Exam A

QUESTION 1

While editing a file in vi, an administrator realizes that the wrong file is being changed. Which of the following vi command sequences will allow the administrator to quit without saving any changes?

- A. :Q!
- B. :q!
- C. :w!
- D. :wq!

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 2

To allow a regular user account to mount and unmount a filesystem (for instance, a cdrom or floppy), which of the following options will need to be added to the corresponding line in /etc/fstab?

- A. nouidchk
- B. alluser
- C. user
- D. auto

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 3

Which of the following commands will print a list of usernames (first column) and their corresponding user id (uid, third column) from /etc/passwd?

- A. cut -d: -f1,3 /etc/passwd
- B. chop -c 1,3 /etc/passwd

- C. tac 1-3 /etc/passwd
- D. fmt -u /etc/passwd

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

important answer

QUESTION 4

Which of the following would be accomplished if the below line is run as root? `chown -R bert /home/bert/*`

- A. Nothing, this command is invalid.
- B. It would revoke bert's ownership from the home directory to root.
- C. It would change user ownership of all files in /home/bert to bert.
- D. It would set the group ownership of the directory /home/bert to bert.
- E. It would set ownership of all files and subdirectories in /home/bert to bert.

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

QUESTION 5

In GRUB's configuration file an administrator finds the following line: `root (hd1,4)` Which of the following is the corresponding device name on a Linux system?

<http://www.gratisexam.com/>

- A. /dev/hda4
- B. /dev/hda5

- C. /dev/hdb4
- D. /dev/hdb5

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 6

An administrator wants to preview where the package file, apache.xml.i386.rpm, will install its files before installing it. Which of the following commands should the administrator issue?

- A. rpm -qp apache.xml.i386.rpm
- B. rpm -qv apache.xml.i386.rpm
- C. rpm -ql apache.xml.i386.rpm
- D. rpm -qpl apache.xml.i386.rpm

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 7

In order to append the output of ls to a file called bazz, which of the following command lines would an administrator use?

- A. ls > bazz
- B. ls >& bazz
- C. ls &> bazz
- D. ls >> bazz

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 8

After modifying LILO's configuration file, which of the following commands should be run for the changes to take effect?

- A. kill -HUP `pidof lilo`
- B. lilo-install
- C. lilo
- D. reboot

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 9

Which of the following sed commands will replace all instances of the string foo with the string foobar changing the file file1.txt in place?

- A. sed 's/foo/foobar/g' file1.txt
- B. sed 's/foo/foobar/g' file1.txt > file1.txt
- C. sed 's/foo/foobar/g' file1.txt | file1.txt
- D. sed -i 's/foo/foobar/g' file1.txt
- E. sed -i 's/foo/foobar/g' file1.txt > file1.txt

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 10

Which of the following keys should an administrator press to switch to normal mode in vi?

- A. Alt
- B. Esc
- C. Ctrl

D. Shift

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 11

Which of the following commands will print line numbers before each line in a file?

A. ln

B. nl

C. cat -e

D. numline

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 12

An administrator wishes to kill a process with a PID of 123. Which of the following commands will allow the process to "clean up" before exiting?

A. kill -1 123

B. kill -9 123

C. kill -15 123

D. kill -17 123

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 13

Which of the following is the purpose of the Bash built-in export command?

- A. To allow disks to be mounted remotely.
- B. To run a command as a process in a sub-shell.
- C. To make the command history available to sub-shells.
- D. To setup environment variables for applications.
- E. To share NFS partitions for use by other systems on the network.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 14

An administrator is having some trouble with a disk partition and needs to do maintenance on this partition. The administrator's users home directories are on it and several are logged in. Which of the following commands would disconnect the users and allow the administrator to safely execute maintenance tasks?

- A. telinit 1
- B. shutdown -r now
- C. killall -9 inetd
- D. /bin/netstop --maint
- E. /etc/rc.d/init.d/network stop

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

updated answer

QUESTION 15

Bob accidentally created the subdirectory \bobsdir in his home directory. He tried to remove the subdirectory with the command rmdir \bobsfile only to receive the error, "No such file or directory." . Which of the following commands will remove the directory?

- A. rmdir '~bob/\bobsdir'
- B. rmdir "~bob/\bobsdir"

- C. `rmdir ~bob/'bobsdir'`
- D. `rmdir ~bob/\bobsdir`
- E. `rmdir ~bob/\\bobsdir`

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

QUESTION 16

Which of the following commands will print the inode usage on each mounted filesystem?

- A. `du -i`
- B. `df -i`
- C. `lsfs -i`
- D. `printfs -i`

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 17

Which of the following commands will uninstall a package but leave its configuration files in case a package is re-installed?

- A. None, no command will do this.
- B. `dpkg -s pkgname`
- C. `dpkg -L pkgname`
- D. `dpkg -P pkgname`
- E. `dpkg -r pkgname`

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

perfect answer

QUESTION 18

How does an administrator get a list of files that have been installed from a dpkg package?

- A. dpkg -l pkgname
- B. dpkg -C pkgname
- C. dpkg -s pkgname
- D. dpkg -S pkgname
- E. dpkg -L pkgname

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

QUESTION 19

Which of the following command line redirection characters instructs the shell to read from the current input source until a specific word, on a separate line and without and trailing spaces, is reached?

- A. <<
- B. <|
- C. !<
- D. &<<

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 20

In bash, inserting 1>&2 after a command redirects:

- A. standard error to standard input.
- B. standard input to standard error.
- C. standard output to standard error.
- D. standard error to standard output.
- E. standard output to standard input.

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 21

In compliance with the FHS, in which of the following places are man pages typically found?

