by_chris_new_

Vendor: Microsoft

Exam Code: 70-668

Exam Name: PRO: Microsoft SharePoint 2010, Administrator

Latest Version updated by Apr 20, 2013.

Exam A

QUESTION 1
You are the administrator for a SharePoint 2010 farm.
You need to design a restore plan for end users of documents to meet the following requirements:

- Each user must be able to recover documents that they have deleted.
- Deleted items must be retained for 30 days.
- End users must be able to permanently delete documents when needed.

What should you do? (Choose the best answer.)

A. - Turn on the first-stage Recycle Bin.
    - Create a Windows Task Schedule for daily backup of sites.
B. - Turn on the first-stage Recycle Bin.
    - Turn off the second-stage Recycle Bin.
C. - Turn on the first-stage Recycle Bin.
    - Use Central Administration to back up and restore sites.
D. - Turn off the first-stage Recycle Bin.
    - Use the Microsoft STSADM command-line tool to perform the backup and restore of sites,

Correct Answer: B
Section: (none)
Explanation

QUESTION 2
You are the administrator for a SharePoint 2010 farm that contains a document library that has multiple content types. No additional metadata is gathered when documents are uploaded. You need to ensure that users can refine their document searches based on the content type of the document. What should you do? (Choose the best answer.)

A. Create a secure store application for the document types and a managed property that references the secure store. Add the new application to the search refinement panel definition.
B. Create a new list that includes a column to store the document type. Add a lookup to this list in the document content type. Crawl the property, create a managed property and mapping, and add the property to the search refinement panel definition.
C. Create a choice column in the document content type. Crawl the property, create a managed property and mapping, and add the property to the search refinement panel definition.
D. Create a managed metadata term set for document types and include the managed metadata in the document content type. Add the new column to the search refinement panel definition.

Correct Answer: C
Section: (none)
Explanation

QUESTION 3
You have a SharePoint Server 2010 server farm. You plan to implement My Sites. You need to recommend a solution that prevents personal profile data from appearing in search results. What should you recommend?

A. Information management policies
B. Audiences
C. User Profile Services policies
D. Access Services

Correct Answer: C
Section: (none)
Explanation

QUESTION 4
You plan to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm will

contain five front-end servers.
You need to recommend a method to split user requests equally across all of the front-end servers. The solution must ensure that all of the front-end servers are available by using the same IP address.
What should you include in the recommendation?

A. Failover Clustering
B. DNS round robin
C. Network Load Balancing (NLB)
D. Microsoft SQL Server database mirroring

Correct Answer: C
Section: (none)
Explanation

QUESTION 5
You are planning the deployment of a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm will have the Excel Services service application and the Managed Metadata Service service application deployed.
You need to identify the minimum number of servers that must be purchased to meet the following requirements:

- The service applications must be load balanced.
- Hardware and software costs must be minimized.

Site collections must be available if a single server fails. Microsoft SQL Server must not be installed on any front-end Web servers.
How many servers should you identify?

A. 3
B. 4
C. 6
D. 5

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Server1 = Service Application (ExelServices + MMS) + WFE Server2 = Service Application (ExelServices + MMS) + WFE Server3 = SLQ Server

QUESTION 6

You are planning the taxonomy of a SharePoint Server 2010 Service Pack 1 (SP1) server farm.
You identify the following requirements:

The legal department will require a list view threshold of 1,000 items. The accounting department will require a list view threshold of 2,000 items. The manufacturing department will require a list view threshold of 1,000 items.

You need to identify the minimum number of web applications and site collections that must be created to meet the requirements.
How many web applications and site collections should you identify?

A. Three web applications and three site collections
B. One web application and three site collections
C. Two web applications and two site collections
D. One web application and two site collections

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Threshold is set per webapplication

QUESTION 7
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You plan to create document repository sites for the sales department and the marketing department.
You identify the following requirements:

- Files that are larger than 5 MB and are uploaded by users in the sales department must be stored in Remote BLOB Storage (RBS).
- All others files uploaded by the sales users must be stored in a Microsoft SQL Server database.
- All files uploaded by users in the marketing department must be stored in a SQL Server database.

You need to recommend the minimum number of web applications, site collections, and content databases that must be created to meet the requirements.
What should you recommend?

A. Two web applications and two site collections in two content databases
B. One web application and two site collections in one content database
C. One web application and one site collection in one content database
D. One web application and two site collections in two content databases

Correct Answer: D
Section: (none)
Explanation

QUESTION 8
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You need to recommend a strategy to

delete Microsoft Word documents from libraries two years after the documents are created. What should you include in the recommendation?

A. site quotas and locks
B. site collection policies
C. item scheduling
D. Word Automation Services

Correct Answer: B
Section: (none)
Explanation

QUESTION 9
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You plan to deploy a site for the sales department and a site for the finance department. You identify the following search requirements for each site:

- Content on the finance site must be indexed once daily.
- Content on the sales site must be indexed every 15 minutes.

- Each site must have independent search keywords and synonyms.

