MCSA Windows Server 2012

(70-410 Installing and Configuring Windows Server 2012)

Please Send Your Suggestions and Comments! to : frinfoparis@gmail.com

Exam A

QUESTION 1

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

ABC.com has a server, named ABC-SR07, which has two physical disks installed. The C: drive hosts the boot partition, while the D: drive is not being used. Both disks are online.

You have received instructions to create a virtual machine on ABC-SR07. Subsequent to creating the virtual machine, you have to connect the D: drive to the virtual machine.

Which of the following is TRUE with regards to connecting a physical disk to a virtual machine?

- A. The physical disk should not be online.
- B. The physical disk should be uninstalled and re-installed.
- C. The physical disk should be configured as a striped disk.
- D. The physical disk should be configured as a mirrored disk.

Correct Answer: A

Section: (none)

QUESTION 2

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

You are running a training exercise for junior administrators. You are currently discussing the new VHD format called VHDX.

Which of the following is TRUE with regards to VHDX? (Choose all that apply.)

- A. It supports virtual hard disk storage capacity of up to 64 GB.
- B. It supports virtual hard disk storage capacity of up to 64 TB.
- C. It does not provide protection against data corruption during power failures.
- D. It has the ability to store custom metadata about the file that the user might want to record.

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

QUESTION 3

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed, and all workstations have Windows 8 installed.

You are running a training exercise for junior administrators. You are currently discussing a Windows PowerShell cmdlet that activates previously de-activated firewall rules.

Which of the following is the cmdlet being discussed?

- A. Set-NetFirewallRule
- B. Enable-NetFirewallRule
- C. Set-NetIPsecRule
- D. Enable-NetIPsecRule

Correct Answer: B

Section: (none)

QUESTION 4

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed, and all workstations have Windows 8 installed.

You are running a training exercise for junior administrators. You are currently discussing the Always Offline Mode.

Which of the following is TRUE with regards to the Always Offline Mode? (Choose all that apply.)

- A. It allows for swifter access to cached files and redirected folders.
- B. To enable Always Offline Mode, you have to satisfy the forest and domain functional-level requirements, as well as schema requirements.
- C. It allows for lower bandwidth usage due to users are always working offline.
- D. To enable Always Offline Mode, you must have workstations running Windows 7 or Windows Server 2008 R2.

Correct Answer: AC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 5

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2008 R2 installed. Some of ABC.com's workstations have Windows 7 installed, while the rest have Windows 8 installed.

After installing a new Windows Server 2012 computer in the ABC.com domain, you configure it to run the File and Storage Services server role. You are instructed to create a shared folder on the new server, and configure the use of Previous Versions for restoring files located in the shared folder.

<http://www.gratisexam.com/>

Which of the following actions should you take?

- A. You should consider configuring the Shadow Copies settings on the new server.
- B. You should consider configuring the Snapshot settings on the new server.
- C. You should consider configuring the Background Copy settings on the new server.
- D. You should consider configuring the Permission settings on the new server.

Correct Answer: A

Section: (none)

Explanation

QUESTION 6

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

You are running a training exercise for junior administrators. You are currently discussing printer pooling.

Which of the following is TRUE with regards to printer pooling? (Choose all that apply.)

- A. Printers in a pool must be of the same model, and use the same printer driver.
- B. Each printer in the pool must have a different printer driver.
- C. Printer ports used in the pool must be of the same type.
- D. The types of printer ports used in the pool must be mixed.
- E. Pooled printers appear to workstations as a single printer.
- F. A minimum of three printers are required to configure a printer pool.

Correct Answer: AE

Section: (none)

QUESTION 7

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

ABC.com has a server, named ABC-SR13. ABC-SR13 hosts a shared folder, named ABCShare, which has been shared as ABCShare\$.

Which of the following is TRUE with regards to sharing the folder in this manner?

- A. It allows all users to view ABCShare when browsing the network.
- B. It prevents users from viewing ABCShare when browsing the network.
- C. It only allows ABC-SR13's users to view ABCShare.
- D. It removes the permissions configured for ABCShare.

Correct Answer: B

Section: (none)

Explanation/Reference:

Explanation:

QUESTION 8

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com.

