CompTIA CV0-001

CompTIA Cloud+ Certification Exam

Excellent Questions, I pass with 90% with these questions. Guys just read this only.Added Explanations and Exhibits most of the questions.

<http://www.gratisexam.com/>

## **Exam A**

### **QUESTION 1**

Which of the following is MOST important when factoring network level security in a public cloud environment?

- A. Ensuring good user experience
- B. Ensuring confidentiality
- C. Ensuring redundancy
- D. Ensuring high availability

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### **QUESTION 2**

Which of the following should an administrator implement when connecting the company's existing network to a public cloud environment to ensure confidentiality of data that is being transmitted?

- A. A proxy server
- B. A load balancing solution
- C. An IPSec tunnel
- D. A server clustering solution

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### **QUESTION 3**

An administrator is creating a new VM template and has a requirement that the OS must be hardened. Which of the following should be performed to harden a guest OS?

- A. Encrypt the hard drive
- B. Run defrag

- C. Rename administrator account
- D. Change page file

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

Real 2

CompTIA CV0-001 Exam

#### **QUESTION 4**

A company has decided to reduce their datacenter size. An administrator for the company has been tasked to virtualize many of the company's servers. Which of the following should the administrator perform to accomplish this goal?

- A. P2V
- B. P2P
- C. V2P
- D. V2V

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 5**

An administrator needs to provide Internet access to all internal systems using a single IP address. Which of the following should the administrator implement?

- A. NAT
- B. Virtual switching
- C. VLAN tagging
- D. PAT

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 6**

Which of the following technologies would MOST likely be used for personal use to virtualize a desktop?

<http://www.gratisexam.com/>

- A. Type II
- B. Type I
- C. RAID 5
- D. RAID 0

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 7**

In which of the following cloud services will the customer be responsible for securing provisioned hosts?

- A. PaaS
- B. IaaS
- C. SaaS
- D. DaaS

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 8**

Which of the following should an administrator perform to harden a VM that has been provisioned in a public cloud environment before deploying the system?

- A. Defrag system
- B. Update drivers
- C. Disable firewall
- D. Patch system

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 9**

Which of the following can be used to encrypt data at rest on a VM located in the cloud?

- A. AES
  - B. SSL
  - C. TLS
  - D. VPN
- Real 4  
CompTIA CV0-001 Exam

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 10**

An administrator is tasked to reduce the company's datacenter power utilization. Currently there are 500 physical servers in the datacenter and 600 virtual servers with five additional available host servers. Which of the following should the administrator perform?

- A. Migrate servers using V2V technology
- B. Perform an offline migration of virtual servers
- C. Migrate servers using V2P technology
- D. Migrate servers using P2V technology

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 11**

An administrator is tasked with installing an application patch on a virtual server. The administrator needs the ability to restore the server to its previous state quickly if the patch corrupts the system. Which of the following should the administrator do to accomplish this task?

- A. Install the patch on a development server
- B. Create a full backup
- C. Create a snapshot
- D. Install the patch on a test server

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 12**

Which of the following cloud delivery models presents the LEAST vulnerabilities to a company's existing network?

- A. Hybrid
- B. Community  
Real 5  
CompTIA CV0-001 Exam
- C. Public
- D. Private

**Correct Answer:** D

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 13**

Which of the following uses the business model of shared resources in a cloud environment?

- A. Elasticity
- B. Self-serve
- C. Cloud bursting
- D. Multi-tenancy

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 14**

Which of the following is used to locate a specific area of storage in a cloud environment?

- A. Object ID
- B. SAN
- C. Replicas
- D. Metadata

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 15**

Which of the following can be done after an administrator deploys a virtual server to ensure that the server vNIC can communicate to the physical network?

- A. Bridge the vNIC
- B. Set the vNIC speed to half-duplex
- C. Add an addition vNIC  
Real 6  
CompTIA CV0-001 Exam
- D. Set the vNIC speed to full-duplex

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 16**

After an administrator successfully migrated the last physical application server to a virtual environment, the help desk reported slow performance. Which of the following should the administrator have done FIRST before migrating this server?

- A. Apply operating system patches to the application server after the migration.
- B. Contact the vendor to see if the application is supported in a virtual environment.
- C. Take a backup of the application server after the migration.
- D. Migrate the application server in a test environment and have users test it.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 17**

Which of the following would be used to establish a dedicated connection in a hybrid cloud environment?

- A. CHAP
- B. AES
- C. PKI
- D. VPN

**Correct Answer:** D

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 18**

An administrator deployed a DaaS cloud delivery model for a financial institution and implemented a data encryption technology using AES cryptography. Which of the following should the administrator implement NEXT?

Real 7

CompTIA CV0-001 Exam

- A. Access controls
- B. RC5
- C. SSL
- D. Zoning

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 19**

An administrator deployed ten application servers from a single VM template. A senior administrator notices that these ten VMs are not using their resources efficiently. Which of the following is MOST likely the issue with the new servers?

- A. The dynamic resource pool is malfunctioning.
- B. The server is missing security patches.
- C. The VM servers were not properly configured.
- D. There are insufficient resources available on the host.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 20**

Which of the following storage technologies is file-based?

- A. WAN
- B. DAS
- C. SAN
- D. NAS

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 21**

Which of the following storage technologies can leverage switches in its implementation?

<http://www.gratisexam.com/>

- A. HBA
- B. DAS
- C. SCSI
- D. SAN

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 22**

Which of the following RAID configuration would be used to accomplish disk mirroring with two disks?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 23**

Which of the following only uses Fibre Channel to implement a storage infrastructure?

- A. NFS
- B. SAN
- C. NAS
- D. SMB

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 24**

Which of the following solutions primarily relies on private cloud resources but may use public cloud resources based on capacity requirements?

Real 9

CompTIA CV0-001 Exam

- A. Rapid deployment
- B. Cloud bursting

- C. Multi-tenancy
- D. Pay-as-you-grow

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 25**

An employee is asked to run an instance of a Linux OS while booted up in a Windows OS. Which of the following types of virtualization would be used to meet this requirement?

- A. Type I
- B. Type II
- C. Bare Metal
- D. Native

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 26**

A small startup wins a contest giving them advertising time during a major sporting event. Which of the following cloud characteristics should be in place to handle the possible spike in demand?

