LOT-925

Exam A

QUESTION 1
Which of the following are optional advanced services that must be enabled manually when first configuring and installing the Domino server?

A. SMTP server
B. Agent Manager
C. Calendar Connector
D. DOLS (Domino Off-Line Services)

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2
In order to create a Domino cluster, which rights are required for you to have to the Domino Directory?

A. Editor access rights and ClusterModifier role
B. Reader access rights and ServerWriter and ServerManager roles
C. Designer access rights and ClusterCreator and ClusterModifier roles
D. Author access and Delete Documents rights and the ServerModifier and ServerCreator roles

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 3
Jose set up Web authentication using primary and secondary directories. Which one of the following describes the order in which he set up directories to be searched?

A. Domino primary directory, then Domino secondary directories. This is the only option available.
B. Domino primary directory, then either Domino or LDAP secondary directories. The administrator can specify the order of secondary searches.
C. LDAP primary directory, then LDAP secondary directory, and then Domino secondary directories.
   This is the order in which secondary searches must be made.
D. Domino primary directory, then Domino secondary directory, and then LDAP secondary directories. This is the order in which secondary searches must be made.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 4
A Notes mail message is sent by Miguel to an Internet address through an adjacent Domino domain over NRPC that then sends mail to the Internet over SMTP. Miguel is now attempting to recall the mail message. Which of the following will be the result of his attempt?

A. He will receive an email that he cannot recall the email message
B. He will immediately receive a prompt that the message is not enabled for message recall
C. He will receive a message from the Internet recipients mail server that the message cannot be recalled
D. He will successfully recall the message if it is allowed in the server configuration and enabled in his user policy

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5
In order for Peggy to establish alternate message recall settings on a per server basis, which of the following is the best solution?

A. Configure the message recall settings in an organization level policy
B. Configure the message recall settings in each server's notes.ini file
C. Configure the message recall settings in each server configuration document
D. Configure the message recall settings in explicit policies and manually apply to users

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 6
While configuring an Internet Site document, Kira has left the option blank for which Domino server hosts the site. What is the default action the server will perform with this option not configured?

A. The Internet Site will not be loaded on any Domino server
B. The Internet Site will be loaded on all Domino servers in the domain
C. The Internet Site will only accept connections for the first IP Address on the server
D. The Internet Site will only accept connections for the hostname in the server document

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 7
Which ONE of the following is required when setting up transactional logging on a server?

A. Enable Transactional Logging in the server document.
B. Add TRANS_LOG=1 to the server's NOTES.INI file.
C. Create a Transactional Logging document in the Directory Catalog.
D. Modify the NOTES.INI log settings to read LOG=LOG.NSF, TRANSLOG.NSF

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 8
When creating the ID Vault for your domain, which of the following cannot be the name of the vault?

A. The name of the server the vault is created on
B. The name of the administrator creating the vault
C. The name of the group that will manage the id vault
D. The same as an organizational unit used in the Domino domain

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 9
Given the following scenario, what will occur if the sender attempts to recall a message after 10 days have elapsed since it was originally sent to the recipient: - The sender and recipient are on the same mail server - The server is configured to allow message recall - The recipient is a member of a group policy that allows message recall - The sender is a member of a group policy that does not allow message recall - The sender has an explicit policy that allows message recall - Message recall is allowed for 14 days for the sender - Message recall is allowed for 8 days for the recipient

A. The sender will be allowed to recall the sent message
B. The sender will not be allowed to recall the sent message
C. The sender will receive a non-delivery report back stating the message recall failed
D. The sender will be prompted that they have exceeded the maximum time allowed for message recall

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 10
Chaz, the Domino administrator, has noticed performance issues when LDAP searches are being performed against the Domino Directory. Which of the following is the best offered solution to improve performance?

A. Extend the LDAP schema to add new attributes
B. Create a full text index of the Domino Directory
C. Configure Directory Assistance to load all users into memory in advance
D. Delete the ($LDAP) view in the Domino Directory and let it rebuild automatically

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 11
Each time Melissa creates a certifier ID, Domino creates a certifier ID file and which of the following?

A. Password database
B. Certifier document
C. Password hash file
D. Certifier database

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 12
Tom set up a Domino domain and organization. Which one of the following describes the difference between a Domino domain and a Domino organization?

A. There is no difference. Domains and organizations function in the same manner.
B. Domains refer to a company's hierarchical structure. Organizations refer to users who share a common organizational certifier.
C. Domains are comprised of users and servers that share a common Domino Directory.
   Organizations define security and naming conventions.
D. Domains define security and naming conventions. Organizations are comprised of users and servers that share a common Domino Directory.

