CompTIA A+ 220-701 Exam

Exam A

QUESTION 1

Which of the following is an advantage of NTFS over FAT32?

- A. Dual OS functionality
- B. File encryption support
- C. Drive size exceeding 128GB
- D. Support for Windows XP

Correct Answer: B

Section: (none)

Explanation

QUESTION 2

Which of the following occurs during POST?

- A. OS loads
- B. Safe Mode starts
- C. RAM check
- D. MBR check

Correct Answer: C

Section: (none)

Explanation

QUESTION 3

Assuming the Windows XP installation disc is in the CD drive, Recovery Console can be run in which of the following ways?

- A. Windows Restore application
- B. %cd%\i386\spuninst.exe
- C. Booted from installation disc
- D. Windows Support website

Correct Answer: C

Section: (none)

Explanation

QUESTION 4

Which of the following is the MOST appropriate question to ask a customer first when attempting to troubleshoot an input device over the phone?

- A. Are you sure that the device is plugged in?
- B. Have you verified all PS/2 plugs are secure?
- C. Can you describe the steps you have taken?
- D. Have you tried turning it off and on again?

Correct Answer: C

Section: (none)

Explanation

QUESTION 5

Which of the following protocols uses port 143 by default?

- A. POP
- B. HTTPS
- C. TELNET
- D. IMAP

"First Test, First Pass" - www.lead2pass.com 4
CompTIA A+ 220-701 Exam

Correct Answer: D

Section: (none)

Explanation

QUESTION 6

Which of the following protocols uses port 443 by default?

- A. HTTPS
- B. IMAP
- C. TELNET
- D. POP

Correct Answer: A

Section: (none)

Explanation

QUESTION 7

Which of the following IP addresses is in a class B range?

<http://www.gratisexam.com/>

- A. 10.0.3.50
- B. 123.25.10.1
- C. 172.16.1.54
- D. 192.168.0.7

Correct Answer: C

Section: (none)

Explanation/Reference:

QUESTION 8

Which of the following would be used to record off-air TV programs?

- A. Capture card
- B. Bluetooth
- C. Wireless card
- D. POST card

Correct Answer: A

Section: (none)

Explanation

QUESTION 9

Which of the following is commonly used for RS-232 connections?

- A. PS/2
- B. Parallel
- C. SCSI
- D. DB-9

Correct Answer: D

Section: (none)

Explanation

QUESTION 10

A user reports that their laptop cannot connect to the wireless network. Which of the following is the FIRST step the technician should take to resolve this problem?

- A. Check that the WiFi switch is enabled on the laptop.
"First Test, First Pass" - www.lead2pass.com 5
CompTIA A+ 220-701 Exam
- B. Check the area for possible sources of interference.
- C. Check the wireless adapter settings in the OS.
- D. Check that the wireless security settings are correct for the network.

Correct Answer: A

Section: (none)

Explanation

QUESTION 11

A technician observes that the lights in a customer's building flicker periodically during the course of the day. Which of the following should the technician recommend to protect the customer's equipment?

- A. A power supply
- B. A generator
- C. A heavy duty electrical cord
- D. A UPS

Correct Answer: D

Section: (none)

Explanation

QUESTION 12

A technician on a service call is dealing with a furious customer who is shouting loudly. The technician cannot

calm the customer down. Which of the following should the technician do NEXT?

- A. The technician should shout back at the customer and remain in control of the situation.

- C. Call the supervisor and complain.
- D. Leave the customer site and document the incident.

Correct Answer: D

Section: (none)

Explanation

QUESTION 13

A technician wants to prevent anyone from logging into a computer that is running in a common area unless they are authorized. The technician has locked the case. Which of the following should actions should the technician take NEXT to prevent access?

- A. Create user accounts for only the authorized users.
- B. Add a BIOS password.
- C. Disconnect the keyboard and the mouse.
- D. Add a privacy screen to the monitor.

Correct Answer: A

Section: (none)

Explanation

QUESTION 14

Which of the following represents a private IP address?

- A. 11.6.42.90
- B. 21.4.3.7
"First Test, First Pass" - www.lead2pass.com 6
CompTIA A+ 220-701 Exam
- C. 172.31.4.3
- D. 196.22.57.3

Correct Answer: C

Section: (none)

Explanation

QUESTION 15

Which of the following is correct about IPv6?

- A. IPv6 only supports IP addresses up to 64-bits in length.
- B. IPv6 is the only type of IP address supported on today s networks.
- C. Both IPv6 and IPv4 can exist on the same network.
- D. The last 64-bits of an IP address represent the device MAC address.

Correct Answer: C

Section: (none)

Explanation

QUESTION 16

A user needs to access a secure website behind a firewall. Which of the following would get the user into the website?

- A. https:\\www.ipdomain.com:8080
- B. https:\\www.ipdomain.com
- C. https:\\ipdomain.com\\8080
- D. https:\\www.ipdomain.com\\8080

Correct Answer: A

Section: (none)

Explanation

QUESTION 17

A user wants to try a live version of another operating system that is on a DVD. In order to use this, the user must do which of the following?

- A. Authorize the boot DVD in Windows.
- B. Install a live version to the hard drive first.
- C. Edit the boot.ini in Windows to allow the DVD to boot.
- D. Ensure the DVD-ROM is placed first in the boot priority.

Correct Answer: D

Section: (none)

Explanation

QUESTION 18

The user reports to the help desk that a UPS trips the internal circuit breaker each time the laser printer is powered on. The technician should do which of the following?

- A. Advise the user that the laser printer needs to be replaced.
- B. Move the printers power cable to a surge only socket.
- C. Put the UPS on a separate power circuit.
- D. Order a UPS with a slightly lower wattage.

Correct Answer: B

Explanation

QUESTION 24

A technician is having trouble closing a running program that is no longer responding. Which of the following will allow the technician to end the process?

