Exam A

QUESTION 1

Your company uses Microsoft SharePoint Online

You have a private site collection named Site1

You need to provide anonymous access to several documents and webpages. The solution must use the minimum amount of administrative effort.

What should you do?

- A. Create a permission policy.
- B. Modify the anonymous policy of the Site1 web application
- C. Modify the user permission of the Site1 web application
- D. Create a public website site collection

Correct Answer:

Section: (none)

Explanation

Explanation/Reference:

Question 1:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file. please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 2

You plan to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You need to recommend a solution for My Site to meet the following requirements:

- The My Site sites of users in the sales department must have URLs that start with <http://sales.contoso.com/users>.
- all other My Site sites must have URLs that start with <http://intranet.contoso.com/mysites>.

what should you include in the recommendation ?

- A. one User Profile Service service application and two managed paths.
- B. two User Profile Service service application and two managed paths.
- C. two User Profile Service service application and one managed paths.
- D. one User Profile Service service application and one managed paths.

Correct Answer:

Section: (none)

Explanation

Question 2:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file. please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 3

Your company plans to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You are designing a maintenance strategy for the farm.

You plan to apply critical Windows updates to the server in the farm once a month.

You need to recommend a strategy to insure that the installation of the Windows updates will not prevent users from searching for content in SharePoint sites.

What should you include in the recommendation?

- A. multiple Search service applications
- B. multiple crawl databases
- C. multiple host duration rules
- D. multiple query servers

Correct Answer:

Section: (none)

Explanation

Explanation/Reference:

Question 3:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 4

You have a SharePoint 2010 (SP1) server farm.

Several farm solutions are deployed to the farm.

You need to recommend a strategy to back the solutions that are deployed to the farm.

Which cmdlet should you include in the recommendation?

- A. Backup-SPContentDatabase
- B. Backup-SPFarm
- C. Backup-SPWeb
- D. Backup-SPConfigurationDatabase

Correct Answer:

Section: (none)

Explanation

Explanation/Reference:

Question 4:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 5

You plan to deploy a PerformancePoint dashboard that will display data from a cube hosted in Microsoft SQL Server Analysis Services.

The following identities are used by services and application pools:

- The Claims to Windows Token Service process identity is contoso\C2WTS
- The PerformancePoint application pool identity is contoso\SPPPS
- The Secure Store application pool identity is contoso\SPSSS
- The SQL Server Analysis Service identity is contoso\SQLAS

You need to ensure that when a user connects to the dashboard, the user credentials are used to connect to the cube.

Which identities should you enable for Kerberos constrained delegation ? (Each correct answer presents parts of the solution. Choose all that apply.)

- A. contoso\C2WTS
- B. contoso\SPPPS
- C. contoso\SPSSS
- D. contoso\SQLAS

Correct Answer:

Section: (none)

Explanation

Question 5:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 6

You plan to deploy SharePoint Server 2010 Service Pack 1 (SP1) server farms named Farm1, Farm2 and Farm3.

You identify the following requirements for each farm:

<http://www.gratisexam.com/>

- Farm1 will be dedicated to hosting shared services for users located in Asia and Africa.
- Farm2 will host content and sites for users located in Asia.
- Farm3 will host content and sites for users located in Africa.