- A. /usr/share/man
- B. /opt/man
- C. /usr/doc/
- D. /var/pkg/man
- E. /usr/local/man

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 22

Select the line that BEST represents what permissions the /etc/passwd file should have.

- A. -rw----- 1 root root 531 Jun 5 22:45 /etc/passwd
- B. -rw-r--r-- 1 root root 531 Jun 5 22:45 /etc/passwd
- C. -rw-r--r-- 1 1 1 531 Jun 5 22:45 /etc/passwd
- D. All answers listed are not correct.
- E. All answers listed are correct.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 23

What command with all options and/or parameters will send the signal USR1 to any executing process of program apache2?

Correct Answer: Answer: killall -s SIGUSR1 apache2, killall -s USR1 apache2,killall -SIGUSR1 apache2,killall -USR1 apache2

Section: (none)

Explanation

Explanation/Reference:

QUESTION 24

The system configuration file named _____ is commonly used to set the default runlevel. (Please provide the fill name with full path information).

Correct Answer: Answer: /etc/inittab

Section: (none)

Explanation

Explanation/Reference:

correct answer

QUESTION 25

In which directory must definition files be placed to add additional repositories to yum?

Correct Answer: Answer: /etc/yum.repos.d,/etc/yum.repos.d/,yum.repos.d,yum.repos.d/

Section: (none)

Explanation

Explanation/Reference:

QUESTION 26

The dpkg-____ command will ask configuration questions for a specified package, just as if the package were being installed for the first time.

Correct Answer: Answer: reconfigure

Section: (none)

Explanation

Explanation/Reference:

QUESTION 27

Which command is used to enable disk quotas on a particular filesystem? (Provide only the command, with no options or parameters)

Correct Answer: Answer: /sbin/quotaon,quotaon

Section: (none)

Explanation

Explanation/Reference:

QUESTION 28

An administrator has downloaded an image file of a boot floppy disk to a hard drive. What is the BEST utility to create a boot floppy from the disk image? (Specify a single command without options.)

Correct Answer: Answer: /bin/dd,dd

Section: (none)

Explanation

Explanation/Reference:

QUESTION 29

The /etc/_____ file lists currently mounted devices.

Correct Answer: Answer: mtab

Section: (none)

Explanation

Explanation/Reference:

QUESTION 30

To prevent users from being able to fill up the / partition, the _____ directory should be on a separate partition if possible because it is world writeable.

Correct Answer: Answer: /tmp,tmp

Section: (none)

Explanation

Explanation/Reference:

QUESTION 31

The priority of any process can range from -20 to _____. (Provide only the numerical value).

Correct Answer: Answer: +19,19

Section: (none)

Explanation

Explanation/Reference:

QUESTION 32

_____ /dev/sda3 will create a swap area on the device /dev/sda3.

Correct Answer: Answer: /sbin/mkswap,mkswap

Section: (none)

Explanation

Explanation/Reference:

QUESTION 33

What option, when passed to the yum command, will update the entire system? (Specify ONLY the option name with no additional parameters).

Correct Answer: Answer: update

Section: (none)

Explanation

Explanation/Reference:

QUESTION 34

What command will print the shared libraries for the file /usr/lib/libpng12.so? (Provide the full command with library name but without any other options or parameters).

Correct Answer: Answer: /usr/bin/ldd/usr/lib/libpng12.so,ldd/usr/lib/libpng12.so

Section: (none)

Explanation

Explanation/Reference:

QUESTION 35

What umask value will result in the default access permissions of 600 (rw-----) for files and 700 (rwx-----) for directories? (Provide only the numerical umask value).

Correct Answer: Answer: 0077,077

Section: (none)

Explanation

Explanation/Reference:

QUESTION 36

An administrator is formatting a single hard disk for a Linux install. What is the maximum number of primary partitions that can be created?

Correct Answer: Answer: 4,four

Section: (none)

Explanation

Explanation/Reference:

QUESTION 37

Which program finds only files that are in an administrator's PATH?

Correct Answer: Answer: /usr/bin/which,which

Section: (none)

Explanation

Explanation/Reference:

valid answer

QUESTION 38

Which command will disable paging and swapping on a device? (Provide only the command with no additional options or parameters).

Correct Answer: Answer: /sbin/swapoff,swapoff

Section: (none)

Explanation

Explanation/Reference:

QUESTION 39

An administrator suspects that a new Ethernet card might be conflicting with another device. Which file should the administrator check within the /proc tree to learn which IRQs are being used by which kernel drivers? (Please enter only a single command and do not enter duplicate answers in this field.)

Correct Answer: Answer: /proc/interrupts,interrupts

Section: (none)

Explanation

Explanation/Reference:

QUESTION 40

To change the priority of a running process, an administrator should use the ____ command. (Specify command only with no options.)

Correct Answer: Answer: /usr/bin/renice,renice

Section: (none)

Explanation

Explanation/Reference:

QUESTION 41

An administrator has downloaded an image file of a boot floppy disk to a hard drive. What is the BEST utility to create a boot floppy from the disk image? (Specify a single command without options.)

Correct Answer: Answer: /bin/dd,dd

Section: (none)

Explanation

Explanation/Reference:

QUESTION 42

In the vi editor, what vi command will copy (but not paste) from the current line at the cursor and the following 16 lines (17 lines total)? Enter the correct vi command without spaces. (Please enter only a single answer.)

Correct Answer: Answer: 17y,17y,17yy,17yy

Section: (none)

Explanation

Explanation/Reference:

QUESTION 43

What command with all options and/or parameters will send the signal USR1 to any executing process of program apache2?

Correct Answer: Answer: killall -s SIGUSR1 apache2, killall -s USR1 apache2,killall -SIGUSR1 apache2,killall -USR1 apache2

What operating system tools can be used to collect capacity planning data? (Choose two.)