- A. Add/Remove Programs
- B. Event Viewer
- C. Task Manager
- D. Device Manager

Correct Answer: C
Section: (none)
Explanation

QUESTION 25

A help desk technician receives a phone call from a user reporting a computer problem. During the phone call, the user starts a conversation with the technician asking detailed information about personnel in upper management. The technician then asks the users name again, after which the user promptly hangs up. Which of the following attacks did the technician experience?

- A. Phishing attack
- B. Eavesdropping attack
- C. Social engineering attack
- D. Spyware attack

Correct Answer: C
Section: (none)
Explanation

QUESTION 26

Which of the following printers would be the BEST choice for printing on multi-part forms?

- A. Impact printer
- B. Thermal printer
- C. Inkjet printer
- D. Laser printer

Correct Answer: A
Section: (none)
Explanation

QUESTION 27

A customer is experiencing unusual problems with a printer due to voltage fluctuations in the wall outlet. Which of the following should be used to eliminate the fluctuations?

- A. Multimeter
- B. Ohm meter

- C. UPS
 - D. Surge protector
- "First Test, First Pass" - www.lead2pass.com 9
CompTIA A+ 220-701 Exam

Correct Answer: C

Section: (none)

Explanation

QUESTION 28

A customer with a laptop frequently goes into the office to work. However, the laptop only has two USB ports, and they are unable to connect their keyboard, mouse, monitor and scanner at the same time. Which of the following devices would BEST address this issue?

- A. Docking station
- B. KVM switch
- C. Bluetooth adapter
- D. IEEE 1394 cable

Correct Answer: A

Section: (none)

Explanation

QUESTION 29

Which of the following is the MAXIMUM partition size of the FAT32 file system?

- A. 16GB
- B. 32GB
- C. 1024GB
- D. 2048MB

Correct Answer: B

Section: (none)

Explanation

QUESTION 30

A user reports that they are suddenly unable to print to a network printer. It was working fine yesterday. The technician can ping the users workstation and the printer. The technician can also print a test page from another workstation. Which of the following is the MOST likely cause of the problem?

- A. The printer is no longer the users default printer.
- B. The users workstation has a faulty NIC.
- C. The printer has corrupt drivers.
- D. The printer has a faulty NIC.

Correct Answer: A

Section: (none)

Explanation

QUESTION 31

In regards to computer case form factors, which of the following provides the MOST room for effective cooling?

- A. BTX
- B. ATX
- C. NLX
- D. Micro ATX

Correct Answer: A

Section: (none)

Which of the following RAID arrays does only striped volumes?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

Correct Answer: A

Section: (none)

Explanation

QUESTION 33

A Windows XP workgroup computer can have up to how many concurrent connections?

- A. 10 or fewer
- B. 15 or fewer
- C. 20 or fewer
- D. 25 or fewer

Correct Answer: A

Section: (none)

Explanation

QUESTION 34

Which of the following is a broadcast address?

- A. 169.254.10.127
- B. 192.168.1.1
- C. 127.0.0.1
- D. 255.255.255.255

Correct Answer: D

Section: (none)

Explanation

QUESTION 35

Which of the following command line paths shows the recovery console s installation?

- A. D:\i386\tools\console
- B. D:\i386\tools /cmdcons
- C. D:\i386\utilities\console
- D. D:\i386\winnt32 /cmdcons

Correct Answer: D

Section: (none)

Explanation

QUESTION 36

A duplexer unit has been added to an existing laser printer. The printer prints normally but it will not print on both sides of the paper. Which of the following is the FIRST action a technician should take when addressing this issue?

- A. Update the printer firmware to the latest version for duplexing.
- B. Delete the printer queue and recreate it.
- C. Check the manufacturer's documentation and website for any known problems with the duplexer unit.
"First Test, First Pass" - www.lead2pass.com 11
CompTIA A+ 220-701 Exam
- D. Check the configuration settings of the printer for duplex enabled.

Correct Answer: D

Section: (none)

Explanation

QUESTION 37

Which of the following malicious software types will create multiple pop-ups on a computer?

- A. Adware
- B. Grayware
- C. Worms
- D. Spyware

Correct Answer: A

Section: (none)

Explanation

QUESTION 38

A technician's company prints forms on multi-layer carbonless copy paper. When asked to replace the printer, which of the following printing technologies will allow the technician to continue to use the company's copy paper?

- A. Transfer
- B. Dot Matrix
- C. Thermal
- D. Laser

Correct Answer: B

Section: (none)

Explanation

QUESTION 39

Before implementing a potential solution to a problem, which of the following should be done?

- A. Perform a system backup
- B. Determine what has changed
- C. Test the solution
- D. Document the solution

Correct Answer: A

Section: (none)

Explanation

QUESTION 40

Which of the following broadband technologies allows for communication across the FARTHEST distance?

- A. Fiber
- B. DSL
- C. Satellite
- D. Cable

Correct Answer: C

Section: (none)

Explanation

QUESTION 41

"First Test, First Pass" - www.lead2pass.com 12
CompTIA A+ 220-701 Exam

Which of the following cables has the LONGEST viable length?

- A. Fiber
- B. CAT6
- C. CAT5e
- D. CAT5

Correct Answer: A

QUESTION 46

Which of the following is the MOST common port to configure for an external modem?

- A. COM1
- B. LPT3
- C. PS/2
- D. LPT1

Correct Answer: A

Section: (none)

Explanation

QUESTION 47

Which of the following bus slots would provide the HIGHEST potential performance for a video card?

- A. PCIe
- B. AGP
- C. PCI
- D. SCSI

Correct Answer: A

Section: (none)

Explanation

QUESTION 48

Which of the following are the voltages supplied to a drive on a standard Molex connector?

- A. 3.5v and 16v
- B. 3.5v and 9v
- C. 3.3v and 24v
- D. 5v and 12v

Correct Answer: D

Section: (none)

Explanation

QUESTION 49

After a technician physically installs a bar code reader, which of the following is the NEXT step?

- A. Program the reader to recognize the required code systems.
- B. Reinstall the operating system to add support for bar code readers.
- C. Adjust the light wavelength.
- D. Test the reader by typing commands from the keyboard.