You need to recommend a logical structure to meet the search requirements of each site.
What should you recommend?

A. One site collection, two sites, and two search scopes
B. Two sites collections, two sites, and two search scopes
C. Two sites collections, two sites, and two content sources
D. One site collection, two sites, and two content sources

Correct Answer: C
Section: (none)
Explanation

QUESTION 10
You host a SharePoint Server 2010 Service Pack 1 (SP1) server farm for multiple tenants. The Enterprise license is activated for the farm. You plan to deploy a web application that will contain two site collections named Collection1 and Collection2. You need to ensure that all of the Enterprise features can be enabled in Collection1. The solution must ensure that only the features of Microsoft SharePoint Foundation can be enabled in Collection2. What should you do?

A. Implement document sets.
B. Manage the web application features.
C. Manage the site collection features.
D. Implement feature packs.

Correct Answer: D
Section: (none)
Explanation

QUESTION 11
Drag and Drop Question
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains two servers. The servers are configured as shown in the following table.

Server name	Server configuration
Server1	SharePoint Server 2010 SP1
SQL1	Microsoft SQL Server 2008 R2 that has only the database engine component installed

You plan to generate reports by using SQL Server Reporting Services. The report definitions will be stored in SharePoint lists. You need to recommend a deployment strategy. What should you recommend? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Connect SQL1 to the farm.

On SQL1, install the SQL Server 2008 R2 connectivity components.

On Server1, install the SQL Server 2008 R2 connectivity components.

From Central Administration, configure the Reporting Services Integration settings.

From SQL1, install SharePoint Server 2010 SP1.

From SQL1, install the Reporting Services component by using native mode.

From SQL1, install the Reporting Services component by using SharePoint integrated mode.

Answer Area

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

Actions	Answer Area
	From SQL1, install the Reporting Services component by using SharePoint integrated mode.
On SQL1, install the SQL Server 2008 R2 connectivity components.	From SQL1, install SharePoint Server 2010 SP1.
On Server1, install the SQL Server 2008 R2 connectivity components.	Connect SQL1 to the farm.
	From Central Administration, configure the Reporting Services Integration settings.
From SQL1, install the Reporting Services component by using native mode.	

QUESTION 12
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains three servers named WFE1, WFE2, and APP1.
User requests are load balanced by using a hardware load balancer. The farm contains a Business Data Connectivity Service service application. The service application is configured to run on APP1.
You plan to add a new server named APP2 to the farm.
You need to ensure that all requests to the Business Data Connectivity Service service application are load balanced between APP1 and APP2.
What should you do?

A. Create a new Business Data Connectivity Service service application.
B. Install Network Load Balancing (NLB) on APP2.
C. Publish the Business Data Connectivity Service service application.
D. Start the Business Data Connectivity Service service application on APP2.
E. Add APP1 and APP2 to the hardware load balancer.

Correct Answer: D
Section: (none)
Explanation

QUESTION 13
Your company uses Microsoft SharePoint Online.
You deploy a custom site template named SiteTemplate1 and a custom page layout named PageLayout1.
You need to recommend a configuration to ensure that the finance department can only create sites that use SiteTemplate1 and pages that use PageLayout1.
What should you include in the recommendation?

A. sites and workspaces
B. page layouts and site templates
C. master pages and page layouts
D. site collection policies

Correct Answer: B
Section: (none)

Explanation

QUESTION 14
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. A user named User1 is the site
collection administrator for a site collection named Collection1. User1 plans to use site templates to recreate
sites that will be used for testing. The new sites will be configured identically to their original site.
You need to recommend which configurations User1 must change manually after creating a site by using the
site templates.
Which configurations should recommend?

A. custom content types
B. permissions
C. document versions
D. custom columns

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
"First Test, First Pass" - www.lead2pass.com 40
Microsoft 70-668 Exam

QUESTION 15
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains several web
applications. You need to recommend a strategy to monitor the memory usage and the CPU usage of the web
applications. Which process should you recommend monitoring?

A. w3wp.exe
B. wssadmin.exe
C. spucworkerprocess.exe
D. spuchostservice.exe

Correct Answer: A
Section: (none)
Explanation

QUESTION 16
You plan to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm will contain a site.
Internal users and external partners will access the site.
You plan to implement SSL for all web applications.
You need to recommend from where to obtain certificates for the planned deployment. The solution must meet
the following requirements:

- Minimize the amount of administrative effort required to deploy the certificates to end users.
- Minimize the number of error messages that the end users receive when they connect to SharePoint sites.

What should you recommend?