- A. lsmod
- B. vmstat
- C. iostat
- D. fuser

Correct Answer: BC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 45

In order for pam_ldap to be capable of changing a user's password in Active Directory, the pam_password parameter must be set to

- A. win
- B. ldap
- C. ad
- D. active_directory

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

modified answer

QUESTION 46

OpenLDAP is capable of using the _____ framework to provide integrity and confidentiality protections.

- A. TLS,SASL,SSL
- B. There is no such thing.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 47

In capacity planning exercise, what tools assist in identifying processes of interest from other processes? (Choose two.)

- A. w
- B. pstree
- C. acpid
- D. lsof

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 48

What type of object class is sambaSamAccount?

- A. auxiliary
- B. structural
- C. extended
- D. abstract

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 49

Which of the following resources would be measured for capacity planning? (Choose two.)

- A. CPU Usage
- B. Disk Usage
- C. Application load time
- D. Memory usage

Correct Answer: AD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 50

After finishing configuration of a UNIX client to authenticate with a Microsoft Active Directory server, login attempts are unsuccessful. Which of the following is most likely the cause?

- A. The slapd daemon is not running
- B. The user account in Active Director has the remote login setting disabled
- C. The PAM library is searching the directory with the default search filter
- D. Unix Client support is disabled in the Active Directory Configuration

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 51

Which of the following procedures will test the TLS configuration of your LDAP server?

- A. Verify the TLS negotiation process in the /var/log/ldap_auth.log file
- B. Run the ldapsearch command with the -ZZ option, while watching network traffic with a packet analyzer
- C. Run the slapcat command, while watching network traffic with a packet analyzer
- D. Verify the TLS negotiation process in the /var/log/auth.log file
- E. Run the ldapsearch command with the -x option, while watching network traffic with a packet analyzer

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 52

Which attributes must be present when assigning the object class sambasamaccounts to a particular user? (Choose two.)

- A. sambaLMPassword
- B. sambasid
- C. SambaNTPassword
- D. uid
- E. displayname

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 53

What operating system tools can be used to collect capacity planning data? (Choose two.)

- A. netstat
- B. tar
- C. sar
- D. route

Correct Answer: AC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 54

Which of the following resources would be measured for capacity planning? (Choose two.)

- A. Video driver performance
- B. System boot time
- C. Network I/O

D. Disk I/O

Correct Answer: CD

Section: (none)

Explanation

Explanation/Reference:

accurate answers

QUESTION 55

Which of the following correctly describes the method to add samba users to the LDAP directory?

- A. Create an LDIF file containing all required information, then use ldapmodd to add the samba related information to an existing posixaccount entry
- B. Use the smbpasswd -a command to add the samba user from the command line. This will add all required information to the LDAP directory
- C. First make sure that a POSIXAccount entry exists in the Directory for the user you want to add, then use smbpasswd -a to add the samba user from the command line
- D. Create an LDIF file containing all required information, then use ldapadd to add the information to the LDAP directory

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 56

Which ONE of the following parameters is used in the database on a slave server to direct clients that want to make changes to the LDAP database to the master server?

- A. updateuri
- B. updateserver
- C. updateref
- D. updated

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 57

Which are common procedures to implement samba with LDAP? (Choose two.)

- A. Compile OpneLDAP with support to samba authentication
- B. Include OpenLDAP core schema files into samba configuration directory
- C. Configure Samba password backend to point to OpenLDAP server
- D. Include the samba schema into OpenLDAP

Correct Answer: CD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 58

Which of the following ACL lines allows access to all hosts that have an IP Address that starts with 192.168.1?

- A. by ipaddress=192.168.1.
- B. by peername=192.168.1.*
- C. by peername=192.168.1
- D. by ipaddress=192.168.1.*

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 59

When performing a capacity planning exercise, when would taking measurements be most appropriate?

- A. During successful operation
- B. After an overload or an episode
- C. During an overload or an episode
- D. After replacing problematic hardware

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 60

In order to migrate usernames and passwords from a NIS server, the passwd and shadow files were used with a custom script to import the data to OpenLDAP. After properly creating a test workstation to authenticate against LDAP, the number of lines outputted from getent passwd are different from the number of the NIS client workstation. Which one of the following statements can be true?

- A. The OpenLDAP client is querying the NIS server on the wrong TCP/IP port
- B. The NIS database is not synchronized with passwd and shadow
- C. The NIS clients are not receiving the correct files from the server
- D. The OpenLDAP server creates some additional users that are show in getent
- E. The NIS clients are confused since OpenLDAP and NIS use the same port to communicate

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 61

In the following output, what resource is the program being observed using the most?

- A. Memory
- B. Disk I/O
- C. Network I/O
- D. CPU

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 62

When configuring LDAP to use certificates, which option should be used with the TLSVerifyClient directive to ask the client for a valid certificate in order to proceed normally?

- A. Allow
- B. Try
- C. Never
- D. Demand

<http://www.gratisexam.com/>

Correct Answer: D

Explanation

Explanation/Reference:

QUESTION 69

Which of the following arguments complete the command which will search for cn=ldapadmin OR ou=BR recursively in the directory?

Ldapsrch -LLL -h server -s sub -b "o=inc" "____"

- A. ((cn=ldapamin))(ou=BR))
- B. ((cn=ldapamin))(ou=BR)|)
- C. |(cn=ldapamin)|(ou=BR))
- D. ((cn=ldapamin)(ou=BR))
- E. ((cn=ldapamin))|(ou=BR))

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 70

Which command will instruct slurpd to process the replication error log in one-shot mode for the server 192.168.0.3?