- A. Shared disk space
- B. Elasticity
- C. Scalability
- D. Shared memory

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 27**

Which of the following components should be virtualized and added to cloud infrastructure to ensure virtual servers are only able to access the volumes assigned to them?

Real 10

CompTIA CV0-001 Exam

- A. NAS
- B. DAS
- C. LUN
- D. HBA

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 28**

Which of the following can be used to protect data integrity when information is being written to a SAN from multiple clients?

- A. Port Zoning
- B. SAN Zoning
- C. LUN Masking
- D. Multipathing

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 29**

Several servers are connected to a SAN using three storage devices and FCoE for transmissions. These servers only need to access one SAN device. All servers, the SAN, and the HBA are virtualized. Which of the following should be used to ensure access is controlled appropriately between devices? (Select TWO).

- A. LUN Masking
- B. Hard Zoning
- C. Supernetting
- D. Soft Zoning
- E. Subnetting

**Correct Answer:** AD

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

### **QUESTION 30**

Real 11

CompTIA CV0-001 Exam

An administrator is called in to determine why a virtual desktop has been unable to connect to the corporate network. Which of the following should be run to determine if the adapter is enabled? (Select TWO).

- A. ipconfig
- B. netstat
- C. ping
- D. ifconfig
- E. iwconfig

**Correct Answer:** AD

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

### **QUESTION 31**

Which of the following should be installed on VMs to report and take action against potential threats?

- A. NIDS
- B. HIPS

- C. NIPS
- D. HIDS

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### **QUESTION 32**

Which of the following will explain why only some of the CPU cycles are available to a virtualized server using two virtualized processors?

- A. Extra processing is needed to store encryption keys used for secure transmission between the server and the network.
- B. Additional processing is used to run ports and services not turned off through the process of server hardening.
- C. Some processing is required for operational overhead on the processor and between the physical and virtualized processors.
- D. Significant processing is used to create and maintain the cache on multi-core processors.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Real 12

CompTIA CV0-001 Exam

Explanation:

### **QUESTION 33**

Which of the following would be used to prove the existence of vulnerabilities on a network?

- A. Penetration testing
- B. Vulnerability assessment
- C. Business impact analysis
- D. Risk assessment

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 34**

Which of the following is MOST likely to be retrieved from an individually addressable blob?

- A. An object ID
- B. A hash
- C. A sequence number
- D. An image

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 35**

Which of the following is true about a Type II hypervisor?

- A. It requires a primary hypervisor to function properly.
- B. It implements stronger security controls than a Type I supervisor at the same patch level.
- C. It provides slower performance than a Type I hypervisor installed on the same hardware.
- D. It provides direct hardware access through the use of specialized drivers.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

Real 13

CompTIA CV0-001 Exam

**QUESTION 36**

A technician wants to configure a server for storage redundancy so that if any two of the four drives fail, the server is still operational. Which of the following should the technician configure?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 6

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 37**

A technician wants to isolate storage from other network traffic. Which of the following **MUST** the technician implement to ensure storage traffic is securely segregated?

- A. VLAN
- B. VMFS
- C. PAT
- D. NTFS

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 38**

Although the SAN appears to be running without any problems, the technician is unable to reach the SAN's web enabled management interface. Which of the following tools can the technician use to **QUICKLY** find where the communication failure occurred?

- A. arp
- B. traceroute
- C. ping
- D. ipconfig

**Correct Answer:** B

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Real 14

CompTIA CV0-001 Exam

Explanation:

**QUESTION 39**

Network statistics show that the 1Gbps switch port used for storage traffic is fully saturated. Which of the following switch technologies can be used to provide twice the bandwidth?

- A. NAT
- B. Multipathing
- C. Link aggregation
- D. VLAN

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 40**

A technician wants to remotely gather a list of all the software running on the client PCs throughout the organization. Which of the following should be used to gather this information?

- A. WMI
- B. SQL
- C. Syslog
- D. SNMP

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 41**

A small business is moving ten physical servers to the cloud. Which of the following should the cloud provider implement to ensure that all ten servers can dynamically share memory resources with other tenants as needed while not interfering with the other tenants?

- A. Soft limits
  - B. Load balancing
  - C. Resource pooling
  - D. Caching
- Real 15  
CompTIA CV0-001 Exam

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 42**

Students in a virtual lab must be able to upload and download homework assignments from personal external storage devices to their virtual desktops. Which of the following should the lab administrator implement to allow students to upload files?

- A. Resource pooling
- B. Secure FTP
- C. Storage quotas
- D. Port mapping

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 43**

Which of the following detection controls can be used to identify an unauthorized individual who accessed a remote network share?

- A. Obfuscation

- B. Authentication
- C. Log review
- D. LUN masking

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 44**

The performance logs on a virtualization server show a large number of pages being written to disk at a high rate. Which of the following should the technician do?

- A. Increase the amount of swap space on the disk
- B. Increase the amount of physical memory
- C. Install and provision additional disk space
- D. Allocate additional CPU power to the guests

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 45**

Which of the following allows a network device to process storage traffic without significant delays, even if the amount of other network traffic has saturated the link?

- A. Caching
- B. Jumbo frames
- C. Load balancing
- D. QoS

**Correct Answer:** D

**Section:** (none)

## **Explanation**

### **Explanation/Reference:**

Explanation:

### **QUESTION 46**

A company wants to migrate its critical application to a public cloud but the security administrator is concerned with the application's data confidentiality requirements. Which of the following can be done to review if the appropriate management security controls are in place at the provider?

- A. Penetration testing
- B. Vulnerability assessment
- C. Performance and application testing
- D. Policy and procedure audit

**Correct Answer: D**

**Section: (none)**

### **Explanation**

### **Explanation/Reference:**

Explanation:

### **QUESTION 47**

A catastrophic disk failure occurred on a company's critical database. After a technician performs a full system restore, one of the business units realizes that the current backup does not hold fresh enough information. Which of the following should the company revise?

Real 17

CompTIA CV0-001 Exam

- A. RTO
- B. MTTR
- C. RPO
- D. MTBF

**Correct Answer: C**

**Section: (none)**

### **Explanation**

### **Explanation/Reference:**

Explanation:

**QUESTION 48**

A company has virtualized all of their servers on one physical server located on the company's first floor datacenter. The company also uses security software from a third-party cloud vendor as part of a SaaS contract. The overall cloud network model for this company's network is BEST described by which of the following?