A. certificates issued by a third-party certification authority (CA)
B. self-signed certificates
C. certificates issued by an internal enterprise certification authority (CA)
D. certificates issued by an internal standalone certification authority (CA)

Correct Answer: A
Section: (none)
Explanation

QUESTION 17
Drag and Drop Question
You are the administrator for a company named Fabrikam, Inc. Fabrikam has an Active Directory forest named fabrikam.com. The forest contains a SharePoint Server 2010 Service Pack 1 (SP1) server farm. Fabrikam plans to grant users from a company named Contoso, Ltd., access to a web application in the farm. Contoso has an Active Directory forest named contoso.com. All of the users at Contoso have user accounts in contoso.com. You need to recommend which configurations must be performed to grant Contoso users access to the web application. What should you recommend? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions	Answer Area
Modify the authentication providers of the web application.	
Install Active Directory Federation Services (AD FS) 2.0 in contoso.com.	
Install Active Directory Federation Services (AD FS) 2.0 in fabrikam.com.	
Configure a new trusted identity provider for the farm.	
Configure a relying party trust in Active Directory Federation Services (AD FS) 2.0.	
Set a new Service Principal Name (SPN) on all of the front-end Web servers.	
Set a new Service Principal Name (SPN) for Active Directory Federation Services (AD FS) 2.0.	

A. Install AD Federation SERVICE in contoso.com
B. Configure a relying party trust in AD FS
C. Configure a new trusted identity provider for the farm
D. Modify the authentifivation providers of the web application
E.
F.
G.

Correct Answer: ABCD
Section: (none)
Explanation

Explanation/Reference:
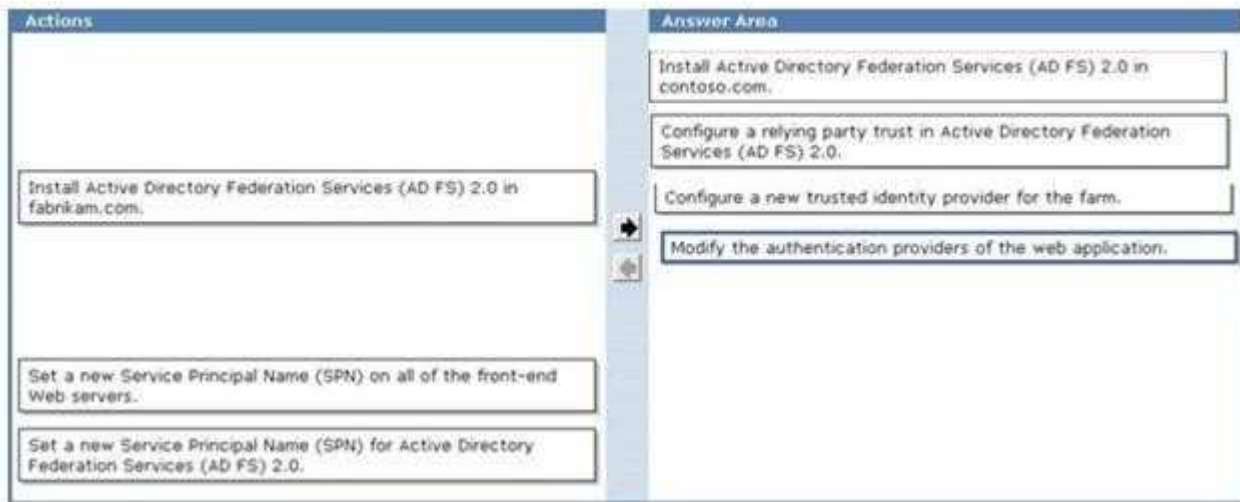

QUESTION 18
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You need to recommend a solution to prevent users from printing confidential documents that are stored in SharePoint sites. The solution must not prevent the users from accessing SharePoint content. What should you include in the recommendation?

A. Active Directory Federation Services (AD FS)
B. The Secure Store Service service application
C. Active Directory Rights Management Services (AD RMS)
D. the security token service

Correct Answer: C
Section: (none)
Explanation

QUESTION 19
Drag and Drop Question
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains a PerformancePoint Services service application. You need to configure the PerformancePoint Services service application to use Kerberos authentication.
What should you do?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Implement delegation.

Create a Service Principal Name (SPN).

Create a Secure Store Service service application.

Modify the IIS Authentication Settings of the web application.

In the PerformancePoint Services service application settings, configure the Secure Store and Unattended Service Account settings.

A. Create a Service Principal Name (SPN)
B. Implement delegation
C. Modify the IIS Authentication Settings of the web application
D.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

Actions

Answer Area

Create a Secure Store Service service application.

In the PerformancePoint Services service application settings, configure the Secure Store and Unattended Service Account settings.

Create a Service Principal Name (SPN).

Implement delegation.

Modify the IIS Authentication Settings of the web application.

QUESTION 20
You plan to deploy a SharePoint Server 2010 Service Packl (SP1) server farm. Product information is stored in an external Microsoft SQL Server database. The SQL Server database is configured to use Active Directory for authentication. You need to recommend which service is required to display all of the product information on a single webpage. The solution must prevent users from being prompted for authentication multiple times. Which service should you implement?