ABC.com has a server, named ABC-SR15, which has Windows Server 2012 installed. ABC.com also has a server, named ABC-SR16, which has Windows Server 2008 R2 SP1 installed.

You have been instructed to make sure that ABC-SR16 is able to run Windows PowerShell 3.0.

Which of the following actions should you take? (Choose two.)

- A. You should consider making sure that ABC-SR16 has a full installation of Microsoft .NET Framework 4 installed.
- B. You should consider making sure that ABC-SR16 has a full installation of Microsoft .NET Framework 2 installed.
- C. You should consider making sure that ABC-SR16 has WS-Management 3.0 installed.

D. You should consider making sure that ABC-SR16 is upgraded to Windows Server 2012.

Correct Answer: AC

Section: (none)

Explanation

Explanation/Reference:

QUESTION 9

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

ABC.com has a server, named ABC-SR07, which has the ADDS, DHCP, and DNS server roles installed. ABC.com also has a server, named ABC-SR08, which has the DHCP, and Remote Access server roles installed. You have configured a server, which has the File and Storage Services server role installed, to automatically acquire an IP address. The server is named ABC- SR09.

You then create reservation on ABC-SR07, and a filter on ABC-SR08.

Which of the following is a reason for this configuration?

- A. It allows ABC-SR09 to acquire a constant IP address from ABC-SR08 only.
- B. It configures ABC-SR09 with a static IP address.
- C. It allows ABC-SR09 to acquire a constant IP address from ABC-SR07 and ABC-SR08.
- D. It allows ABC-SR09 to acquire a constant IP address from ABC-SR07 only.

Correct Answer: D

QUESTION 10

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

ABC.com has a server, named ABC-SR13, which is configured as the primary DNS server in the ABC.com domain. ABC.com has another server, named ABC-SR14, which makes use of ABC- SR13 for DNS queries.

You want to make sure that running nslookup.exe from ABC-SR14 produces a result that shows the proper name of the default server.

Which of the following actions should you take?

- A. You should consider creating a reverse lookup zone on ABC-SR14.
- B. You should consider creating a forward lookup zone on ABC-SR14.
- C. You should consider creating a reverse lookup zone on ABC-SR13.
- D. You should consider creating a forward lookup zone on ABC-SR13.

Correct Answer: C

QUESTION 11

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012

installed.

ABC.com has a domain controller, named ABC-DC01, which contains the ABC.com domain's primary DNS zone. ABC.com's workstations refer to ABC-DC01 as their primary DNS server.

You have been instructed to make sure that any DNS requests that are not for the ABC.com domain, is resolved by ABC-DC01 querying the DNS server of ABC.com's Internet Service Provider (ISP).

Which of the following actions should you take?

- A. You should consider configuring a reverse lookup zone.
- B. You should consider configuring forward lookup zone.
- C. You should consider configuring Forwarders.
- D. You should consider configuring 019 IP Layer Forwarding.

Correct Answer: C

QUESTION 13

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

You have been instructed to make sure that ABC.com users are not able to install a Windows Store application. You then create a rule for packaged apps.

Which of the following is the rule based on? (Choose all that apply.)

- A. The publisher of the package.
- B. The publisher of the application.
- C. The name of the package
- D. The name of the application
- E. The package version.
- F. The application version.

Correct Answer: ACE

QUESTION 15

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

ABC.com's user accounts are located in an organizational unit (OU), named ABCStaff. ABC.com's managers belong to a group, named ABCManagers.

You have been instructed to create a new Group Policy object (GPO) that should be linked to the ABCStaff OU, but not affect ABC.com's managers.

Which of the following actions should you take?

- A. You should consider removing the user accounts of the managers from the ABCStaff OU.
- B. You should consider configuring the new GPO's WMI filter.
- C. You should consider adding the user accounts of ABC.com's managers to the Admins group.
- D. You should consider adding the user accounts of ABC.com's managers to the localAdministrators group.

Correct Answer: B

QUESTION 16

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

You are running a training exercise for junior administrators. You are currently discussing the Windows Firewall with Advanced Security feature.

Which of the following is TRUE with regards to Windows Firewall with Advanced Security? (Choose all that apply.)

