## 70-668 by SharePoint Guy 2010

### QUESTION 1

You need to recommend a backup strategy for the content in a SharePoint site collection. The strategy must meet the following requirements: • Adhere to the company's business requirements. • Minimize the amount of time required to restore the entire server farm. What should you include in the backup strategy?

- A. granular backups and Microsoft SQL Server transaction log backups
- B. full farm backups and granular backups
- C. full farm backups and Microsoft SQL Server transaction log backups
- D. full farm backups and differential farm backups

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Correct answer explanation and reference.

### QUESTION 2

You are a SharePoint administrator for Fabrikam, Inc. The company has a main office and three branch offices. The main office is located in Paris. The branch offices are located in New York, Tokyo, and Toronto. The company has 2,000 employees. You plan to deploy two SharePoint Server 2010 server farms. One farm will host a corporate intranet Web site and one farm will host a public Web site. The intranet will be used for collaboration and Web content management. You need to ensure that ProjectSite.wsp is the only template used to create collaboration sites. What should you do?

- A. Rename ProjectSite.wsp as Default.wsp.
- B. Deploy ProjectSite.wsp to the root site collection.
- C. Modify the Subsite Template settings for the collaboration environment.
- D. Deactivate the SharePoint Server Publishing feature.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Correct answer explanation and reference.

### QUESTION 3

You are a SharePoint administrator for Wingtip Toys. The company has a main office and 10 distribution centers. The main office is located in Miami. The company has 36 departments. Each department has a department manager. You need to recommend which SharePoint Server 2010 feature meets the technical requirements of the distribution centers. Which feature should you recommend?

- A. the Application Registry Service
- B. the enterprise site collection feature
- C. the Content Type Syndication Hub
- D. the Publishing Infrastructure

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

To use the page output cache and the associated cache profile settings, you must be using the Publishing

feature on your site.

#### QUESTION 4

You need to recommend a search solution that meets the company's user requirements. You must minimize the amount of effort required to administer a search. What should you include in the solution?

- A. • two query servers • one crawl server • one mirrored index partition • two property databases • one crawl database
- B. • two query servers • two crawl servers • two index partitions • one mirrored property database • one mirrored crawl database
- C. • two query servers • two crawl servers • one mirrored index partition • one mirrored property database • one mirrored crawl database
- D. • two query servers • two crawl servers • one mirrored index partition • two property databases • two crawl databases

Answer B

Correct answer explanation and reference.

**Correct Answer:**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### QUESTION 5

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

- WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>.
- WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

You plan to implement SSL in WebApp1.

You need to recommend a solution to ensure that the internal users can access WebApp1 by using HTTP and HTTPS.

What should you include in the recommendation?

- A. service application groups
- B. Remote BLOB Storage (RBS)
- C. the Access Services service application
- D. Microsoft Visual Studio 2010
- E. the Secure Store Service service application
- F. Information Rights Management (IRM)
- G. user policies
- H. managed accounts
- I. cross-firewall access zones
- J. Network Access Protection (NAP)
- K. SharePoint Health Analyzer

- L. a BLOB cache
- M. Active Directory Federation Services (AD FS)
- N. Network Load Balancing (NLB)
- O. an ASP.NET Membership Database
- P. alternate access mappings

**Correct Answer:** P

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 6

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

- WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>.
- WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

You need to recommend a solution to authenticate the external users by using the internal Active Directory infrastructure.

What should you include in the recommendation?

- A. Network Access Protection (NAP)
- B. Active Directory Federation Services (AD FS)
- C. The Access Services service application
- D. Network Load Balancing (NLB)
- E. Microsoft Visual Studio 2010
- F. an ASP.NET Membership Database
- G. Remote BLOB Storage (RBS)
- H. the Secure Store Service service application
- I. Information Rights Management (IRM)
- J. a BLOB cache
- K. managed accounts
- L. service application groups
- M. SharePoint Health Analyzer
- N. alternate access mappings

**Correct Answer:**

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 7

User policies

P. cross-firewall access zones

<http://www.gratisexam.com/>

- A.
- B.
- C.
- D.