- A. slurpd -r -o </path/to/replication/error/log
- B. slurpd -r -h 192.168.0.3 -o
- C. slurpd -r -o 192.168.0.3
- D. slurpd -r -f /path/to/replication/error/log -o
- E. slurpd -r /path/to/replication/error/log o

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

QUESTION 71

What strategy is used to initialize NIS maps?

- A. Start ypserver with the -new option

- B. Create the yp.conf configuration file then restart the NIS server process
- C. Create the nis.conf configuration file then restart the NIS server process
- D. Execute the make command from the /var/yp directory

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 72

What operating system tools can be used to collect capacity planning data? (Choose two.)

- A. iostat
- B. lsmod
- C. fuser
- D. vmstat

Correct Answer: AD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 73

Which of the following is the correct syntax for including a schema file in slapd.conf?

- A. include /usr/local/etc/openldap/schema/core.schema
- B. add /usr/local/etc/openldap/schema/core.schema
- C. permit /usr/local/etc/openldap/schema/core.schema
- D. allow /usr/local/etc/openldap/schema/core.schema

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 74

Which LDAP object class is used in a white pages implementation?

- A. OrganizationalRole
- B. InetOrgPerson
- C. WhitePageUser
- D. FriendlyPerson
- E. PosixAccount

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 75

Which command will perform a one-level search from the DN c=INC, for all entries whose organization's name begins with RioDeJaneiro?

- A. `ldapsearch -s sub -b "c=INC" -f "(o=RioDeJaneiro) (Description)"`
- B. `ldapsearch -LLL -b "c=INC" "(o=description)" RioDeJaneiro*`
- C. `ldapsearch -b "c=INC" -f (o=description,cn=RioDeJaneiro%)"`
- D. `ldapsearch -LLL -s one -b "c=INC" "(c=INC" "(o=RioDeJaneiro*)"`

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 76

Which option should be used to disable anonymous binds to your LDAP directory?

- A. `Disallow bind_simple`
- B. `Disallow bind_anon`
- C. `Disallow bind_anon_cred`

D. Disallow bind_simple_unprotected

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 77

What operating system tools can be used to collect capacity planning data? (Choose two.)

- A. lsmode
- B. vmstat
- C. fuser
- D. iostat

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 78

When configuring a syncprov provider slapd, which directives must be present in slapd.conf? (Choose TWO correct Answer)

- A. syncprov-sessionlog
- B. syncprov-overlay
- C. syncprov-checkpoint
- D. syncprov-errorlog

Correct Answer: AC

Section: (none)

Explanation

Explanation/Reference:

Explanation

The provider is implemented as an overlay, so the overlay itself must first be configured in slapd.conf (5) before it can be used. The provider has only two

configuration directives, for setting checkpoints on the contextCSN and for configuring the session log. Because the LDAP Sync search is subject to access control, proper access control privileges should be set up for the replicated content.

The contextCSN checkpoint is configured by the syncprov-checkpoint directive. Checkpoints are only tested after successful write operations. If operations or more than time has passed since the last checkpoint, a new checkpoint is performed. The session log is configured by the syncprov-sessionlog directive, where is the maximum number of session log entries the session log can record. When a session log is configured, it is automatically used for all LDAP Sync searches within the database. syncprov-checkpoint ops minutes This directive controls maintenance of the contextCSN which is normally a memory only value but is written to the database on normal server termination and loaded from the database during server start-up operations. The directive may be used to force the provider to write the contextCSN to the underlying database after a successful write operation after either ops write operations or more than minutes time have passed since the last contextCSN database update (or checkpoint). syncprov-checkpoint is disabled by default. This directive is designed to minimise the amount of consumer synchronization activity required in the event that the master (provider) DIT server crashes.

syncprov-nopresent TRUE | FALSE

If set to TRUE the Present phase of refreshing should be bypassed. This value should only be set TRUE for a syncprov instance used with a log database such as one managed using the accesslog overlay. The default is FALSE.

syncprov-reloadhint TRUE | FALSE

Indicates the overlay should honor the reloadHint flag in the Sync Control (Note certain version 2.3 clients did not set the reloadhint flag correctly). It must be set TRUE when using the accesslog overlay for delta-synchronization. The default is FALSE. reloadhint may be used by the consumer requesting the replication operation to indicate that it wishes to force a complete transfer of the DIT irrespective of any other settings or values - such as the Sync Cookie.

syncprov-sessionlog ops

Indicates that a session log for recording information about write operations made on the database should be maintained by the provider. Ops specifies the number of operations that are recorded in the log. All write operations (except Adds) are recorded in the log. When using the session log, it is helpful to set an eq index on the entryUUID attribute in the underlying provider database

QUESTION 79

When importing the contents of one directory into another, the administrator is adding entries with the slapadd command. Which of the following statements are true? (Choose three.)

- A. slapindex must be run after slapadd, because the slapadd operation will not write to index files
- B. The changes in the LDIF file will not be replicated with slurpd
- C. The slapd process must be stopped before running slapadd
- D. Slapstart must be run after creating the entries
- E. All slave servers must be listed in the LDIF file for the entries to be replicated

Correct Answer: ABC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 80

After analyzing a slapd.conf file, an administrator noted that the rootdn and rootpw directives are not present. Where is the LDAP administrator account defined?

- A. The account is defined in the file /etc/ldap/secret
- B. It is using the default account admin with the password admin
- C. The account is defined by an ACL in slapd.conf
- D. It is using the default account admin with a null password
- E. The account is defined in the file /etc/ldap.root.conf

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 81

Which of the following steps should be followed when configuring a slave slapd server? (Choose three.)

- A. Do not add a relogfile directive to slapd.conf
- B. Add a relogfile directive to slapd.conf
- C. Do not add a replica directive to slapd.conf
- D. Add a replica directive to slapd.conf
- E. Add an updatedn directive to slapd.conf

Correct Answer: ACE

Section: (none)

Explanation/Reference:

QUESTION 88

Which technique could be used in analysing capacity planning data?