Correct Answer: C
Section: (none)
Explanation

QUESTION 13
Directory assistance in Lotus Domino 8 enables you to specify when a secondary directory must only be used for authentication. This provides which of the following features?

A. This blocks email from being forwarded to adjacent domains
B. This avoids NAMELookups to reduce the number of mbiguous Name dialog boxes
C. This help you validate your choice of host name for receiving authentication requests
D. This scans group member lists to ensure that each member exists in an available directory that is configured in directory assistance

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 14
John registered a new server. In which one of the following was the Server document placed?

A. NAMES.NSF
B. CERTLOG.NSF
C. CATALOG.NSF
D. DIRECTORY.NSF

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 15
Edison, the Domino Administrator, wants to enforce file security on HTML and Image files. Which one of the following should he do?

A. Enforce ECLs
B. Create File Protection documents
C. Use Protect Directories in the HTTPD.CNF files
D. Domino does not allow security enforcement on HTML and Image files

Correct Answer: B
Section: (none)
Explanation

QUESTION 16
In what order is blacklist and whitelist filtering processed on a received SMTP message?

A. DNS blacklists, DNS whitelists, private blacklists, private whitelists
B. DNS whitelists, DNS blacklists, private whitelists, private blacklists
C. Private blacklists, DNS blacklists, private whitelists, DNS whitelists
D. Private whitelists, private blacklists, DNS whitelists, DNS blacklists

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 17
The server out-of-office service is configured in which of the following locations?

A. Server document
B. Server configuration document
C. Mail.box on the Domino 8 mail server
D. In each user's mailfile the service is to be enabled

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 18
The default port for SSL over SMTP is which one of the following?

A. 389
B. 465
C. 636
D. 995

Correct Answer: B
Section: (none)

Explanation

Explanation/Reference:

QUESTION 19
Which protocol must be enabled on the Domino server to support RSS feeds for mail files?

A. RSS
B. HTTP
C. IMAP
D. LDAP

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 20
Which task reads the mail.box for new or changed messages that require processing?

A. SMTP
B. Amgr
C. Asminp
D. Router

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 21
Without manually restarting the SMTP server task, how often will it automatically check for changes to Configuration Settings documents?

A. Never
B. Two minutes
C. Hourly
D. Daily at midnight

Correct Answer: B
Section: (none)
Explanation

QUESTION 22
Pedro, a Domino administrator, has enabled the Inbox maintenance feature from a mail policy document. How is the Inbox maintenance feature trigged and where does it run?

A. The Inbox maintenance agent is enabled by default to run at 2 AM on all mail servers in the domain.
B. The Administration Process periodically runs the Inbox Maintenance agent on each user's home server.
C. Every time a user opens their mail file the Inbox maintenance agent runs locally on the user's workstation.
D. The Inbox maintenance agent runs on a user's home server and is manually triggered by selecting Tools - Inbox maintenance from within their mail file.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 23
iNotes requires which of the following server tasks to be running?

A. IMAP
B. SMTP
C. DOLS
D. HTTP

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 24
The ACME corporation is receiving a large amount of mail that is addressed to users that are not listed in the Domino Directory. The administrator wants to configure the server to check that recipients are listed in the directory and to refuse any mail addressed to a group name. In which of the following areas is this configured?

A. Inbound Sender Controls
B. Inbound Relay Enforcement
C. Inbound Connection Controls
D. Inbound Intended Recipient Controls

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 25
Trisha wants to set up Activity Trends for her Domino environment. Where should Trisha go to configure Activity Trends?

A. Server document
B. Program document
C. Connection document
D. Configuration document

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 26
Carla is attempting to utilize Directory Assistance to prevent group lookups from the primary Domino Directory for database authorization. However, she cannot get this to function correctly.
Which if the following is the cause?

A. Group lookups are not possible from the primary Domino Directory
B. You can never exclude the primary Domino Directory from this type of functionality
C. The primary Domino Directory must be moved to last in the search order for Directory Assistance
D. She must create an exclusion rule in the Directory Assistance database that includes the primary Domino Directory

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 27
What tool can an administrator use to see how database workload is distributed across servers and recommend a resource-balancing plan?

A. Trend Analysis
B. Activity Trends
C. Activity Logging
D. Transaction Logging

Correct Answer: B
Section: (none)
Explanation

QUESTION 28
The Domino startup has aborted due to the system time being too far in advance as compared to the Domino server time. Which of the following next steps would be the best choice to get the Domino server to start immediately?