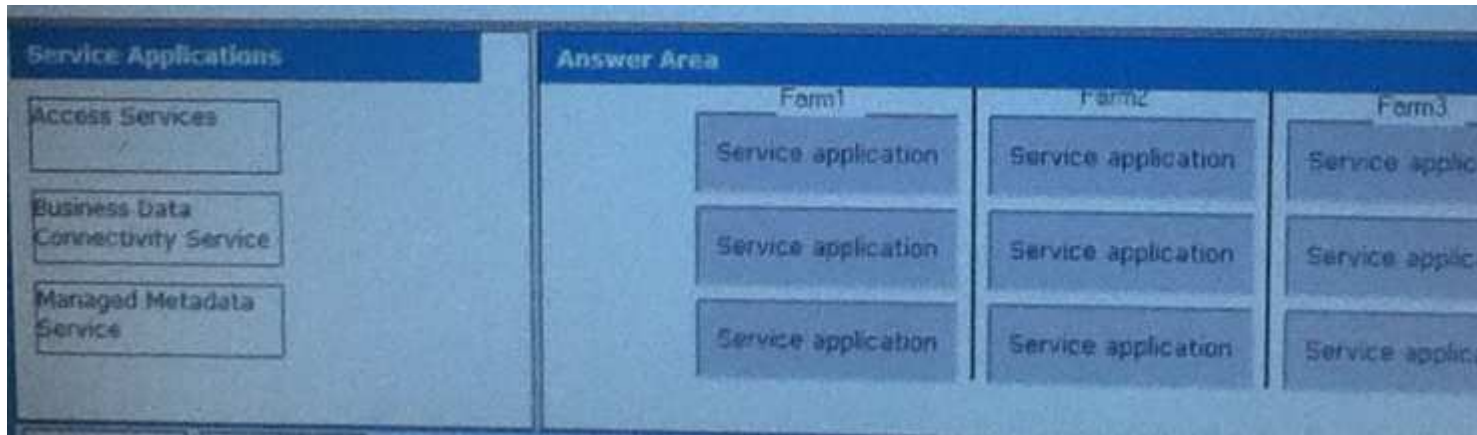

You plan to deploy the following service applications for all of the users.

- Access Services
- Managed Metadata Service
- Business Data Connectivity Service

You need to recommend to which farm each service application must be deployed. the solution must minimize

the number of service applications deployed to each farm. any services that can be shared must be deployed to Farm1.

Which service applications should you recommend.

I changed the answers to multichoice so it can be viewed on Mobile VCE.

- A. Farm 1 - Access Services
- B. Farm 1 - Business Data Connectivity Services
- C. Farm 1 - Managed Metadata Service
- D. Farm 2 - Access Services
- E. Farm 2 - Business Data Connectivity Services
- F. Farm 2 - Managed Metadata Service
- G. Farm 3 - Access Services
- H. Farm 3 - Business Data Connectivity Services
- I. Farm 3 - Managed Metadata Service

Correct Answer:

Section: (none)

Explanation

Explanation/Reference:

Question 6:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 7

You have a SharePoint 2007 server farm that contain four servers. the servers are configured as shown in the following table.

Server name	Server operating system	Server configuration
APP1	64-bit version of Windows Server 2008	SharePoint Server 2007 Service Pack 1 (SP1)
SQL1	64-bit version of Windows Server 2003	Microsoft SQL Server 2005 Service Pack 3 (SP3)
WFE1	Windows Server 2003 x86	SharePoint Server 2007 Service Pack 1 (SP1)
WFE2	64-bit version of Windows Server 2008	SharePoint Server 2007 Service Pack 1 (SP1)

You need to recommend which steps are required to upgrade the farm to SharePoint Server 2010 SP1.

Actions	Answer Area
Decommission WFE1.	
Upgrade SQL1 to SQL Server 2008 R2.	
Install SharePoint Server 2010 SP1 on SQL1.	
Upgrade APP1 and WFE2 to SharePoint Server 2010 SP1.	
Install SharePoint Server 2007 Service Pack 2 (SP2) on APP1 and WFE2.	

I didn't know how to change drag and drop questions to simple questions.

A.

Correct Answer:

Section: (none)

Explanation

Explanation/Reference:

Question 7:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file. please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 8

You have a SharePoint Server 2007 Service Pack 3 (SP3) server farm.

You plan to migrate the farm to SharePoint Server 2010 Service Pack 1 (SP1) by using the database attach method.

You need to identify which components must be reconfigured manually after the content databases are

migrated.

Which components should you identify? (Each correct answer presents part of the solution. Choose all that apply.)

- A. approval workflows.
- B. permission policies for the web applications
- C. Web Parts that contain custom code
- D. outgoing email settings
- E. site collection permissions

Correct Answer:

Section: (none)

Explanation

Question 8:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 9

You have a Microsoft Sharepoint Portal Server 2003 Service Pack 3 (SP3) server farm.