Correct Answer: A

Section: (none)

Explanation

QUESTION 50

Which of the following will dissipate heat MOST efficiently?

- A. CPU fan
"First Test, First Pass" - www.lead2pass.com 14
CompTIA A+ 220-701 Exam
- B. Liquid cooling systems
- C. Heat sink
- D. Power supply

Correct Answer: B

Section: (none)

Explanation

QUESTION 51

Which of the following areas allows a user to switch the left and right button commands?

- A. Button tab in the mouse properties
- B. Device Manager properties
- C. Use MouseKeys in accessibility
- D. Hardware profiles in the system properties

Correct Answer: A

Section: (none)

Explanation

QUESTION 52

Which of the following is a valid motherboard memory slot type?

- A. DIMM
- B. AGP
- C. CMOS
- D. PCI

Correct Answer: A

Section: (none)

Explanation

QUESTION 53

Which of the following is the MOST important consideration when installing Windows 7 64-bit?

- A. Processor speed
- B. Processor type
- C. Memory type
- D. Memory speed

Correct Answer: B

Section: (none)

Explanation

QUESTION 54

Which of the following is the default port for RDP?

- A. 21
- B. 80
- C. 3389
- D. 8080

Correct Answer: C

Section: (none)

Explanation

QUESTION 55

Which of the following connector types are typically used on LCD displays? (Select TWO).

- A. XGA
- B. Bluetooth
- C. CGA
- D. DVI
- E. VGA

Correct Answer: DE

Section: (none)

Explanation

QUESTION 56

Which of the following is an advantage that a USB mouse has over a PS/2 mouse?

- A. A USB mouse uses less power
- B. A USB mouse is more portable
- C. A USB mouse is hot swappable
- D. A USB mouse is more secure

Correct Answer: C

Section: (none)

Explanation

QUESTION 57

Which of the following is true of IPv6 addresses?

- A. They are supported by all routers.
- B. They cannot be used with IPv4.
- C. They require fiber connections only.
- D. They represent addressing using 128-bits.

Correct Answer: D

Section: (none)

Explanation

QUESTION 58

During start up, the technician notices a repeating error just before the login screen. Which of the following built-in utilities would the technician use to quickly identify the problem?

- A. DXDIAG
- B. System Information
- C. MSCONFIG
- D. System Restore

Correct Answer: C

Section: (none)

Explanation

QUESTION 59

Which of the following is the default data rate of USB 2.0?

- A. 48Mbps
 - B. 480Mbps
 - C. 480Kbps
 - D. 1.1Gbps

QUESTION 63

Which of the following is a valid IPv6 address for assignment to a TCP/IP workstation?

- A. FE0G:9A2C::0001/64
- B. FE08::145A::87B2/122
- C. 9024:8622::5467/64
- D. ABC0::0024/130

Correct Answer: C

Section: (none)

Explanation

QUESTION 64

A technician installs Microsoft Windows to a computer with three internal SATA hard drives and an external USB hard drive. Hard drive 1 contains the operating system. Hard drive 2 contains the user profiles. Hard drive 3 and the external USB hard drive are empty. In which of the following locations should the page file be located to maximize performance?

"First Test, First Pass" - www.lead2pass.com 17
CompTIA A+ 220-701 Exam

- A. Internal SATA Hard Drive 1
- B. External USB Hard Drive
- C. Internal SATA Hard Drive 3
- D. Internal SATA Hard Drive 2

Correct Answer: C

Section: (none)

Explanation

QUESTION 65

Which of the following services processes print requests and sends them to the printer?

- A. Printer Driver
- B. Print Spooler
- C. Printer Service
- D. Print Properties

Correct Answer: B

Section: (none)

Explanation

QUESTION 66

An external hard drive would normally use which of the following external ports? (Select TWO).

- A. An eSata port
- B. A USB port
- C. A serial port
- D. An HDMI port
- E. A parallel port

Correct Answer: AB

Section: (none)

Explanation

QUESTION 67

A RAID controller is required to perform which of the following?

- A. Speed up the performance of a computer.
- B. Add a second hard drive to the computer.
- C. Restore data from a backed up hard drive.
- D. Create a striped set with two or more drives.

Correct Answer: D

Section: (none)

Explanation

QUESTION 68

Which of the following broadband types can provide the MOST available bandwidth?

- A. DSL
- B. Fiber
- C. Satellite
- D. Cable

Correct Answer: B

Correct Answer: B

Section: (none)

Explanation

QUESTION 70

Which of the following is a limitation of satellite broadband?

- A. The speed is capped by ISO regulations
- B. Requires line of sight
- C. Cannot be used in remote locations
- D. It is a receive only transmission

Correct Answer: B

Section: (none)

Explanation

QUESTION 71

Which of the following network cables would a technician find on the RJ-45 connector?

- A. Coaxial cable
- B. Ethernet cable
- C. Fiber
- D. USB

Correct Answer: B

Section: (none)

Explanation

QUESTION 72

Which of the following wireless technology standards has the SHORTEST indoor range?

- A. 802.11a
- B. 802.11b
- C. 802.11g
- D. 802.11n

Correct Answer: A

Section: (none)

Explanation

QUESTION 73

When a PC is turned on, which of the following tests the CPU, memory, chipset, video adapter, disk controllers, disk drives, and keyboard?

- A. BIOS setup
- B. POST
- C. CMOS chip
"First Test, First Pass" - www.lead2pass.com 19
CompTIA A+ 220-701 Exam
- D. Bootstrap loader

Correct Answer: B

Section: (none)

Explanation

QUESTION 74

Keyboard errors are MOST often caused by which of the following problems? (Select TWO).

- A. Jammed keys
- B. ESD
- C. Driver issues
- D. Incorrect BIOS settings
- E. Defective cables

Correct Answer: AE

Section: (none)

Explanation

QUESTION 75

The user boots their computer in the morning to discover the message OS not found . Which of the following would recover from that error without data loss?

