CompTIA 220-802 CompTIA A+ Certification

- ☀ Any questions/info you can recall are on the VCEs. So the preparation of exam is very easy.
- ☀ This VCE covers all syllabus. After preparing it anyone pass the exam in high grades.
- ☀ Pretty much all the questions we study that no answer in doubt.

Sections

1. Operating Systems
2. Security
3. Mobile Devices
4. Troubleshooting

<http://www.gratisexam.com/>

5. Mix Questions

Exam A

QUESTION 1

The shared folder named C\$ is an example of which of the following?

- A. Local share
- B. Permission propagation
- C. Inheritance
- D. Administrative share

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.intelliadmin.com/index.php/2007/10/the-admin-share-explained/>

QUESTION 2

Which of the following can be used as an appropriate boot device?

Real 28

CompTIA 220-802 Exam

- A. USB drive
- B. HDMI
- C. OEM recovery media
- D. FDISK

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/tipstricks/ht/bootusbflash.htm>

QUESTION 3

Which of the following is the BEST tool to verify the cable is plugged into the correct port on the patch panel?

- A. Cable certifier

- B. Punch down
- C. Toner probe
- D. Cable tester

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Logic_probe

QUESTION 4

Which of the following is the BEST tool for a technician to use to make sure the network wires are securely fastened in a wall jack?

- A. Crimper
- B. Small flat screwdriver
- C. Wire strippers
- D. Punch down

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computercablestore.com/punch-down.aspx>

QUESTION 5

Real 29

CompTIA 220-802 Exam

Which of the following is the BEST tool for a technician to use to make sure the network cable is securely fastened in the RJ-45 connector?

<http://www.gratisexam.com/>

- A. Cable tester
- B. Crimper
- C. Small flat screwdriver
- D. Punch down

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/jargon/c/crimp.htm>

QUESTION 6

Which of the following resources is MOST important for accessing remote virtual environments on a client machine?

- A. Network speed
- B. CPU speed
- C. High speed memory
- D. Drive space

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://compnetworking.about.com/od/internetaccessbestuses/f/what-is-network-remote-access.htm>

QUESTION 7

A user sent an email requesting that a technician check if a computer is on and connected to the Internet so the user can login from home. Which of the following commands in the command prompt would a technician use to verify if the computer is on and connected without having to go to the computer?

- A. NSLOOKUP
- B. NETSTAT
- C. PING
- D. IPCONFIG

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/commandlinereference/p/ping-command.htm>

QUESTION 8

If a computer does not have an optical drive, which of the following is the MOST efficient method to install an operating system?

- A. Emergency Restore CD
- B. Floppy disk
- C. USB flash drive
- D. Bluetooth connection

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/USB_flash_drive

QUESTION 9

Which of the following is the MAXIMUM number of primary partitions that can be created on a hard drive with FAT32?

- A. 2
- B. 4
- C. 6
- D. 8

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://support.microsoft.com/kb/314463>

QUESTION 10

A technician needs to decrease the time it takes to install an operating system on 100 computers. Which of the following installations would the technician use to reduce hands-on time spent on each computer?

- A. Upgrade installation
 - B. USB installation
 - C. Unattended installation
 - D. Clean installation
- Real 31
CompTIA 220-802 Exam

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: [http://en.wikipedia.org/wiki/Installation_\(computer_programs\)#Silent_installation](http://en.wikipedia.org/wiki/Installation_(computer_programs)#Silent_installation)

QUESTION 11

Which of the following should be regularly scheduled to fix hard drive errors?

- A. Defragmentation
- B. Check Disk
- C. System Restore
- D. Antivirus Scan

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://support.microsoft.com/kb/315265>

QUESTION 12

A technician is trying to request a new IP address to a customer's computer through the command prompt. Which of the following commands should the technician use?

- A. ipconfig /flushdns
- B. ipconfig /renew
- C. ipconfig /all
- D. ipconfig /release

Correct Answer: B
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://www.wikihow.com/Refresh-Your-IP-Address-on-a-Windows-Computer>

QUESTION 13

A customer is not able to connect to any websites. Which of the following commands should a technician run FIRST to identify the issue?

<http://www.gratisexam.com/>

- A. NETSTAT
- B. NET SHOW
Real 32
CompTIA 220-802 Exam
- C. IPCONFIG
- D. TRACERT

Correct Answer: C
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://www.microsoft.com/resources/documentation/windows/xp/all/proddocs/en-us/ipconfig.msp?mfr=true>

QUESTION 14

A technician wants to know the MAC address of a computer. Which of the following commands would the technician use?

- A. IPCONFIG
- B. NSLOOKUP
- C. NETSTAT
- D. PING

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://compnetworking.about.com/od/networkprotocolsip/a/macaddressing.htm>

QUESTION 15

A technician would like to dispose of a hard drive that is no longer needed. According to company policy, all contents on the disk should be deleted before disposal. Which of the following OS command line tools should be used?

- A. CHKDSK
- B. DEL
- C. SCANDSK
- D. FORMAT

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/formathl.htm>

QUESTION 16

Real 33

CompTIA 220-802 Exam

A computer starts to boot then quickly shuts down. Which of the following should the technician use to troubleshoot this issue?

- A. Toner probe
- B. Power supply tester
- C. Loopback plugs
- D. Events logs

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/toolsofthetrade/f/powersupplytest.htm>

QUESTION 17

A PC is running slower than usual. Which of the following tools would BEST diagnose the possible bottleneck?

- A. CHKDSK
- B. Device Manager
- C. Task Scheduler
- D. Task Manager

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.ictc.com/my-computer-is-running-slow-what-can-i-do/>

QUESTION 18

Which of the following switches should a technician use with the PING command to resolve an IP address to a hostname?

- A. -a
- B. -f
- C. -n
- D. -t

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://rocksoft.com.my/knowledgebase.php?action=displayarticle&id=224>

QUESTION 19

Which of the following commands is used to map a network drive?

- A. NBTSTAT
- B. NET USE
- C. NETMAP

D. NETSTAT

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference:

http://www.onlinetoolworks.com/help/SB32AdmnNetwork_Drive_Mappings_and_NET_U.htm

QUESTION 20

Which of the following BEST describes a method for installing an operating system across the network?

- A. USB 3.0
- B. IEEE 1394
- C. PXE
- D. NTFS

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/magazine/2008.07.desktopfiles.aspx>

QUESTION 21

Which of the following would be the BEST format for optical media?

- A. FAT32
- B. EXT3
- C. CDFS
- D. NTFS

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/jargon/c/cdfs.htm>

QUESTION 22

In which of the following operating systems does Windows XP mode come as a free download to be used for application compatibility?

- A. Windows 7 Starter
- B. Windows 7 Professional
- C. Windows Vista Business
- D. Windows 7 Home Premium

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/products/features/windows-xp-mode>

QUESTION 23

The Aero feature is found in which of the following operating systems? (Select TWO).

- A. Windows 7 Home Premium
- B. Windows 7 Starter
- C. Windows Vista Enterprise
- D. Windows XP Media Center
- E. Windows XP 64-bit Professional

Correct Answer: AC

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/products/features/aero>

QUESTION 24

An audio visual company has decided that they want to migrate from Windows XP Professional SP2. The company has a domain network. A technician is tasked with selecting an operating system. Which of the following should the technician select?

- A. Windows 7 Home Premium
Real 36

CompTIA 220-802 Exam

- B. Windows Vista Home Premium
- C. Windows 7 Professional
- D. Windows XP Media Center

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: http://reviews.cnet.com/8301-31012_7-10379487-10355804.html

QUESTION 25

A bank is upgrading some clerical users' PCs. Which of the following would be the MOST appropriate method for erasing the data on the old PCs?

- A. Drive degauss
- B. Standard format
- C. Change the jumpers on the hard drive
- D. Quick format

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://en.wikipedia.org/wiki/Degaussing>

QUESTION 26

Which of the following commands may need to be run after a virus removal if the computer will not boot?

- A. SCANDSK
- B. DXDIAG
- C. FIXMBR
- D. MSCONFIG

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/termsf/p/fixmbr.htm>

QUESTION 27

A technician would like to map a network drive. Which of the following indicates the correct path

Real 37

CompTIA 220-802 Exam

for mapping a network drive?