A. Application Registry Service
B. Business Connectivity Services
C. Managed Metadata Service
D. Access Services

Correct Answer: B
Section: (none)
Explanation

QUESTION 21
Drag and Drop Question
You are the administrator for a SharePoint Server 2010 Service Pack 1 (SP1) farm that has the following topology:

Server name	Server role
WFE-01	Web Front End (WFE)
WFE-02	Web Front End (WFE)
WFE-03	Web Front End (WFE)
QRY-01	Crawler, Query
DBS-01	Database Server (failover cluster)
DBS-02	Database Server (failover cluster)

You need to implement a load-balancing scheme for sandbox solutions to meet the following requirements:

- Provide the maximum level of isolation to run sandboxed solutions.
- Provide the highest level of scalability that is not limited by the resources on a single server.
- Run sandbox solutions on the server based on solution affinity.

What should you do? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

A. Start the Sandboxed Code Service on WFE-01 and WFE 02
B. Stop the Sandboxed Code Service on WFE-03
C. Select the Load balancing Requests to run sandboxed code are routed by solution affinity option for WFE-01 and WFE-02
D.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 22
Drag and Drop Question
You have two SharePoint Server 2010 Service Pack 1 (SP1) server farms named Farm1 and Farm2.
Farm1 is used for content authoring.
Farm2 is used for publishing.
You need to deploy content automatically from Farm1 to Farm2.

What should you do?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From Farm1, add a content deployment job.	
From Farm2, add a content deployment job.	
From Farm1, add a content deployment path.	
From Farm2, add a content deployment path.	
From Farm1, modify the content deployment settings.	
From Farm2, modify the content deployment settings.	

A. From Farm2, modify the content deployment settings
B. From Farm1, add a content deployment path
C. From Farm1, add a content deployment job.
D.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

Actions	Answer Area
	From Farm2, modify the content deployment settings.
From Farm2, add a content deployment job.	From Farm1, add a content deployment path.
	From Farm1, add a content deployment job.
From Farm2, add a content deployment path.	
From Farm1, modify the content deployment settings.	

QUESTION 23
Your company plans to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You are designing a maintenance strategy for the farm. You plan to apply critical Windows updates to the servers in the farm once a month. You need to recommend a strategy to ensure that the installation of Windows updates will not prevent users from searching for content in SharePoint sites.
What should you include in the recommendation?

A. multiple crawl databases

B. multiple host distribution rules
C. multiple query servers
D. multiple Search service applications

Correct Answer: D
Section: (none)
Explanation

QUESTION 24
Your company uses Microsoft SharePoint Online.
You have a private site collection named Site1.
You need to provide anonymous access to several documents and webpages. The solution must use the minimum amount of administrative effort.
What should you do?

A. Create a permission policy.
B. Modify the user permission of the Site1 web application.
C. Modify the anonymous policy of the Site1 web application.
D. Create a public website site collection.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:
It's possible to grant access on an existing site collection to external users, but those will always be authenticated. You cannot change an existing private collection to become public.

QUESTION 25
Drag and Drop Question
You have a Microsoft SharePoint Foundation 2010 Service Pack 1 (SP1) server farm named Farm1. Farm1 contains a web application named Web1. You deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm named Farm2. You need to move Web1 to Farm2. What should you do? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. In Farm1, back up the Web1 content databases
B. In Farm2, create a new web application
C. In Farm2, restore the backup of the Farm1 content databases
D.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

Actions	Answer Area
	In Farm1, back up the Web1 content databases.
	In Farm2, create a new web application.
In Farm1, back up the Farm1 configuration database.	In Farm2, restore the backup of the Farm1 content databases.
In Farm2, restore the backup of the Farm1 configuration database.	
In Farm1, export the Web1 website by using Internet Information Services (IIS) Manager.	
In Farm 2, import the Web1 website by using Internet Information Services (IIS) Manager.	

QUESTION 26
Your company uses SharePoint Server 2010 Service Pack 1 (SP1). You need to recommend a solution to track
user access to data in a document library. What should you include in the recommendation?

A. administrative reports
B. user policies
C. Web Analytics
D. auditing

Correct Answer: D
Section: (none)
Explanation

QUESTION 27
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains a web application. The web application contains several sites in individual content databases. You are planning the maintenance strategies for the content databases. You need to plan a strategy to release unused space from the databases. Which tool should you use?

A. Storage Explorer
B. Windows System Resource Manager (WSRM)
   "First Test, First Pass" - www.lead2pass.com 51
   Microsoft 70-668 Exam
C. SharePoint Health Analyzer
D. Resource Monitor

Correct Answer: B
Section: (none)
Explanation

QUESTION 28
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains four front- end Web servers, two application servers, and a Microsoft SQL Server failover cluster. You plan to deploy an enterprise monitoring solution for the farm. You need to recommend a monitoring strategy to meet the following requirements:

- Generate reports that contain hardware utilization data.
- Generate alerts if specific URLs are unavailable.
- Provide a logical layout of the farm topology.
- Minimize cost.

What should you include in the recommendation?

