Free update is available within 180 days after your purchase.
Please login your user center and download the latest product anytime.
PS:Ensure you can pass the exam,please check the latest product in 2-3 days before the exam again.

Testlet 1

Topic 1, Large Company

Background
You are the SharePoint administrator for a large company. You are responsible for installing and configuring a multi-server SharePoint environment that will be used for information management and collaboration.

The company has an Active Directory Domain Services (AD DS) domain. User-specific contact information, including employee photos, is stored and managed in Active Directory. All employees are located in the ActiveUsers organizational unit (OU).

The User Profile Synchronization service runs on a server named SERVER1.

Business Requirements
The SharePoint environment must meet the following business requirements:

Ensure that users can connect to the portal by using the same URL from any location.
Ensure that users can access corporate information from outside the network without using a VPN connection.
Allow users to configure notifications for content changes.
Allow users to follow content creators.
Limit the number of sites and people each user can follow to 100.
Allow content authors to upload documents, large image files, and large video files for consumption by internal and external users.
Allow administrators to promote search query results across the entire company.
Utilize My Sites to share content.
Provide opportunities for social interaction.

Technical Requirements
You must meet the following technical requirements for the SharePoint environment:

Do not exceed the minimum hardware specifications.
Install the minimum supported versions of all software on the servers.
Control the growth of storage utilization.
Maximize existing content database usage before creating new content databases.
Store large files on network attached storage (NAS).
Ensure that all web applications, site collections, files, databases, and components stay within the supported limits.
Configure the User Profile Synchronization service to import user profile data from Active Directory.
Grant the User Profile service account the least permissions necessary to read data.
Ensure that current and future SharePoint environments include the most recent software updates.
Use predefined database naming conventions.
Create individual user sites by using the https://contoso.com/personal/path.

QUESTION 1
You create a User Profile Synchronization connection. You need to grant the necessary permissions to the synchronization account. What should you do?

A. Grant the account Full Control on the ActiveUsers OU.
B. Grant the account Full Control on the AuthenticatedUsers AD security group.
C. Grant the account Read permission on the domain.
D. Grant the account the Replicate Directory Changes permission on the domain.

Correct Answer: D
Section: [none]
Explanation

Explanation/Reference:

QUESTION 2
You need to ensure that content authors can publish the specified files. What should you do?

A. Create multiple authoring site collections. Create a site that contains lists, document libraries, and a Pages library. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.
B. Create multiple authoring site collections. Create a site that contains lists, document libraries, and a Pages library. Create an asset library in the authoring site collection, and enable anonymous access to the library on the authoring web application.
C. Create one authoring site collection. Create a site that contains multiple lists, document libraries, and Pages libraries. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.
D. Create multiple authoring site collections. Create a site that contains multiple lists, document libraries, and Pages libraries. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.

Correct Answer: B
Section: [none]

Setup My Sites	Configure Trusted Host Locations
Manage Promoted Sites	Publish Links to Office Client Applications
Manage Social Tags and Notes	Manage Following

QUESTION 4
You need to import employee photos into SharePoint user profiles by using the least amount of administrative effort. Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

A. Define a mapping for the thumbnailPhoto attribute of the Picture user profile property.
B. Run the Update-SPUserSolution Windows PowerShell cmdlet.
C. Run an incremental synchronization of the User Profile Synchronization service.
D. Run a full synchronization of the User Profile Synchronization service.
E. Run the Update-SPProfilePhotoStore Windows PowerShell cmdlet.
F. Define a mapping for the photo attribute of the Picture user profile property.

Correct Answer: ADE
Section: [none]

QUESTION 6
You copy the content of the SharePoint installation media and software updates to your hard drive. You need to meet the setup requirements for future SharePoint server installations. What should you do?

A. Extract the content of each file to the Updates folder by running the /extract:<path> command.
B. Upgrade the installation media by running the /lang:<lcid> command.
C. Extract the content of each file to the Setup folder by running the /extract:<path> command.
D. Extract the content of each file to the PrerequisiteInstallerFiles folder by running the / extract:<path> command.

Correct Answer: A
Section: [none]
Explanation

Explanation/Reference:

QUESTION 7
You need to implement corporate sizing and performance guidelines for general usage scenarios. Which three actions should you perform? (Each correct answer presents part of the solution.
Choose three.)

A. For the Remote BLOB Storage (RBS) storage subsystem on network attached storage (NAS), limit the maximum time-to-first-byte (TTFB) of any response from the NAS to 100 milliseconds.
B. Limit the maximum size of each content database to 4 TB.
C. For the Remote BLOB Storage (RBS) storage subsystem on network attached storage (NAS), limit the maximum time-to-first-byte (TTFB) of any response from the NAS to 20 milliseconds.

D. Limit the number of documents in each document library to 20 million.

E. Limit the number of documents in each content database to 10 million.

F. Limit the maximum size of each content database to 200 GB.

Correct Answer: CEF
Section: [none]
Explanation

Explanation/Reference:

QUESTION 8
HOTSPOT
You are setting up individual user sites. You need to ensure that site addresses follow corporate guidelines.
Which command should you use? (To answer, select the appropriate command in the answer area.)

Testlet 2

Topic 2, Photo Processing

Background
General Background
You are a SharePoint administrator for an online photo-processing company named Contoso, Ltd.
Contoso's primary customers are professional photographers. The Contoso SharePoint 2013 environment
includes the sites described in the following table.

Description	URL	Usage
Public website	www.adatum.com	Photographers upload photos, customize print-processing options, and pay for orders.
Intranet site	intranet.contoso.com	Contoso employees collaborate with colleagues and store processed photo files.

The intranet site includes a document library for each employee in which the employee stores photos.