- A. Combinatorics
- B. Category Theory
- C. Gate Control Theory
- D. Queueing Theory

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

Explanation

Queueing Theory

Analytic models are based on a set of formulas and computational algorithms used to generate performance metrics from model parameters. Such models are normally based on the theory of queueing networks and are used to predict the performance of a system as a function of the system's description and workload parameters.

Category Theory

Jack Park writes See <http://www.tunes.org> in particluar the paper on the Arrows system by Brian Rice. IMHO this is the software project closest to the Rosen's ideas (which use Category Theory as a Mathematics of Knowledge)

QUESTION 89

All entries in an LDAP directory must have the _____ attribute.

Correct Answer: Answer: OBJECTCLASS

QUESTION 150

After modifying the indexes for a database in slapd.conf and running slapindex- the slapd daemon refuses to start when its init script is called. What is the most likely cause of this?

- A. The indexes are not compatible with the init script
- B. The init script is starting slapd as an ordinary user and the index files are owned by root
- C. The init script has identified one or more invalid indexes
- D. The init script can't be run after executing slapindex, without first signing the indexes with slapsign

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 151

An administrator notices that searches are being processed sequentially and taking a long time to complete. What should be done to speed up the searches?

- A. Refine the search filter
- B. Use the -binarytreesearch option with ldapsearch
- C. Use the -fuzzy option with ldapsearch
- D. Add the correct indexes in slapd.conf, stop the server and run slapindex

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 152

When performing a capacity planning exercise, when would taking measurements be most appropriate?

- A. After an overload or an episode
- B. After replacing problematic hardware
- C. During successful operation
- D. During an overload or an episode

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 153

Which of the following tools are used to measure memory usage? (Choose three.)

- A. vmstat
- B. sar
- C. top
- D. pstree
- E. mpstat

Correct Answer: ABC

Section: (none)

Explanation

Explanation/Reference:

valid answers

QUESTION 154

When configuring a UNIX client to authenticate against a Microsoft Active Directory server, the top-level entry in the domain is dc=ad,dc=example,dc=com. What is the default DN of the container where users and groups are stored?

- A. CN=USERS,DC=DA,DC=EXAMPLE,DC=COM
- B. CN=EXAMPLE,DC=AD,DC=USERS,DC=COM
- C. CN=USERS,DC=AD,DC=EXAMPLE,DC=COM
- D. CN=USERS,DC=AD,DC=EXAMPLE,DC=ORG

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 155

What settings may a user enter when configuring Microsoft Outlook to connect to an LDAP white pages services? (Choose three.)

- A. Alias dereferencing options
- B. SASL configuration
- C. Search base
- D. Maximum number of entries to return on a successful search
- E. Search timeout

Correct Answer: CDE

Section: (none)

Explanation

Explanation/Reference:

QUESTION 156

.When assigned to the ref attribute for ou=people,dc=example,dc=com, which of the following values will create a subordinate knowledge link to slave.example.com?

- A. ldap//slave.example.com?ou=people,dc=example,dc=com
- B. ldap//slave.example.com/ou=people,dc=example,dc=com
- C. ldap//slave.example.com,ou=people,dc=example,dc=com
- D. ldap//slave.example.com ou=people,dc=example,dc=com

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 157

Which statements are true of object classes in an LDAP directory? (Choose two.)

- A. An entry can't have more than one auxiliary object class
- B. Auxiliary object classes - When used on their own - provide access to extended schema
- C. An entry can't have more than one structural object class
- D. Abstract object classes are no longer officially support by the LDAP protocol
- E. Once an entry has been created, its structural object class can't be changed without re-creating the entry

Correct Answer: CE

Section: (none)

Explanation

Explanation/Reference:

QUESTION 158

What is the goal of capacity planning? (Choose three.)

- A. Sizing computers for a specified load
- B. Ensuring sufficient resources for growth
- C. Diagnosing capacity problems
- D. Troubleshooting a software problem
- E. Selecting a computer vendor

Correct Answer: ABC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 159

Select the INFCORRECT statement regarding the LDIF file format

- A. In the file, a blank line separates one entry from another one
- B. The LDIF file accepts any type of file encoding

- C. If the attribute contains binary data, some specific configurations must be made for this entry
- D. It must contains a "dn" line (or distinguished name), that indicates where the attributes listed in the following lines of the file must be added

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 160

Which of the following tools are used to measure memory usage? (Choose three.)

- A. pstree
- B. vmstat
- C. mpstat
- D. top
- E. sar

Correct Answer: BDE

Section: (none)

Explanation

Explanation/Reference:

QUESTION 161

A private OID should be obtained for a company when

- A. The company plans to create custom schema files for their directory
- B. That company runs out of public OIDS
- C. The company wants to make their directory available to the public on the World Wide Web
- D. The company intends to use LDAP for commercial purposes

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 162

Which of the following switches for the ldapsearch command makes sure that search referrals are followed?

- A. -C
- B. -R
- C. -r
- D. S

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 163

An administrators has manually migrated local accounts to LDAP, instead of using the migration tools. When trying to authenticate as a user, as error is returned about invalid credentials. What is the most likely cause of this?