A. Microsoft System Center Configuration Manager 2007 R3
B. the Unified Logging Service (ULS)
C. Performance Monitor
D. Microsoft System Center Operations Manager 2007 R2

Correct Answer: D
Section: (none)

Explanation

Explanation/Reference:

QUESTION 29
You are a SharePoint administrator for Northwind Traders. The company has 20,000 employees distributed across 11 different departments. You plan to implement a SharePoint Server 2010 server farm for internal collaboration. You need to recommend a solution that provides users with the ability to update their user attributes in Active Directory. What should you recommend?

A. a User Profile Service Application
B. Active Directory Federation Services (AD FS)
C. Business Connectivity Services
D. Active Directory Rights Management Services (AD RMS)

Correct Answer: A
Section: (none)
Explanation

QUESTION 30
You are a SharePoint administrator for Litware, Inc. The company has a main office and a branch office. The company has 14,000 employees. You plan to deploy a SharePoint Server 2010 server farm. Employees of the company's business partners will require access to the SharePoint farm. You need to recommend a solution to minimize the amount of resources required for indexing during business hours. What should you include in the solution?

A. crawl rules
B. crawler impact rules
C. a host distribution rule
D. search scopes

Correct Answer: B
Section: (none)
Explanation

QUESTION 31
You are a SharePoint administrator for Litware, Inc. The company has a main office and a branch office. The company has 14,000 employees. You plan to deploy a SharePoint Server 2010 server farm. Employees of the company's business partners will require access to the SharePoint farm. You need to recommend a solution that meets the company's compliance requirements. What should you include in the solution?

A. Windows Server 2008 Security Compliance Management Toolkit
B. Microsoft System Center Operations Manager
C. Active Directory Federation Services (AD FS)
D. Active Directory Rights Management Services (AD RMS)

Explanation

QUESTION 35
You are a SharePoint administrator for Blue Yonder Airlines. You plan to upgrade the Microsoft Office
SharePoint Server 2007 server farm to SharePoint Server 2010. You need to increase the available disk space
on Server1 and Server2 before you upgrade the farm. What should you do?

A. Take all of the content databases offline.
B. Shrink the content database files.
C. Reset the indexes and perform a full crawl.
D. Activate the Content Organizer on all of the site collections.

Correct Answer: A
Section: (none)
Explanation

QUESTION 36
You are a SharePoint administrator for Graphic Design Institute. The institute has five departments. Each
department offers 20 courses. You plan to deploy SharePoint Server 2010 on the network. You need to
recommend a solution that meets the institute's backup requirements. Your solution must minimize costs.
Which tool should you include in the solution?

A. Microsoft System Center Operations Manager
B. Microsoft SQL Server Management Studio
C. Microsoft System Center Data Protection Manager
D. Central Administration

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 37
You need to design a solution to ensure that all Web servers can access their databases if a single database
server fails. Your solution must minimize costs. What should you include in the solution?

A. failover clustering
B. Windows Network Load Balancing
   "First Test, First Pass" - www.lead2pass.com 71

Explanation

QUESTION 38
You are a SharePoint administrator for Trey Research. You plan to upgrade the existing Microsoft Office
SharePoint Server 2007 environment to SharePoint Server 2010. You need to recommend a solution that
meets the requirements of the human resources department and the accounting department. Your solution
must minimize costs. What should you recommend?

A. One server farm, one site collection, and two subsites

B. One server farm, one site collection, and two document libraries
C. One server farm and two site collections
D. Two server farms and one site collection in each server farm

Correct Answer: C
Section: (none)
Explanation

QUESTION 39
You are a SharePoint administrator for Trey Research. Vow plan to upgrade the existing Microsoft Office SharePoint Server 2007 environment to SharePoint Server 2010 Service Pack 1 (SP1). You need to recommend a solution to back up the business critical lists. You must restore the lists in the minimum amount of time. What should you recommend?

A. automated content deployment
B. scheduled granular backups
C. server farm backups
D. database replication

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 40
The company's security team reports that the firewall has too many open ports. You need to identify the port or ports required by SharePoint to access Server4.
Which port or ports should you identify?

A. TCP port 1433
B. TCP port 1521
   "First Test, First Pass" - www.lead2pass.com 75

Explanation

QUESTION 42
You are a SharePoint administrator for A . Datum Corporation. The company has a main office and a branch office. The company has 2,000 users. You need to design a search solution to meet the company's user requirements. Your solution must minimize costs. What should you include in the design?

A. Two servers that have the Web Server role and query component installed, and two servers that have the craw component installed
B. Two servers that have the Web Server role and crawl component installed and two servers that have the query component installed
C. Two servers that have the Web Server role, query component, and crawl component installed
D. Two servers that have the Web Server role installed, two servers that have the query component installed, and two servers that have the crawl component installed

Correct Answer: C
Section: (none)
Explanation

QUESTION 43
You are a SharePoint administrator for Fabrikam, Inc. The company has a main office and three branch offices. The main office is located in Paris. The branch offices are located in New York, Tokyo, and Toronto. The company has 2,000 employees. You plan to deploy two SharePoint Server 2010 server farms. One farm will host a corporate intranet Web site and one farm will host a public Web site. The intranet will be used for collaboration and Web content management. You need to recommend a solution to simplify the management of RFPs and related documents. What should you recommend?