- A. Insert the system boot disk and repair the operating system.
- B. Install a new hard drive and restore the system.
- C. Restore the BIOS configuration to default to recognize the drive.
- D. Use the manufacturers supplied system recovery disk and restore the system.

Correct Answer: A

QUESTION 80

A technician receives a request to build a machine and install a 64-bit operating system. Which of the following processors would the technician use in this system?

- A. Pentium 4
- B. Athlon XP
- C. Celeron
- D. Itanium 2

Correct Answer: D

Section: (none)

Explanation

QUESTION 81

Which of the following is the key combination to resolve an inverted display?

- A. Windows Key + ALT + U
- B. CTR + ALT + Down arrow
- C. SHIFT+ HOME + PG UP
- D. CTR + TAB + Enter

Correct Answer: B

Section: (none)

Explanation

QUESTION 82

Which of the following network types allows for high speed data communication and is the MOST difficult to splice into?

- A. Cable
- B. DSL
- C. Satellite
- D. Fiber

Correct Answer: D

Section: (none)

Explanation

QUESTION 83

Which of the following provides the BEST transfer speed for a HDD?

- A. SATA

- B. IEEE 1394
- C. EIDE
- D. IDE

Correct Answer: A

Section: (none)

Explanation

QUESTION 84

A technician turns on the computer and a blue screen appears on the monitor with an error code. Which of the following is the BEST place for the technician to find out what this error code means?

- A. Hardware manufacturer's website
- B. Third party websites
"First Test, First Pass" - www.lead2pass.com 22
CompTIA A+ 220-701 Exam
- C. OS manufacturer's website
- D. Installation manuals

Correct Answer: C

Section: (none)

Explanation

QUESTION 85

Which of the following is commonly used to create a LAN in a home network? (Select TWO)

- A. Switch
- B. Satellite
- C. DSL
- D. Dial-up
- E. Ethernet

Correct Answer: AE

Section: (none)

Explanation

QUESTION 86

A technician has had several support requests for one PC. The technician has reseated the PCI cards and replaced the hard drive in the PC located in a school cafeteria kitchen. PCs located in the business office or the classrooms have not had this issue. Which of the following is MOST likely causing this PC's issue?

- A. Faulty RAM
- B. 240 volt Kitchen outlets
- C. Power Brownouts
- D. Excessive Heat

Correct Answer: D

Section: (none)

Explanation

QUESTION 87

A technician inserts a Windows OS install disk into the CD-ROM to upgrade the OS on a computer but after several restarts, the computer does not boot from the disk. Which of the following MOST likely needs to be configured?

- A. BIOS settings
- B. Network Configuration
- C. Repair Options
- D. Wake On LAN settings

Correct Answer: A

Section: (none)

Explanation

QUESTION 88

A laptop with an external USB hard drive and an external monitor is not booting from the internal hard drive. Power has been verified and the battery is fully charged, but the laptop appears to be stopping after POST. Which of the following will help troubleshoot the cause of this problem?

- A. Format the external USB hard drive.
- B. Turn off the external monitor
- C. Disconnect the external devices.
"First Test, First Pass" - www.lead2pass.com 23
CompTIA A+ 220-701 Exam
- D. Remove and reseat the laptop battery

Correct Answer: C

Section: (none)

Explanation

QUESTION 89

Which of the following Internet connections has the HIGHEST latency?

- A. Cable
- B. Satellite
- C. DSL
- D. Dial-up

Correct Answer: B

Section: (none)

Explanation

QUESTION 90

A customer reports the optical drive is no longer responding. Which of the following questions should be asked FIRST?

- A. "Did you log in with an administrator account?"
- B. "Have you been to any inappropriate websites?"
- C. "What have you changed since the optical drive worked properly?"
- D. "What has changed since the optical drive worked properly?"

Correct Answer: D

Section: (none)

Explanation

QUESTION 91

A technician installs a new graphics card in a computer and upon booting up nothing happens. The technician puts the old graphics card back into the computer and the computer boots up normally. Which of the following would be the BEST source of information to solve the problem? (Select TWO).

- A. Chat room discussion online
- B. Installation manual
- C. Ask another technician
- D. Manufacturer's website
- E. OS forum online

Correct Answer: BD

Section: (none)

Explanation

QUESTION 92

Which of the following is the MINIMUM memory requirement for installing Windows Vista Home Basic?

- A. 1GB
- B. 128MB
- C. 256MB
- D. 512MB

Correct Answer: D

Section: (none)

Explanation

QUESTION 93

Which of the following should be The FIRST step in troubleshooting a problem?

- A. Establish a theory of probable cause
- B. Establish a plan of action
- C. Verify full system functionality
- D. Identify the problem

Correct Answer: D

Section: (none)

Explanation

QUESTION 94

A technician installs an additional hard drive controller. Which of the following processes will MOST likely prevent errors?

- A. 1) Apply System Updates
2) Update the BIOS
3) Install the card
4) Install the driver

- 5) Upgrade the Card Firmware
- B. Install the card
 - 2) Update the BIOS
 - 3) Upgrade the Card Firmware
 - 4) Install the driver
 - 5) Apply System Updates
- C. 1) Apply System Updates
 - 2) Install the driver
 - 3) Install the card
 - 4) Upgrade the Card Firmware
 - 5) Update the BIOS
- D. 1) Update the BIOS
 - 2) Install the driver
 - 3) Install the card
 - 4) Upgrade the Card Firmware
 - 5) Apply System Updates

Correct Answer: A

Section: (none)

Explanation

QUESTION 95

A company printer is used to print payroll checks on paper forms with carbon backing. Which of the following is the BEST type of printer for this scenario?

- A. Laser
- B. Impact
- C. Inkjet
- D. Thermal

Correct Answer: B

Section: (none)

Explanation

QUESTION 96

Explanation

QUESTION 71

A networking device that sends packets to all connections is a:

- A. gateway
- B. hub
- C. switch
- D. router

Correct Answer: B

Section: (none)

Explanation

QUESTION 72

A user reports that the battery in their Windows 7 laptop is constantly low on power. Which of the following should a technician suggest to help the user conserve laptop battery power?