- A. The password hash type was not included in the user's password attribute
- B. The administrator forgot to run slappasswd to convert the hashes in /etc/shadow
- C. The original password from /etc/passwd was not included
- D. Shadow passwords are incompatible with OpenLDAP
- E. The administrator forgot to run ldappasswd to convert the hashes in /etc/shadow

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 164

In the following output, what was the maximum number of processes swapped out at any time? Exhibit

procs						memory		swap		io		system			cpu	
r	b	w	swpd	free	buff	cache	si	so	bi	bo	in	cs	us	sy	id	
1	0	0	0	76272	67784	55956	0	0	35	16	107	36	5	2	93	
0	0	0	0	24936	67992	55960	0	0	0	3	281	412	18	26	56	
8	0	0	0	4040	62872	51080	0	0	0	6	202	247	16	13	71

Explanation

Explanation/Reference:

QUESTION 165

Which command should be used to optimize LDAP searches?

- A. ldapsearch -h sub
- B. slapd -r +20
- C. slapindex
- D. make /var/lib/openldap-data/
- E. slapd-instances=10-f

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 166

When investigating memory usage, what is the most important measurement for capacity planning purposes?

- A. Virtual memory size (VSZ)
- B. Swap memory usage
- C. Total Memory
- D. resident set size (RSS)

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 167

What is true of any created custom attribute or object class?

- A. It must not contain any numbers
- B. It can't be placed in one of the default distributed schema files
- C. The name must be registered with IANA to avoid conflicts with other custom schemas
- D. It must have a unique OID

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 168

When logged in to a workstation which retrieves most of its user information from NIS, which command can be used to list ALL to users?

- A. ypusers list
- B. cat /etc/passwd
- C. cat /var/lib/nis/passwd
- D. getent passwd
- E. show users

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 169

A user is unable to login on a workstation where NSCD was configured BEFORE the pam_ldap and nss_ldap modules. What should be done to fix this problem?

- A. Nscd must be started with -ldap=yes option
- B. Restart the NSS Server
- C. Restart the nscd daemon
- D. Restart the PAM Server
- E. Nscd incompatible with OpenLDAP and should be disabled

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 170

Which of the following is correct about this excerpt from an LDIF file? Dn cn=PrintOperators,ou=Groups,ou=IT,o=BR

- A. dn is the domain name
- B. o is the organizational unit
- C. cn is the common name
- D. dn is the relative distinguished name

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 171

In capacity planning exercises, what tools assist in identifying processes of interest from other processes? (Choose two.)

- A. free
- B. top
- C. lshal
- D. ps

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 172

Which of the following resources would be measured for capacity planning? (Choose two.)

- A. Application load time
- B. Disk Usage
- C. Memory usage
- D. CPU Usage

Correct Answer: CD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 173

After configuration PAM and NSS to integrate with OpenLDAP, the SSH server refuses to authenticate users who are only in LDAP. What is the first step you

should follow to debug this problem?

- A. Restart the sshd server
- B. Restart the nssd server
- C. Add the Use_LDAP=yes parameter to sshd_config
- D. Restart the pamd service

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 174

What operating system tools can be used to collect capacity planning data? (Choose two.)

- A. lsof
- B. fuser
- C. top
- D. ps

Correct Answer: CD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 175

What does the LDIF acronym stand for?

- A. Lightweight Database Interchange Format
- B. LDAP Database Interchange Format
- C. LDAP Data Internet File
- D. LDAP Data Interchange Format

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 176

When configuring an LDAP system for integration with PAM and NSS the /etc/nsswitch.conf file needs to be modified. What is the best choice below to fill in this line from the /etc/nsswitch.conf file? passwd: files _____

- A. pam
- B. ldap
- C. pam_nss
- D. pam_ldap
- E. none

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Reference: https://wiki.archlinux.org/index.php/LDAP_Authentication (Configure NSS, see the second blue box and first line)

QUESTION 177

When planning a web server which of the following choices will impact system sizing? (Specify THREE answers)

- A. How many concurrent users are expected
- B. Which hardware vendor has better Linux support.
- C. What type of content will be served
- D. What scripting languages will the web server support.
- E. Will the OS install be CD, DVD or network based.

Correct Answer: ACD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 178

In the following output, what percentage of time was the CPU waiting for pending I/O?

```
# vmstat 1 100
procs -----memory----- --swap-- ----io---- --system-- ----cpu----
 r  b   swpd   free   buff  cache   si   so    bi    bo    in    cs   us  sy  id  wa
 0  0     0 282120 134108 5797012   0    0     0     2     0     0   0  0 100  0
 0  0     0 282120 134108 5797012   0    0     0     0 1007   359  0  0 100  0
 0  0     0 282120 134108 5797012   0    0     0     0 1117   577  0  0 100  0
 0  0     0 282120 134108 5797012   0    0     0     0 1007   366  0  0 100  0
```

- A. 0
- B. 100
- C. 35.9
- D. 35.7
- E. 36.6

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 179

In the following output, what is the 5 minute load average for the system?

```
[root@server ~]# uptime
12:10:05 up 18 days, 19:00, 2 users, load average: 0.47, 24.71, 35.31
```

- A. 0.47
- B. 24.71
- C. 35.31
- D. There is no 5 minute interval. It is some value between 0.47 and 24.71.
- E. There is no 5 minute interval. It is some value between 24.71 and 35.31.

Correct Answer: D

Section: (none)

Explanation

QUESTION 183

What is the utility used to test that slapd.conf is usable and minimally complete?