- A. Hybrid
- B. Offsite public
- C. On-site private
- D. Community

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 49**

A company has five servers and wishes to consolidate into a single physical server. Which of the following migration methods would accomplish this?

- A. P2P
- B. V2P
- C. V2V
- D. P2V

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 50**

An external USB hard drive physically attached to a server is a:

Real 18  
CompTIA CV0-001 Exam

- A. SAN.
- B. DAS.

- C. VLAN.
- D. NAS.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 51**

Which of the following protocols is MOST likely used by a switch to communicate status information to an administrator?

- A. SNMP
- B. SMTP
- C. NNTP
- D. HTTP

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 52**

A company has multiple guest operating systems running in a virtual environment. An administrator would like to ensure all servers consistently receive the same IP addresses. Which of the following should be implemented?

- A. Soft limit quotas
- B. Reservations
- C. Resource pooling
- D. Entitlement allocations

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 53**

A technician would like to connect to a virtual server from inside the network, using a desktop computer. Which of the following tools could the technician use?

Real 19

CompTIA CV0-001 Exam

- A. HTTP
- B. RDP
- C. IMAP
- D. SSL

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 54**

Which of the following is an example of two-factor authentication when accessing a virtual server?

- A. Multiple usernames/passwords for all websites
- B. Username/password, fingerprint scanner, and key fob
- C. Username/password and PIN
- D. Username/password and fingerprints

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 55**

A company with an online store website has migrated the website and store database information to a cloud provider. The company wants to ensure credit cards used for online store purchases are processed such that local compliance regulations are met. Which of the following is used by a third party to verify the cloud vendor is meeting the compliance standards?

- A. Replication consistency
- B. Penetration test
- C. Bandwidth assessment
- D. Application delivery

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 56**

A server has two power supplies such that when the first one fails, the second one automatically is used to provide power to the server. This type of setup is an example of which of the following?

Real 20

CompTIA CV0-001 Exam

- A. Latency
- B. Replication
- C. Redundancy
- D. Failback

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 57**

Which of the following would allow the knowledge management division to maximize the ability to find documents within an online document repository?

<http://www.gratisexam.com/>

- A. Object ID
- B. Access control
- C. Metadata
- D. Rapid deployment

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 58**

A system administrator wants to create a mitigation strategy to quickly roll back a virtual image after applying the latest updates. Which of the following would the administrator utilize?

- A. File backup
- B. Snapshot
- C. Offline backup
- D. Image backup

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 59**

A system administrator currently has two web server VMs on one host. Users are reporting that query searches within the site are slow. The system administrator

notices that the host CPU is above the threshold. Which of the following should be completed?

Real 21  
CompTIA CV0-001 Exam

- A. Migrate one web server to another host.
- B. Defragment the hard drives on the server.
- C. Rebuild the two web server VMs.
- D. Install another NIC for the creation of a network bridge.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 60**

A storage administrator has 100 terabytes of physical storage space within the SAN. Which of the following is used to enable access to the storage space?

- A. Drive mirroring
- B. LUN creation
- C. Drive striping
- D. RAID configuration

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 61**

The network administrator creates a DNS A record. Which of the following tools can identify which IP has been assigned to a FQDN?

- A. arp
- B. ipconfig
- C. nslookup
- D. tracert

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 62**

A system administrator wants to be able to use one server to collect all of the logs on the network. Which of the following would be used to satisfy this scenario?

Real 22

CompTIA CV0-001 Exam

- A. Firewall logging
- B. Change management database
- C. Syslog service
- D. SNMP

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 63**

Which of the following will allow the network administrator to verify that one IP is assigned to one VM?

- A. Virtual Local Area Network
- B. Reservations
- C. Resource Pooling
- D. Storage allocation

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 64**

A storage administrator wants to limit an operating system from accessing all of the storage within the array. Which of the following could be enabled on the SAN?

- A. LUN masking
- B. Implement different file formats
- C. Access control lists
- D. Data at rest encryption

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 65**

A company is required to provide their customers with zero downtime for its web application. Which of the following would satisfy this requirement?

Real 23  
CompTIA CV0-001 Exam

- A. Cold site
- B. High availability
- C. Multipathing
- D. Load balancing

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 66**

Which of the following cloud services provides billing, payroll, contract management, and human resource management functions?

- A. CaaS

- B. SaaS
- C. BPaaS
- D. DaaS

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 67**

Which of the following cloud delivery models is deployed over a company intranet or company- hosted datacenter?

- A. Private cloud
- B. Hybrid cloud
- C. Community cloud
- D. Public cloud

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 68**

Which of the following would create an efficient means of accessing and organizing data in a cloud environment, as well as provide a list of useful, relevant data?

Real 24

CompTIA CV0-001 Exam

- A. Blob data
- B. Object ID
- C. Replicas
- D. Metadata

**Correct Answer:** D

**Section:** (none)

### **Explanation**

#### **Explanation/Reference:**

Explanation:

#### **QUESTION 69**

Which of the following hypervisor types runs on a host operating system that provides virtualization services, including memory management and device support?

- A. Type II hypervisor
- B. Proprietary hypervisor
- C. Type I hypervisor
- D. Open source hypervisor

**Correct Answer: A**

**Section: (none)**

### **Explanation**

#### **Explanation/Reference:**

Explanation:

#### **QUESTION 70**

Users on a network report that they are unable to access any external websites, however, they are able to access resources by IP address. Which of the following command line utilities would be used FIRST in troubleshooting this problem?

- A. netstat
- B. telnet
- C. nslookup
- D. ipconfig

**Correct Answer: C**

**Section: (none)**

### **Explanation**

#### **Explanation/Reference:**

Explanation:

#### **QUESTION 71**

Which of the following storage technologies would be MOST appropriate for installations where fast data access time is paramount?

Real 25

CompTIA CV0-001 Exam

- A. USB
- B. Tape
- C. HDD
- D. SSD

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 72**

A web hosting company received reports of slow performance from four out of the five clients. Upon investigation, it was determined that a hosted virtual machine was using more RAM and CPU than the others. Which of the following MOST likely contributed to the issue?