- A. It provides host-based, two-way network traffic filtering for a computer.
- B. It provides host-based, one-way network traffic filtering for a computer.
- C. It blocks unauthorized network traffic flowing into or out of the local computer.
- D. It only blocks unauthorized network traffic flowing into the local computer.
- E. It only blocks unauthorized network traffic flowing out of the local computer.

QUESTION 18

You work as an administrator at ABC.com. The ABC.com network consists of two Active Directory forests, named ABC.com and test.com. There is no trust relationship configured between the forests.

A backup of Group Policy object (GPO) from the test.com domain is stored on a domain controller in the ABC.com domain. You are informed that a GPO must be created in the ABC.com domain,

and must be based on the settings of the GPO in the test.com domain.

You start by creating the new GPO using the New-GPO Windows PowerShell cmdlet. You want to complete the task via a Windows PowerShell cmdlet.

Which of the following actions should you take?

- A. You should consider making use of the Invoke-GPUUpdate Windows PowerShell cmdlet.
- B. You should consider making use of the Copy-GPO Windows PowerShell cmdlet.
- C. You should consider making use of the New-GPLink Windows PowerShell cmdlet.
- D. You should consider making use of the Import-GPO Windows PowerShell cmdlet.

Correct Answer: D

QUESTION 19

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com.

ABC.com has a domain controller, named ABC-DC01, which has Windows Server 2012 installed. Another ABC.com domain controller, named ABC-DC02, has Windows Server 2008 R2 installed.

You have deployed a server, named ABC-SR15, on ABC.com's perimeter network. ABC-SR15 is running a Server Core Installation of Windows Server 2012.

You have been instructed to make sure that ABC-SR15 is part of the ABC.com domain.

Which of the following actions should you take?

- A. You should consider making use of Set-Computer Windows PowerShell cmdlet on ABC-SR15.
- B. You should consider making use of Get-Computer Windows PowerShell cmdlet on ABC-SR15.
- C. You should consider making use of Test-Computer Windows PowerShell cmdlet on ABC-SR15.
- D. You should consider making use of Add-Computer Windows PowerShell cmdlet on ABC-SR15.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:**QUESTION 20**

You work as an administrator at ABC.com. The ABC.com network consists of an Active Directory forest that contains a root domain, named ABC.com, and two child domains, named us.ABC.com and uk.ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

The root domain hosts a domain local distribution group, named ABCGroup. You are preparing to issue ABCGroup read-only access to a shared folder hosted by the us.ABC.com domain.

You want to make sure that ABCGroup is able to access the shared folder in the us.ABC.com domain.

Which of the following actions should you take?

- A. You should consider re-configuring ABCGroup as a universal Admins group.
- B. You should consider re-configuring ABCGroup as a universal security group.
- C. You should consider re-configuring ABCGroup as a global administrators group.
- D. You should consider re-configuring ABCGroup as a local administrators group.

QUESTION 36

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com.

ABC.com has a Windows Server 2012 domain controller, named ABC-DC01, which has the Domain Naming master and the Schema master roles installed. ABC.com also has a Windows Server 2008 R2 domain controller, named ABC-DC02, which has the PDC Emulator, RID master, and Infrastructure master roles installed.

You have deployed a new Windows Server 2012 server, which belongs to a workgroup, in ABC.com's perimeter network. You then executed the djoin.exe command.

Which of the following is the purpose of the djoin.exe command?

- A. It sets up a computer account in a domain and requests an offline domain join when a computer restarts.
- B. It sets up a user account in a domain and requests an online domain join when a computer restarts.
- C. It sets up a computer account in a domain and requests an offline domain join immediately.
- D. It sets up a computer account in a domain and requests an online domain join immediately.

Correct Answer: A

QUESTION 37

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

When you recently added new workstations to the ABC.com manually, you found that the computer accounts were created in the default container. You want to make sure that the default container for newly created computers is redirected to a specified, target organizational unit (OU).

Which of the following actions should you take?

- A. You should consider making use of the replace.exe command-line tool.
- B. You should consider making use of the redircmp.exe command-line tool.
- C. You should consider making use of the redirusr.exe command-line tool.
- D. You should consider making use of the rexec.exe command-line tool.