"First Test, First Pass" - www.lead2pass.com 42
CompTIA A+ 220-701 Exam

- A. Have the user run the laptop using the battery until all the power is depleted, and then recharge the battery.
- B. Have the user remove the battery and run the notebook using the electrical cord only.
- C. Configure the laptop power options to restore power usage when the laptop is unattended.
- D. Configure the laptop power option to power saver plan.

Correct Answer: D

Section: (none)

Explanation

QUESTION 73

A network extension needs to be run 50 meters (164 feet) across a machine shop. The path will take the extension near a number of fluorescent light fixtures and a large electric motor. Which of the following cable types would be BEST suited for this environment?

- A. Fiber
- B. UTPCat3
- C. STPCat5
- D. Coaxial

Correct Answer: A

Section: (none)

Explanation

QUESTION 74

Which of the following are the default libraries in the Windows 7 OS?

- A. Documents, Media, Pictures, Programs, and Videos
- B. Files, Music, Pictures, Online, and Videos
- C. Documents, Music, Pictures, and Videos
- D. Files, Media, Programs, and Online

Correct Answer: C

Section: (none)

Explanation

QUESTION 75

Which of the following wireless networking standards operates at only 5GHz?

- A. 802.11a
- B. 802.11b
- C. 802.11g
- D. 802.11n

Correct Answer: A

Section: (none)

Explanation

QUESTION 76

Which of the following cables uses an ST connector by default?

- A. CAT5e
- B. Fiber
- C. CAT5
"First Test, First Pass" - www.lead2pass.com 43

Explanation

QUESTION 45

Which of the following input/output protocols is commonly associated with the DB-9 port?

- A. RS-422
- B. RS-232
- C. IEEE 1284
"First Test, First Pass" - www.lead2pass.com 59
CompTIA A+ 220-701 Exam
- D. IEEE 1394

Correct Answer: B

Section: (none)

Explanation

QUESTION 46

Which of the following will be true of the battery with 9 cells instead of 6 cells?

- A. Higher electricity measured in volts.
- B. Greater duration of power availability.
- C. More devices can be powered at one time.
- D. More horsepower will be provided.

Correct Answer: B

Section: (none)

Explanation

QUESTION 47

An end user reports that their laptop cannot access the wireless network. The user had access to the network yesterday, before taking the laptop out of the office. Which of the following is the MOST likely reason for the connection problem?

- A. The wireless network is down.
- B. The user turned the wireless switch off.
- C. The battery needs to be charged.
- D. The wireless antenna has become disconnected.

Correct Answer: B

Section: (none)

Explanation

QUESTION 48

A technician would like to rebuild the MBR without reinstalling Windows. Which of the following recovery options would be used to build a new MBR?

- A. Recovery Console
- B. System Restore
- C. Automated System Recovery
- D. Emergency Repair Disk

Correct Answer: A

Section: (none)

Explanation

QUESTION 49

A technician notices that there are two appointments scheduled for the same time. Which of the following should the technician do to resolve the issue?

- A. Call one of the clients and apologize, then reschedule
- B. Do not go to the second scheduled appointment
- C. Email each client for rescheduling
- D. Go to the first scheduled appointment then after completion go to the next

Explanation

QUESTION 26

A user states that a new graphical intensive application they are using will not load because it requires Direct3D to be enabled. Which of the following utilities would be used to enable this?

- A. services.msc
- B. appwiz.cpl
- C. dxdiag.exe
- D. msconfig.exe

Correct Answer: C

Section: (none)

Explanation

QUESTION 27

Which of the following board types can transmit data up to 8GB/s?

- A. AGP

- B. CNR
- C. PCI
- D. PCIe

Correct Answer: D

Section: (none)

Explanation

QUESTION 28

The Complete PC Backup feature is available in which of the following versions of Windows? (Select TWO)

- A. Windows Vista Ultimate
- B. Windows Vista Business
- C. Windows XP Professional SP2
- D. Windows 2000 Professional
- E. Windows Vista Home Basic
- F. Windows Vista Home Premium
- G. Windows XP Home

Correct Answer: AB

Section: (none)

Explanation

QUESTION 29

Which of the following cable types is not affected by electromagnetic interference but requires specialized tools and techniques to install?

- A. CAT5e
- B. Plenum coated STP
- C. CAT6
"First Test, First Pass" - www.lead2pass.com 78
CompTIA A+ 220-701 Exam
- D. Fiber optic

Correct Answer: D

Section: (none)

Explanation

QUESTION 30

Which of the following controls the connections between the processor and the AGP slot on a motherboard?

- A. Memory
- B. Chipset
- C. Power supply
- D. System bus

Correct Answer: B

Section: (none)

Explanation

QUESTION 31

When a user was installing a new program, the computer suddenly restarted. Now when the computer starts, it gets partially through the boot process, then reboots. Which of the following is the QUICKEST method to get the computer running without losing any of the users data?

- A. Reinstall the OS
- B. Perform a factory restore
- C. Boot into Safe Mode and perform Windows Restore
- D. Boot using Last Known Good Configuration

Correct Answer: D

Section: (none)

Explanation

QUESTION 32

A user has a docking station at work, but now wants to take their laptop home. Which of the following features would a technician use to allow this?

- A. Remote Access
- B. Hardware Profiles
- C. Advanced Power Management
- D. Device Manager

Correct Answer: B

Section: (none)

Explanation

QUESTION 33

A user reports that they walked away from their laptop for 30 minutes and when they came back the screen was very dim. The user tried moving the mouse and increasing the brightness setting, but neither worked. Which of the following should the technician do FIRST?

- A. Plug in an external monitor to test the video card.
- B. Run a check disk scan to verify there is no corruption.
- C. Check if the laptop is now on battery power.
- D. Have the LCD screen replaced with a known good screen.

Correct Answer: C

Which of the following connectors is used for musical equipment?