- A. Hard quota limits
- B. Soft quota limits
- C. Storage allocation
- D. Resource pooling

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 73**

Which of the following access control types allows users to assign security attributes to objects such as files and directories?

- A. Role based
- B. Mandatory
- C. Discretionary
- D. Rule set based

**Correct Answer:** C

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 74**

An administrator is tasked to perform a P2V migration of a critical application. Which of the following steps should the administrator perform FIRST before the migration?

Real 26

CompTIA CV0-001 Exam

- A. Harden the operating system
- B. Migrate the server in a development environment
- C. Contact the vendor for compatibility requirements
- D. Establish a performance baseline

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 75**

Which of the following networking components would be used to connect two subnets in a virtual environment?

- A. Virtual switch
- B. Virtual disks
- C. Virtual router
- D. Virtual HBA

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 76**

Which of the following could be assigned to a virtual CPU?

- A. Cores
- B. HBAs
- C. LUNs
- D. Stepping

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 77**

Which of the following could be reviewed on devices to help determine whether unauthorized access has occurred?

Real 27

CompTIA CV0-001 Exam

- A. Antivirus
- B. Firewall
- C. Audit logs
- D. IDS

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 78**

Which of the following reduces the risk of known attacks from being successful?

- A. DLP techniques
- B. Patching frequency
- C. Mandatory access controls

D. Encryption methods

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 79**

How many cores are available to the resource pool with a Type I hypervisor that has 4 quad core processors installed?

A. 16

B. 24

C. 32

D. 64

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 80**

Which of the following describes the access control method where data owners authorize who is granted access to their files?

Real 28

CompTIA CV0-001 Exam

A. Mandatory access control

B. Role-based access control

C. Access control list

D. Discretionary access control

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 81**

Which of the following will provide the MOST network address information possible for a system that belongs to a tenant in a private cloud?

- A. ipconfig
- B. telnet
- C. traceroute
- D. nslookup

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 82**

Some of the VMs in an environment are experiencing network connectivity loss. The VM management network has no connectivity issues. Which of the following could cause this connectivity issue?

- A. NIC teaming is disabled
- B. Faulty host NIC port
- C. Wrong NIC load balancing mode
- D. Slow NIC

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 83**

Users have been reporting slow response times on a database server. The administrator noticed the server at any given time has between 30 to 50 users connected to various databases.

Real 29

CompTIA CV0-001 Exam

Additional research shows disk metrics such as disk queuing and disk access rates are both around 10% to 15%. Which of the following can be the root cause of this slow performing server?

- A. The CPU time reservation is small.
- B. The swap disk space is small.
- C. The server has fewer resources than required.
- D. I/O tuning is disabled.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 84**

A web server is offline. Which of the following will allow the FASTEST possible recovery of the web server?

- A. Operating system and application backups
- B. Image backups
- C. Operating system backups only
- D. File backups

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 85**

Which of the following is a MINIMUM requirement for VM online migration?

- A. Same CPU family between source and target hosts.
- B. Same network equipment between source and target hosts.
- C. Same hardware vendor for the datacenter.
- D. Same hypervisor versions between source and target hosts.

**Correct Answer:** A

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 86**

Real 30

CompTIA CV0-001 Exam

Which of the following is a subcomponent of a virtual machine?

- A. Virtual switch
- B. Virtual HBA
- C. Virtual shield
- D. Virtual OS

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 87**

Which of the following BEST defines RAID 4?

- A. RAID 4 allows two failed drives.
- B. RAID 4 requires a minimum of 4 disks.
- C. RAID 4 has a dedicated parity drive.
- D. RAID 4 is less secure than RAID 5.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 88**

Which of the following MUST be in a zone? (Select TWO).

- A. Initiator
- B. Target
- C. CNA
- D. HBA
- E. Fibre Channel

**Correct Answer:** AB

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 89**

To avoid the same LUN showing up multiple times in client hosts, an administrator should

Real 31

CompTIA CV0-001 Exam  
implement:

- A. Multipathing software
- B. Multiple HBAs
- C. Multiple zones
- D. Multiple initiators

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 90**

Ubiquitous access to cloud computing means:

- A. access by any person
- B. access by any device through any network connection

- C. access by authorized personnel only
- D. international access across country borders

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 91**

Which of the following attributes BEST describes "elasticity" in cloud computing? (Select TWO).

- A. Universal access
- B. Multi-tenancy
- C. Portability
- D. Cost effectiveness
- E. Scalable
- F. Off premises

**Correct Answer:** DE

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 92**

Real 32

CompTIA CV0-001 Exam

Which of the following factors yields cost savings in cloud computing? (Select TWO).

- A. Shared resources
- B. Availability
- C. Ubiquitous access
- D. Multi-tenancy
- E. On premises

**Correct Answer:** AD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 93**

A company has an existing internal network that hosts confidential information. However, this network also has a connection to a separate site. The separate site is managed by a third party organization that has an SLA with the company. Which of the following BEST defines this cloud delivery model?

- A. Private Cloud
- B. Public Cloud
- C. Community Cloud
- D. Hybrid Cloud

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 94**

Which of the following business continuity designs provides the highest degree of fault tolerance?

- A. Cold Site
- B. Site Mirroring
- C. Warm Site
- D. Hot Site

**Correct Answer:** B

**Section:** (none)

**QUESTION 95**

Monitoring alarms should be set based on:

<http://www.gratisexam.com/>

- A. A high point for every performance counter in the system.
- B. The point of application installation.
- C. Acceptable application performance criteria.
- D. Support availability.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 96**

Which of the following access control methods could allow for a network user to sign onto their corporate network and their supplier's network portal without having to enter their ID and password more than once?

- A. Discretionary access control
- B. Mandatory access control
- C. Role-based access control
- D. Federated access control

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

<http://www.gratisexam.com/>

Explanation:

**QUESTION 97**

A user is notified that they will be terminated at the end of the day. As they start cleaning up their workstation, they try to FTP information from their workstation to a cloud-based, personal backup solution. Which of the following hardening techniques would be used to restrict their ability to transfer this information via FTP?