Correct Answer: B

QUESTION 38

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

You are running a training exercise for junior administrators. You are currently discussing the Virtual Fibre Channel SAN feature.

Which of the following is TRUE with regards to the Virtual Fibre Channel SAN feature? (Choose all that apply.)

- A. It prevents virtual machines from connecting directly to Fibre Channel storage.
- B. It allows for virtual machines to connect to Fibre Channel storage directly.
- C. It includes support for virtual SANs, live migration, and multipath I/O.
- D. It includes support for virtual SANs, and live migration, but not multipath I/O.

QUESTION 39

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

You are running a training exercise for junior administrators. You are currently discussing what happens when you run the Remove-NetLbfoTeam Windows PowerShell cmdlet.

Which of the following describes the results of running this cmdlet?

- A. It removes one or more network adapters from a specified NIC team.
- B. It removes a team interface from a NIC team.
- C. It removes a specified NIC team from the host.
- D. It removes a network adapter member from a switch team.

QUESTION 40

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

You are running a training exercise for junior administrators. You are currently discussing the use of Non-Uniform Memory Architecture (NUMA).

Which of the following is TRUE with regards to Non-Uniform Memory Architecture (NUMA)? (Choose two.)

- A. It is a computer architecture used in multiprocessor systems.
- B. It is a computer architecture used in single processor systems.
- C. It allows a processor to access local memory faster than it can access remote memory.
- D. It allows a processor to access remote memory faster than it can access local memory.

QUESTION 41

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

ABC.com has a Hyper-V server, named ABC-SR13, which hosts multiple virtual machines.

You have enabled the use of Single-root I/O virtualization.

Which of the following is TRUE with regards to using Single-root I/O virtualization? (Choose all that apply.)

- A. It maximizes network throughput, while minimizing network latency.
- B. It maximizes network throughput, as well as network latency.
- C. It avoids the virtual switch stack and allows the virtual machine direct access to the actual network switch.
- D. It prevents the virtual machine from accessing the network switch directly.

QUESTION 42

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

ABC.com has a domain controller, named ABC-DC01. You have been instructed to make sure that the Group Policy Administrative Templates are available centrally.

Which of the following actions should you take?

- A. You should consider copying the policies folder to the PolicyDefinitions folder in the ABC.com domain's SYSVOL folder.
- B. You should consider copying the PolicyDefinitions folder to the policies folder in the ABC.com domain's SYSVOL folder.
- C. You should consider copying the PolicyDefinitions folder to the policies folder in the ABC.com domain's systemroot folder.
- D. You should consider copying the PolicyDefinitions folder to the policies folder in the ABC.com domain's logonserver folder.

QUESTION 43

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

You have configured a server, named ABC-SR07, as a VPN server. You are required to configure new firewall rules for workstation connections.

You want to achieve this using the least amount of administrative effort.

Which of the following actions should you take?

- A. You should consider making use of the Enable-NetFirewallRule cmdlet.
- B. You should consider making use of the New-NetFirewallRule cmdlet.
- C. You should consider making use of dism.exe from the command prompt.
- D. You should consider making use of dsadd.exe from the command prompt.

QUESTION 44

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers in the ABC.com domain, including domain controllers, have Windows Server 2012 installed.

You have created and linked a new Group Policy object (GPO) to an organizational unit (OU), named ABCServ, which host the computer accounts for servers in the ABC.com domain.

You have been tasked with adding a group to a local group on all servers in the ABC.com domain. This group should not, however, be removed from the local group.

Which of the following actions should you take?

- A. You should consider adding a restricted group.
- B. You should consider adding a global group.
- C. You should consider adding a user group.
- D. You should consider adding a server group.

Correct Answer: A

QUESTION 47

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed.

You have received instructions to convert a basic disk to a GPT disk.

Which of the following is TRUE with regards to GPT disks? (Choose all that apply.)

- A. To convert a basic disk to a GPT disk, the disk must not contain any partitions or volumes.
- B. You can convert a basic disk to a GPT disk, regardless of partitions or volumes.
- C. GPT is required for disks larger than 2 TB.
- D. GPT is required for disks smaller than 2 TB.
- E. The GPT partition style can be used on removable media.
- F. GPT disks make use of the standard BIOS partition table.