- A. \\share\servername
- B. \\username\servername
- C. \\password\share
- D. \\servername\share

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://compnetworking.about.com/od/windowsxpnetworking/ht/mapnetworkdrive.htm>

QUESTION 28

Which of the following is the MINIMUM account required to install most programs on Windows XP?stand

- A. Power user
- B. Administrator
- C. Standard user
- D. Guest

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: https://www.microsoft.com/resources/documentation/windows/xp/all/proddocs/en-us/windows_security_default_settings.mspx?mfr=true

QUESTION 29

When configuring user accounts, which of the following should a technician perform?

- A. Make all users local administrators
- B. Assign the minimum required access to the users
- C. Make all users standard users
- D. Assign the maximum required access to the users

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: http://www.pcworld.com/article/171933/manage_users_in_windows_7.html

QUESTION 30

A technician needs to rebuild a computer that had a virus. Which of the following data destruction methods should be used to ensure the virus has been successfully erased before reinstalling the operating system, programs, and all user data?

- A. Standard format
- B. Low level format
- C. Shredder
- D. Degaussing tool

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: http://pcsupport.about.com/od/windows7/ss/format-hard-drive-windows-7-tutorial_7.htm

QUESTION 31

A user states when they press certain letters on their laptop's keyboard, a number is displayed on the screen. Which of the following can the technician perform to resolve this issue?

<http://www.gratisexam.com/>

- A. Change the character mapping
- B. Turn off number lock
- C. Replace the keyboard
- D. Update the keyboard drivers

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/issues/ch000792.htm>

QUESTION 32

A user has too many applications starting when they log into windows. From the command line, which of the following tools is the FASTEST option to prevent these applications from running on startup?

- A. MSCONFIG
- B. SERVICES.MSC
- C. REGEDIT
- D. MSINFO32

Real 39

CompTIA 220-802 Exam

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://lifel hacker.com/5718799/know-which-apps-to-remove-from-msconfig-with-this-startup-applications-list>

QUESTION 33

From which of the following tools can a technician locate the PID of an application?

- A. Local Security Policy
- B. MSCONFIG
- C. Computer Management
- D. Task Manager

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: http://www.ehow.com/about_5255845_pid-task-manager.html

QUESTION 34

Which of the following file system types is used for optical media?

- A. FAT32
- B. FAT
- C. CDFS
- D. NTFS

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/jargon/c/cdfs.htm>

QUESTION 35

Which of the following supports IP telephony devices without requiring external power?

- A. VPN
 - B. PoE
 - C. QoS
 - D. WEP
- Real 40
CompTIA 220-802 Exam

Correct Answer: B
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://www.metrolinedirect.com/what-is-power-over-ethernet.html>

QUESTION 36

A customer is concerned about a computer that repeatedly beeps when attempting to power on. Which of the following is MOST likely the cause?

- A. Network cable is unplugged
- B. USB 2.0 is plugged into USB 1.1 port
- C. RAM not seated properly
- D. Optical media was left in the drive

Correct Answer: C
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://antony492.com/unseated-ram/>

QUESTION 37

A customer wants to use VoIP phones without having to plug them into an electrical outlet. Which of the following switch features would a technician recommend?

- A. QoS
- B. Gigabit
- C. PoE
- D. Wake-on-LAN

Correct Answer: C
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://www.metrolinedirect.com/what-is-power-over-ethernet.html>

QUESTION 38

A customer reports that after a technician cleaned up a rogue antivirus program, the customer cannot browse the web. Which of the following should the technician check to resolve the situation?

Real 41

CompTIA 220-802 Exam

- A. Browsing history
- B. Firewall settings
- C. User privileges
- D. Proxy settings

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows-vista/change-proxy-settings-in-internet-explorer>

QUESTION 39

A technician has 50 identical computers that need to be upgraded to the Windows 7 OS, and are capable of booting from the network. They are running a Gigabit network with a Windows deployment server. Which of the following will be the BEST to use in this scenario?

<http://www.gratisexam.com/>

- A. UEFI
- B. Windows 7 DVD
- C. PXE
- D. USB flash

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.howtogeek.com/57601/what-is-network-booting-pxe-and-how-can-you-use-it/>

QUESTION 40

A technician receives an error every time a workstation boots up. The technician needs to find out what process is responsible for the error. Which of the following utilities would be used FIRST?

- A. System Control Panel
- B. Task Manager
- C. Event Viewer
- D. MSCONFIG

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://support.microsoft.com/kb/308427>

QUESTION 41

A technician is working on a workstation that is receiving read/write failures when trying to access a particular file. Which of the following commands should the technician use to resolve this issue?

- A. DISKPART
- B. FORMAT
- C. CHKDSK
- D. FDISK

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

http://www.pegasus-afs.com/support/webhelp/common_errors_and_problems/the_benefits_of_using_chkdsk.htm

QUESTION 42

A technician is tasked with changing the account lockout threshold to 30 minutes in Windows 7. Which of the following should the technician use to accomplish this task?

- A. User Access Control
- B. Windows Security Center
- C. Local Security Policy
- D. Users and Groups

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: [http://technet.microsoft.com/en-us/library/cc757692\(v=ws.10\).aspx](http://technet.microsoft.com/en-us/library/cc757692(v=ws.10).aspx)

QUESTION 43

A technician is creating an image that will be used to deploy Windows 7 to 100 PCs. Which of the following tools should be used to accomplish this?

- A. SYSPREP
- B. Windows 7 Advisor
- C. CHKDSK
- D. DISKPART

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://support.microsoft.com/kb/302577>

QUESTION 44

A technician needs to create a new folder from the command line on the root of the C. drive. Which of the following is the correct command to use?

- A. CD
- B. MD
- C. PUSHD
- D. RD

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/mdhlp.htm>

QUESTION 45

Which of the following options is MOST likely active on a network of three workstations, running Windows 7 Home Edition x64, to enable File and Print sharing?

- A. HomeGroup
- B. Active Directory
- C. WorkGroup
- D. Domain Setup

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/help/home-sweet-homegroup-networking-the-easy-way>

QUESTION 46

A technician is reconfiguring an email account for off-line mode. Which of the following will describe the expected time of account synchronization with the email server?

- A. It will depend on the SMTP settings of the email server.
- B. It will depend on the time when the account was last synchronized.
- C. It will depend on the POP settings of the email server.
- D. There is no off-line mode for email.

Real 44

CompTIA 220-802 Exam

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Explanation:

When you configure email account for offline mode, the software uses synchronization at a point in time to download all email messages to the computer. There is time between synchronizations and it depends on the time of the last synchronization.

QUESTION 47

An entry level network analyst calls and is not sure which Windows OS features to use to check for users who are currently logged on. Which of the following features would BEST assist this analyst?

- A. Task Manager
- B. MSCONFIG
- C. Disk Management
- D. Administrative Tools

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://support.microsoft.com/kb/323527>

QUESTION 48

Which of the following Control Panel utilities would be BEST to use to remove a Windows 7 application?

- A. Folder Options
- B. Add/Remove Programs
- C. Programs and Features
- D. Administrator Tools

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows/uninstall-change-program>

QUESTION 49

Which of the following components would a user MOST need when building a virtual server?

Real 45

CompTIA 220-802 Exam

(Select TWO).

- A. Networking speed

- B. High-end sound card
- C. RAM
- D. High-end video card
- E. HDMI
- F. CPU

Correct Answer: CF

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://searchservvirtualization.techtarget.com/tip/Sizing-server-hardware-for-virtual-machines>

QUESTION 50

Which of the following commands would a technician use to map a network share?

- A. NET
- B. NSLOOKUP
- C. IPCONFIG
- D. COPY

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/nethlp.htm>

QUESTION 51

A technician needs to use Remote Desktop Connection in order to get access to a remote Windows workstation. However, the Programs menu has been hidden and they only have access to the Run command utility or a command-line prompt. Which of the following is the utility that the technician should use to access Remote Desktop Connection?

- A. MSINFO32
- B. SERVICES.MSC
- C. MSCONFIG
- D. MSTSC

Correct Answer: D
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://support.microsoft.com/kb/300887>

QUESTION 52

A user on a domain network cannot install software that they need. Which of the following user groups is this user MOST likely associated with?

- A. Standard user
- B. Guest user
- C. Power user
- D. Administrator

Correct Answer: A
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://www.sevenforums.com/software/135091-standard-user-able-install-software.html>

QUESTION 53

Which of the following paths would a technician use to map a network drive?