- A. slapdtest
- B. slaptest
- C. ldapsearch
- D. ldaptest

Correct Answer:

Section: (none)

Explanation

Explanation/Reference:

Answer: <http://tldp.org/HOWTO/LDAP-HOWTO/ldapbackends.html> (see 1.3, second sentence)

QUESTION 184

In the example below, what is the missing argument that is required to use `secret' as the password to authenticate the replication push with a slave directory server?

```
replica uri=ldaps://slave.example.com:636
        binddn="cn=Replicator,dc=example,dc=com"
        bindmethod=simple _____=secret
```

- A. secure
- B. master
- C. credentials
- D. password

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Reference: <http://www.openldap.org/doc/admin24/replication.html> (18.3.1.3 Set up the consumer slapd, see the example code)

QUESTION 185

When securing the LDAP directory using TCP Wrappers, choose the correct option to exclude any network not defined in the sample below from having access to

the directory.

slapd: 10.0.0.0/255.0.0.0 127.0.0.1 : ALLOW
slapd: _____: DENY

- A. ANY
- B. ACCESS
- C. ALL
- D. NONE

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Reference: <http://www.openldap.org/doc/admin24/security.html> (14.1.3. TCP Wrappers)

QUESTION 186

After updating and adding indexes to the configuration file, what is the utility used to regenerate the indices?

- A. slapindex
- B. slapdindex
- C. ldapindex
- D. slapdindices

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 187

What is the slapd.conf directive used to load classes into the LDAP configuration?

- A. Class
- B. objectClass
- C. objectConflg
- D. objectConfigClass

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 188

When importing employee information for the corporate whitepages, which department is Gerald to be assigned, according to this excerpt from the LDIF file?

```
dn: cn=Gerald W. Cartec, ou=engineering,dc=plainjoe,dc=org
```

- A. plainjoe
- B. plain30e.org
- C. none
- D. engineering

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 189

Often times LDAP administrators may find it is necessary to limit the number of search results from the directory. In the global section of the slapd.conf file it is possible to set both hard and soft limits. Select below which single item would set a soft limit of 10 and a hard limit of 25 on search results.

- A. searchlimit size.soft=10 size.hard=25
- B. sizelimit size.soft=10 size.hard=25
- C. sizelimit size.hard=10 size.soft=25
- D. search sizelimit size.soft=10 size.hard=25

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Reference: <http://www.openldap.org/doc/admin24/limits.html> (9.3.Global limits, see the last code under the topic)

QUESTION 190

What are the expected results of the following command:

`ldapsearch -LLL "(cn=Steve Smith)" cn sn telephoneNumber`

- A. dn: uid=jts,dc=example,dc=com
cn: John Smith
cn: John T. Smith
sn: Smith
telephoneNumber: 1 555 123-4567
- B. dn: uid=sss,dc=example,dc=com
cn: Steve Smith
cn: Steve S. Smith
sn: Smith
telephoneNumber: 1 555 765-4321
- B. dn: uid=sss,dc=example,dc=com
sn: Smith
telephoneNumber: 1 555 765-4321
- C. dn: uid=sss,dc=example,dc=com
cn: Steve Smith
cn: Steve S. Smith

Correct Answer: C

Explanation/Reference:

QUESTION 200

Which of the following is the default process priority when a process is started using the nice command?

- A. -10
- B. 10
- C. 20
- D. 0

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 201

Which of the following RPM commands will output the name of the package which installed the file /etc/exports?

- A. rpm -F /etc/exports
- B. rpm -qf /etc/exports
- C. rpm -KI /etc/exports
- D. rpm -qp /etc/exports
- E. rpm -qi /etc/exports

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 202

Which of the following commands will print a list of usernames (first column) and their corresponding user id (uid, third column) from /etc/passwd?

- A. cut -d: -f1,3 /etc/passwd
- B. chop -c 1,3 /etc/passwd
- C. tac 1-3 /etc/passwd
- D. fmt -u /etc/passwd

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 203

Which of the following commands will print the inode usage on each mounted filesystem?

- A. du -i
- B. df -i
- C. lsfs -i
- D. printfs -i

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 204

Which of the following is true when hard-linked files are present?

- A. The output of stat will report "hard" instead of "regular file"
- B. The hard-linked files may not be empty
- C. Both files will share the same inode
- D. Issuing a long directory listing with ls -l will indicate the link with "->"
- E. The file permissions will be prefixed by an "h", eg. hrwxr-x-r-x

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 205

Which of the following files should be edited to select the network locations from which Debian installation package files are loaded?

- A. /etc/dpkg/dpkg.cfg
- B. /etc/apt/apt.conf
- C. /etc/apt/apt.conf.d
- D. /etc/apt/sources.list
- E. /etc/dpkg/dselect.cfg

Correct Answer: D

QUESTION 208

What does the slapindex tool do?

- A. Defragments the LDAP database files
- B. Displays only the DN of every entry in the directory, sorted by container
- C. Displays information about the currently configured indexes
- D. Regenerates indexes defined in slapd.conf

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 209

Which one of the following pieces of information is not present in the slurpd replication log file?

- A. The address of the remote LDAP slave server
- B. The name of the user who initiated the modification
- C. A timestamp of when the modification took place
- D. A timestamp of when the change has taken place on the slave

Correct Answer: D

Section: (none)

Explanation/Reference:

QUESTION 210

Which of the following are valid LDAP client command? (Choose two.)

- A. slapcat
- B. ldappasswd

<http://www.gratisexam.com/>

- C. ldapwhoami
- D. ldapbrowser
- E. slaptest

Correct Answer: BC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 211

What operating system tools can be used to collect capacity planning data? (Choose two.)

- A. ps
- B. fuser
- C. top
- D. lsof

Correct Answer: AC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 212

Which of the following tools are used to measure network I/O?

- A. route
- B. netstat
- C. iostat
- D. vmstat

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 213

Which of the following resources would be measured for capacity planning? (Choose two.)

- A. CPU Usage
- B. Application load time
- C. Disk Usage
- D. Memory usage

Correct Answer: AD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 214

In the following output, what resource is the program being observed using the most?

- A. Memory
- B. Network I/O
- C. CPU
- D. Disk I/O

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 215

To restrict user authentication to ONLY users who belong to a specific organizational unit, which file should be modified?