The farm uses a database server named SQL1. SQL1 runs the 32-bit version of Windows Server 2003 R2 and has Microsoft SQL Server 2005 SP3 installed.

You need to recommend which steps are required to upgrade the farm to SharePoint Server 2010 Service Pack1 (SP1).

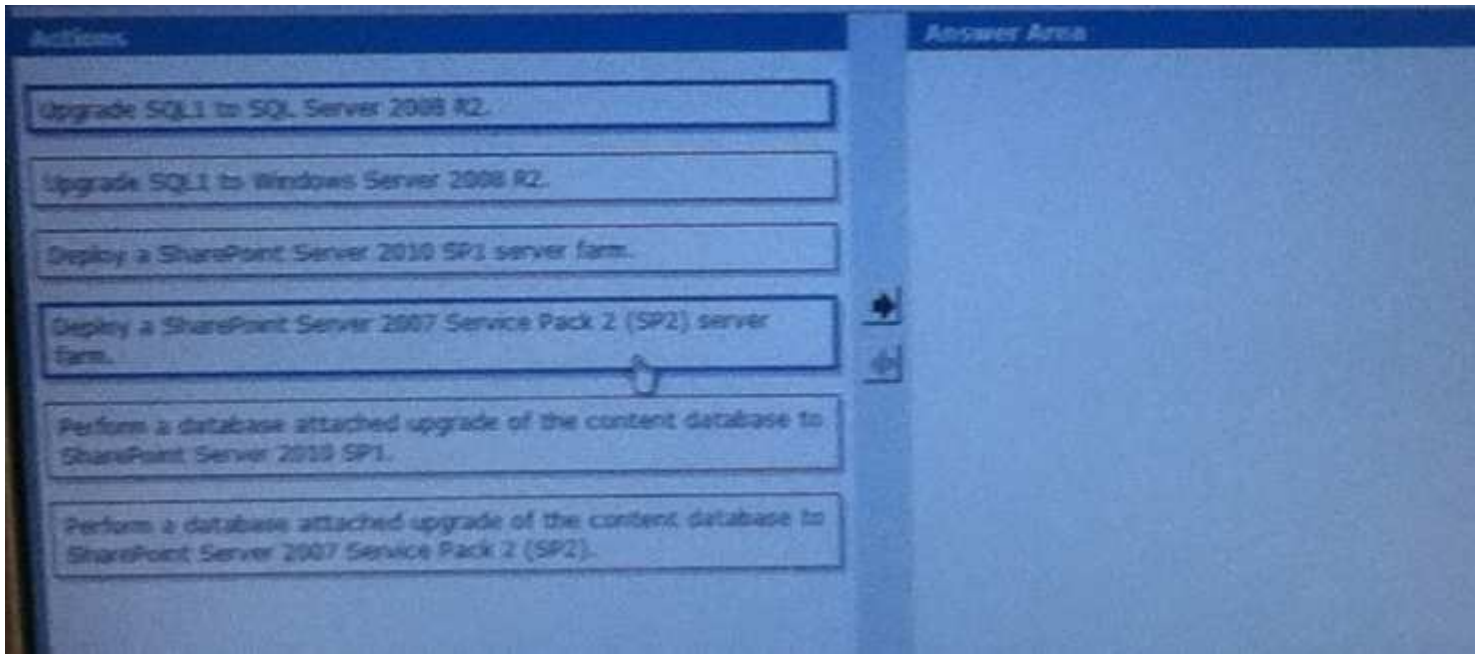

what should you do ?

To Answer, move the appropriate actions from the list of actions to answer area and arrange them in the correct order.

Items are:

1. Upgrade SQL1 to SQL Server 2008 R2.
2. Upgrade SQL1 to Windows Server 2008 R2.
3. Deploy a SharePoint Server 2010 SP1 server farm.
4. Deploy a SharePoint Server 2007 Service Pack 2 (SP2) server farm.
5. Perform a database attached upgrade of the content database to SharePoint Server 2010 SP1.
6. Perform a database attached upgrade of the content database to SharePoint Server 2007 Service Pack 2 (SP2).