- A. //servername\usershare
- B. \\servername\usershare
- C. \servername\usershare
- D. //servername/usershare

Correct Answer: B
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://www.dummies.com/how-to/content/how-to-map-a-network-folder-in-windows-7.html>

QUESTION 54

A user is operating a virtual machine (VM) and discovers it has been infected with malware. Which of the following applies?

- A. The host computer will automatically delete the VM.
- B. The VM can be shut down with no harm to the host PC.
- C. The host computer will quarantine the VM automatically.
- D. The VM will crash and cause irreparable damage to the host PC.

Real 47

CompTIA 220-802 Exam

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

One of the benefits of virtual machine is that it can be shut down without harming the host PC. It uses virtual resources that are mapped to the hardware resources. When the virtual machines shuts down, it might corrupt virtual resource, not the physical ones.

QUESTION 55

Which of the following ports MUST be open in order for Remote Desktop to function?

- A. 53
- B. 80
- C. 3389
- D. 5900

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://helpdeskgeek.com/networking/configure-router-for-remote-desktop/>

QUESTION 56

Which of the following is an advantage of a virtual machine hosted on a PC?

<http://www.gratisexam.com/>

- A. Reduces the training required for employees.
- B. Reduces the amount of physical hardware required.
- C. Reduces the amount of CPU required on the host PC.
- D. Reduces the amount of RAM required on the host PC.

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://searchservvirtualization.techtarget.com/tip/Understanding-the-benefits-of-a-virtual-machine>

QUESTION 57

When scheduling a backup for preventative maintenance, which of the following would ensure all data was captured?

Real 48

CompTIA 220-802 Exam

- A. Differential
- B. Full
- C. Incremental
- D. Daily

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://superuser.com/questions/99530/windows-7-backup-disk-full>

QUESTION 58

Which of the following commands can be used in Windows XP to modify when the CHKDSK command runs?

- A. CONVERT
- B. IPCONFIG
- C. CHKNTFS
- D. SCANDSK

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://support.microsoft.com/kb/160963>

QUESTION 59

A user would like to run a copy of Windows XP for testing; however, the user is currently using a Windows 7 PC. Which of the following technologies should a technician recommend in order for the user to have access to both systems simultaneously?

- A. Purchase a second PC
- B. KVM switch
- C. Dual boot
- D. Virtualization

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://en.wikipedia.org/wiki/Virtualization>

QUESTION 60

Windows Virtual PC is designed to:

- A. Allow a user to run older programs in a Windows XP environment.
- B. Allow a user to share a printer to any user on the Internet.
- C. Give the user the ability to run multiple operating systems on a tablet.
- D. Give the user the ability to run 64-bit applications in virtual mode.

Correct Answer: A
Section: Operating Systems
Explanation

Explanation/Reference:
Explanation:

QUESTION 61

Which of the following allows a user to enable XP mode?

- A. Windows Vista Home Premium
- B. Windows 7 Professional
- C. Windows 7 Home Premium
- D. Windows Vista Ultimate

Correct Answer: B
Section: Operating Systems
Explanation

Explanation/Reference:
Reference: <http://windows.microsoft.com/en-us/windows7/install-and-use-windows-xp-mode-in-windows-7>

QUESTION 62

A PC has sensitive data that must be destroyed, before the PC is redeployed. A technician has been tasked with completely wiping the PC hard drive. Which of the following methods is BEST for the technician to use?

- A. Quick format
 - B. FDISK
 - C. Low level format
 - D. Standard format
- Real 50
CompTIA 220-802 Exam

Correct Answer: C
Section: Security
Explanation

Explanation/Reference:
Reference: <http://www.dedoimedo.com/computers/low-level-formatting.html>

QUESTION 63

An attack that creates a website that looks like another website, with the purpose of learning someone's account information is called which of the following?

- A. Virus
- B. Shoulder surfing
- C. Trojan
- D. Phishing

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.consumer.ftc.gov/articles/0003-phishing>

QUESTION 64

Which of the following helps to prevent virus infections from USB flash drives?

- A. Strong passwords
- B. Password protected screen savers
- C. Disabling the guest account
- D. Disabling the autorun feature

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

QUESTION 65

Which of the following security threats are MOST often delivered via email? (Select TWO).

- A. Rootkits
- B. Phishing
- C. Shoulder surfing

Real 51

CompTIA 220-802 Exam

- D. Social engineering
- E. Spam

Correct Answer: BE

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.securelist.com/en/threats/spam>

QUESTION 66

A user is advised by the software vendor that the user must have elevated privileges in order to run a program. The user should do which of the following to BEST accomplish this?

- A. Run in Windows XP compatibility mode
- B. Run the program in a virtual PC environment
- C. Log out of the system and login under another user's name
- D. Right click select "run as" and select administrator

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://msdn.microsoft.com/en-us/library/dd298823.aspx>

QUESTION 67

A company wants to prevent non-authorized users from entering into a secure building. Which of the following will BEST mitigate this activity?

- A. Train users on tailgating
- B. Implement an escort policy
- C. Install mantraps
- D. Require all users to have badges

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://whatis.techtarget.com/definition/mantrap-interlocking-door-controller>

QUESTION 68

An employee at a company lost their mobile device that contains proprietary information.

Real 52

CompTIA 220-802 Exam

Which of the following methods is the BEST to be implemented to prevent unauthorized users from obtaining this information?

- A. Lock screen pattern
- B. Cancel mobile service
- C. Remote wipe
- D. Six character password

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.mobiledvicemanager.com/mobile-device-security/remote-wipe/>

QUESTION 69

Which of the following would be the QUICKEST means of removing data from a hard drive, when there is no consideration regarding the total destruction of the data?

- A. Standard format
- B. Low level format
- C. Overwrite program
- D. Drive wipe

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/windows7/ht/format-hard-drive-windows-7.htm>

QUESTION 70

Which of the following is MOST effective in preventing security breaches on a network? (Select THREE).

- A. Bandwidth throttling
- B. Eliminate password history
- C. Enable QoS
- D. Antivirus software
- E. User education
- F. Enforced login/logoff hours

Correct Answer: DEF

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.esecurityplanet.com/network-security/how-to-prevent-security-breaches-from-known-vulnerabilities.html>

QUESTION 71

Which of the following areas of a file system should a standard user have restricted permissions to in order to promote a security best practice? (Select TWO).

- A. Temporary Internet Files
- B. My Document Files
- C. Windows System Files
- D. Network Files
- E. Program Files

Correct Answer: CE

Section: Security

Explanation

Explanation/Reference:

Windows program files are important for Windows operating system. If these files are deleted, Windows will corrupt. Similarly program files are related to applications and programs installed on a computer. These are highly sensitive files because they are related to the functioning of the operating system and the applications installed on it.

QUESTION 72

A technician wants to ensure that only authorized administrators can make configuration changes to the company's wireless router. Which of the following **MUST** the technician change to prevent unauthorized users from modifying the access point configuration?

- A. MAC address filters
- B. Manufacturer password

- C. Default SSID
- D. Configure encryption

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/windows7/f/default-password-windows-7.htm>

QUESTION 73

Which of the following utilities would a technician use on a Windows Vista or Windows 7 machine to configure what applications are allowed to send/receive data over the LAN connection?

Real 54
CompTIA 220-802 Exam

- A. Users and Groups
- B. Windows Firewall
- C. Registry Editor
- D. Task Scheduler

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/products/features/windows-firewall>

QUESTION 74

A customer needs to setup their laptop for use with a proxy server to browse the web at work. Which of the following areas would a technician need to visit to configure this on a Windows 7 system?

- A. System Protection
- B. Security Center
- C. Windows Firewall
- D. Internet Options

Correct Answer: D

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://windows.microsoft.com/is-is/windows-vista/using-windows-security-center>

QUESTION 75

Which of the following security threats is defined by its self propagating characteristic?

- A. Virus
- B. Rootkit
- C. Trojan
- D. Worm

Correct Answer: D

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://www.pcworld.com/article/111965/article.html>

QUESTION 76

Real 55

CompTIA 220-802 Exam

Which of the following should a technician implement to prevent external contractors from physically plugging devices into the company's network jacks unless such jacks are designated for guest use?