Technical Background
The SharePoint environment contains five front-end web servers that use Windows Network Load
Balancing (NLB) with NLB affinity set to None. The company maintains all processed photos in the
SharePoint content database. The content database uses RAID 5 storage. Photo files that are more than
one year old are rarely viewed. Employees actively use the default self-service site creation feature.

The network infrastructure contains an Active Directory Domain Services (AD DS) environment. All servers
run Windows Server 2008 R2. The internal AD DS domain is named contoso.com. Active Directory
Federation Services (AD FS) is deployed in the LAN. Two AD FS proxy servers are deployed in the
perimeter network. Users log on to client computers by using the syntax username@contoso.com.

Contoso has a lab environment that includes a dedicated AD DS environment and SharePoint 2013. The
main lab SharePoint site is located at lab.intranet.contoso.com. A test site for a project named Project2
exists under lab.intranet.contoso.com/corp. The default self-service site creation feature is enabled for the
test site.

Contoso has a development team that maintains the public website, maintains the intranet site, and creates
SharePoint apps. The development team recently created a SharePoint-hosted app named Appl that
converts .tif files to .png files.

Future Development
Contoso is forming a new corporation named Proseware, Inc. that will sell SharePoint apps. The company
has acquired the proseware.com domain name.
Contoso is preparing to federate with Microsoft Office 365 and will use the proseware.com domain for
Office 365 services.

Technical Requirements
You must meet the following technical requirements:

App1 must have access to each employee's photo document library.
App1 must use Windows Authentication.
Each front-end web server must use a single IP address for all SharePoint sites and apps on that server.
All SharePoint sites and apps must listen on port 9000.
Office 365 must use single sign-on (SSO).

**The company has established the following new monitoring requirements for the production
SharePoint environment:**

Monitor whether a large number of documents are checked out.
Monitor whether a large number of unpublished items are being requested.

The company has established the following new monitoring requirements for Project2:

Monitor changes to a value in a specific registry key.
Monitor the SharePoint cache hit ratios.
Perform monitoring only from 9:00 A.M. to 3:00 P.M. daily.

Scanned contracts are stored in binary large object (BLOB) cache storage. The BLOB cache is routinely filling up. End users are reporting poor performance when viewing scanned contracts.

QUESTION 1
You need to create a new site collection while maintaining the ability for users to create their own sites. What should you do?

A. Use a path-based site collection and a single farm that contains all the web applications.
B. Create a host-named site collection and use a single farm that contains all the web applications.
C. Use a path-based site collection and alternate access mappings.
D. Create a host-named site collection and use a single farm that contains a single consolidated web application.

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

QUESTION 2
HOTSPOT
You need to choose the Performance Monitor counter to use to meet the new monitoring requirements for the production environment. Which performance counter should you use? (To answer, select the appropriate counter in the answer area.)

Hot Area:

SharePoint Publishing Cache

Publishing cache flushes / second
Publishing cache hit count
Publishing cache hit ratio.com
Publishing cache hits / sec
Publishing cache miss count
Publishing cache misses / sec
Total number of cache compactions

A.
B.
C.
D.

QUESTION 4
You need to meet the Project2 monitoring requirements. What should you do?

A. Create a user-defined data collector set.
B. Monitor only startup event trace sessions.
C. Monitor only event trace sessions.
D. Use a system-defined data collector set.

Correct Answer: D
Section: [none]
Explanation

Explanation/Reference:

QUESTION 5
HOTSPOT
You are configuring the IIS website settings for a SharePoint application in the Create New Web Application wizard. You need to ensure that the settings meet the technical requirements. Which configuration option should you change? (To answer, select the appropriate option in the answer area.)
Hot Area:

IIS Web Site

Choose between using an existing IIS web site or create a new one to serve the Microsoft SharePoint Foundation application.

If you select an existing IIS web site, that web site must exist on all servers in the farm, and have the same name, or this action will not succeed.

If you opt to create a new IIS web site, it will be automatically created on all servers in the farm. If an IIS setting that you wish to change is not shown here, you can use this option to create the basic site, then update it using the standard IIS tools.

○ Use an existing IIS web site

Default Web Site

● Create a new IIS web site
Name

SharePoint - App1

Port

9000

Host Header

intranet.contoso.com

Path

d:\data\app1

A.
B.
C.
D.

Correct Answer:

Testlet 3

Topic 3, Blue Yonder Airlines

Background

General Background
You are the SharePoint administrator for Blue Yonder Airlines. The company currently has a SharePoint 2010 environment. It is your responsibility to install and configure a SharePoint 2013 environment that will be used for information management and collaboration, both internally and with external partners. You must also migrate the existing SharePoint environment to SharePoint 2013.

Blue Yonder works with several external partners, including those described in the following table.

Partner company	Role	URL
Wingtip Toys	Designers of toy airplanes and other items sold by Blue Yonder.	http://www.wingtiptoys.com
Tailspin Toys	Manufacturers of all toys sold by Blue Yonder.	http://www.tailspintoys.com
Margie's Travel	Staffing company that provides just-in-time staffing options for air and ground personnel.	http://www.margiestravel.com

Blue Yonder collaborates with Wingtip Toys and Tailspin Toys to design, manufacture, and sell airline-related toys to customers. The Blue Yonder board of directors expects the collaborative design process to become more effective as a result of implementing SharePoint 2013.

Technical Background
All existing servers run Windows Server 2008 R2. The network infrastructure contains an Active Directory Domain Services (AD DS) environment. The internal AD DS domain is named blueyonderairlines.com. User-specific contact information is stored and managed in AD DS. All employees are located in the ActiveUsers organizational unit (OU). Active Directory Federation Services (AD FS) is deployed in the LAN. Two AD FS proxy servers are deployed in the perimeter network.
Users log on to client computers by using the syntax username@blueyonderairlines.com.
Blue Yonder provides access to the SharePoint environment to partners through individual URLs for each partner company. Each partner company has a dedicated web application and site collection. The following table describes the access URLs.