A. a custom Document Set content type
B. content deployment paths
C. the RecordCenter site template
D. an information management policy

Correct Answer: A
Section: (none)
Explanation

QUESTION 44
You are a SharePoint administrator for Fourth Coffee. The company has 40 offices. You need to implement an authentication solution that meets the company's security requirements. What should you do?

A. Create a new Web application zone and create a new ISAPI filter.
B. Create a new Web application zone and create an auto-enrollment policy for certificates.
C. Enable SSL and configure certificate mapping.
D. Enable SSL and create a new ISAPI filter.

Correct Answer: C
Section: (none)
Explanation

QUESTION 45
You are a SharePoint administrator for Wingtip Toys. The company has a main office and 10 distribution centers. The main office is located in Miami. The company has 36 departments. Each department has a department manager. You need to recommend which SharePoint Server 2010 feature meets the technical requirements of the distribution centers. Which feature should you recommend?

A. the Application Registry Service
B. the enterprise site collection feature
C. the Content Type Syndication Hub
D. the Publishing Infrastructure

Correct Answer: D
Section: (none)
Explanation

QUESTION 46
You need to recommend a search solution that meets the company's user requirements. You must minimize the amount of effort required to administer a search. What should you include m the solution?

A. Two query servers
   One crawl server
   One mirrored index partition
   Two property databases
   One crawl database
B. Two query servers
   Two crawl servers
   Two index partitions
   One mirrored property database
   One mirrored crawl database
C. Two query servers
   Two crawl servers
   One mirrored index partition
   One mirrored property database
   One mirrored crawl database
   "First Test, First Pass" - www.lead2pass.com 89
   Microsoft 70-668 Exam
D. Two query servers
   Two crawl servers
   One mirrored index partition
   Two property databases
   Two crawl databases

Correct Answer: B
Section: (none)
Explanation

QUESTION 47
You are a SharePoint administrator for Wingtip Toys. The company has a main office and 10 distribution centers. The main office is located in Miami. The company has 36 departments. Each department has a department manager. You need to plan a solution that meets the company's taxonomy requirements. You must

ensure that the taxonomy for the legal documents is isolated.
What should you include in the solution?

A. multiple Site Collection policies
B. multiple Managed Metadata Service applications
C. a Legal site collection
D. a Web application zone

Correct Answer: B
Section: (none)
Explanation

QUESTION 48
You are a SharePoint administrator for Woodgrove Bank. The company is located in Berlin and has 25,000 employees. You need to recommend a document retention solution to meet the company's requirements. What should you include in the recommendations?

A. Site collection quotas and locks
B. Information management policies
C. Web Application user policies
D. Information Rights Management (IRM)

Correct Answer: B
Section: (none)
Explanation

QUESTION 49
You need to design a public Web site. The design must minimize costs and use the minimum amount of administrative effort. What should you include in the design?

A. Content deployment paths
B. SharePoint solution packages
C. Microsoft System Center Operations Manager
D. Microsoft SharePoint Designer

Correct Answer: D
Section: (none)
Explanation

QUESTION 50
You are a SharePoint administrator for Woodgrove Bank. The company is located in Berlin and has 25,000 employees. You need to identify what you can deploy between SharePoint-Dev and SharePoint-QA by using content deployment. What should you identify?

A. Web Parts and workflows
B. Web Parts and event receivers
C. libraries and views
D. libraries and Web pages

Correct Answer: B

QUESTION 51
You have a SharePoint Server 2010 server farm that contains 10 Web servers. You need to ensure that the processing of SharePoint user solutions is evenly distributed across the servers in the farm.
What should you do in the server farm?

A. Configure the Data Retrieval Service.
B. Start the Sandboxed Code Service on all of the Web servers.
C. Implement Windows Network Load Balancing on all of the web servers.
D. Create a new Secure Store Service application.

Correct Answer: B
Section: (none)
Explanation

QUESTION 52
Your company has an office in New York and an office in Seoul. The offices connect to each other by using a WAN link. The New York office contains all sales and marketing staff. The Seoul office contains all manufacturing and research staff.
The network contains a single Active Directory domain. You plan to deploy SharePoint Server 2010 to support both offices. You need to recommend a solution that meets the following requirements:

- Network traffic across the WAN link must be minimized.
- All documents must be stored on servers located in the office where the documents were created.
- SharePoint users in New York and Seoul must be able to find documents in both offices when they perform searches.

What should you recommend?