- A. Disable DHCP and assign a static IP address to each network device physically connected to the network.
- B. Enable MAC address filtering across all network jacks and record the MAC address of guest devices.
- C. Disable all switch ports when they are not utilized and enable them on an as needed basis.
- D. Place guest network jacks in public areas and all other jacks in secure areas as needed.

Correct Answer: C

Section: Security**Explanation****Explanation/Reference:**

Explanation:

The best way is to disable all switch ports when they are not utilized. Switch them on when you need them. This way, you can prevent external contractors from physically plugging devices in to company's network jacks.

QUESTION 77

Which of the following should a technician implement to prevent external contractors from physically plugging devices into the company's network jacks unless such jacks are designated for guest use?

- A. Disable DHCP and assign a static IP address to each network device physically connected to the network.
- B. Enable MAC address filtering across all network jacks and record the MAC address of guest devices.
- C. Disable all switch ports when they are not utilized and enable them on an as needed basis.
- D. Place guest network jacks in public areas and all other jacks in secure areas as needed.

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Explanation:

QUESTION 78

A small business owner is setting up their wireless network in their office, which is in a building shared with several other businesses. The owner does not want to disable the SSID broadcasting due to visiting customers needing to use the network, but does not want other businesses to notice the network, let alone access it. Which of the following would BEST accomplish this?

Real 56

CompTIA 220-802 Exam

- A. Configure the access point encryption from unsecured access to WEP.
- B. Adjust the radio power so that coverage is restricted to the business.
- C. Change the SSID to reflect the business name instead of a public access point.
- D. Enable MAC filtering and restrict access to other company's devices.

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Explanation:

Best way to do this is to adjust radio power to restrict the coverage to the business. When the radio power is restricted to an office. The persons in the other office space cannot detect the signals at all.

QUESTION 79

An administrator is concerned about users accessing network shares outside of their job role.

Which of the following would BEST prevent this?

- A. Set up shares with permissions based upon group membership.
- B. Implement a written policy addressing the issue for all users.
- C. Monitor access to the network shares using SNMP.
- D. Prevent remote logins to all network shares and drives.

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/library/cc768050.aspx>

QUESTION 80

A company is looking to donate a collection of old PCs that are no longer needed. Which of the following data destruction methods would be MOST secure for highly sensitive information?

- A. Simple 1-pass zero overwrite
- B. Low level 3-pass random wipe
- C. Low level 7-pass random wipe
- D. High level format 10 times

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://superuser.com/questions/215852/is-using-multiple-passes-for-wiping-a-disk-really-necessary>

QUESTION 81

A user receives an unsolicited call from a technician claiming to be from a Microsoft certified partner. The technician tricks the user into allowing them access to their PC because of malware alerts that were being broadcasted. Which of the following attacks is this user a victim of?

- A. Shoulder surfing
- B. Phishing attack
- C. Social engineering

D. Malware infection

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.social-engineer.org/>

QUESTION 82

Which of the following identifies traffic based upon its physical network address?

- A. Phishing
- B. Hashing
- C. MAC filtering
- D. Geotracking

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://compnetworking.about.com/cs/wirelessproducts/qt/macaddress.htm>

QUESTION 83

A technician must secure company documents from accidental disclosure. Which of the following should be implemented? (Select TWO).

<http://www.gratisexam.com/>

- A. User training
- B. Anti-malware
- C. Paper shredding
- D. Time of day restrictions

- E. Employee badges
Real 58
CompTIA 220-802 Exam
- F. Mantraps

Correct Answer: AC

Section: Security

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Paper_shredder

QUESTION 84

Which of the following is TRUE about the difference between a worm and a virus?

- A. Worms are written in assembly while viruses are written with scripting languages.
- B. Viruses hide in the boot record while worms hide within the file system.
- C. Worms self propagate while viruses need human intervention to replicate.
- D. Viruses disable the antivirus update service while worms kill the antivirus process.

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.webopedia.com/DidYouKnow/Internet/2004/virus.asp>

QUESTION 85

A technician is tasked with improving the security of a SOHO network. The office is comprised of a single wireless router located under the front desk where the office manager sits. All desktop computers are wired into the router which is configured with strong device credentials. Additionally, wireless is disabled on the router. Which of the following should the technician perform NEXT to improve the security of the SOHO network?

- A. Disable the router's remote management feature.
- B. Enable WPA2 wireless encryption.
- C. Change the router's default admin name and password.
- D. Place the router in a locked room.

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://network.cmu.ac.th/wp-content/uploads/2011/05/CCNA-Security-Ch2-Securing-Network-Devices.pdf>

QUESTION 86

Real 59

CompTIA 220-802 Exam

After several passes with a malware removal program, the program keeps detecting the same malware infection after a reboot. Which of the following should be done to attempt to remove the offending malware?

- A. Run the malware removal program while disconnected from the Internet
- B. Run the malware removal program in Windows Safe Mode
- C. Reinstall the malware removal program from a trusted source
- D. Set the malware removal program to run each time the computer is rebooted

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference:

http://www.pcworld.com/article/243818/how_to_remove_malware_from_your_windows_pc.html

QUESTION 87

A technician is trying to prevent a local application from reaching the web due to security concerns. Which of the following solutions could BEST prevent the application from reaching the web? (Select TWO).

- A. Configure the workstation for a static IP
- B. Disable all wireless network connections
- C. Remove shortcuts to the application
- D. Block the application in Windows Firewall
- E. Change network location to Work
- F. Reroute the web address in HOSTS file

Correct Answer: DF

Section: Security

Explanation

Explanation/Reference:

Explanation:

Use Windows firewall to restrict an application from reaching the web. Alternatively you can also reroute the web address in the HOST file.

QUESTION 88

For the last year, a company has gathered statistics on the most common security incidents.

The highest percentage deals with opening email attachments that contain malware. Which of the following would mitigate this issue without reducing productivity?

Real 60

CompTIA 220-802 Exam

- A. Annual cyber security education
- B. Update antivirus signatures more often
- C. Block all email attachments
- D. Install an IPS on each workstation

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: http://www.aps.anl.gov/Safety_and_Training/Training/Courses/esh223/start.html

QUESTION 89

A company wants to ensure that the latest cyber security threats are known to the employees across the enterprise to minimize occurrences. Which of the following should be implemented?

- A. Message of the Day
- B. Email lists
- C. Company forums
- D. Regular user education

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Explanation:

Educating user is the best way to combat security threats. After all security threats occur when a human carries it across unknowingly.

QUESTION 90

A technician is implementing a SOHO wireless network for Company A that shares a floor with Company B. Which of the following would BEST secure the wireless network so that only Company A employees are allowed access?

- A. Turning down the radio power level
- B. Enabling MAC filtering
- C. Setting a high encryption level
- D. Disabling the SSID broadcast

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://compnetworking.about.com/cs/wirelessproducts/qt/macaddress.htm>

QUESTION 91

A technician enabled remote management on the small office WAP to manage this device from another location. Users are reporting that the WAP has changed its SSID without anyone's knowledge. Which of the following would prevent this from occurring?

- A. Change to user MAC filtering
- B. Change default usernames and passwords
- C. Disable the SSID from broadcasting
- D. Enable static IP addresses

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://compnetworking.about.com/od/routers/ss/routerpassword.htm>

QUESTION 92

A technician has configured the ability to connect to a small office server using remote desktop from a workstation within the office. The technician has reviewed logs that show constant brute force attacks to that server from outside the network. Which of the following would prevent this from occurring?

- A. Configure the server to use a static IP
- B. Logically move the server to the DMZ

- C. Reallocate the server to a different networking closet
- D. Disable the remote desktop port

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: [http://technet.microsoft.com/en-us/library/cc759006\(v=ws.10\).aspx](http://technet.microsoft.com/en-us/library/cc759006(v=ws.10).aspx)

QUESTION 93

In order to prevent other users from editing files in 'C:\ Files', which of the following steps should be taken?

- A. Set NTFS permissions to read only
- B. Set the folder to index files for search
Real 62
CompTIA 220-802 Exam
- C. Set the local administrator as the owner of the folder
- D. Set network share permissions to read only

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/magazine/2005.11.howitworksntfs.aspx>

QUESTION 94

Which of the following security threats requires the attacker to be physically located near the target machine?