These items are in random order as it appeared in the exam picture.

A.

Correct Answer:

Section: (none)

Explanation

Question 9:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 10

You plan to deploy SharePoint Server 2010 Service Pack 1 (SP1) for the human resource department.

You plan to create two SharePoint groups named Group1 and Group2.

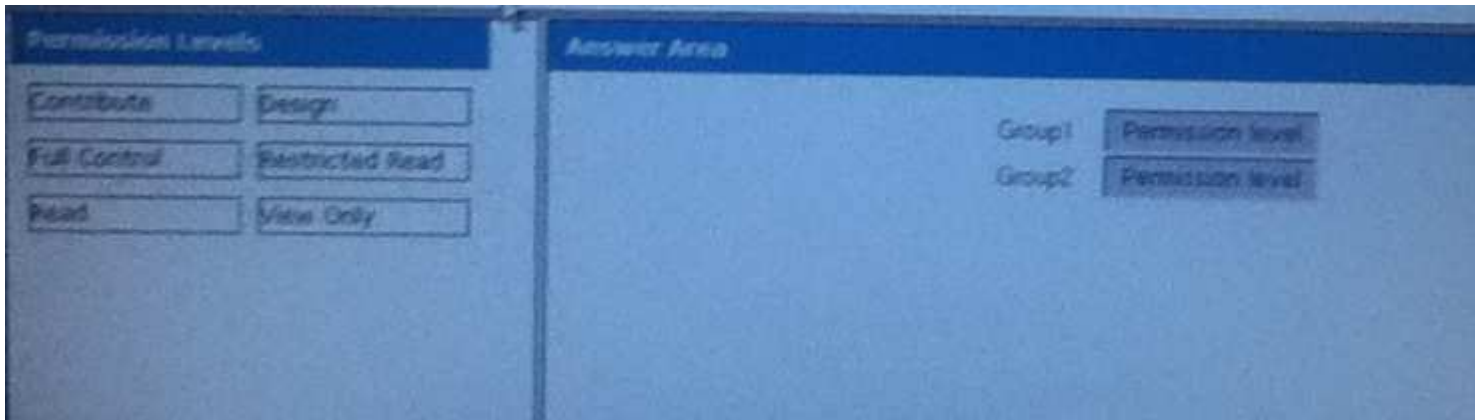

The groups must have the following permissions.

- Users on Group1 must be able to view pages and documents, but must be prevented from viewing the historical versions of pages and documents and the permissions of users.
- Users in Group2 must be able to view pages and list items, and to download documents.

You need to identify the permission level required for each group. The solution must minimize the number of permissions assigned to each group.

Which permission level should you identify?

To answer, drag the appropriate permission level to the group in the answer area.

I changed it to multi select question, choose 1 Item for Group1 and 1 Item for Group2.

- A. Group 1 - Contribute
- B. Group 1 - Design
- C. Group 1 - Full Control
- D. Group 1 - Restricted Read
- E. Group 1 - Read
- F. Group 1 - View Only
- G. Group 2 - Contribute
- H. Group 2 - Design
- I. Group 2 - Full Control
- J. Group 2 - Restricted Read
- K. Group 2 - Read
- L. Group 2 - View Only

Correct Answer:

Section: (none)

Explanation

Question 10:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.
please send the VCE file with answer to me, or just simply send me the answers by email. my email address is
bytexorer@gmail.com.