Partner company	URL to access environment
Wingtip Toys	https://wingtiptoys.blueyonderairlines.com
Tailspin Toys	https://tailspintoys.blueyonderairlines.com
Margie's Travel	https://margiestravel.blueyonderairlines.com

In preparation for the upgrade you maximize the default upload limits for each web application.

Blue Yonder has an existing managed metadata service containing managed metadata and content types. The content types have workflows. You create a new managed metadata service connection for the Wingtip Toys web application.

A workflow created by Blue Yonder moves information through the product lifecycle. Each access URL specifies a separate web application, site collection, and site.

Business Requirements
The SharePoint environment must meet the following business requirements:

Provide an environment where toy design, manufacturing, and sales information can be shared between Blue Yonder and partner companies.

Provide a training site for internal and external users.
Allow content authors of training materials to upload documents, large image files, and large video files for consumption by internal and external users.
Allow users to sort content by category.
Ensure that users from Wingtip Toys or Tailspin Toys can access content only in their own areas of the portal.
Prevent users from Wingtip Toys and Tailspin Toys from adding terms or creating enterprise keywords.
Content types and keywords must be shared between sites, site collections, and web applications.
Simplify search processes by collecting unique characteristics and information about each uploaded item.
Allow administrators to promote search query results across the entire environment.
Allow resource coordinators from Blue Yonder to find temporary staffing options from Margie's Travel contractors and employees.
Provide opportunities for social interaction between employees, contractors, and external contacts to promote idea generation and socialization.
Utilize site feeds on all collaborative sites.
Replicate profile information in the https://blueyonderairlines.com site to partner sites.
Ensure that third-party vendors can read and modify documents.
For publishing sites, use only friendly URLs that do not contain anything other than the direct address.
Avoid URL constructions such as /Lists/Posts/Post.aspx?ID = 568.

Site content must meet the following requirements:

Individual training videos must be in single files, and presented on the training site.
Changes to confidential documents must be logged.

Technical Requirements
You must meet the following technical requirements:

Store all large files outside of the SharePoint content database or databases.
All servers must run on virtual machines.
Ensure that search queries are handled by web servers.
Ensure that all lists support multiple content types.

QUESTION 1
You need to ensure that all required sites can use microblogging features for collaboration. Which two actions should you perform? (Each correct answer presents part of the solution.
Choose two.)

A. Enable the Site Feeds feature on each My Site.
B. Enable the Following Content feature on each team site.
C. Enable self-service site creation on the web application that contains the team sites.
D. Enable the Site Feeds feature on each team site.

Correct Answer: AB
Section: [none]
Explanation

Explanation/Reference:

QUESTION 2
You need to configure the existing managed metadata service application for term store management. Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

A. Grant the Read and Restricted Write Access to Term Store permission to the Wingtip Toys and Tailspin Toys application pool accounts.
B. Grant the Full Access to Term Store permission to the Blue Yonder application pool account.
C. Add the managed metadata service connection to the application proxy group that is assigned to all three web applications.

D. Grant the Read Access to Term Store permission to the Local Farm account.

E. Grant the Read and Restricted Write Access to Term Store permission to the Local Farm account.

Correct Answer: AC

QUESTION 10
You need to configure navigation for publishing sites. What should you do?

A. Create a managed path for the site collection.
B. Modify the site settings to use managed navigation.
C. Configure alternate access mapping.

D. Modify the site settings to use structural navigation.

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

Topic 4, A.Datum

Background

General Background
You are a SharePoint administrator for A. Datum Corporation. A. Datum is a large legal firm with offices in Chicago, New York, and London. A. Datum is merging with a smaller legal firm named Fabrikam, Inc.

Technical Background
A. Datum has an Active Directory Domain Services (AD DS) domain named adatum.com. The domain contains an Active Directory Rights Management Services (AD RMS) server.

The A. Datum SharePoint environment includes the sites described in the following table.

Site	URL	Description
Public site	www.adatum.com	Public website
Intranet portal	intranet.adatum.com	Internal portal for company information
Document portal	docs.adatum.com	Internal portal for document storage
My Site portal	my.adatum.com	Internal portal for social networking

The A. Datum SharePoint environment contains two servers that run all SharePoint services. The servers run Windows Server 2012 and are members of the domain. A third-party file-level antivirus application runs on all servers in the domain. The adatum.com farm uses Microsoft SQL Server 2012 for the SharePoint databases.

A. Datum is planning a three-tier SharePoint farm to replace the existing farm. A firewall will be placed between each tier. All servers must be virtualized unless otherwise specified. The following servers are available for the new SharePoint environment:

Server name	Operating system	Location
SERVER01	None	Chicago
SERVER02	None	Chicago
SERVER03	None	New York
HOST01	Windows Server 2012 with Hyper-V	Chicago
HOST02	Windows Server 2012 with Hyper-V	Chicago

All user accounts are stored in and maintained by using Active Directory. The My Site portal and document portal SharePoint sites receive user and group membership information by using Active Directory synchronization. New users often have to wait more than 24 hours before they can view their user profile information.

Fabrikam has an AD DS domain named fabrikam.com and a single-server SharePoint environment.

Web Applications
A new remote web application named App1 will be hosted in the adatum.com domain. Appl will require access to SharePoint resources in the fabrikam.com domain. SharePoint administrators in the fabrikam.com domain must be able to administer App1 by using Windows PowerShell.

Technical Requirements
You must meet the following technical requirements:

Fabrikam users must be able to directly access internal SharePoint resources in the adatum.com domain. Datum users must not be able to access resources in the fabrikam.com domain.
All documents relating to the merger must contain a barcode, and must be protected from distribution.
Authenticated users must not be prompted for credentials when they access Appl.
Users in the adatum.com domain must be able to access all SharePoint sites the same day they receive their Active Directory account credentials.