**Correct Answer:**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### **QUESTION 8**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

- WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>.
- WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

You need to simulate concurrent user connections to the internal farm. What should you include in the recommendation?

- A. Network Load Balancing (NLB)
- B. alternate access mappings
- C. Information Rights Management (IRM)
- D. user policies
- E. SharePoint Health Analyzer
- F. Remote BLOB Storage (RBS)
- G. an ASP.NET Membership Database
- H. the Access Services service application
- I. Network Access Protection (NAP)
- J. the Secure Store Service service application
- K. Microsoft Visual Studio 2010
- L. cross-firewall access zones
- M. managed accounts
- N. Active Directory Federation Services (AD FS)
- O. a BLOB cache
- P. service application groups

**Correct Answer: K**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 9**

You plan to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm will contain five front-end servers.

You need to recommend a method to split user requests equally across all of the front-end servers. The solution must ensure that all of the front-end servers are available by using the same IP address.

What should you include in the recommendation?

- A. Failover Clustering
- B. DNS round robin
- C. Network Load Balancing (NLB)
- D. Microsoft SQL Server database mirroring

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 10**

You are planning a backup strategy for a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains two web applications named WebApp1 and WebApp2. WebApp1 contains two site collections named SiteCollection1 and SiteCollection2. WebApp2 contains a site collection named SiteCollection3.

You need to recommend a backup strategy that provides the ability to restore WebApp1 independently from WebApp2.

What should you include in the recommendation?

- A. Microsoft System Center Data Protection Manager 2010 backups
- B. Windows Server Backup backups
- C. SharePoint backups
- D. Microsoft SQL Server database backups

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 11**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You plan to use Remote BLOB Storage (RBS).

You need to recommend a backup strategy that will include the BLOB files in the backup. The solution must minimize costs.

What should you include in the recommendation?

- A. Microsoft System Center Data Protection Manager
- B. Microsoft SQL Server database mirroring that uses FILESTREAM
- C. Microsoft SQL Server database backups
- D. Microsoft SharePoint Server backups

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### **QUESTION 12**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You also have a public site that is hosted on Microsoft SharePoint Online.

You need to recommend a search solution to meet the following requirements:

- Provide users with the ability to search the SharePoint Online site and SharePoint on-premises simultaneously.
- Provide search results from SharePoint Online and SharePoint on-premises in a single Web Part.

What should you include in the recommendation?

- A. SharePoint Search Federation
- B. a content source
- C. search scopes
- D. a crawl rule

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### **QUESTION 13**

You are planning the deployment of a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

The farm will have the Excel Services service application and the Managed Metadata Service service application deployed.

You need to identify the minimum number of servers that must be purchased to meet the following requirements:

- The service applications must be load balanced.
- Hardware and software costs must be minimized.
- Site collections must be available if a single server fails.
- Microsoft SQL Server must not be installed on any front-end Web servers.

How many servers should you identify?

- A. 3
- B. 4
- C. 6
- D. 5

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 14**

You are planning the taxonomy of a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You identify the following requirements:

- The legal department will require a list view threshold of 1,000 items.
- The accounting department will require a list view threshold of 2,000 items.
- The manufacturing department will require a list view threshold of 1,000 items.

You need to identify the minimum number of web applications and site collections that must be created to meet the requirements.

How many web applications and site collections should you identify?

- A. Three web applications and three site collections
- B. One web application and three site collections
- C. Two web applications and two site collections
- D. One web application and two site collections

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 15**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You plan to create document repository sites for the sales department and the marketing department.

<http://www.gratisexam.com/>

You identify the following requirements:

- Files that are larger than 5 MB and are uploaded by users in the sales department must be stored in Remote BLOB Storage (RBS). All others files uploaded by the sales users must be stored in a Microsoft SQL Server database.
- All files uploaded by users in the marketing department must be stored in a SQL Server database.

You need to recommend the minimum number of web applications, site collections, and content databases that must be created to meet the requirements.

What should you recommend?