- A. HDMI
- B. MIDI
- C. PS/2
- D. DVI

Correct Answer: B
Section: (none)
Explanation

QUESTION 35

A customer states their computer was fine until yesterday when they heard a pop noise and the computer stopped working. Which of the following components should the technician test FIRST?

- A. Main system board
- B. Processor
- C. Hard disk drive
- D. Power supply

Correct Answer: D
Section: (none)
Explanation

QUESTION 36

Which of the following is the MINIMUM available hard drive space requirement for installing Windows XP Professional?

- A. 1GB
- B. 1.5GB
- C. 2GB
- D. 2.5 GB

Correct Answer: B
Section: (none)
Explanation

QUESTION 37

Which of the following BEST explains the concept of hyperthreading?

- A. Allows two program threads to be stored in memory simultaneously
- B. Allows one program thread to be processed by more than one processor simultaneously
- C. Allows two program threads to be processed by a single processor simultaneously
- D. Allows one program thread to be stored in memory faster than another program thread

Correct Answer: C
Section: (none)
Explanation

QUESTION 38

Which of the following utilities can be used to view the start-up programs?

"First Test, First Pass" - www.lead2pass.com 80
CompTIA A+ 220-701 Exam

- A. REGEDIT
- B. IPCONFIG

In order to perform a network installation of Windows, which of the following MUST be supported by the computers network interface?

- A. PCL
- B. AGP
- C. PXE
- D. PCI

Correct Answer: C

Section: (none)

Explanation

QUESTION 16

A technician attempts to install Windows XP on a new Windows Vista PC but gets an error stating that setup did not detect any valid hard disks. Which of the following is MOST likely the cause of this error?

- A. The hard drive is too large for Windows XP to recognize.
- B. The hard drive is defective and needs to be replaced.
- C. The user needs to call Microsoft and verify that the Windows copy is registered with the DRM.
- D. Windows XP does not natively support SATA controllers.

Correct Answer: D

Section: (none)

Explanation

QUESTION 17

Which of the following adapter cards is used for connecting external hard drives?

- A. RAID
- B. PCMCIA
- C. eSATA
- D. PATA

Correct Answer: C

Section: (none)

Explanation

QUESTION 18

Which of the following would be the BEST resolution setting for an application that requires a minimum resolution of 1024 x 768?

- A. SVGA
- B. PAL
- C. VGA
- D. XGA

Correct Answer: D

Section: (none)

Explanation

QUESTION 19

IEEE1394b is capable of transfer rates of up to:

- A. 12Mbps
 - B. 400Mbps
 - C. 480Mbps
 - D. 800Mbps
- "First Test, First Pass" - www.lead2pass.com 98
CompTIA A+ 220-701 Exam

Correct Answer: D

Section: (none)

Explanation

QUESTION 20

Which of the following hardware cards allows the full functionality of the Windows XP Media Center radio option?

- A. Modem
- B. Video
- C. TV tuner
- D. NIC

Correct Answer: C

Section: (none)

Explanation

QUESTION 21

A technician has installed a new driver on a computer. Upon rebooting the computer, a stop error occurs before the technician can log back in. Which of the following would be the BEST option for the technician to do NEXT?

- A. Boot the computer to the Recovery Console.
- B. Boot the computer with a Windows Installation CD.
- C. Boot the computer using Last Known Good Configuration.
- D. Boot the computer using Safe Mode with Networking.

Correct Answer: C

Section: (none)

Explanation

QUESTION 22

Which of the following is best practice when installing memory into a computer?

- A. Install memory modules in pairs.
- B. Insure the proper drivers are installed for best performance.
- C. Apply thermal grease to insure proper seating.
- D. Wear an anti-static wrist strap.

Correct Answer: D

Section: (none)

Explanation

QUESTION 23

A technician is upgrading a desktop with the largest storage medium available. Which of the following drives is installed?

- A. Blue-ray drive
- B. Tape drive
- C. Magnetic storage drive
- D. Solid state drive

Correct Answer: C

Section: (none)

Explanation

QUESTION 25

Which of the following technologies has the HIGHEST potential throughput?

- A. DSL
- B. Fiber
- C. Satellite
- D. Cable

Correct Answer: B

Section: (none)

Explanation

QUESTION 26

Printouts from a printer are a random mix of letters, numbers, and symbols. Which of the following is MOST likely the cause of this problem?

- A. The toner cartridge needs to be replaced.
- B. Duplex printing is selected on a single-sided printer.
- C. The print spooler is full and needs to be restarted.
- D. The incorrect printer driver is installed.

Correct Answer: D

Section: (none)

Explanation

QUESTION 27

Which of the following devices goes into an AGP slot on a computer system board?

- A. Sound card
- B. Processor chip
- C. Memory
- D. Video card

Correct Answer: D

Section: (none)

Explanation

QUESTION 28

Which of the following should the technician verify FIRST if the customer reports that a laptop battery is not

charging?

- A. Remove all unneeded peripherals
- B. Check the power light on the AC adapter
- C. Swap the laptop battery for a new or refurbished battery "First Test, First Pass" - www.lead2pass.com 100 CompTIA A+ 220-701 Exam
- D. Check the backlight for functionality

Correct Answer: B

Section: (none)

Explanation

QUESTION 29

Which of the following provides data redundancy by writing data to two disks simultaneously?

- A. RAID 5
- B. RAID 1
- C. JBOD
- D. RAID 0

Correct Answer: B

Section: (none)

Explanation

QUESTION 30

A user reports a loud noise from their desktop PC. Which of the following would be suspected as a source? (Select TWO).

- A. USB thumb drive
- B. Cooling fan
- C. CMOS battery
- D. Power supply
- E. Motherboard

Correct Answer: BD

Section: (none)

Explanation

QUESTION 31

Which of the following can be hot-swappable?

- A. Hard drive
- B. Tape drive
- C. Floppy drive
- D. DVD-RW

Correct Answer: A

Section: (none)

Explanation

QUESTION 32

Which of the following adapter types will use a RJ-45 connector?