When a user account is deleted, the user's personal site collection must automatically be removed within 12 hours.
The antivirus application must not scan SharePoint directories.

When migrating the SharePoint environment, you must meet the following requirements:

The application and database servers must not be accessible from the Internet.
The database servers must accept connections only from the SharePoint servers.
The database servers must be physical machines running Windows Server 2012 with direct access to storage.
The database servers must be configured for redundancy.
All database transaction logs must be sent off-site.
All SharePoint installation prerequisites must be installed offline.

QUESTION 1
You need to configure SharePoint for the appropriate protection of merger documents. What should you do?

A. Configure Information Rights Management.
B. Configure Web Part security.
C. Configure document library permissions.
D. Configure document conversions.

Correct Answer: A
Section: [none]
Explanation

Explanation/Reference:

QUESTION 2
You need to configure the antivirus application. Which two actions should you perform? (Each correct answer presents a part of the solution. Choose two.)

A. Configure scanning to exclude the %Program Files%\Microsoft SQL Server \MSSQL10_50.SHAREPOINT\ folder.
B. Configure scanning to include the %Program Files%\Microsoft Office Servers\15.0\ folder.
C. Configure scanning to exclude the %Program Files%\Microsoft Office Servers\15.0\ folder.
D. Configure scanning to exclude the %Program Files%\Microsoft Office Servers\14.0\ folder.
E. Configure scanning to include the %Program Files%\Microsoft Office Servers\14.0\ folder.
F. Configure scanning to exclude the %Program Files%\Common Files\Microsoft shared\Web Server Extensions folder.

Correct Answer: AC
Section: [none]

QUESTION 10
DRAG DROP
You need to configure the SQL Server environment. Which three actions should you perform in sequence?
(To answer, move the a of actions to the answer area and arrange them in the correct order.)
Select and Place:

	Answer Area
Install Windows Server 2012 and SQL Server 2012 on physical machines.	
Configure SERVER02 and SERVER03 as an AlwaysOn availability group.	
Configure SERVER02 as a witness server.	
Configure SERVER03 as a log shipping destination.	
Install Windows Server 2012 and SQL Server 2012 on virtual machines.	
Configure SERVER01 as a principal server and SERVER02 as a mirror server.	

www.ensurepass.com

A.

B.

C.

D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Install Windows Server 2012 and SQL Server 2012 on physical machines.
Configure SERVER02 and SERVER03 as an AlwaysOn availability group.	Configure SERVER01 as a principal server and SERVER02 as a mirror server.
Configure SERVER02 as a witness server.	Configure SERVER03 as a log shipping destination.
Install Windows Server 2012 and SQL Server 2012 on virtual machines.	

Testlet 5

Topic 5, Contoso Ltd

Background
You are the SharePoint server administrator for Contoso, Ltd. Contoso has a SharePoint 2010 environment hosted on SharePoint Online and a separate on-premises SharePoint 2010 farm. You are preparing to upgrade the environments to newer versions of SharePoint. You are also planning to support a hybrid on-premises/cloud deployment that will be available to customers, partners, and third-party vendors.

Contoso collaborates with a partner company, Tailspin Toys, on multiple projects.

Technical Environment
All user groups reside in the existing Active Directory Domain Services (AD DS) domain corp.contoso.com.

The existing SharePoint Online environment is configured as follows:

The SharePoint Online URL assigned by Microsoft is http://contoso.sharepoint.com.
The SharePoint Online Administration Center URL is https://contoso.admin.sharepoint.com.
The user name for the Contoso Office 365 administrator is admin@contoso.com.
An existing line-of-business application provides an OData service that is hosted in Microsoft Windows Azure SQL Database.

The site collections are described in the following table.

Site collection	URL	Location
Corporate Projects	https://sharepoint.contoso.com/sites/projects	On-premises
Partner Projects	https://projects.contoso.com	Online

Business Requirements
The upgraded SharePoint environments must meet the following business requirements:

All SharePoint 2013 features must be available to all users when connecting from inside or outside of the corporate network.
Users of the Partner Projects site collection must be able to share content from their Microsoft Outlook clients and receive content from external users who send email directly to the site.
The Corporate Projects site collection must be available to internal users who connect from outside of the corporate network and must not require a VPN connection.
Third-party vendors must be able to read and modify documents.

Technical Requirements
You must meet the following technical requirements:

Before upgrading the Partner Projects site collection, create a duplicate, upgraded copy of the site for review and verification purposes.
Use Active Directory Federation Services (AD FS) 2.0 to authenticate Contoso employees, partners, and customers.
Automate the sign-in experience by using the local AD FS 2.0 servers for AD FS single sign-on (SSO).
Ensure that a web usage report that contains traffic reports, search reports, and inventory reports can be provided for any site.

The upgraded SharePoint environments must meet the following technical requirements:

All user profile information that resides in Active Directory must be available in SharePoint Online.
All sites must be able to share a mail-enabled document library that resides in the cloud.
The existing line-of-business application must be consumed as an external content type by using Microsoft Business Connectivity Services (BCS).

The Partner Projects site collection must allow Contoso and Tailspin Toys users to share documents with third-party vendors on an ad-hoc basis, without incurring additional licensing requirements.

QUESTION 1
You are configuring DNS for SharePoint Online. You need to create the appropriate type of DNS record. Which type of DNS record should you create?

A. A.A DNS CNAME record pointing to sharepoint.contoso.com.
B. B.A DNS CNAME record pointing to contoso.sharepoint.com.
C. C.A DNS A record pointing to the IP address of the SharePoint Online servers.
D. D.A DNS TXT record containing an Office 365 validation code.

