1) Install the card
2) Update the BIOS
3) Upgrade the Card Firmware
4) Install the driver
5) Apply System Updates
- C. 1) Apply System Updates
2) Install the driver
3) Install the card
4) Upgrade the Card Firmware
5) Update the BIOS
- D. 1) Update the BIOS
2) Install the driver
3) Install the card
4) Upgrade the Card Firmware
5) Apply System Updates

QUESTION 59

A customer calls in, talking constantly without allowing time for the technician to answer or ask questions. The technician decides to place the customer on hold to work on another issue and misses what the customer's problem was. When the customer is finished explaining the issue, the technician asks the customer to summarize the problem again, which angers the customer. How could the technician have better handled the situation to avoid such a confrontation?

- A. The technician should have asked the customer to slow down and allow for a response to a few of the matters brought up in discussion.
- B. The technician should have allowed the customer to finish completely, and then return to the customer's first point to build a structured discussion.
- C. The technician should have transferred the call to a supervisor, as the supervisor is better trained to handle such customers.
- D. The technician should have only asked closed-ended questions so the customer could not elaborate on the issues and the technician could troubleshoot the issue.

Correct Answer: B