- A. Shoulder surfing
- B. Social engineering
- C. Phishing
- D. Rootkit

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.lifelock.com/education/id-theft-types/shoulder-surfing/>

QUESTION 95

An unauthorized user observing system security procedures is known as:

- A. A worm.
- B. Shoulder surfing.
- C. Phishing.
- D. Spyware.

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.lifelock.com/education/id-theft-types/shoulder-surfing/>

QUESTION 96

Privacy filters applied to users computer screens are used to combat which of the following security risks?

Real 63
CompTIA 220-802 Exam

- A. Rootkits
- B. Spear phishing
- C. Shoulder surfing
- D. Social Engineering

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://blog.securityactive.co.uk/tag/stop-shoulder-surfing/>

QUESTION 97

Which of the following is solely designed to avoid detection by an antivirus program by using the underlying operating system to its advantage?

- A. Rootkit
- B. Virus
- C. Trojan
- D. Worm

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.webopedia.com/TERM/R/rootkit.html>

QUESTION 98

Which of the following passwords is the MOST secure according to industry best practices?

- A. VeryStrongPassword
- B. SimpleAnswer1234
- C. E@sy2Remember
- D. thisisthecorrectanswer1

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference:

http://netforbeginners.about.com/od/antivirusantispyware/a/example_strong_passwords.htm

QUESTION 99

Real 64

CompTIA 220-802 Exam

Which of the following security best practices would prevent a program on a CD from immediately launching when inserted into a computer?

- A. MSCONFIG >Startup Tab
- B. Disable the Guest account
- C. Rename the Administrator account
- D. Disable autorun
- E. Restrict user permissions

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://lifehacker.com/5858703/disable-autorun-to-stop-50-of-windows-malware-threats>

QUESTION 100

Which of the following security threats involve shoulder surfing and phone phishing?

- A. Man-in-the-Middle
- B. Social engineering
- C. Trojan virus
- D. Spyware

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.webroot.com/us/en/home/resources/tips/online-shopping-banking/secure-what-is-social-engineering>

QUESTION 101

Which of the following security threats does NOT use software to extract sensitive information or credentials?

- A. Grayware
- B. Shoulder surfing
- C. Malware
- D. Man-in-the-Middle exploits

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://searchsecurity.techtarget.com/definition/shoulder-surfing>

QUESTION 102

Which of the following features helps to prevent shoulder surfing?

- A. Native resolution
- B. Auto adjust
- C. Degaussing
- D. Privacy screen

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.secure-it.com/shop/index.php/cPath/38>

QUESTION 103

Which of the following security controls would be an example of the least privilege principle on a home PC?

- A. Install antispyware on the PC.
- B. Create a standard user account for kids.
- C. Store all financial data in a separate folder.
- D. Disable the firewall for online gaming.

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Principle_of_least_privilege

QUESTION 104

A user regularly has to walk away from their computer and is worried someone may access their workstation. Which of the following would BEST prevent this?

- A. Lock the workstation
- B. Shutdown the computer
- C. Logon using the unprivileged guest account
- D. Set the screensaver password

Correct Answer: A

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://www.dummies.com/how-to/content/how-to-lock-your-pc.navId-323066.html>

QUESTION 105

For any given 802.11n wireless Internet signal, which of the following is needed to establish a connection?

- A. MAC address filtering
- B. Windows password
- C. Proper SSID
- D. SSL certificate

Correct Answer: C

Section: Security**Explanation****Explanation/Reference:**

QUESTION 106

A company is experiencing issues with third parties tailgating authorized users during entry to secure server rooms. Which of the following would BEST alleviate this problem?

- A. Retinal scanners
- B. Mantraps
- C. Door locks
- D. Smart card badges

Correct Answer: B

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://www.datacenterjournal.com/design/what-is-a-mantrap-and-do-you-need-one/>

QUESTION 107

Which of the following security concepts establishes the notion that a user should only be given sufficient access to the resources they need to perform their job function?

Real 67
CompTIA 220-802 Exam

- A. Deny all
- B. Allow all
- C. Most privilege
- D. Least privilege

Correct Answer: D
Section: Security
Explanation

Explanation/Reference:

Reference: <http://www.cs.cornell.edu/fbs/publications/leastPrivNeedham.pdf>

QUESTION 108

A user reports that every time they use a search engine and click on a link to go to a website, they instead are taken to a site blocked by their company's content filter. The user is not trying to go to the blocked site and needs to be able to successfully use the search engine to complete their assignment. Which of the following tools would a technician use to BEST resolve this issue?

- A. Anti-malware software
- B. Factory pre-installation
- C. System restore
- D. Recovery console

Correct Answer: A
Section: Security
Explanation

Explanation/Reference:

Reference: http://wiki.answers.com/Q/How_does_anti-malware_scanners_work

QUESTION 109

After being infected with a virus, a user's computer does not recognize the user as having local administrator rights to the computer. After troubleshooting the issue, a technician determines the computer needs to be rebuilt and data needs to be restored from the user's backup. Which of the following tools would BEST reset the computer to how it worked when first purchased?

- A. Recovery Console
- B. Factory restore CD
- C. Anti-malware software
- D. System Restore

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Recovery_disc

QUESTION 110

Which of the following is BEST used to prevent other people from viewing a user's computer screen?

- A. Anti-virus software
- B. Key fob
- C. Biometric device
- D. Privacy filter

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.privacyscreens.co.uk/howitworks.php>

QUESTION 111

A pest exterminator tries to gain access to a company's computer lab, but the receptionist does not see an extermination scheduled on the calendar and denies the exterminator access to the lab. Which of the following security threats almost occurred?

- A. War driving
- B. Social engineering
- C. Shoulder surfing
- D. Phishing

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.veracode.com/blog/2013/03/hacking-the-mind-how-why-social-engineering-works/>

QUESTION 112

A computer program that functions normally while quietly installing malicious software on a machine is known as a:

- A. DDoS attack.
- B. Worm.
- C. Phishing attack.
Real 69
CompTIA 220-802 Exam
- D. Trojan.

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://computer.howstuffworks.com/trojan-horse.htm>

QUESTION 113

Which of the following security threats is BEST mitigated through proper user training?

- A. A Worm
- B. Rootkits
- C. Social Engineering
- D. Browser Adware

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.veracode.com/blog/2013/03/hacking-the-mind-how-why-social-engineering-works/>

QUESTION 114

The practice of following an authorized person through an entrance without using a badge to defeat security is called:

- A. tailgating
- B. spamming
- C. shredding
- D. phishing

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://en.wikipedia.org/wiki/Tailgating>

QUESTION 115

Turnstiles and other mantraps will prevent which of the following security threats?

Real 70

CompTIA 220-802 Exam

- A. Shoulder surfing
- B. Tailgating
- C. Rootkits
- D. Viruses

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: http://www.infosecpro.com/a_security_engineering/se13.htm

QUESTION 116

Which of the following encryption standards is found on older wireless devices and provides minimal security?

- A. WPA
- B. WPA2
- C. WEP
- D. AES

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://searchsecurity.techtarget.com/definition/Wired-Equivalent-Privacy>

QUESTION 117

Phishing is:

- A. An infection that causes a web browser to go to a different site than the one intended from a search result page.
- B. A technique used to obtain financial information from a user mimicking a legitimate website.
- C. An infection that causes a computer to behave erratically by playing music and launching browser windows.
- D. A technique used to obtain financial information from a user by compiling information from social networks and their friends.

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.victeach.com.au/Other-Services/Security/Threats-and-scams.html>

QUESTION 118

A technician is configuring a PC that will have confidential information stored on it. To ensure that only authorized users can access this PC, which of the following should the technician do? (Select TWO).

- A. Disable the guest account
- B. Install antivirus applications
- C. Disable DHCP
- D. Change the SSID
- E. Change the default username

Correct Answer: AE

Section: Security

Explanation

Explanation/Reference:

Explanation:

To prevent unauthorized access to the PC, disable guest accounts and change default usernames for maximum security.

QUESTION 119

A company recently had a security breach and is now required to increase the security on their workstations. A technician has been tasked to harden all the workstations on the network. Which of the following should the technician do?