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

QUESTION 2
You need to configure Office 365 to automate the sign-in experience. What should you do?

A. Configure AD FS to convert the domain contoso.com to a federated domain.
B. Run the New-MsolFederatedDomain-DomainName contoso.com SupportMultipleDomain Windows PowerShell cmdlet.
C. Configure AD FS to add the domain contoso.com as an AD FS federated domain and to support multiple domains.
D. Run the Update-MsolFederatedDomain-DomainName contoso.com - SupportMultipleDomain Windows PowerShell cmdlet.

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

QUESTION 3
You need to meet the requirements for the projects.contoso.com site. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Add the Site Mailbox app to the site.
B. Create a distribution list, and add the project team members to the distribution list.
C. Add all the project team members to the Members group of the site.
D. Create an AD security group, and add all the project team members to the security group.
E. Email-enable a document library app on the site.

Correct Answer: BE
Section: [none]
Explanation

Explanation/Reference:

QUESTION 4
DRAG DROP
You need to provide access to the Corporate Projects site collection to remote internal users. Which authentication mode and site collection URL should you use? (To answer, drag the appropriate answer choices to the correct location or locations in the answer area. Each answer choice may be used once,

more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

QUESTION 5
DRAG DROP
You need to configure the environment to allow replication from the existing domain to Office 365. Which components should you use? (To answer, drag the appropriate products or technologies to the correct location or locations in the answer area. Each product or technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Left column items:
- AD FS 2.0
- AD FS 2.0 Proxy
- Microsoft Office 365 Deployment Readiness Tool
- Microsoft Online Services Directory Synchronization tool
- SAML token-based claims authentication
- Windows Identity Foundation

Answer Area

Purpose	Product o
Local area network	
Perimeter network	
User replication	

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

Left column items:
- Microsoft Office 365 Deployment Readiness Tool
- SAML token-based claims authentication
- Windows Identity Foundation

Answer Area

Purpose	Product o
Local area network	AD FS 2.0
Perimeter network	AD FS 2.0 Proxy
User replication	Microsoft Online Servi Synchronization tool

QUESTION 6

You are configuring an administration connection to SharePoint Online. You need to instantiate the connection and authenticate to Office 365. Which Windows PowerShell cmdlet should you run?

A. Connect-SPOService-Url https://contoso.sharepoint.com -credential admin@contoso.com
B. Connect-SPOService-Url https://contoso-admin.sharepoint.com -credential admin@contoso.com
C. Set-SPOTenant -ExternalServicesEnabled-NoAccessRedirectUrl https:// contoso.sharepoint.com
D. Set-SPOSiteGroup -Site https://contoso-admin.sharepoint.com -Identity Administrators

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

QUESTION 7
You need to display the required web usage report(s) for the projects.contoso.com site. What should you do?

A. Display the Unified Logging Service (ULS) logs.
B. Display usage reports created by using Microsoft System Center 2012 - Operations Manager.
C. In Central Administration, on an on-premise SharePoint server, navigate to the Web Analytics reports.
D. Navigate to the site, and then replace Pages/Default.aspx in the URL with _layouts/ usagedetails.aspx.

Correct Answer: D
Section: [none]
Explanation

Explanation/Reference:

QUESTION 8
You are preparing to upgrade the Partner Projects site collection. You need to perform the prerequisite task. Which Windows PowerShell cmdlet should you run?

A. Invoke-PolicyEvaluation
B. Request-SPOUpgradeEvaluationSite
C. Start-OrganizationUpgrade
D. Upgrade SPOSite

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

QUESTION 9
DRAG DROP
You need to enable third-party vendors to access project documentation in the Partner Projects site collection. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Send a message that contains the direct site link to the site user.	
Add third-party vendor email addresses to the Members SharePoint group for the site.	
Add third-party vendor email addresses to the Visitors SharePoint group for the site.	
Use the **Share** functionality to share the site.	
Enable SAML token–based authentication on the zone that contains the https:// projects.contoso.com site.	
Create a custom AD FS attribute store for third-party vendors.	
Enable forms-based authentication on the zone containing the https:// projects.contoso.com site.	
Enable anonymous access on the https://projects.contoso.com site.	

www.ensurepass.com

QUESTION 5
DRAG DROP
A company has a single Active Directory Domain Services (AD DS) forest that contains two domains named tailspintoys.com and wingtiptoys.com. The company has a SharePoint environment in the tailspintoys.com domain. You need to ensure that SharePoint search services use SharePoint managed accounts. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Configure the SharePoint Server Search service to use the Account1 account.	
Register Account1 as a SharePoint managed account.	
Create an account named Account1 in the tailspintoys.com domain.	
Create an account named Account1 in the wingtiptoys.com domain.	
Configure the SharePoint Foundation Search service to use the Account1 account.	

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Answer Area
	Create an account name tailspintoys.com domain
	Register Account1 as a S account.
	Configure the SharePoin use the Account1 accour

Create an account named Account1 in the
wingtiptoys.com domain.

Configure the SharePoint Foundation Search service
to use the Account1 account.

QUESTION 6

A company named Contoso, Ltd. has a SharePoint farm. The farm has one Search service application configured. The Search service application contains five crawl databases, all of which contain content. Contoso plans to crawl knowledge base content from its partner company Litware, Inc. The knowledge base content must be stored in a dedicated crawl database. You need to configure crawling. What should you do?

A. Add a crawl database that contains the Litware knowledge base to the existing Search service application.
B. Provision a new Search service application. Configure the service application to crawl the Litware knowledge base content.
C. Set the MaxCrawlDatabase parameter to 6.
D. Create a dedicated Microsoft SQL Server instance for the Litware crawl database.