A. a server farm in each office that has a Web server located in each office
B. a single server farm that uses two site collections and a Web server in each office
C. a server farm in each office and a search federation between the farms
D. a single server farm that uses two content databases and Microsoft SQL Server database mirroring between the two offices
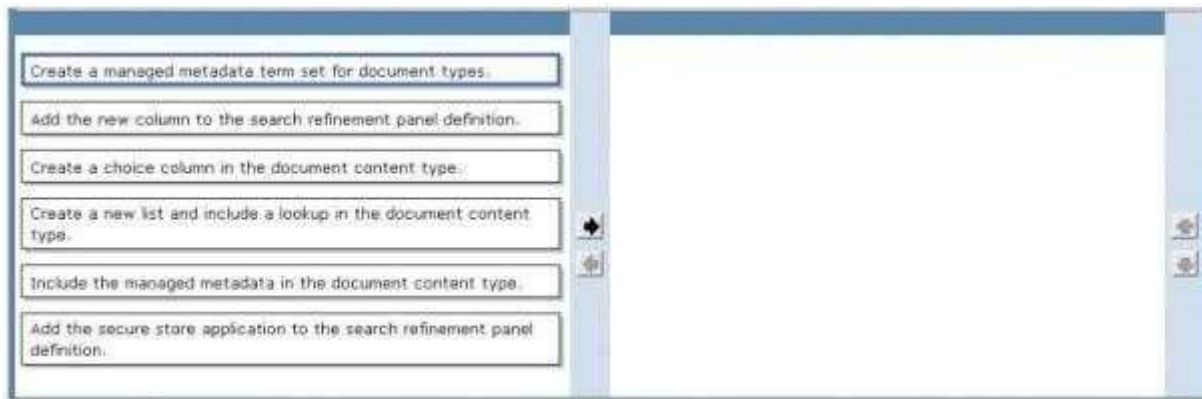

Correct Answer: C
Section: (none)
Explanation

QUESTION 53
Drag and Drop Question
You are the administrator for a SharePoint 2010 farm that contains a document library that has multiple content types. No additional metadata is gathered when documents are uploaded. You need to ensure that users can refine their document searches based on the content type of the document. What should you do? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
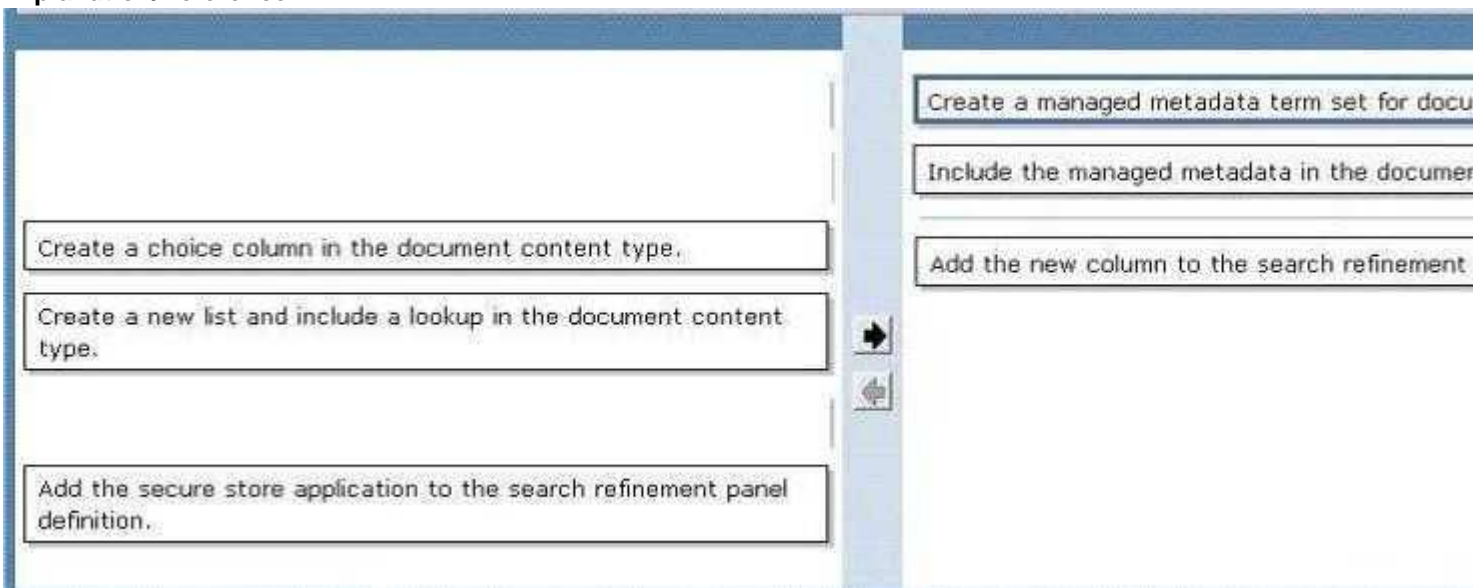

A. Create a managed metadata term set for document types
B. Include the managed metadata in the document content type
C. Add the new colum to the search refinement panel definition
D.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 54
You plan to deploy SharePoint Server 2010 and to enable self-service site creation. You need to recommend a Web application configuration to meet the following requirements:

- Users must be allowed to create site collections.
- Site collections created by Web developers must be deleted manually.
- Site collections created by managers must be deleted automatically if they are not used for 120 days.
- Site collections created by other users must be deleted automatically if they are not used for 60 days.

- The number of site collections must be minimized.

What should you include in the recommendations?