- A. Enable Windows automatic updates
- B. Enable screensaver required passwords
- C. Enable MAC filtering
- D. Enable wireless encryption

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/is-is/windows-vista/use-your-windows-password-for-your-screen-saver-password>

QUESTION 120

A user receives a phone call from a person claiming to be from technical support. This person knows the user's name and that the user has Windows installed on their computer. The technician directs the user to open Event Viewer and look at some event log entries to demonstrate the effects of a virus on the computer. The technician also asks the user for their user ID and password so that they can clean the computer. This is an example of which of the following

Real 72
CompTIA 220-802 Exam
security threats?

- A. Social engineering
- B. Phishing
- C. Malware
- D. Virus

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference:
http://www.pcworld.com/article/182180/top_5_social_engineering_exploit_techniques.html

QUESTION 121

A user has just purchased a wireless router for their home. Which of the following should be done to BEST secure the router from unauthorized access? (Select TWO).

<http://www.gratisexam.com/>

- A. Change router default logins
- B. Change the security settings on their computer
- C. Set encryption on the router
- D. Update router firmware
- E. Change the encryption on the computer's wireless adapter

Correct Answer: AC

Section: Security

Explanation

Explanation/Reference:

Explanation:

First change default router logins to avoid guesswork by hackers. Set encryption on the router using WPA and/or WPA2.

QUESTION 122

A user is experiencing slow performance with their computer. A technician suspects the computer has a virus and runs antivirus software. A virus is found and removed, but the performance issue is not resolved. Which of the following should the technician perform NEXT?

- A. Document findings, actions, and outcomes
- B. Establish a plan of action to resolve the problem
- C. Re-establish a new theory or escalate
- D. Implement preventative measures

Real 73

CompTIA 220-802 Exam

Correct Answer: C

Section: Security

Explanation

<http://www.gratisexam.com/>

Explanation/Reference:

Explanation:

Go back to the finding the real problem. See what is slowing down the performance and then resolve the problem using related troubleshooting techniques.

QUESTION 123

The benefit of MAC filtering in wireless networking is that the network:

- A. is encrypted.
- B. is not visible.
- C. uses static IP addresses.
- D. is more secure.

Correct Answer: D

QUESTION 126

A technician is trying to setup a non-domain user account on a workstation, but receives the following error message "Password does not meet the complexity requirements." Which of the following utilities should the technician use to identify the criteria?

- A. Local Security Policy
- B. Users and Groups
- C. Performance Monitor
- D. MSCONFIG

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.tomshardware.com/forum/23713-63-password-meet-password-policy-requirements>

QUESTION 127

In a SOHO wireless network, which of the following prevents unauthorized users from accessing confidential data?

- A. Reduce broadcast power
- B. Change SSID name
- C. Set encryption
- D. Enable MAC filtering

Correct Answer: C

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://www.dirksen.nl/assets/Uploads/Downloads/Top10ChecklistSOHOSecurity.pdf>

QUESTION 128

A technician recently setup a new wired network and wants to ensure only their computers can use it. Which of the following is the MOST secure way to accomplish this?

- A. Make sure the computers are using strong passwords.
- B. Enable an intrusion detection system.
- C. Assign the computers static IP addresses.
- D. Disable the extra ports on the router.

Correct Answer: D

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://www.geekzone.co.nz/forums.asp?forumid=66&topicid=10968>

QUESTION 129

Which of the following security measures is usually found in a laptop?

- A. Biometrics
- B. Bollard
- C. Hypervisor
- D. Key fobs

Correct Answer: A

Section: Security**Explanation****Explanation/Reference:**

Reference: <http://searchsecurity.techtarget.com/definition/biometrics>

QUESTION 130

Which of the following can be achieved with Group Policy to help with workstation security measures?

- A. BitLocker password
- B. Complexity requirements
- C. BIOS password
- D. Wake on LAN

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/library/cc875814.aspx>

QUESTION 131

Which of the following can enable a technician to remove a virus that prevents users from updating their antivirus software?

- A. Recovery console
- B. REGEDIT
- C. Safe mode
- D. MSCONFIG

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/fixtheproblem/f/windows-safe-mode.htm>

QUESTION 132

A technician has installed the hardware for a SOHO wired network. Which of the following is the FIRST step to securing the network?

- A. Enable MAC filtering
- B. Change default usernames and passwords
- C. Disable unused ports
- D. Assign static IP addresses

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.dirksen.nl/assets/Uploads/Downloads/Top10ChecklistSOHOSecurity.pdf>

QUESTION 133

Which of the following is a security threat that uses email to trick users?

- A. Phishing
- B. Virus
- C. Spyware
- D. Shoulder surfing

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://kb.iu.edu/data/arsf.html>

QUESTION 134

Which of the following user accounts should be disabled to adhere to security best practices?

- A. Standard user
- B. Guest
- C. Administrator
- D. Power user

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/is-is/windows-vista/what-is-a-guest-account>

QUESTION 135

Which of the following user accounts should be renamed to adhere to security best practices?

- A. Power user

- B. Guest
- C. Standard user
- D. Administrator

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/library/jj852273.aspx>

QUESTION 136

Which of the following security threats do shredders help prevent?

- A. Dumpster diving
- B. Malware
- C. Phishing
- D. Worms

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Garbage_picking

QUESTION 137

A user has setup a SOHO and needs to implement a network configuration that allows for sharing of devices and files across the network without the complexity of a centralized server. Which of the following would be MOST appropriate?

- A. PAN
- B. WorkGroup
- C. Domain
- D. WAN

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/what-is-the-difference-between-a-domain-a-workgroup-and-a-homegroup>

QUESTION 138

Browser redirection is caused by which of the following types of viruses?

- A. Hijack
- B. Trojan
- C. Worm
- D. Keylogger

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Browser_hijacking

QUESTION 139

A user has a perimeter firewall and up-to-date antivirus software. The user is asking what else they can do to improve their security. Which of the following will have the MOST impact on network security? (Select TWO).

- A. Install additional antivirus software
- B. Disable screen savers
- C. Conduct a daily security audit
- D. Assign security rights based on job roles
- E. Use strong passwords

Correct Answer: DE

Section: Security

Explanation

Explanation/Reference:

Explanation:

To improve security, assign security rights based on job roles. You need to give least amount of privilege to users so that they can do their jobs without having access to resources that have nothing to do with their job roles.

QUESTION 140

An Internet browser's cookie could be classified as which of the following?

- A. Rootkit
- B. Phishing
- C. Malware
- D. Spyware

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Spyware#Browser_cookies

QUESTION 141

A technician needs to change the minimum password length to 8 characters to make it more secure. Which of the following system settings should the technician configure?

- A. Windows Firewall
- B. Windows Security Center
- C. Local Security Policy
- D. System Configuration

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/library/dd277395.aspx>

QUESTION 142

Real 80

CompTIA 220-802 Exam

A technician would like to limit computer access to certain users. Which of the following should be configured?

- A. Advanced security
- B. Boot.ini file
- C. System configuration

D. Local security policy

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference: <http://technet.microsoft.com/en-us/library/dd277395.aspx>

QUESTION 143

Which of the following common security threats could be occurring when a user calls and requests his co-worker's password?

- A. Shoulder surfing
- B. Spyware
- C. Phishing
- D. Social engineering

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference:

http://www.pcworld.com/article/182180/top_5_social_engineering_exploit_techniques.html

QUESTION 144

When securing a small office home office (SOHO) that has empty cubicles with unused network ports, which of the following can be used to secure ONLY the unused ports?

- A. Use DHCP addressing on the network.
- B. Disable the ports on the router or switch.
- C. Power down the router when it is not being used.
- D. Disable DNS on the network.

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Explanation:

To secure unused ports, just disable them on the router or the switch.

QUESTION 145

Which of the following should a technician do LAST after cleaning up a virus infection?

- A. Enable system restore and create restore point
- B. Update antivirus software
- C. Schedule scans and updates
- D. Educate the end user

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Explanation:

Most of the time users install virus, Trojans and other malicious codes on their computers unknowingly. The best to prevent this loophole is to educate the user about viruses and where to look and what to do to prevent installing malicious codes.

QUESTION 146

A user does not want their kids to be able to install software on their home desktop. Which of the following types of accounts should the user set up in Windows 7?

- A. Standard
- B. Remote Desktop Users
- C. Administrator
- D. Power User

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows-vista/what-is-a-standard-user-account>

QUESTION 147

Which of the following are examples of physical security? (Select TWO).