Correct Answer: D

Explanation/Reference:

QUESTION 12
DRAG DROP
A company has an Active Directory Domain Services (AD DS) domain and a SharePoint environment. The SharePoint environment includes a team site for each department. All domain users have Read permissions on the root site. Currently only Human Resources department members have access to the Human Resources team site.

You have the following requirements for the Human Resources site:

Employees who are not members of the Human Resources department can view only content that is not marked as sensitive.
Human Resources department members can view all content.

You need to configure permissions for the Human Resources site. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Answer Area

Assign the Limited Access permission level on the sensitive content to all users who are not members of the Human Resources department.

Configure the sensitive content in the Human Resources site to break inheritance from the parent site.

Assign the Limited Access permission level on the Human Resources site to users who are not members of the Human Resources department.

Configure the Human Resources site to inherit permissions from the root site.

Remove the Read permission level on the sensitive content from users who are not members of the Human Resources department.

A.

B.

C.

D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Answer Area
Assign the Limited Access permission level on the sensitive content to all users who are not members of the Human Resources department.	Configure the Human Resources site to permissions from the root site.
	Configure the sensitive content in the H Resources site to break inheritance from site.
Assign the Limited Access permission level on the Human Resources site to users who are not members of the Human Resources department.	Remove the Read permission level on th content from users who are not membe Human Resources department.

QUESTION 13
DRAG DROP
You are managing a SharePoint farm that contains the following four sites:

Site1 and Site2 are in the root site collection and contain publicly accessible content. Site3 is a subsite of Site1, and contains confidential content. Site4 is a subsite of Site2, and contains confidential content.

All SharePoint sites within the farm must use the principle of least privilege. You need to plan the site authorization settings. What should you do? (To answer, drag the appropriate terms to the correct site or sites in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

	Answer Area
Contribute	
	Site	**Permissions**
Design	Site1

QUESTION 15

Contoso, Ltd. recently merged with Fabrikam, Inc. Each company has an Active Directory Domain Services (AD DS) domain. You are managing a SharePoint farm in the contoso.com domain. You need to enable users in the fabrikam.com domain to access the Contoso SharePoint farm and prevent users in the contoso.com domain from accessing resources in the fabrikam.com domain. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Configure a two-way forest trust from the fabrikam.com domain to the contoso.com domain.
B. Add the fabrikam.com AD security groups to the SharePoint farm.
C. Configure a two-way forest trust from the contoso.com domain to the fabrikam.com domain.
D. Add the contoso.com AD security groups to the SharePoint farm.
E. Configure a one-way forest trust from the fabrikam.com domain to the contoso.com domain.
F. Configure a one-way forest trust from the contoso.com domain to the fabrikam.com domain.

QUESTION 17
DRAG DROP
You are managing a SharePoint site collection that contains a site for each department. Users in the Accounting department have the following requirements for the department SharePoint site:

All group members must be able to create document workspaces, approve site content, and add group members.
Group membership must be visible only to group members. Other users must not be able to request group membership.

You need to meet the requirements of the Accounting department. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
Select and Place:

In the group settings, set the option for viewing membership to **Everyone**.

In the group settings, set the option for editing membership to **Group Members**.

Create a group named Accountants. Assign the Manage Permissions permission level to the Accountants group.

Create a permission level named Manage Permissions that has the Manage Web Site permission.

Create a permission level named Create Permissions that has the Create Subsites permission.

Create a group named Accountants. Assign the Create Permissions permission level to the Accountants group.

www.ensurepass.com

A.

B.

C.

D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

Answer Area
In the group settings, set the option for viewing membership to **Everyone**.
Create a group named Accountants. Assign the Manage Permissions permission level to the Accountants group.
Create a permission level named Create Permissions that has the Create Subsites permission.

Answer Area

Create a permission level named Manag Permissions that has the Manage Web S permission.

Create a group named Accountants. Ass Create Permissions permission level to t Accountants group.

In the group settings, set the option for membership to **Group Members**.

QUESTION 18
You are configuring a query rule for a site in a SharePoint site collection. You need to promote specific search results during a defined date range only. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Configure actions for the rule.
B. Configure query conditions for the rule.
C. Add the rule with a source type.
D. Add the rule without a source type.
E. Configure publishing options for the rule.

Correct Answer: AE

QUESTION 19
DRAG DROP
You are managing a SharePoint website. You need to add a search service component to the search topology. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Clone the search topology.	
Run the **New-SPEnterpriseSearchServiceApplication** Windows PowerShell cmdlet.	
Modify the active search topology.	
Promote the clone topology to active.	
Run the **New-SPEnterpriseSearchIndexComponent** Windows PowerShell cmdlet.	
Restart the SharePoint Search Application service.	

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Answer Area
	Clone the search topology.
	Run the **New-SPEnterpriseSearchServiceApplication** PowerShell cmdlet.
Modify the active search topology.	Promote the clone topology to active.
Run the **New-SPEnterpriseSearchIndexComponent** Windows PowerShell cmdlet.	
Restart the SharePoint Search Application service.	

QUESTION 20
DRAG DROP
A SharePoint group named Accounting contains 50 user accounts. Group members plan to store documents in a SharePoint app. You need to ensure that only Accounting group members can store or view documents in the app. You must achieve this goal without affecting existing apps or permissions, and by using the least amount of administrative effort. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Create a document library app.	
Grant app permissions to the Accounting group.	
Configure the app to stop inheriting permissions.	
Grant app permissions to the user accounts.	
Modify the permissions of the parent site.	

A.
B.
C.

D.