A. One Web application that contains one site collection and one Web application that contains two site collections
B. One Web application and one site collection
C. Three Web applications that each contains one site collection
D. One Web application that contains three site collections

Correct Answer: C
Section: (none)
Explanation

QUESTION 55
You plan to deploy a SharePoint 2010 farm.
You need to ensure that the following requirements are met:

- The farm must handle up to 10,000 users.
- The farm must be optimized for search and load balancing.
- The farm must be cost-efficient.

Which farm deployment topology should you use? (Choose the best answer.)

A. A first web server that has the Query component
   A second web server that has the Query component
   A single application server that has all other service components A first database server that contains Search databases
   A second database server that contains all other SharePoint databases
B. A first web server that has the Query component
   A second web server that has the Query component
   A single application server that has all service components A single database server that contains all SharePoint databases.
C. A first web server that has the Query component
   A second web server that has the Query component and all other service components A single database server that contains all SharePoint databases
D. A first web server that does not have the Query component A second web server that does not have the Query component A third web server that has the Query component
   "First Test, First Pass" - www.lead2pass.com 107
   Microsoft 70-668 Exam
   A first application server that has the query and crawl component A second application server that has all other application server components A first database server that contains Search databases
   A second database server that contains all other SharePoint databases

Correct Answer: A
Section: (none)
Explanation

QUESTION 56
You have a SharePoint Server 2010 Service Pack 1 (SP1) deployment. You need to write a report that uses Microsoft SQL Server Reporting Services to monitor feature usage. The solution must minimize the amount of development effort. Which data source should you use?

A. the Unified Logging Service (ULS)
B. the logging database
C. Internet Information Services (IIS) logs

D. Event Viewer

Correct Answer: A
Section: (none)
Explanation

QUESTION 57
Drag and Drop Question
You have two SharePoint Server 2010 Service Pack 1 (SP1) server farms named Farm1 and Farm2.
You plan to implement a hierarchical classification for the two farms. You need to recommend a solution to meet the following requirements:

- All classifications must be created and managed in Farm1.
- Farm2 must be able to consume the classifications in Farm1.

What should you recommend?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. On Farm1, create a Managed Metadata Service application
B. On Farm1, publish the service application
C. On Farm2, connect to the service application
D.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

Actions

On Farm1, extend the web application.

On Farm2, create a data connection file.

On Farm1, create a Business Data Connectivity Service service application.

Answer Area

On Farm1, create a Managed Metadata Service service application.

On Farm1, publish the service application.

On Farm2, connect to the service application.

QUESTION 58
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains 10 front-end Web servers that have the query server role installed.
You plan to index 15 million items.
You need to recommend a solution to decrease the relevance of search results that are indexed from a specific site.
What should you include in the recommendation?

A. crawler impact rules
B. authoritative pages
C. server name mappings
D. crawl rules

Correct Answer: B
Section: (none)
Explanation

QUESTION 59
You plan to deploy a SharePoint Server 2010 Service Pack1 (SP1) server farm. The network has

Microsoft System Center Operations Manager 2012 installed. You need to ensure that Operations Manager can monitor availability of the SharePoint service applications. What should you recommended deploying?

A. a management pack
B. a Web Part pack
C. a feature pack
D. a solution package

Correct Answer: A
Section: (none)
Explanation

QUESTION 60
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains five front-end Web servers. Users access the farm 24 hours a day. You plan to perform routine maintenance on all of the front-end Web servers. You need to identify the time of day when the fewest number of users are connected to the farm.

What should you use?

A. PerformancePoint Services
B. Web Analytics reports
C. Resource Monitor
D. site quotas and locks

Correct Answer: B
Section: (none)
Explanation

QUESTION 61
You have a SharePoint Server 2007 Service Pack 3 (SP3) server farm. You plan to migrate the farm to
SharePoint Server 2010 Service Pack 1 (SP1) by using the database attach method. You need to identify which
components must be reconfigured manually after the content databases are migrated. Which components
should you identify? (Each correct answer presents part of the solution. Choose all that apply.)

A. outgoing email settings
B. Web Parts that contain custom code
C. permission policies for the web applications
D. site collection permissions
E. approval workflows

Correct Answer: BCE
Section: (none)
Explanation

QUESTION 62
Drag and Drop Question
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You plan to display information from a
line-of-business application named APP1 in a Web Part. APP1 uses an internal database for authentication.
Users authenticate to APP1 by using a user name and a password.
You need to implement single sign-on between SharePoint and APP1.
What should you do?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the
correct order.

A. Start the Secure Store Service on a server in the farm
B. Create a Secure Store Service application
C. Generate a new encryption key
D. Create a new target application

Correct Answer: ABCD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 63
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains a database server that runs Microsoft SQL Server 2008 R2. You need to ensure that users can access SharePoint sites in the event of a SQL Server storage failure. Which SQL Server technology should you implement?

A. Database mirroring
B. Merge replication
C. Failover Clustering
D. Transactional replication
E. Snapshot replication

Correct Answer: A

Section: (none)
Explanation