- A. Badges

Real 82
CompTIA 220-802 Exam

- B. Anti-virus
- C. Encryption
- D. Firewalls
- E. Locked doors

Correct Answer: AE

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.hhs.gov/ocr/privacy/hipaa/administrative/securityrule/physssafeguards.pdf>

QUESTION 148

Which of the following scenarios BEST defines phishing?

- A. A user receives an email from a friend to download a picture but the file format ends in .exe.
- B. A user receives a pop-up message about a virus from a company that states that if they buy this product it will remove the virus.
- C. A user receives a message about unwanted activity from their antivirus asking to remove the suspect file.
- D. A user receives an email from a person in another country with a story as to why they need help with a financial arrangement.

Correct Answer: D

Section: Security

Explanation

Explanation/Reference:

Reference:

QUESTION 158

Real 86

CompTIA 220-802 Exam

Which of the following is the MOST secure method, short of physical destruction, that would be used to ensure that data on a hard drive cannot be recovered?

- A. Use a degaussing tool
- B. Format the drive
- C. Use an overwrite program
- D. Repartition the drive

Correct Answer: C

Section: Security

Explanation

Explanation/Reference:

Reference: http://www.pcworld.com/article/261702/how_to_securely_erase_your_hard_drive.html

QUESTION 159

IT suspects that other people are frequently making changes to a computer when a user leaves their desk. Which of the following security policies can be implemented in order to prevent this situation?

- A. Auto-lock
- B. Password complexity
- C. Change the default username
- D. Disable the guest account

Correct Answer: A

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.inf.aber.ac.uk/advisory/faq/156>

QUESTION 160

A client has asked a technician about drive sanitation and wants to know what the difference is between overwriting a drive and formatting a drive. Which of the following would be the BEST response from the technician?

- A. "Overwriting writes 1s and 0s to a hard drive replacing the data, while formatting only clears the reference to the data and only overwrites as space is used."
- B. "Nothing is different. They both destroy the data so no one can recover it."
- C. "Overwriting writes 1s and 0s to the drive replacing only the user's data but not the OS data, while formatting destroys the hard drive."
- D. "Overwriting replaces all the data with a single file that fills the hard drive destroying the data, while formatting erases all the data."

Real 87

CompTIA 220-802 Exam

Correct Answer: A

Section: Security

QUESTION 161

Which of the following BEST describes the security term known as tailgating?

- A. Propping open a secure entrance to gain later access
- B. Following behind someone when entering a secure area
- C. Removing files from a site using a hidden USB drive
- D. Using someone else's logged in computer to access files

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://en.wikipedia.org/wiki/Tailgating>

QUESTION 162

A user is reporting that they are clicking on search results and being redirected to the wrong sites. Which of the following should a technician check FIRST?

<http://www.gratisexam.com/>

- A. Temporary Internet Files
- B. Proxy Settings
- C. Cookies
- D. Windows Firewall

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://answers.oreilly.com/topic/675-how-to-configure-proxy-settings-in-windows-7/>

QUESTION 163

When setting up a new wireless router, which of the following actions should the technician take FIRST in order to secure the network? (Select TWO).

- A. Disable unused ports
- B. Change the SSID
- C. Position the antennas to prevent outside access
- D. Enable MAC filtering

<http://www.gratisexam.com/>

E. Change the default user name

Correct Answer: BE

Section: Security

Explanation

Explanation/Reference:

Explanation:

The basic tasks to secure a network is to change SSID and the default user name. This is the basic security a user can employ to secure the network immediately.

QUESTION 164

Which of the following allows a hidden backdoor to be used for access to workstations on the Internet?

- A. Firmware
- B. Rootkits
- C. SQL injection
- D. Cross-side scripting

Correct Answer: B

Section: Security

Explanation

Explanation/Reference:

Reference: <http://www.spamlaws.com/how-rootkits-work.html>

QUESTION 165

While configuring a new email application that uses POP3 for a customer, the technician determines the firewall is blocking the traffic. Which of the following ports should be opened to allow POP3 mail traffic through the firewall?

- A. 53
- B. 110
- C. 443
- D. 3389

Correct Answer: B

Section: Mobile Devices

Explanation

Explanation/Reference:

Reference: <http://www.speedguide.net/port.php?port=110>

Real 89

CompTIA 220-802 Exam

QUESTION 171

Which of the following features allows for easier navigation of long lists on a tablet device?

- A. Pinch-zoom
- B. Multitouch
- C. Scrollbars
- D. Touch flow

Correct Answer: D

Section: Mobile Devices

Explanation

Explanation/Reference:

Reference: <http://gigaom.com/2010/03/08/touchscreen-tablets/>

QUESTION 172

A user calls the help desk to report about their smartphone not being able to make any phone calls. The user admits that the smartphone can still send/receive email, browse all websites, and utilize all Internet-capable applications. Which of the following issues is MOST likely affecting the smartphone?

- A. Wi-Fi is turned off; the cellular antenna is turned on.
- B. The cellular antenna is turned off; Wi-Fi is still on.
- C. The user forgot to turn off Bluetooth before trying to make a call.
- D. The user has 4G capability turned off, and is only on 2G.

Correct Answer: B

Section: Mobile Devices**Explanation****Explanation/Reference:**

Explanation:

Cellular antenna catches and transmits cellular signals and data. Wi-fi is another technology that is used to access internet using a wireless router. So if the cellular antenna is turned off, you can still use Wi-Fi to browse internet and use host of applications.

QUESTION 173

Laptops and tablets have which of the following in common?

- A. Solid state drives
 - B. Contain an accelerometer
 - C. No field serviceable parts
 - D. Not upgradable
- Real 92
CompTIA 220-802 Exam

Correct Answer: A

Section: Mobile Devices**Explanation****Explanation/Reference:**

Reference:

http://www.computerworld.com/s/article/9229514/SSDs_still_no_threat_to_notebook_hard_drives

QUESTION 174

Which of the following is one of the major differences between a new tablet and a new laptop computer?

- A. Tablet has no field serviceable parts.
- B. Laptop has less field functionality.
- C. Tablet has faster Ethernet capability.
- D. Laptops have slower responsiveness than tablets.

Correct Answer: A

Section: Mobile Devices**Explanation****Explanation/Reference:**

Explanation:

Tablet PC has very delicate parts. Due to the nature of these parts, it cannot be serviced on field. You need special tools to pry open a tablet and working with the parts needs attention.

QUESTION 175

Which of the following data types can be synchronized to a mobile device by default? (Select TWO).

- A. Biometric information
- B. Pictures
- C. Contacts
- D. Credentials
- E. SMS

Correct Answer: BC

Section: Mobile Devices

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/sync-music-pictures-contacts-and-calendars-with-a-mobile-device>

QUESTION 176

Real 93

CompTIA 220-802 Exam

Which of the following mobile device features disables cellular and wireless communication?

- A. Hotspot Mode
- B. Pairing Mode
- C. Settings Reset
- D. Airplane Mode

Correct Answer: D

Section: Mobile Devices

Explanation

Explanation/Reference:

QUESTION 186

A technician is troubleshooting a RAID 6 array on a high end CAD/CAM workstation. Two disk drives have their fault lights on. Which of the following is the BEST action for the technician to perform when fixing this problem?

- A. Replace the failed drives and verify the RAID rebuilds completely.
- B. Reseat the drives, backup the data, and then replace them.
- C. Reseat the drives and monitor the RAID status over a few days.
- D. Replace the failed drives and restore the data from a known good backup.

Correct Answer: A

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference:

http://download.intel.com/support/motherboards/server/sb/intel RAID basic troubleshooting guide _v2_0.pdf

QUESTION 187

A technician is called in to troubleshoot a four disk RAID 10 array on a high end Windows 7 Enterprise workstation. One drive has failed. Which of the following should the technician do to fix the problem?

- A. Reseat the drive and verify the RAID array is healthy
- B. Replace the failed drive and verify the RAID is healthy.
- C. Replace the failed drive and restore the data.
- D. Add a fifth drive and make it a spare.

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference: <https://wiki.archlinux.org/index.php/RAID>

QUESTION 188

A user states their Windows XP desktop PC fails to boot to the Windows logo. Which of the following tools could a technician use to help diagnose if there is a pre-boot failure?

- A. Multimeter
- B. POST card
- C. Power supply tester
- D. BIOS flash

Real 149

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/POST_card

QUESTION 189

A user's computer will not boot. A technician notices four indicator lights on the backside of the computer. Two of the lights are green, and two are amber. Which of the following documentation should the technician read to determine what the lights are indicating?