Correct Answer:
Section: [none]

| Add the Admin1 account to the Site Collection Administrators group. | |

QUESTION 22
DRAG DROP
A SharePoint environment includes an enterprise search application. You are configuring the search
application crawl schedule for a specific farm. You plan to configure the crawl schedule at set intervals of
15 minutes on a continuous basis. The relevant information for the farm is shown in the following graphic.

```
Name         : Search Service Application
Id           : 93b820c1-03ae-4056-afb0-f8e6397556e2
ServiceName  : SearchQueryAndSiteSettingsService
```

You need to ensure that search results are fresh and up-to-date for all SharePoint sites in the environment.
Which Windows PowerShell cmdlets should you run? (To answer, drag the appropriate cmdlets to the
correct variable or variables in the answer area. Each cmdlet may be used once, more than once, or not at
all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Get-SPEnterpriseSearchCrawlContentSource -
SearchApplication $corpsearchapp

Get-SPEnterpriseSearchServiceApplication "Search Service
Application"

Set-SPEnterpriseSearchCrawlContentSource –
EnableContinuousCrawls 1

Set-SPEnterpriseSearchCrawlContentSource -ScheduleType
Full Daily CrawlSchedule -CrawlScheduleRunEveryInterval 30

Set-SPEnterpriseSearchCrawlContentSource -ScheduleType
Incremental -
DailyCrawlScheduleCrawlScheduleRepeatInterval 15 -
CrawlScheduleRepeatDuration 1440

Answer Area

Variable	Windows PowerShell cmdlet
$corpsearchapp =	
$contentsource =	
$contentsource		

A.

B.

C.

D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

Get-SPEnterpriseSearchCrawlContentSource -
SearchApplication $corpsearchapp

Set-SPEnterpriseSearchCrawlContentSource -ScheduleType

~~www.ensurepass.com~~

Answer Area

Variable	Windows PowerShell cmdlet
$corpsearchapp =	Get-SPEnterpriseSearchServiceApplication "Search Service Application"
$contentsource =	Set-SPEnterpriseSearchCrawlContentSource – EnableContinuousCrawls 1
$contentsource		Set-SPEnterpriseSearchCrawlContentSource -ScheduleType Incremental - DailyCrawlScheduleCrawlScheduleRepeatInterval 15 - CrawlScheduleRepeatDuration 1440

QUESTION 23
DRAG DROP
You are managing a SharePoint search topology. An external identity management system handles all user authentication. SharePoint is not indexing some subdirectories of a public SharePoint site. You need to ensure that SharePoint indexes the specific subdirectories. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Include all items in the path.
Exclude all items in the path.
Configure the settings to crawl SharePoint content as HTTP pages.
Configure the settings to crawl complex URLs.
Use the default content access account.
Create a crawl rule that includes the subdirectory path.
Specify a content access account.
Specify form credentials.

Answer Area

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Answer Area
Include all items in the path.	Configure the settings to crawl SharePoint as HTTP pages.
Exclude all items in the path.	Specify a content access account.
	Create a crawl rule that includes the subd path.
Configure the settings to crawl complex URLs.	www.ensurepass.com
Use the default content access account.	
Specify form credentials.	

QUESTION 24
A company is planning to upgrade from SharePoint 2010 to SharePoint 2013. You need to find out the web traffic capacity of the SharePoint farm by using a Microsoft Visual Studio Team System project file. Which tool should you use?

A. Network Monitor
B. SharePoint Health Analyzer
C. SharePoint Diagnostic Studio
D. Load Testing Kit (LTK)

Correct Answer: D
Section: [none]
Explanation

Explanation/Reference:

QUESTION 25
You install SharePoint Server in a three-tiered server farm that meets the minimum requirements for SharePoint 2013 and surrounding technologies. The content databases will reside on Fibre Channel drives in a storage area network (SAN). The backup solution will utilize SAN snapshots. You are estimating storage requirements. You plan to migrate 6 TB of current content from file shares to SharePoint. You need to choose the content database size that will optimize performance, minimize administrative overhead, and minimize the number of content databases. Which content database size should you choose?

A. 100 GB
B. 200 GB
C. 3TB
D. 6TB

Correct Answer: C
Section: [none]
Explanation

QUESTION 44
DRAG DROP
A company's SharePoint environment contains a single web application with a root site collection that hosts the company intranet site. The company plans to allow project managers to create project-specific sites and assign permissions for those sites to project team members. The project sites will contain large files. You have the following requirements:

Create a separate area of the intranet site for the purpose of containing project sites.
Assign a distinct URL to the project site area.
Ensure that project managers can create project sites and add users to project sites. Ensure that project site data is stored separately from other intranet site content.

You need to create and configure the project site area. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
In the root site for the intranet, enable the setting to use additional content databases.	
In a content database separate from that of the intranet site, create a site collection under the managed path.	
In the root site for the site collection, grant project managers permission to create sites and add users to the sites.	
Create a site at the root of the intranet site.	
In Central Administration, create a managed path for the web application.	

A.

B.

C.

D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

Answer Area
In the root site for the intranet, enable the setting to use additional content databases.
Create a site at the root of the intranet site.

Answer Area
In the root site for the site collection, gran managers permission to create sites and a the sites.
In Central Administration, create a manag the web application.
In a content database separate from that intranet site, create a site collection unde managed path.

QUESTION 45
DRAG DROP
You are the administrator of a SharePoint farm. The search index for the farm contains approximately 10 million items. Performance reports indicate that search queries have high latency times and content crawls are slow. You add a new SharePoint server to the farm. You need to configure the new server to add a new index component to the search topology. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Clone the topology.	
Start the search service instance.	
Activate the topology.	
Restart the search service instance.	
Add an index partition and an index replica.	
Add an index component and an index partition.	

A.

B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Answer Area
	Start the search service instance.
	Clone the topology.
	Add an index component and an index partitio
Restart the search service instance.	Activate the topology.
Add an index partition and an index replica.	