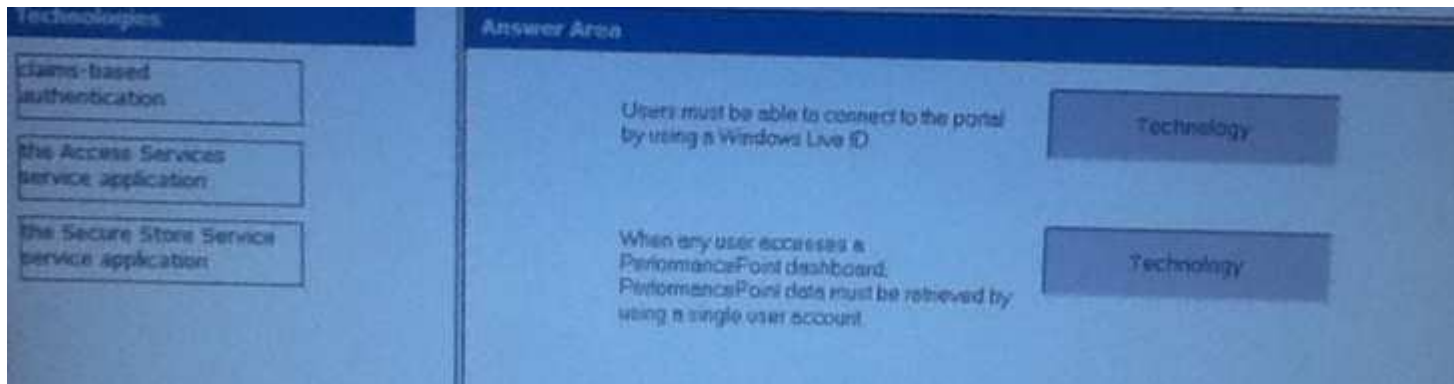

QUESTION 11

You plan to deploy a business intelligence portal on a server that has SharePoint Server 2010 Service Pack 1 (SP1) installed.

You identify the following requirements for the planned deployment.

- Req1 - Users must be able to connect to the portal by using a Windows Live ID.
- Req2 - When any user accesses PerformancePoint dashboard, PerformancePoint data must be retrieved by using a single user account.

for changing this question to multi select, when name above requirement, Req1 and Req2 Sequentially.

Which technology should you identify ?

Choose one Item for Req1 and one Item for Req2.

- A. Req1 - Claim based Authentication
- B. Req1 - the Access Service service application.
- C. Req1 - the Secure Store Service service application
- D. Req2 - Claim based Authentication
- E. Req2 - the Access Service service application.
- F. Req2 - the Secure Store Service service application

Correct Answer:

Section: (none)

Question 11:

I don't know the Answer for these questions.

if you know the answer please edit this VCE file in Visual CertExam Designer and put the answers in the file.

please send the VCE file with answer to me, or just simply send me the answers by email. my email address is bytexorer@gmail.com.

QUESTION 12

Your company is evaluating the development of three custom SharePoint solutions named Solution1, Solution2, and Solution3.

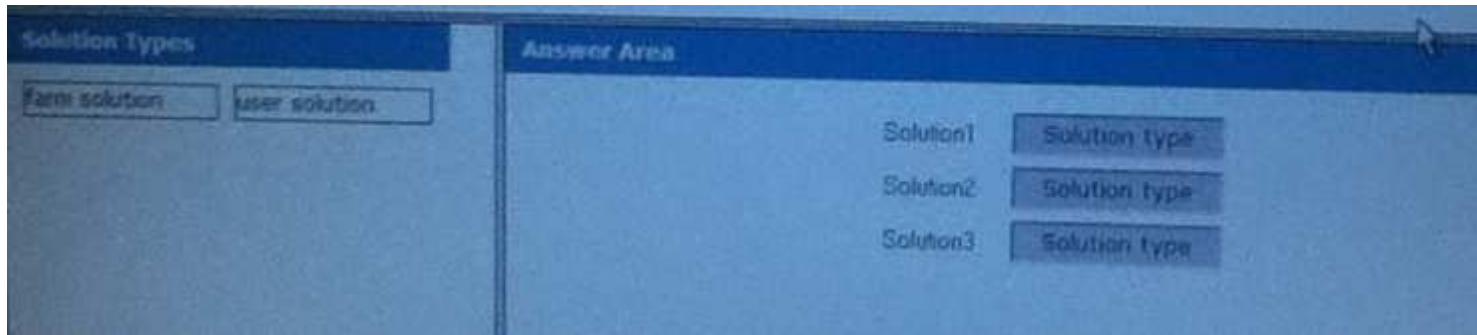

You identify the following requirements for the custom solutions:

- Solution1 will retrieve information from a Microsoft SQL Server database.
- Solution2 will aggregate information from multiple site collections.
- Solution3 will retrieve data from multiple lists in a site. Solution3 must be load balanced between all front-end Web servers.