- A. Network diagram
- B. Computer manual
- C. Asset management
- D. Wiring scheme

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Explanation:

The best resource for troubleshooting computer problems is the manual that came along with it. Similar to any electronic device, the manual lists common problems and their solutions.

QUESTION 190

A technician has a client's laptop that is randomly shutting down. Which of the following is the FIRST step of the troubleshooting theory that the technician will perform to resolve the laptop's issue?

- A. Document finding, actions, and outcomes
- B. Identify the problem
- C. Establish a theory
- D. Establish a plan of action to resolve the problem

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Explanation

Explanation/Reference:

Reference: http://www.tech-recipes.com/rx/446/xp_kill_windows_process_command_line_taskkill/

QUESTION 197

A technician is about to put a computer back into service that has not been turned on for many months. It was healthy when taken out of service and boots quickly without any problems. Which of the following actions would be a best practice to begin computer maintenance? (Select TWO).

- A. Run a full antivirus scan.
- B. Defragment the hard disk.
- C. Run antivirus updates.
- D. Run Windows updates.
- E. Configure the firewall to access the Internet.

Correct Answer: CD

Section: Troubleshooting

Explanation

Explanation/Reference:

Explanation:

You have to update the system. Run antivirus updates because antivirus changes frequently as new viruses are discovered. Run Windows updates to keep the system updated and ready to use.

QUESTION 198

A technician discovers a networked computer has been infected with a zero day virus. Which of the following is the FIRST thing that should be done to the workstation?

- A. Document the symptoms of the virus.
- B. Turn off the computer using the power switch.
- C. Unplug it from the network.
- D. Run an antivirus update and then a full scan.

Correct Answer: C

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference: http://en.wikipedia.org/wiki/Zero-day_virus

QUESTION 199

A user is reporting their web browser is not going to the site they are attempting to access. Which

Real 153

CompTIA 220-802 Exam

of the following would BEST resolve this?

- A. Delete all Internet cookies.
- B. Ensure the user is not utilizing a proxy server.
- C. Remove all Internet shortcuts.
- D. Clear all Internet cache and saved passwords.

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Explanation:

One solution to this problem might be related to proxy server. If the web browser is not accessing a site, try to disable proxy server from the browser proxy settings.

QUESTION 200

A technician is called onsite to solve a network connection error. Upon arrival, the technician observes a message on the screen stating there is no boot drive found. Which of the following steps should the technician take NEXT?

- A. Repair the boot up sequence using recovery console.
- B. Restart the system, booting from a system recovery disk.
- C. Restart the system to verify the proper boot sequence.
- D. Inform the customer the hard drive has crashed and replace the drive.

Correct Answer: C

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference: <http://www.tomshardware.com/forum/55646-2-boot-device-available>

QUESTION 201

The technician is dispatched to a user's home to secure a wireless network. The SOHO user has only one system to connect wirelessly, yet wishes to protect their Wi-Fi from unauthorized use. Which of the following will BEST meet the user's requirements?

- A. Configure the router to allow access by MAC address.
- B. Configure the use of DHCP.
- C. Configure the use of static IP addresses.
- D. Configure the network to utilize a proxy.

Correct Answer: A

Section: Troubleshooting

Explanation

Explanation/Reference:

Real 154

CompTIA 220-802 Exam

QUESTION 204

A workstation is making a loud clicking noise that is originating from the hard drive and it is not

Real 155

CompTIA 220-802 Exam

booting. Which of the following should the technician do FIRST?

- A. Visit the hard disk vendor's site and run a hardware check on the drive.

- B. Put the hard drive in another system and back up all data from it.
- C. Run CHKDSK immediately and replace the drive if it is bad.
- D. Format the drive and restore from a previous image.

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference: <http://harddriveclicking.net/>

QUESTION 205

A user is reporting that they cannot connect to the wireless network from their office but they were able to connect yesterday. Which of the following would be the MOST likely reason?

- A. Radio switch on laptop is enabled
- B. Radio switch on laptop is disabled
- C. Channel interference
- D. User is too far away from the access point

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Reference: <http://en.kioskea.net/forum/affich-130312-wifi-radio-disabled-of-my-laptop-how-turn-on>

QUESTION 206

A user reports that their PC does not work. Which of the following would be the BEST question for the technician to ask the user to get further information?

- A. "Can you get to the Internet?"
- B. "What exactly does not work?"
- C. "Does the PC turn on?"
- D. "Are you able to sign on?"

Correct Answer: B

Section: Troubleshooting

Explanation

Explanation/Reference:

Explanation:

Clarify what is not working. The line of questioning is an effective strategy to discover and solve a problem especially on phone.

Real 156

CompTIA 220-802 Exam

QUESTION 207

A user reports that their PC boots up to a screen that reads "OS not found". Which of the following would be the MOST likely cause of this problem?

- A. There are conflicting operating systems.
- B. Not enough memory is available.
- C. The system has a BSOD.
- D. The user has a USB key attached.

Correct Answer: D

Section: Troubleshooting

Explanation

Explanation/Reference:

Explanation:

Sometimes the computer mixes up the boot order. If the USB key is attached to the computer, try removing the USB key and rebooting the system.

QUESTION 208

A technician is working on an issue and has identified the problem and worked out the cause. Which of the following would MOST likely be the NEXT step the technician should make?

- A. Document the cause and solution
- B. Inform the user
- C. Report to the supervisor
- D. Establish a plan of action

Correct Answer: D

Section: Troubleshooting

Explanation

Explanation/Reference:

QUESTION 605

When running Windows XP, which of the following would give a list of switches for the CHKDSK command?

- A. chkdsk ~?
- B. chkdsk :?
- C. chkdsk /?
- D. chkdsk \?

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.computerhope.com/chkdskh.htm>

QUESTION 606

Which of the following commands would a technician use to move one directory above or below the one the technician is currently in?

- A. DIR
- B. RD
- C. CD
- D. MD

Correct Answer: C

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://www.lsi.upc.edu/~robert/teaching/foninf/doshelp.html>

QUESTION 607

A virtual machine running locally would be BEST utilized in which of the following situations?

Real 22
CompTIA 220-802 Exam

- A. On a PC with minimal RAM
- B. Patch testing before rollout
- C. Thick client configuration
- D. Gaming workstation configuration

Correct Answer: B

Section: Operating Systems

Explanation

Explanation/Reference:

Explanation:

The best way to utilize a virtual machine is to test patches before deploying it on the live machine. Patches tend to corrupt operating systems. So it is better to check them first on a virtual machine before deploying it on a live machine.

QUESTION 608

Which of the following operating systems supports full usage of 8GB DDR3 RAM?

- A. Windows 7 Professional x86
- B. Windows 7 Home Premium x64
- C. Windows XP Professional
- D. Windows Vista Home Premium x86

Correct Answer: B

- D. DISKPART

Correct Answer: A

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://pcsupport.about.com/od/toolsofthetrade/ht/sfc-scannow.htm>

QUESTION 612

A technician is tasked with building three systems that are capable of utilizing the new Windows HomeGroup functionality. Which of the following versions of Windows would need to be used?

- A. Windows 7 or Windows Vista
- B. Windows Vista only
- C. Windows XP Professional x64 Edition
Real 24
CompTIA 220-802 Exam
- D. Windows 7 only

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Reference: <http://windows.microsoft.com/en-us/windows7/products/features/homegroup>

QUESTION 613

Which of the following data transfers will retain the current NTFS permissions of a file?

- A. Copying the file to a different location on the same volume
- B. Copying the file to a different location on a different volume
- C. Moving the file to a different location on a different volume
- D. Moving the file to a different location on the same volume

Correct Answer: D

Section: Operating Systems

Explanation

Explanation/Reference:

Explanation:

Moving a file to a different location on the same NTFS volume will retain current NTFS permissions. However, if the file is moved to another volume with different file system like FAT32, permissions will be invalidated and you have to reassign permissions to the file.

QUESTION 614

A user's computer keeps producing a "low virtual memory" alert and the speed of the system degrades afterwards.

Which of the following Control Panel locations can provide information to review and correct this issue?

- A. System > Remote
- B. System > Hardware
- C. System > System Restore
- D. System > Advanced

Correct Answer: D