A. Edit the notes.ini to remove the line LAST_OS_UPDATE_TIME
B. Delete the notes.ini file from the server and restart the server
C. Edit the notes.ini and type a colon or a semicolon in front of the parameter LAST_DOMINO_TIME_ABORT
D. Rename the notes.ini to <timestamp>notes.ini and restart the server where <timestamp> is the correct operating system time

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

Exam B

QUESTION 1
Your enterprise users receive large lists of ambiguous names when performing name look-ups for addressing mail messages. Which of the following will remove the ambiguous names?

A. Remove the alternate directories from the cluster directory
B. Disable specific directories from mail lookups in admin4.nsf
C. Enable specific directories to be utilized for credentials only in Directory Assistance
D. Specify that the primary Domino Directory is the only mail addressing source within the server configuration document

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2
Domino uses which type of document to determine how to connect to another server for replication and mail routing?

A. Server
B. Domain
C. Program
D. Connection

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 3
Restrictions can be configured in Adjacent domain documents and Configuration Settings documents. Domino will default to which?

A. Adjacent
B. The most restrictive
C. Configuration Settings
D. It will ignore Supplicate fields

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 4
Which domain document provides servers in a Domino domain with information on where to transfer mail destined for external SMTP addresses?

A. Foreign domains
B. Internet Domains
C. Adjacent domains
D. Foreign SMTP domains

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5
The Server Controller is a program that does what?

A. Controls a Domino server
B. Allows a remote administrator to control a Domino server from their desktop
C. Manages security access to the Domino server
D. Shuts down and restarts the server at specified times to enable offline backups

Correct Answer: A
Section: (none)
Explanation

QUESTION 6
The ADC prompting is disabled but the Send to IBM option is enabled. Which of the following prompts will the user receive?

A. The Notes client end user is prompted to specify whether to send a diagnostic report to their company administrator and to IBM
B. A diagnostic report is not sent to the company administrator but the Notes client end user is prompted to specify whether to send a diagnostic report to IBM
C. The Notes client end user sees no messages or prompts enabled with no regarding diagnostic collection and reporting. A diagnostic prompting report is sent to the administrator
D. A dialog box displays information to the end user that a diagnostic report will be sent to their company administrator. The end user is also prompted as to whether they would like to send a diagnostic report to IBM

Correct Answer: D

QUESTION 7
Which of the following views in the Domino Directory are required to be updated once the server is upgraded to Domino 8.5?

A. $Users and $ServerAccess
B. People, Groups and Servers
C. People-Hierarchical and Server-Configurations
D. $NamesLookup, $ServerConfig and $GroupMembers

Correct Answer: A

QUESTION 8
Mike has implemented Lotus Traveler for his mobile users. The users have requested the ability to read and send encrypted mail. Which of the following are required for this request to be available?

A. Uses must mail themselves a copy of their Notes ID file
B. Users must upload their Notes ID files to their mail database
C. Users must upload their Notes ID files to their personal address book
D. Users must attach their Notes ID files to a draft email message in their mail database

Correct Answer: B

QUESTION 9
The default ACL entry for Anonymous for all database templates (.NTF files) has which of the following for an access level?

A. None
B. Reader
C. Author
D. Designer

Correct Answer: B

QUESTION 10
A user is accessing a Domino database through the web and does not authenticate. You, as the Domino administrator, have not listed Anonymous in the Access Control List of the database. What rights is this user assigned?

A. Creator
B. Manager
C. -Default-
D. The user is denied access

Correct Answer: C

QUESTION 11
The password quality scale for ID files has which of the following ranges?

A. 1-18
B. 0-24
C. 1-10
D. 0-16

Correct Answer: D

QUESTION 12
Wallace is attempting to alter the roles assigned in a database. However, when he opens the Access Control List for that database, he does not see any reference to roles. Which of the following is the cause?

A. He is not listed as Manager of the database
B. He does not have the appropriate form rights
C. He is not listed as Designer of the database
D. He does not have the appropriate folder rights

Correct Answer: A

QUESTION 13
You have the ability to set different levels of administration access to users. Which of the following represents the hierarchy order for privileges from greatest to least access?

A. Server administrator > View Console administrator > Administrator > User administrator
B. Full access administrator > Administrator > Full console administrator > System administrator
C. Full Console administrator > System Administrator > Full Access administrator > Administrator
D. Full server access administrator > Console rights administrator > User administrator > View access only administrator

Correct Answer: B

QUESTION 14
The network team has asked Diana to change the SSL port on a Domino server providing SSL web access. Where would Diana change the port configuration? Note: Diana is using Internet Sites.

A. In the notes.ini
B. Rerun the Domino setup wizard
C. In the server configuration document
D. On the server document under Port -> Internet Ports

Correct Answer: D

QUESTION 15
Airis, the Domino administrator, has assigned an explicit policy to a user. This policy has alternate values for the same settings documents as the organizational policy. What is the result of this action?