- A. /etc/pam.d/ldap
- B. pam_ldap.conf
- C. /etc/pam.d/login
- D. ldap.conf
- E. pam.conf

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

QUESTION 216

In capacity planning exercises, what tools assist in identifying processes of interest from other processes? (Choose two.)

- A. acpid
- B. pstree
- C. w
- D. lsof

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 217

In the following output, what does the 1 in the b column indicate?

- A. A process is blocked on I/O
- B. A process is waiting on a parent to check its exit value
- C. A process is swapped and waiting
- D. A process is waiting

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 218

Which of the following tools are used to measure disk I/O? (Select THREE correct Answers.)

- A. lpstat
- B. sar
- C. iostat
- D. vmstat
- E. mpstat

Correct Answer: BCE

Section: (none)

Explanation

Explanation/Reference:

Explanation

The primary tool to use in troubleshooting disk I/O problems is iostat. sar -d provides useful historical context. vmstat can provide information about disk saturation. For Solaris 10 systems, dtrace can provide extremely fine-grained information about I/O performance and what is causing any utilization or saturation problems. The DTrace Toolkit provides a number of ready-to-use scripts to take advantage of DTrace's capabilities. UNIX man pages vmstat () vmstat reports information about processes, memory, paging, block IO, traps, and cpu activity. The first report produced gives averages since the last reboot. Additional reports give information on a sampling period of length delay. The process and memory reports are instantaneous in either case.

UNIX man pages iostat (8)

The iostat utility displays kernel I/O statistics on terminal, device and cpu operations. The first statistics that are printed are averaged over the system uptime. To get information about the current activity, a suitable wait time should be specified, so that the subsequent sets of printed statistics will be averaged over that time.

UNIX man pages sar (1)

In the first instance, sar samples cumulative activity counters in the operating system at n intervals of t seconds, where t should be 5 or greater. If t is specified with more than one option, all headers are printed together and the output may be difficult to read. (If the sampling interval is less than 5, the activity of sar itself may affect the sample.) If the -o option is specified, it saves the samples in filename in binary format. The default value of n is 1.

UNIX man pages mpstat (1M)

mpstat reports processor statistics in tabular form. Each row of the table represents the activity of one processor. The first table summarizes all activity since boot; each subsequent table summarizes activity for the preceding interval. All values are rates (events per second) unless otherwise noted.

UNIX man pages lpstat (1)

lpstat displays status information about the current classes, jobs, and printers. When run with no arguments, lpstat will list jobs queued by the current user.

QUESTION 219

Which of the following statements about the ldapsearch command are true? (Choose three.)

- A. The -b option specifies the database where the LDIF file will be included
- B. It is possible to configure a specific LDAP server for the search with the -h option
- C. The -L option is useful when for viewing details of LDIF files
- D. The -Z option requires a successful StartTLS operation in order to continue
- E. With the -x option, the simple bind authentication method will be used

Correct Answer: BCE

Section: (none)

Explanation

Explanation/Reference:

QUESTION 220

An administrator is adding several LDIF files to the directory with slapadd and the new entries are not displayed when ldapsearch is used. Assuming that there is no database corruption, what is the most appropriate solution to the problem?

- A. Run ldaprefresh_all
- B. Run slaprefresh_all
- C. Stop the slapd process, run slapindex and then correct the entries using slap_vaccum
- D. Stop the slapd process and add the files again with slapadd

Correct Answer: D

QUESTION 228

An administrator has sent their current vi process with a PID of 1423 to the background on the command line. Assuming no other processes are in the background, what single command with no options or parameters will bring the vi process to the foreground?

Correct Answer: Answer: %1,fg

Section: (none)

Explanation

Explanation/Reference:

fg is a job control command in Unix and Unix-like operating systems that resumes execution of a suspended process by bringing it to the foreground and thus redirecting its standard input and output streams to the user's terminal.

QUESTION 229

Which command will display messages from the kernel that were output during the normal bootup sequence? (Please enter only a single command and do not enter duplicate answers in this field.)

Correct Answer: Answer: /bin/dmesg,dmesg

Section: (none)

Explanation

Explanation/Reference:

QUESTION 230

What file contains kernel level logging information such as output from a network driver module when it is loaded? (Please enter only a single command and do not enter duplicate answers in this field.)

Correct Answer: Answer: /var/log/kern.log,/var/log/messages,kern.log,messages

Section: (none)

Explanation

Explanation/Reference:

QUESTION 231

What file in the /proc filesystem lists parameters passed from the bootloader to the kernel? (Please enter only a single command and do not enter duplicate answers in this field.)

Correct Answer: Answer: /proc/cmdline,cmdline

Section: (none)

Explanation

Explanation/Reference:

QUESTION 232

What command is used to display a file in octal format? (Please enter only a single command and do not enter duplicate answers in this field.)

<http://www.gratisexam.com/>

Correct Answer: Answer: /usr/bin/hexdump,/usr/bin/od,hexdump,od

Section: (none)

Explanation

Explanation/Reference:

<http://www.gratisexam.com/>

QUESTION 233

What option, when passed to the yum command, will update the entire system? (Specify ONLY the option name with no additional parameters).

Correct Answer: Answer: update

Section: (none)

Explanation

Explanation/Reference:

QUESTION 234

What is the name of the main configuration file for GRUB? (Please specify the file name with no path information).

Correct Answer: Answer: grub.cfg,grub.conf,menu.lst

Section: (none)

Explanation

Explanation/Reference:

QUESTION 235

An administrator has issued the following command: grub-install --root-directory=/custom-grub /dev/sda In which directory will the new menu.lst file be found? (Provide the full directory path only without the filename).

Correct Answer: Answer: /custom-grub/boot/grub,/custom-grub/boot/grub/

Section: (none)