You need to recommend which type of solution must be used for each custom solution.

Which type of solution should you recommend?

To answer, drag the appropriate solution type to the correct custom solution in the answer area.

I changed this question to multi choice, Choose one item for each solution.

- A. Solution 1 - Farm Solution
- B. Solution 2 - Farm Solution
- C. Solution 3 - Farm Solution
- D. Solution 1 - User Solution
- E. Solution 2 - User Solution
- F. Solution 3 - User Solution

Correct Answer:

Section: (none)

bytexorer@gmail.com.

QUESTION 13

You plan to deploy SharePoint Server 2010 Service Pack 1 (SP1) server farms named Farm1, Farm2 and Farm3.

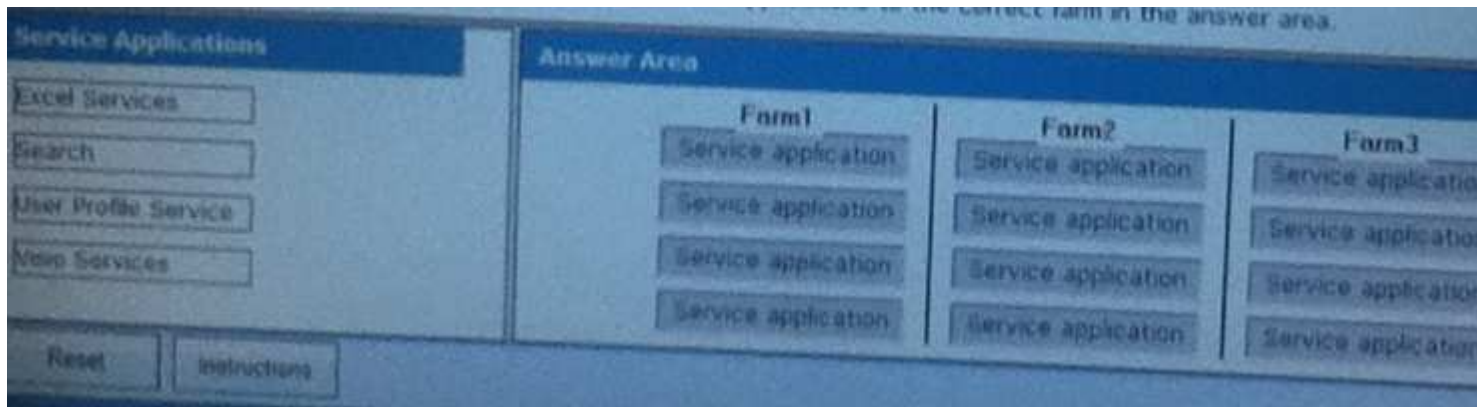

- Farm1 - Dedicated to hosting shared services.
- Farm2 - Dedicated to hosting content for the human resources department.
- Farm3 - Dedicated to hosting content for the finance department.

You identify the following deployment requirements:

- Users in the human resources department must be able to manage their user profile and to view Microsoft Excel files by using a web browser.
- Users in the finance department must be able to search for finance content, to manage their user profile, and to view Microsoft Visio web drawings in web browser.

You need to identify which service application or service applications must be deployed to each farm. Any services that can be shared must be deployed to Farm1.

Which service applications should you identify?

- A. Farm 1 - Excel Services
- B. Farm 1 - Search
- C. Farm 1 - User Profile Services
- D. Farm 1 - Visio Services
- E. Farm 2 - Excel Services
- F. Farm 2 - Search
- G. Farm 2 - User Profile Services
- H. Farm 2 - Visio Services
- I. Farm 3 - Excel Services
- J. Farm 3 - Search
- K. Farm 3 - User Profile Services
- L. Farm 3 - Visio Services

Correct Answer:

Section: (none)