- A. NIC
- B. Video
- C. Sound
- D. Dial-up modem

Correct Answer: A

Section: (none)

Explanation

QUESTION 33

Which of the following ports is BEST to use when adding a network printer in Windows XP?

"First Test, First Pass" - www.lead2pass.com 101
CompTIA A+ 220-701 Exam

- A. USB
- B. COM5
- C. LPT1
- D. TCP/IP

Correct Answer: D

QUESTION 38

In which of the following steps of the troubleshooting theory is it important to perform backups?

- A. Verify full system functionality.
- B. Test the theory to determine cause.
- C. Identify the problem.
- D. Document findings, actions, and outcomes.

Correct Answer: C

Section: (none)

Explanation

QUESTION 39

Which of the following devices will allow a technician to use a single set of input devices on several computers?

- A. Smart card reader
- B. KVM
- C. SCSI
- D. Bar code reader

Correct Answer: B

Section: (none)

Explanation

QUESTION 40

Which of the following are locations where a computer virus could exist and then further infect a computer? (Select TWO).

- A. Optical scanner
- B. Boot sector of the hard drive
- C. Optical media
- D. Ethernet switch
- E. USB mouse

Correct Answer: BC

Section: (none)

Explanation

QUESTION 41

A technician is trying to install an OS to a remote PC without the use of physical media. Which of the following is used to perform this task?

- A. FTP
- B. Initiate a network share
- C. Telnet
- D. PXE boot environment

Correct Answer: D

Section: (none)

Explanation

QUESTION 42

Which of the following has the LEAST amount of storage capacity?

- A. FDD
"First Test, First Pass" - www.lead2pass.com 103
CompTIA A+ 220-701 Exam
- B. Tape drive
- C. Blue-Ray

driver updates.

The NEXT action would be to:

- A. flash the firmware on the printer to match the new driver
- B. check the printer properties on the server
- C. power cycle the printer to update the driver
- D. have each user remove and re-install the printer to update the driver

Correct Answer: B

Section: (none)

Explanation

QUESTION 2

Which of the following adapter types would provide the BEST performance for high end graphics?

- A. PCI
- B. AGP
- C. EISA
- D. IEEE 1394

Correct Answer: B

Section: (none)

Explanation

QUESTION 3

A technician has determined that there is constant interference from other wireless devices over the wireless network. Which of the following should the technician do FIRST to resolve the problem?

- A. Change the admin password on the wireless router.
- B. Change the encryption type on the wireless router.
- C. Change the channel being used by the wireless router.
- D. Change the SSID on the wireless router.

Correct Answer: C

Section: (none)

Explanation

QUESTION 4

Which of the following is the BEST way to ensure that a hard drive is secure for disposal?

- A. FDISK the drive multiple times.
- B. Magnetically erase the drive.
- C. Format the drive.

D. Convert the drive to NTFS.

Correct Answer: B

Section: (none)

Explanation

QUESTION 5

Which of the following is an example of DDR2 RAM?

A. PC100

B. PC2700

C. PC6400

D. PC10666

"First Test, First Pass" - www.lead2pass.com 117
CompTIA A+ 220-701 Exam

Correct Answer: C

Section: (none)

Explanation

QUESTION 6

Which of the following troubleshooting steps is NEXT after determining the cause?

A. Establish a plan of action to resolve the problem and implement the solution.

B. Document findings, actions, and outcomes.

C. Verify full system functionality and if applicable implement preventative measures.

D. Question the user and identify user changes.

Correct Answer: A

Section: (none)

Explanation

QUESTION 7

PC2700 memory runs at which of the following clock speeds?

A. 270MHz

B. 333MHz

C. 400MHz

D. 566MHz

Correct Answer: B

Section: (none)

Explanation

QUESTION 8

A user reports that their computer seems to be running slow and frequently reboots on its own. Which of the following is the FIRST thing the technician should check to address this issue?

A. Check for newly installed software on the system

B. Check to determine if the graphics card is faulty

C. Reinstall antivirus software and run a scan

D. Check for newly added peripherals to the system

Correct Answer: A

Section: (none)

Explanation

QUESTION 9

Setting an administrator password in the BIOS will accomplish which of the following?

- A. Prevent a user from reading email
- B. Prevent a virus from infecting the BIOS
- C. Prevent a user from rearranging boot devices
- D. Prevent an outside intruder from attacking the system

Correct Answer: C

Section: (none)

Explanation

QUESTION 10

Which of the following technologies BEST refers to simultaneous data transfer in both directions?

"First Test, First Pass" - www.lead2pass.com 118
CompTIA A+ 220-701 Exam

- A. Half-duplex
- B. Ethernet routing
- C. Full-duplex
- D. Ethernet switching

Correct Answer: C

Section: (none)

Explanation

QUESTION 11

A technician has a customer with a Windows 7 Home Basic machine who wants to play movies through the Media Center program. Which of the following should the technician do to allow this to happen?

- A. Upgrade the Media Player program to the Media Center program.
- B. Enable the Media Center program.
- C. Upgrade the system to Windows 7 Business.
- D. Upgrade the system to Windows 7 Home Premium Edition.

Correct Answer: D

Section: (none)

Explanation

QUESTION 12

A laptop docking station will enable a user to do which of the following?

- A. Simultaneously connect to multiple network subnets
- B. Provide an additional layer of security for the laptop

- C. Connect and use multiple peripherals from one device
- D. Add additional RAM to a laptop that might not have available slots

Correct Answer: C

Section: (none)

Explanation

QUESTION 13

Which operating systems use the c:\WINNT\ directory?

- A. Windows 7
- B. Windows Vista Home
- C. Windows Vista Ultimate
- D. Windows 2000

Correct Answer: D

Section: (none)

Explanation

QUESTION 15

Fingerprint readers are an example of which of the following security technologies?

- A. Biometric
- B. Password
- C. Smart card
- D. Username authentication

Correct Answer: A

Section: (none)
Explanation

QUESTION 16

A new printer driver has just been installed on a desktop computer. Which of the following is the correct location to find the Print Test Page button?