- A. Antivirus
- B. NIPS
- C. NIDS
- D. Host-based firewall

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

Real 34  
CompTIA CV0-001 Exam

**QUESTION 98**

Which of the following is MOST important when working in highly available virtual environments?

- A. Storage VLAN
- B. Virtual network
- C. Wide area network
- D. Heartbeat VLAN

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 99**

A datacenter migration is taking place and the administrator has been tasked with reducing the footprint of the new datacenter by virtualizing as many servers as possible. A physical server has been flagged as a candidate for relocation to the new data center. Which of the following methods would be the FIRST method for relocating the server to the new data center?

- A. V2V
- B. V2P
- C. P2V
- D. P2P

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 100**

A critical hypervisor security patch has been released and needs to be rolled out as soon as possible. Which of the following steps can be taken to minimize downtime for all guest VMs currently running?

- A. In the next scheduled maintenance window, apply patch, reboot host, and wait for all VMs to come back online.
- B. In the next scheduled maintenance window, migrate VMs to another host. Remove host from any availability clusters, patch host, reboot host, and place host back into availability cluster.  
Real 35  
CompTIA CV0-001 Exam
- C. In the next scheduled maintenance window, shut down all VMs, apply patch, reboot host, and wait for all VMs to come back online.
- D. In the next scheduled maintenance window, migrate VMs to another host. Remove host from any availability clusters, unplug network cables from host, patch host, reboot host, reconnect network cables, and place host back into availability cluster.

**Correct Answer:** B

Explanation:

#### **QUESTION 127**

Which of the following is an example of vertical scaling?

- A. Adding memory to a host
- B. Adding CPU to a VM guest
- C. Adding memory to the VM guest
- D. Migrating all VM guests from one host to another in a cluster

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 128**

After deploying VM guests from a VM template on an NFS datastore, the administrator has discovered misaligned VM guest partition offsets in multiple VM guests. Which of the following represents a complete solution for improving I/O performance?

- A. Correct the VM guest partition offset in the deployed VMs
- B. Correct the VM guest partition offset in the deployed VMs and use the correct LUN alignment offset for the VM guest OS
- C. Correct the VM guest partition offset in the VM template
- D. Correct the VM guest partition offset in the VM template and the deployed VMs

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 129**

The Chief Technology Officer (CTO) has recently implemented a policy requiring all critical systems, including the virtualized environment to be highly available in the primary datacenter.

Real 45

CompTIA CV0-001 Exam

The organization also maintains a cold site for disaster recovery. Which of the following BEST satisfies this requirement?

- A. Implement two hosts in a local cluster in the primary datacenter.
- B. Implement two hosts in the primary datacenter.
- C. Implement two hosts in a geo-cluster, one in the primary datacenter and one in the cold site.
- D. Implement data mirroring between the primary datacenter to the cold site.

**Correct Answer:** A

Explanation:

**QUESTION 157**

Encryption ensures which of the following? (Select TWO).

- A. Access control
- B. Data loss
- C. Confidentiality
- D. Authentication
- E. Data integrity

**Correct Answer: CE**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 158**

A company has just established a new branch office that needs to connect back to centrally hosted applications for day to day operations. The branch office has

noted that access to many company services are slow and causing a drop in productivity. The company IT department has investigated a plan to improve performance across the link to the branch office without having to pay for more bandwidth from the Internet Service Provider. This plan includes hardware that after installation will allow for much faster access to day to day business applications. Which of the following terms BEST describes the action taken by the IT department?

- A. LAN optimization
- Real 55
- CompTIA CV0-001 Exam
- B. WAN optimization
- C. Load balancing
- D. Bandwidth compression

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 159**

Which of the following deployment models BEST meets the requirement to host some of a company's applications in a third party environment while retaining control over some of their data?

- A. Hybrid
- B. Private
- C. Community
- D. Public

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 160**

Management has implemented a policy which states that the OS, the swap file, and data must each reside on its own disk. The virtualization administrator has deployed a VM from a template that has one virtual disk configured. Which of the following steps MUST the administrator take to comply with policy?

- A. Add two virtual disks to the VM
- B. Create two partitions on the existing virtual disk
- C. Create three partitions on the existing virtual disk
- D. Add three virtual disks to the VM

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

An administrator is responsible for maintenance and support of servers in the cloud environment.

Real 56

CompTIA CV0-001 Exam

There are over 500 virtual servers spanning across ten physical hosts. The administrator deploys a new application server. The administrator allocated the appropriate virtual resources for the application. Users report slow response after the new server was deployed. Which of the following is the cause of this issue?

- A. Storage allocation on the guest OS
- B. Resource pooling mis-configuration
- C. Application licensing expiration
- D. Data segregation on the host OS

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 162**

Which of the following hypervisors will allocate resources MORE efficiently?

- A. Type I
- B. Proprietary
- C. Type II
- D. Open source

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 163**

A system administrator identified an issue on a critical server that is hosted in the cloud. The user community is affected by this issue, but is still able to work. A reboot is needed to rectify this issue. Which of the following steps should the administrator do FIRST to resolve this issue?

<http://www.gratisexam.com/>

- A. Contact the user community
- B. Establish a back-out plan
- C. Enter a change request
- D. Reboot the server

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 164**

An administrator is tasked with ensuring that any new virtual server deployed will meet the minimum requirements for the environment. Which of the following items would be included in a baseline for a VM template? (Select TWO).

- A. Database
- B. CPU
- C. Encryption keys

- D. Security patches
- E. IP address

**Correct Answer:** BD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 165**

A new host has been bought to be a part of a new cluster. The purchase order specifies this server has four physical CPUs with eight cores each. After the administrator boots the host, there are only 24 logical processors available for VM allocation. Which of the following BEST describes this problem?

- A. The server requires a firmware upgrade to version 8.2
- B. The BIOS does not have virtualization support features completely enabled
- C. The virtualization license is not the enterprise edition
- D. A CPU is dead on arrival or disabled on the motherboard

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 215**

An administrator has three VMs and each has been allocated two virtual CPUs. VM1 and VM2 have CPU shares set to normal priority. VM3 has CPU shares set to high priority. All three VMs are running CPU intensive workloads and begin to contend for CPU resources. If VM1 and VM2 are effectively given 1600 MHz each, which when combined represents 50% of the available processing power, VM3 will be given:

- A. 1600 MHz.
- B. 1800 MHz.
- C. 2400 MHz.
- D. 3200 MHz.