- A. Two web applications and two site collections in two content databases

- B. One web application and two site collections in one content database
- C. One web application and one site collection in one content database
- D. One web application and two site collections in two content databases

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 16**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You need to recommend a strategy to delete Microsoft Word documents from libraries two years after the documents are created.

What should you include in the recommendation?

- A. site quotas and locks
- B. site collection policies
- C. item scheduling
- D. Word Automation Services

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 17**

You plan to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You plan to use InfoPath Forms Services.

You need to recommend which service application must be deployed to the farm.

Which service application should you recommend?

- A. State Service
- B. Managed Metadata Service
- C. Business Data Connectivity
- D. Application Registry Service

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 18**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You plan to deploy a site for the sales department and a site for the finance department.

You identify the following search requirements for each site:

- Content on the finance site must be indexed once daily.
- Content on the sales site must be indexed every 15 minutes.
- Each site must have independent search keywords and synonyms.

You need to recommend a logical structure to meet the search requirements of each site.

What should you recommend?

- A. One site collection, two sites, and two search scopes
- B. Two sites collections, two sites, and two search scopes
- C. Two sites collections, two sites, and two content sources
- D. One site collection, two sites, and two content sources

**Correct Answer:** AD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 19**

You host a SharePoint Server 2010 Service Pack 1 (SP1) server farm for multiple tenants. The Enterprise license is activated for the farm.

You plan to deploy a web application that will contain two site collections named Collection1 and Collection2.

You need to ensure that all of the Enterprise features can be enabled in Collection1. The solution must ensure that only the features of Microsoft SharePoint Foundation can be enabled in Collection2.

What should you do?

- A. Implement document sets.
- B. Manage the web application features.
- C. Manage the site collection features.
- D. Implement feature packs.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 20**

You are planning the search infrastructure for your company.

You need to recommend a search solution to meet the following requirements:

- Users must be able to preview the documents returned in search results.
- Users must be able to refine search results by using custom properties.
- Users must be able to search the content of PDF files.
- The solution must be able to index 1 million documents.
- The solution must minimize upfront software costs.

What should you include in the recommendation?

- A. Microsoft SharePoint Online
- B. Microsoft FAST Search Server 2010 for SharePoint
- C. Microsoft SharePoint Foundation 2010 Service Pack 1 (SP1)
- D. Microsoft SharePoint Server 2010 Service Pack 1 (SP1)

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 21

You are the administrator for a SharePoint Server 2010 Service Pack 1 (SP1) farm.

You plan to deploy a sandbox solution in a production environment.

You need to identify the highest degree of isolation.

What should you do? (Choose the best answer.)

- A. Use local load balancing and run sandboxed solutions only on specific servers.
- B. Use remote load balancing and run sandboxed solutions only on specific servers.
- C. Use local load balancing and dedicate a separate server to run sandboxed solutions.
- D. Use remote load balancing and dedicate a separate server to run sandboxed solutions.

**Correct Answer:** BADBAACBDCC

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation: You can increase the isolation of sandboxed solutions by using remote load balancing and by running the sandboxed solutions service only on specific servers. In a production environment, we recommend that you use remote load balancing and dedicate a separate server to running sandboxed solutions. For information about how to decide which load-balancing scheme to use, see Plan to load balance sandboxed solution code in Plan sandboxed solutions (SharePoint Server 2010). ding

#### QUESTION 22

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

- WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>.
- WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

The marketing department plans to upload large video files to the sites in WebApp2.

You need to recommend a solution to minimize the size of the content databases for WebApp2.

What should you include in the recommendation?

- A. an ASP.NET Membership Database
- B. Microsoft Visual Studio 2010

- C. a BLOB cache
- D. Active Directory Federation Services (AD FS)
- E. service application groups
- F. the Secure Store Service service application
- G. user policies
- H. cross-firewall access zones
- I. SharePoint Health Analyzer
- J. Network Access Protection (NAP)
- K. alternate access mappings
- L. Information Rights Management (IRM)
- M. managed accounts
- N. the Access Services service application
- O. Network Load Balancing (NLB)
- P. Remote BLOB Storage (RBS)

**Correct Answer:** P

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 23

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

- WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>.
- WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

You plan to create a PerformancePoint dashboard in WebApp1. The dashboard will retrieve data from a SharePoint Online site.