- A. In Computer Management under Administrative Tools
- B. The General tab of the properties page of the printer
- C. In the Print Spooler service
- D. The Hardware tab of the Systems properties page

Correct Answer: B
Section: (none)
Explanation

QUESTION 17

Which of the following cable types is required to be fire-resistant and does not emit toxic fumes when exposed to high temperatures?

- A. STP
- B. Coaxial
- C. UTP
- D. Plenum

Correct Answer: D
Section: (none)
Explanation

QUESTION 18

Which of the following is a reason for maintaining a system with a floppy drive?

- A. To enable Bit Locker
- B. To recover archived data
- C. To store large amounts of data
- D. To increase data read speed

Correct Answer: B
Section: (none)
Explanation

QUESTION 19

Which of the following is the MAXIMUM data rate of IEEE 1394?

- A. 20Mbps
 - B. 200Mbps
 - C. 1000Mbps
 - D. 2000Mbps

Explanation

QUESTION 20

Which of the following will enable a technician to easily identify a connection for each device?

- A. Installing SATA drives
- B. Using LCD monitors
- C. Using optical mice
- D. Cable management

Correct Answer: D
Section: (none)
Explanation

QUESTION 21

Which of the following cable types use shielding to protect against EMI and RFI? (Select TWO).

- A. Fiber
- B. Crossover
- C. Coaxial
- D. UTP E. STP

Correct Answer: C
Section: (none)
Explanation

QUESTION 22

Which of the following is an example of EMI?

- A. Degraded LAN performance due to too many Bluetooth devices being used in close proximity
- B. Degraded LAN performance due to CAT5 cable being wound too tightly
- C. Degraded LAN performance due to a cellular phone being used in close proximity
- D. Degraded LAN performance due to CAT5 and AC power cables in close proximity

Correct Answer: D
Section: (none)
Explanation

QUESTION 23

Which of the following explains what the wattage rating of a power supply determines?

- A. Number of power connectors available
- B. Number of potential internal drives
- C. Storage capacity of optical disks
- D. Speed of the processor chip

Correct Answer: B
Section: (none)
Explanation

QUESTION 24

"First Test, First Pass" - www.lead2pass.com 121
CompTIA A+ 220-701 Exam

A technician finds the inside of a desktop computer completely covered in almost 1 inch (2.54 centimeters) of dust. Which of the following would be the BEST solution to clean out the inside of the case?

- A. Wet rag
- B. Compressed air
- C. Lint free cloth
- D. Dry rag

Correct Answer: B

Section: (none)

Explanation

QUESTION 25

802.11g has a MAXIMUM speed of up to:

- A. 2.4Mbps
- B. 11Mbps
- C. 54Mbps
- D. 100Mbps

Correct Answer: C

Section: (none)

Explanation

QUESTION 26

Which of the following ports would Windows Firewall need to make an exception for in order to allow FTP access?

- A. 21
- B. 80
- C. 443
- D. 3389

Correct Answer: A

Section: (none)

Explanation

QUESTION 27

Which of the following is the purpose of a monitor's degauss feature?

- A. Automatically adjusts the display settings for optimal performance
- B. Increases the monitor brightness to reduce glare
- C. Removes stray magnetic fields
- D. Resets the monitor to factory default settings

Correct Answer: C

Section: (none)

Explanation

QUESTION 28

Which of the following properties of a heat sink has the GREATEST affect on heat dispersion?

- A. Proximity to the power supply
- B. Surface area
- C. Connection mechanism
- D. Shape

QUESTION 34

Which of the following is the MAXIMUM number of primary partitions that can exist on a physical hard drive?

- A. One
- B. Two
- C. Three
- D. Four

Correct Answer: D

Section: (none)

Explanation

QUESTION 35

A user is unable to login to their laptop when away from the office. Which of the following is the MOST likely reason?

- A. Login attempts within the office extend the login account password expiration period.

- B. The users domain login credentials need to be cached.
- C. Microsoft Windows cannot authenticate the users login when not connected to the network.
- D. The users account was created on the network after the initial user logged in.

Correct Answer: B

Section: (none)

Explanation

QUESTION 36

Which type of connector is required for a coaxial network cable?

- A. RJ-11
- B. Token ring
- C. BNC
- D. RJ-45

Correct Answer: C

Section: (none)

Explanation

QUESTION 37

While checking the print queue, a technician determines that a print job at the top of the queue requires a paper size not loaded in the printer. Which of the following is the BEST option to get the other print jobs to print until the issue can be resolved?

- A. Force the job to print on the paper that is loaded in the printer.
"First Test, First Pass" - www.lead2pass.com 124
CompTIA A+ 220-701 Exam
- B. Lower the priority of the jammed print job.
- C. Delete all print jobs and have all the users resubmit the print jobs.
- D. Increase the priority of all other jobs in the print queue.

Correct Answer: B

Section: (none)

Explanation

QUESTION 38

Which of the following options is the BEST way to fix a CRT monitor that has suffered from magnetic interference?

- A. Replace the power cord.
- B. Turn it off, wait several minutes, and restart.
- C. Plug it into a different outlet.
- D. Perform a degauss.

Correct Answer: D

Section: (none)

Explanation

QUESTION 39

A technician needs to upgrade several Windows XP Professional 64-bit computers to Windows 7 Professional

64-bit. The technician wants to retain the user settings. Which of the following tasks should the technician perform?

- A. Upgrade the 64-bit Windows XP Professional to 64-bit Windows VISTA Professional, and then upgrade the 64-bit Windows VISTA Professional to 64-bit Windows 7 Professional.
- B. Do a clean install of 32-bit Windows VISTA Professional, and then an upgrade to 64-bit Windows 7 Professional.
- C. Do a clean installation of 64-bit Windows 7 Professional.
- D. Upgrade from 64-bit Windows XP Professional to 64-bit Windows 7.

Correct Answer: A