**Correct Answer:** D

Real 75

CompTIA CV0-001 Exam

Anne, an administrator, receives an alert indicating a disk failure on a highly available server with a local RAID 5 array. When checking the server, Anne confirms a flashing amber light on one of the disks. Which of the following is the correct procedure for replacing this drive?

- A. Remove the old drive, reboot the server, and access the RAID controller. Rebuild the array to RAID 6, and then add the new drive for parity.
- B. Remove the old disk while the server is powered on and operational and replace with a new drive.
- C. Remove the old drive, reboot the server, and access the RAID controller. Rebuild the array to RAID 1, and then add the new drive for parity.
- D. Power off the server and replace with a new drive.

**Correct Answer:** B

**Section:** (none)

**QUESTION 223**

An administrator is designing a VM cluster to support a new testing department in the company. This department will require high availability and the ability to migrate VMs with little impact to other network functions within the department. The infrastructure available for the department supports a 1GB internal backbone upon which virtual switches are being configured. Which of the following network designs would meet the criteria for the department?

- A. Assign the migration VLAN, management VLAN and storage VLAN on one virtual switch port and a client VLAN on a separate virtual switch port
- B. Assign the migration VLAN, management VLAN and client VLAN on one virtual switch port and assign the storage VLAN on a separate virtual switch port
- C. Assign the migration VLAN and client VLAN on one virtual switch port, and the management VLAN and storage VLAN on one virtual switch port
- D. Assign the migration VLAN, management VLAN, client VLAN and storage VLAN all on separate virtual switch ports

**Correct Answer:** D

#### QUESTION 283

The corporate security department is recommending that the administrator deploys Type I hypervisor versus Type II. Which of the following is a security concern in regards to deploying a Type II hypervisor?

- A. Human error
- B. Performance benchmarks
- C. Additional software
- D. Administration time

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### QUESTION 284

Which of the following is a concern when migrating from a private cloud to a public cloud?

- A. Storage
- B. Limited visibility
- C. Security
- D. Performance

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 285**

During the company's last DR exercise, the administrator noticed that the backup site (Site B) was responding 35% slower to ICMP packets than the primary site (Site A). Which of the following tests can help the administrator determine the root cause of a slow network?

Real 99

CompTIA CV0-001 Exam

- A. Latency test
- B. Bandwidth test
- C. Load balancing test
- D. Replication test

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 286**

Which of the following is the BEST technique an administrator can use to keep copies of various VM states while servers are online?

- A. Cold backup
- B. Snapshot
- C. Clone

D. Disk image

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 287**

Which of the following would be a good reason to perform a V2V migration?

- A. Network vendor change
- B. Host vendor change
- C. Hypervisor vendor change
- D. Storage vendor change

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 288**

Which of the following are SAN protocols? (Select TWO).

- A. Fibre Channel
- Real 100
- CompTIA CV0-001 Exam
- B. iSNS
- C. NFS
- D. iSCSI
- E. TCP/IP
- F. CIFS

**Correct Answer:** AD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 289**

An administrator has access to the following tools: ping, tracert, ipconfig/ifconfig, and route. All of these can be used to troubleshoot which of the following?

- A. Zoning connections
- B. iSCSI connections
- C. Fibre channel connections
- D. FCoE

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 290**

Virtual switches are:

- A. Virtualized network switching devices.
- B. Used to differentiate network traffic with tags.
- C. Virtual machines that are on the same network.
- D. Physical switches running on the same network with virtual machines.

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 291**

The BEST way to compare daily performance metrics against a "normal" operational metric is to first establish:

Real 101

CompTIA CV0-001 Exam

- A. A standard metrics process.
- B. An operational baseline.
- C. An operational goal.
- D. An analysis formula.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 292**

After a sudden spike in traffic Anne, an administrator, notices many internal IP addresses are sending traffic to an external web server belonging to another company. Which of the following attacks may she be witnessing from her network?

- A. Phishing
- B. Man-in-the-middle
- C. Vishing
- D. Denial of service

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 293**

Which of the following is often used by a certificate to keep the contents of the page confidential?

- A. 3DES
- B. AES
- C. RSA
- D. RC4

**Correct Answer:** C

**Section:** (none)

## **Explanation**

### **Explanation/Reference:**

Explanation:

### **QUESTION 294**

An administrator is tasked with encrypting all Personally Identifiable Information (PII) within a cloud based database. Which of the following types of encryption will ensure that ONLY this type of information is encrypted while the rest of the database remains unencrypted?

Real 102

CompTIA CV0-001 Exam

- A. File and folder encryption
- B. Transport encryption
- C. Hard drive encryption
- D. Table encryption

**Correct Answer: D**

**Explanation**

### **Explanation/Reference:**

Explanation:

### **QUESTION 295**

Which of the following would be a deciding factor when choosing a multi-tenant cloud environment over a locally hosted virtual environment?

- A. Security
- B. Cost of ownership
- C. Litigation hold
- D. Standardization

**Correct Answer: B**

**Section: (none)**

**Explanation**

### **Explanation/Reference:**

Explanation:

### **QUESTION 296**

A company decided to go with a cloud-based hosted email solution across all offices and wishes to make the transition as seamless as possible. Which of the following methods would provide the MOST seamless transition for end users?

- A. Non-SSL federation
- B. Access controls
- C. Multi-factor authentication
- D. Single sign-on

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 297**

A software development team is looking for a sandbox environment to test new releases before deploying to production and has requested several virtual machines for this purpose. Which of the

Real 103

CompTIA CV0-001 Exam

following virtual components could be utilized to help isolate these virtual machines from the production infrastructure?

- A. Shared storage
- B. One virtual CPU per virtual machine
- C. Shared memory
- D. Virtual NICs on a different network

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 298**

Which of the following protocols would allow data to be transferred securely through the cloud?

- A. HTTP

- B. SMTP
- C. DHCP
- D. SFTP

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 299**

Which of the following security methods would be used to harden a switch?

- A. IDS
- B. ACL
- C. VPN
- D. VLAN

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 300**

A round robin is an example of which of the following methods of network optimization?