A. The settings from the fields will cancel each other out and no value will be applied.
B. The organizational policy always overrides conflicting values with explicit policies.
C. The explicit policy always overrides conflicting values with organizational policies.
D. The administrator will receive an error when she tries to apply both polices to the user warning her of the conflict between the policies.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 16
When deploying Lotus Traveler to your users without a policy in place, which of the following occurs to the end user mobile device?

A. The built-in defaults are utilized
B. The user functions with no policy settings in place
C. The device will not launch until a policy is assigned
D. The user will not be able to download and install Lotus Traveler until policies are created

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 17
Mike needs to determine how a set of new policies will affect his users. What can Mike use to determine the effect of the new policies on his users?

A. Log in as a user and see what policies have changed.
B. Open the user view in the Domino Administrator client, select a user, and choose Actions - Show User Policies.
C. From the Basics tab of the Access Control List, click Effective Access.
D. Use the Policy Synopsis tool from the People view in the Domino Administrator client.

Correct Answer: D

QUESTION 18
Gavin has created an Organization Unit policy for */Marketing/ABC. In this policy he placed a security settings document that specified that the password quality should be 10. However, people in this Organizational Unit are only being required to have a password quality of 7. What is the cause for this discrepancy?

A. The password quality cannot go above 9 and will reset to the default of 7 for users.
B. The parent Organization policy specifies the password quality of 7 and has it set to enforce.
C. The parent Organization policy specifies the password quality of 8 and has it set to inherit.
D. Users are manually changing their password quality in their user.id files and restricting updates from the

policy.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 19
Donald has configured a mail setting policy to prohibit iNotes users from changing the mail file owner field. How is this policy applied to iNotes users?

A. The policy is applied through the ADMINP task.
B. The policy is applied by the Dynamic Client Configuration process.
C. The policy is applied the first time the users authenticate using HTTP.
D. Donald must restart the HTTP task and restart the router on the user's mail server.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 20
Your corporation has a security requirement that Microsoft Office documents may not contain macros. Lotus Symphony is the company standard for opening these documents. Which of the following is the best choice for restricting macros from being run by users?

A. Disable macros in a security settings document
B. Apply a default Lotus Symphony settings document
C. Enable the macros filter in the desktop settings document
D. Select to disable the use of macros in a Lotus Symphony settings document

Correct Answer: B

QUESTION 2
Billy wishes to use compression on his Domino servers for client connectivity. What steps must Billy do to make this function?

A. Enable binding on the client port; restart the client; disable tunneling on the server port; restart the server port
B. Disable binding on the client port; restart the client; enable encryption on the server port; restart the server port
C. Enable compression on the server port; restart the server port; enable compression on the client port; restart the client
D. Disable encryption on the server port; restart the server port; enable tunneling on the server port; restart the server port

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 3
When a user is configured for roaming in D8.5 and logs into a Notes client, there are three places where that user can access their Notes ID file. Of the four permutations below, one is location is incorrect. Select the option that should be excluded.

A. Local file system
B. Their mail file
C. From the Domino ID vault
D. Their Contacts application

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 4
Which of the following are optional advanced services that must be enabled manually when first configuring and installing the Domino server?

A. SMTP server
B. Agent Manager
C. Calendar Connector
D. DOLS (Domino Off-Line Services)

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5
While installing the first Domino server, Alan is presented with a list of Internet services. Which of the following are selections for Alan under Internet services?

A. Database Replicator, Ports and Web Interfaces
B. Directory engines, Schedule Management and Billing
C. Web browsers, Internet Mail clients and Directory services
D. Protocols, Domino Enterprise Connection Services and Web Statistics

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 6
Joseph, a Lotus Notes user, has sent a message recall request for an email he sent earlier in the day. The recall request is processed by which of the following server processes once it reaches the recipients mail server?

A. Adminp
B. Router
C. Server
D. SMTP

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 7
John registered a new server. In which one of the following was the Server document placed?

A. NAMES.NSF
B. CERTLOG.NSF
C. CATALOG.NSF
D. DIRECTORY.NSF

Correct Answer: A
Section: (none)
Explanation

QUESTION 14
Ben attempts to send Jerry a Notes mail message. Both users are on the same mail server. Which of the following paths will the message take?

A. The Router will receive the message from Ben and deliver it immediately to Jerry's mailfile via SMTP
B. The Router will receive the message from Ben and deliver it immediately to Jerry's mailfile via NRPC
C. The Router will receive the message from Ben and drop it into the mail.box on the server where the next thread will pick it up via NRPC and delivery it to Jerry.
D. Since Ben and Jerry share a mail server, the Router task isn't used at all; the server drops the message directly from Ben's client into Jerry's mailbox.