You need to recommend a solution to ensure that the data is always retrieved from SharePoint Online by using an account named [service@contoso.onmicrosoft.com](mailto:service@contoso.onmicrosoft.com). The solution must minimize the amount of custom development.

What should you include in the recommendation?

- A. Remote BLOB Storage (RBS)
- B. cross-firewall access zones
- C. Network Access Protection (NAP)
- D. Network Load Balancing (NLB)
- E. the Access Services service application
- F. a BLOB cache
- G. service application groups
- H. the Secure Store Service service application
- I. user policies
- J. Active Directory Federation Services (AD FS)

- K. Information Rights Management (IRM)
- L. SharePoint Health Analyzer
- M. alternate access mappings
- N. Microsoft Visual Studio 2010
- O. managed accounts
- P. an ASP.NET Membership Database

**Correct Answer:** H

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 24**

You are the administrator for a SharePoint Server 2010 Service Pack 1 (SP1) farm.

You need to implement an enterprise search technology that meets the following requirements:

- Allows users to search people and their expertise.
- Crawls content outside the SharePoint.
- Provides metadata-driven refinement in the top results.
- Provides phonetic searches.
- Provides thumbnails and previews for documents.

Which search technology should you use? (Choose the best answer.)

- A. Search Server 2010 Express
- B. SharePoint Server 2010 Search
- C. User Profile Service
- D. FAST Search Server 2010 for SharePoint

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 25**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

- WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>.
- WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

Corporate security policy states that the password of each user account must be changed every three months.

You need to recommend a technology to ensure that the internal farm remains operational after the passwords change.

What should you include in the recommendation?

- A. Microsoft Visual Studio 2010
- B. the Access Services service application
- C. the Secure Store Service service application
- D. a BLOB cache
- E. Network Load Balancing (NLB)
- F. Information Rights Management (IRM)
- G. managed accounts
- H. SharePoint Health Analyzer
- I. Remote BLOB Storage (RBS)
- J. alternate access mappings
- K. Network Access Protection (NAP)
- L. Active Directory Federation Services (AD FS)
- M. service application groups
- N. an ASP.NET Membership Database
- O. cross-firewall access zones
- P. user policies

**Correct Answer: G**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### **QUESTION 26**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains a site collection named Collection1. You need to recommend a strategy to remove the draft versions from documents that were not modified for six months.

What should you include in the recommendation?

- A. Word Automation Services
- B. site quotas and locks
- C. item scheduling
- D. site collection policies

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### **QUESTION 27**

You are planning a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You need to recommend which editions of Microsoft SQL Server 2008 R2 must be deployed to support online index rebuilding.

Which editions should you recommend? (Each correct answer presents a complete solution. Choose all that apply.)

- A. Workgroup
- B. Standard

- C. Enterprise
- D. Datacenter
- E. Web

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 28**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains three servers named WFE1, WFE2, and APP1.

User requests are load balanced by using a hardware load balancer.

The farm contains a Business Data Connectivity Service service application. The service application is configured to run on APP1.

You plan to add a new server named APP2 to the farm.

You need to ensure that all requests to the Business Data Connectivity Service service application are load balanced between APP1 and APP2.

What should you do?

- A. Create a new Business Data Connectivity Service service application.
- B. Install Network Load Balancing (NLB) on APP2.
- C. Publish the Business Data Connectivity Service service application.
- D. Start the Business Data Connectivity Service service application on APP2.
- E. Add APP1 and APP2 to the hardware load balancer.

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 29**

You have a SharePoint Server 2010 Service Pack 1 (SP1) deployment.

You need to write a report that uses Microsoft SQL Server Reporting Services to monitor feature usage. The solution must minimize the amount of development effort.

Which data source should you use?

- A. the Unified Logging Service (ULS)
- B. the logging database
- C. Internet Information Services (IIS) logs
- D. Event Viewer

**Correct Answer:** A

**Section:** (none)

**Explanation**