Real 104

CompTIA CV0-001 Exam

- A. LUN masking
- B. Load balancing
- C. Subnetting
- D. Multipathing

**Correct Answer:** B

**Section:** (none)

**QUESTION 301**

Which of the following is a boot type that requires a NIC when provisioning a hypervisor on bare metal?

- A. SCSI
- B. PXE
- C. IDE
- D. ISO

**Correct Answer: B**

**Section: (none)**

**Explanation****Explanation/Reference:**

Explanation:

**QUESTION 302**

An administrator adds a new virtualization host to an existing cluster but is unable to move existing VMs to the new host. Which of the following is MOST likely to be a reason for the VM mobility failure?

- A. There are too many connections to the iSCSI LUN.
- B. Minimum memory configuration has not been met in the system.
- C. The host has not been added to the resource pool.
- D. Different CPU architectures are being used.

**Correct Answer: D**

**Section: (none)**

**Explanation****Explanation/Reference:**

Explanation:

**QUESTION 303**

A storage administrator has just partitioned storage to several of the servers. Another layer of

Real 105

CompTIA CV0-001 Exam

security has been added to the storage access to complement the fabric zoning. Which of the following layers of security did the administrator implement on the storage array?

- A. Disk encryption
- B. CHAP authentication
- C. LUN masking
- D. End-to-end encryption

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 304**

Multipathing achieves which of the following high availability objectives? (Select TWO).

- A. Redundancy
- B. Site mirroring
- C. Fault tolerance
- D. Recovery point objective
- E. Replication

**Correct Answer: AC**

**Section: (none)**

**Explanation**

**QUESTION 309**

The IT department of a company has received many calls concerning slow response time from a common application. The administrator can develop a solution after diagnosing the symptoms by using:

- A. New virtual resources.
- B. Customer surveys.
- C. Performance and monitoring tools.
- D. Scheduled maintenance time.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 310**

The Chief Information Officer (CIO) wants to know how secure the company's new IT system is. The Information Assurance Officer (IAO) decides that an external

third party test of the system prior to deployment will provide an objective assessment for the CIO. Which of the following methods should be used in the scenario to test the system?

- A. Account lock out test
- B. Penetration testing
- C. Lockdown testing
- D. Hacker testing

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 311**

A system engineer is asked to design a new department infrastructure to be added to the existing company cloud environment. Besides the infrastructure components upon which the new department will be built, the engineer has to account for which of the following network aspects of the system?

- A. Storage allocation
  - B. IP planning
  - C. DHCP server
  - D. Load balancing
- Real 108  
CompTIA CV0-001 Exam

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 312**

Which of the following is the BEST method to isolate iSCSI network traffic?

- A. WWPN Zoning
- B. WWNN Zoning
- C. Dedicated VLANs

D. LUN Masking

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 313**

An administrator recently deployed a critical web server that only uses HTTPS in the DMZ. All the ports are open on the server. Which of the following should the administrator perform to harden this server?

- A. Block port 53 on the proxy server
- B. Block port 80 on the server firewall
- C. Block port 443 on the server firewall
- D. Block port 443 on the network firewall

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 314**

Which of the following statements defines fault tolerance in a public cloud environment?

- A. Network packets reached their destination after a VLAN goes offline.
- B. A server stays operational after a hard drive failure.
- C. An application is available 24 x 7 without any downtime.
- D. VMs are automatically moved after a host completely fails.

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 339**

An administrator has created a VM on a new virtualization host and notices network speeds are significantly slower than expected. Upon further review, the VM is using a legacy virtual driver for the NIC. Which of the following should the administrator perform?

- A. Change the default gateway to point to a faster router
- B. Change the router port to support spanning tree
- C. Install guest VM tools
- D. Add an additional virtual NIC

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 340**

A company would like to virtualize as many servers as possible. Which of the following would make a server that requires a connection to a dot matrix printer a viable candidate?

- A. Type I hypervisor
- B. Port interface
- C. Port mapping
- D. Type II hypervisor

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 341**

Joe, an administrator, has just added a new VM to a production network. Joe's workstation is connecting into the environment from a VPN. Other VMs on the same subnet are open to connections, however the new VM is inaccessible by RDP, SSH, or ping from Joe's workstation.

Real 118

CompTIA CV0-001 Exam

Joe can ping other systems on the production network while connected into the new VM by console. Which of the following is the MOST likely source of the problem?

- A. VPN gateway
- B. Firewall ACL
- C. VLAN tag
- D. SSL certificate

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 342**

Disk read/write performance on a VM is very low. The VM storage is hosted on an iSCSI LUN on a RAID 5 array with Fibre Channel drives. Which of the following is the BEST explanation for this poor performance?

- A. QoS should be implemented to eliminate application chatter
- B. Inadequate Fibre Channel switch capacity
- C. Too few NICs in the host link team
- D. Multipathing software is configured incorrectly on the VM

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 343**

Joe, a new administrator, is asked to enter his mobile phone number into a log management system. Which of the following alert features is MOST likely being edited?

- A. Syslog
- B. SNMP
- C. APM
- D. SMS

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

Real 119

CompTIA CV0-001 Exam

**QUESTION 344**

New servers were purchased specifically for virtualization capabilities. However, the hypervisor of choice cannot find compatible processors on the new servers. Which of the following would a system administrator MOST likely need to configure to enable virtualization features for these systems?

- A. IPMI
- B. RAM
- C. BIOS
- D. HBAs

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 345**

A system administrator is asked to build ten servers and is given only 4U of rack space in the company datacenter. Of which of the following virtualization benefits is the administrator MOST likely taking advantage?

- A. Availability
- B. Consolidation
- C. Portability
- D. Scalability

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 346**

A new network engineer logs into a router and discovers multiple and separate routing tables configured. This router MOST likely has which of the following items configured?

- A. Supernetting
- B. VPN
- C. RIP
- D. VLAN

**Correct Answer: C**

Explanation:

**QUESTION 347**

A network engineer continuously runs traceroute at different network utilization levels. Which of the following is MOST likely being tested?

- A. Service Performance
- B. Application Delivery
- C. Load Balancing
- D. Replication

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 348**

Anne, an administrator, is unable to bring her system back up after installing a patch onto the live system. Which of the following should Anne do in order to get the

system back up and running?