QUESTION 46
DRAG DROP
You are managing a SharePoint search topology. You need to index custom entity extractor types
(tokenized content) in unstructured documents. Which three actions should you perform in sequence? (To
answer, move the appropriate actions from the list of actions to the answer area and arrange them in the
correct order.)

Select and Place:

Create a comma-separated word extraction dictionary.

Modify the search service to include the extraction dictionary.

Import the file by running the **Set-SPEnterpriseSearchCrawlContentSource** Windows PowerShell cmdlet.

Import the file by running the **Import-SPEnterpriseSearchCustomExtractionDictionary** Windows PowerShell cmdlet.

Modify the search schema to include the extraction dictionary.

Create a tab-separated word part extraction dictionary.

Create a comma-separated word part extraction dictionary.

Create a tab-separated word extraction dictionary.

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

	Answer Area
Create a comma-separated word extraction dictionary.	Create a comma-separated word part extra dictionary.
Modify the search service to include the extraction dictionary.	Import the file by running the **Import-SPEnterpriseSearchCustomExtractionl y** Windows PowerShell cmdlet.
Import the file by running the **Set-SPEnterpriseSearchCrawlContentSource** Windows PowerShell cmdlet.	Modify the search schema to include the ex dictionary.
Create a tab-separated word part extraction dictionary.	
Create a tab-separated word extraction dictionary.

QUESTION 47
HOTSPOT
A company has a SharePoint farm. The environment contains a server-based virus scanner. You need to configure the SharePoint farm to clean infected documents when users open documents or save documents to their computers. How should you configure the antivirus settings? (To answer, select the appropriate check boxes in the answer area.)

Hot Area:

Antivirus Settings

Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents.

☐ Scan documents on upload

☐ Scan documents on download

www.ensurepass.com

☐ Allow users to download infected documents

☐ Attempt to clean infected documents

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

Antivirus Settings

Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents.

☐ Scan documents on upload

☑ Scan documents on download

QUESTION 52
You are managing a SharePoint farm in an Active Directory Domain Services (AD DS) forest. The forest contains two domains named americas.contoso.com and europe.contoso.com. A single SharePoint farm is located in the americas.contoso.com domain and uses Kerberos authentication. Users in the europe.contoso.com domain cannot access the Excel Services application in the americas. contoso.com domain when using an external data source. You need to ensure that users in the europe.contoso.com domain can use the Excel Services application with external data sources. What should you do?

A. Deploy a SharePoint farm in the europe.contoso.com domain.
B. Configure Kerberos constrained delegation.
C. Configure basic Kerberos delegation.
D. Configure anonymous access in the SharePoint farm.

Correct Answer: A
Section: [none]
Explanation

QUESTION 53
A company's SharePoint environment contains three web applications. The company must record the following information for each document in any of the three web applications:

The date and time at which the document was last reviewed. Additional custom date and time information as requirements are identified.

You have the following requirements:

Ensure that the current information is available when searching content and for refining search results.
Ensure that the additional custom date and time information can be assigned to content in all web applications.
Ensure that SharePoint users who are not farm administrators can record additional date and time information as required.

You need to meet the requirements. What should you do?

A. Create a column of data type Date and Time in a document library in each site collection.
B. In Central Administration, create a term set with a term of data type Date and Time.
C. Create a content type that uses a custom field of data type Date and Time in each site collection.
D. Create a site column of data type Date and Time in each site collection.

Correct Answer: B

QUESTION 54
DRAG DROP
A company has a multi-tenant SharePoint environment that includes a web application named WebApp1. WebApp1 is not secure. The company plans to install SharePoint apps that allow all tenants access to custom applications. You need to ensure that WebApp1 can host the SharePoint apps over a secure URL. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Install the SSL certificate on the SharePoint servers.	
Configure IIS to bind the WebApp1 website to the SSL certificate.	
Configure the SSL certificate in Central Administration.	
Use claims-based authentication to secure user accounts.	
Create an SSL certificate.	
Configure IIS to use Kerberos authentication.	

A.
B.
C.
D.

Correct Answer:
Section: [none]
Explanation

Explanation/Reference:

		Answer Area
		Create an SSL certificate.
		Install the SSL certificate on the SharePo
Configure the SSL certificate in Central Administration.		Configure IIS to bind the WebApp1 websi SSL certificate.
Use claims-based authentication to secure user accounts.		
Configure IIS to use Kerberos authentication.		

QUESTION 55
DRAG DROP
You are troubleshooting services in a SharePoint environment. The services have the following logging requirements:

Business Connectivity Services must have only the minimum logging level.
Word Automation Services must log all errors.
The Search service logs must log all activity.

You need to apply the appropriate trace log diagnostic level for each service. Which diagnostic level should you apply to each service? (To answer, drag the appropriate levels to the correct service or services in the answer area. Each level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

High		Answer Area

Medium
Monitorable
Unexpected
Verbose

Level	Service
	Business Connectivity Services
	Word Automation Services
	Search service

A.
B.
C.
D.

QUESTION 59
A SharePoint farm includes two front-end web servers, one application server, and two clustered servers that run Microsoft SQL Server. The SharePoint Foundation Web Application service is not running on the application server. You plan to configure the SharePoint farm to receive and store email messages and email message attachments in libraries. You need to ensure that users can send email messages and attachments directly to libraries across the entire farm. You must accomplish this goal by using the least amount of effort. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Install and configure the Simple Mail Transfer Protocol (SMTP) service on each application server.
B. Install and configure the Simple Mail Transfer Protocol (SMTP) service on each front-end web server.
C. Enable and start the SharePoint Foundation Web Application service on each application server.
D. Enable incoming email by using the Automatic settings mode.
E. Enable and start the SharePoint Foundation Web Application service on each front-end web server.
F. Enable incoming email by using the Advanced settings mode.