- A. Perform a V2V migration
- B. Restore the last backup on the system
- C. Run an incremental backup on the system
- D. Run a full backup on the system

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 349**

An administrator is building a VM for a department whose requirements mandate that a particular vendor's application run on one physical processor. In order to ensure that this requirement is met while ensuring optimal performance, which of the following should the administrator configure?

- A. Memory affinity
  - B. Licensing
  - C. CPU hyperthreading
  - D. CPU affinity
- Real 121  
CompTIA CV0-001 Exam

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 350**

A department requires segregated access due to project requirements. Anne, the engineer, has designated storage and a separate resource pool for VMs through a new VLAN. She wants to ensure a more secure environment for this department within the company cloud. Which of the following should Anne implement?

- A. LUN masking
- B. Multipathing
- C. Virtual switch

D. Virtual desktop

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 351**

A user in the human resource (HR) department has reported slow response time to the company personnel database when trying to process new hires to the company. The administrator reviews the department VMs and resource pools to determine the cause of the slow access. The memory and CPU for the host machines in this resource pool have recently been upgraded. Other HR users that do not access the database are not reporting any problems. Which of the following is the cause of the slow response time?

- A. NIC failure
- B. Disk latency
- C. Bandwidth throttling
- D. CPU wait time

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 352**

A hypervisor is unable to access its fibre-channel storage. Which of the following is the reason?

Real 122

CompTIA CV0-001 Exam

- A. iSCSI initiator configuration
- B. Obfuscation
- C. LUN masking
- D. Access control lists

**Correct Answer:** C

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 353**

A virtualized mission critical application requires a guaranteed level of resource utilization. Which of the following should be implemented?

- A. Licensing
- B. Resource pooling
- C. Soft limit
- D. Reservations

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 354**

Joe, an administrator, is responsible for the maintenance and support of all virtual servers in his environment. He needs to ensure that access to files and folders is optimized. Which of the following should Joe perform to accomplish this goal?

- A. Schedule weekly defrags
- B. Archive old data annually
- C. Perform daily full backups
- D. Implement file compression

**Correct Answer: A**

**QUESTION 355**

An administrator needs to add more guests in a virtual environment. Which of the following **MUST** the administrator take into account before adding additional VMs

to a host? (Select TWO).

Real 123  
CompTIA CV0-001 Exam

- A. Amount of RAM
- B. Number of virtual CPUs
- C. Number of CPU cores
- D. Number of power supplies
- E. Number of network cards

**Correct Answer:** AC

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 356**

Which of the following BEST explains why remote access works on a Type I host but not on a Type II host, when both are deployed in a single fully functioning environment as part of a hybrid cloud implementation?

- A. Type II host has backups, replication, and heartbeat.
- B. Type II host firewall is blocking port 22.
- C. Type II host has only one 10GB interface enabled.
- D. There is only one network per host and all traffic goes through it.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 357**

Which of the following would MOST likely require a cold migration?

- A. Moving VMs between hosts on different continents
- B. Moving VMs between hosts with different RAM configurations

- C. Moving VMs between hosts with different CPU architectures
- D. Moving VMs between hosts in different network segments

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 358**

Which of the following events will force a storage migration in a virtual environment?

Real 124

CompTIA CV0-001 Exam

- A. Reaching the end of the CPU hardware lifecycle
- B. Reaching the end of the NIC hardware lifecycle
- C. Reaching the end of the SAN hardware lifecycle
- D. Reaching the end of the RAM hardware lifecycle

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 359**

An administrator has been tasked with reducing costs by consolidating a firewall, proxy server, and NIPS. Which of the following risks does this change introduce?

- A. NIC failure
- B. Disk failure
- C. CPU failure
- D. Single point of failure

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 360**

In which of the following situations would an administrator use VLANs on a network? (Select TWO).

- A. Create distinct broadcast domains
- B. Reduce network traffic on the WAN
- C. Reduce network traffic on the MAN
- D. Optimize traffic for an IaaS provider
- E. Group related servers together on the same subnet

**Correct Answer:** AE

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 361**

Real 125

CompTIA CV0-001 Exam

In which of the following situations would a network administrator use TCP port 3389?

- A. The network administrator is in the datacenter and next to the KVM switch
- B. The network administrator needs to access a server at a separate location
- C. The network administrator is working on a failed server and replacing hard drives
- D. The server is down and the network administrator is not able to connect to the server

**Correct Answer:** B

**Section:** (none)

**Explanation**

**QUESTION 362**

An administrator is installing a new Unix-based server and will be creating the LUNs for the database. The database needs to have two LUNs. Which of the

following should the administrator use for rapid provisioning?

- A. Recovery CD
- B. Logical Volume Manager
- C. fdisk
- D. expart

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 363**

A cloud service provider is associating chargeback values with their storage tiering solution as follows:

Tier 1 - RAID 10 on SAS 15,000 RPM disks. Sold at \$0.25/GB

Tier 2 - RAID \_\_\_?\_\_\_ on SAS 15,000 RPM disks. Sold at \$0.21/GB

Tier 3 - RAID 5 on SAS 10,000 RPM disks. Sold at \$0.17/GB

Tier 4 - RAID 0 on SATA 10,000 RPM disks. Sold at \$0.12/GB

Storage tiering is arranged by disk and RAID types and the cumulative benefits of both. The cloud service provider administrator is attempting to determine which RAID type to configure for Tier 2 storage.

Real 126

CompTIA CV0-001 Exam

Which of the following RAID types should the administrator use for Tier 2 storage?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

**Correct Answer: C**

**QUESTION 369**

A company has tasked an administrator with virtualizing the server farm and wants to adhere to the principle of n+1. The administrator has analyzed the resource consumption of the current server farm and observes the following:

5 application servers consuming 12 GB RAM each.

4 web servers consuming 2 GB RAM each.

10 terminal servers consuming 6 GB RAM each.

Which of the following is the MINIMUM necessary to meet the requirements of the new host cluster?

- A. 1 host with 196GB RAM
- B. 2 hosts with 64GB RAM each
- C. 3 hosts with 128GB RAM each
- D. 4 hosts with 24GB RAM each

**Correct Answer: C**
