Exam A

QUESTION 1
Click the Point and Click button to begin. You've created a directory named SHARED on your NetWare 6.5 server's DATA volume. You want trustees of this directory to be able to open, create, modify, and delete files in this directory. You don't want users to be able to delete or rename the directory itself. You've created a test trustee assignment for the KTracy user object to the SHARED directory. You've found that KTracy has too many rights. She has the ability to rename the directory. Click on the trustee assignment that is giving her this right.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2
Click the Point and Click button to begin. Click the iManager option you would use to create a Novell istributed Print Services Manager object and manage the remote printer management configuration.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 3
Your NetWare 6.5 server is experiencing problems during startup. You suspect the problem lies with a command in the AUTOEXEC .NCF file. You want to boot the server without processing AUTOEXEC .NCF so you can manually execute each command in the file from the server console to determine which one is causing the problem. Given that the server has been booted to DOS and the current directory is C:\NWSERVER, you enter _____ from the server's DOS prompt to start the server without executing AUTOEXEC .NCF. Answer :

A. SERVER.EXE-NA

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 4
When moving an object, iManager provides the option to leave a(n) _____ object where the moved object used to reside which points to the moved object in its new location; allowing any operations or applications that are dependent on the old location to continue uninterrupted. Answer :

A. ALIAS

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5
You've installed Virtual Office on your NetWare 6.5 server. However, when you access iManager in Internet Explorer 6 from your Windows XP Professional workstation, the Virtual Office management roles don't appear. What's the cause of the problem?

A. The server must be restarted.
B. The Virtual Office iManager modules need to be installed.
C. The Virtual Office roles aren't compatible with Windows XP.
D. The Virtual Office roles aren't compatible with Internet Explorer 6.
E. The configuration file for the Apache2 web server on your server must be edited to support the Virtual Office roles.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 6
Novell Directory Services (NDS) was first introduced in which version of NetWare?

A. NetWare 3.1
B. NetWare 3.2
C. NetWare 4.0
D. NetWare 4.11
E. NetWare 4.2
F. NetWare 5.0
G. NetWare 5.1
H. NetWare 6.0
I. NetWare 6.5

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 7
Which are features of a controlled access printer under Novell Distributed Print Services (NDPS)? (Choose 2.)

A. Requires minimal administrative action.
B. Is not bound by eDirectory security rules.
C. Represented by an object in the eDirectory tree.

D. Available only to users who have rights to use it.

E. Immediately accessible upon creation by all users in the network.

Correct Answer: CD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 8
Due to some older applications that are still used by your company, you have configured your NetWare 6.5 server to provide printing services using Queue-Based Printing. When you implemented your printing system, you configured your print queue to be the QUEUES directory on your DATA volume. After several months, you notice that volume DATA frequently runs out of disk space. You discover that this is due to the fact that print jobs, after they leave the print queue, remain in the file system as deleted files for some time until they are purged. Which directory attribute could you assign to the QUEUES directory to force print job files to be immediately removed from the system as soon as they are printed?

A. H

B. P

C. Dc

D. Di

E. Ic

F. Sy

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 9
Which utility can be used to create an Inherited Rights Filter (IRF) to block eDirectory rights from flowing down the tree? (Choose 2.)

A. FLAG

B. NDIR

C. FILER

D. iManager

E. ConsoleOne

F. Remote Manager

Correct Answer: DE
Section: (none)
Explanation

Explanation/Reference:

QUESTION 10
You are considering implementing Novel Distributed Print Services (NDPS) on your network. Your network has 3 NetWare 6.5 servers all residing in the WIDGET-TREE eDirectory tree. The servers reside in separate eDirectory contexts. The network is configured to use the IPX protocol. The workstations in your organization run Windows XP Professional. Can you use NDPS in this environment?

A. Yes, all prerequisite requirements have been met.
B. No, NDPS is not compatible with Windows XP
C. No, NDPS is not compatible with the IPX protocol.
D. No, you can't implement NDPS if more than one server exists in the same eDirectory tree.
E. No, you can only implement NDPS if all the servers in your tree reside in the same eDirectory context.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 11
Click the Point and Click button to begin. Click the option in iManager you would use to see every object that the Admin.SLC .DA user object is an explicit trustee of.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 12
Click the Point and Click button to begin. You're configuring OpenSSH on your NetWare 6.5 server. To enable OpenSSH, you need to load SSHD.NLM. Click on the option in OpenSSH Manager that will do this.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 13
Which drive letter assignments are reserved for local, non-network drives? (Choose 2.)

A. Z
B. B
C. L
D. E
E. W
F. D

Correct Answer: BF
Section: (none)
Explanation

Explanation/Reference:

QUESTION 14
Click the Point and Click button to begin. You need to create a new traditional volume on your server. Currently, all partitions on the server have been allocated to existing volumes. However, one of the drives has some free space. Click the option you would use in Remote Manager to create a new partition for a traditional volume.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 15
Click the Point and Click button to begin. Click the iManager option you would use to configure printing security levels to restrict user access to your organization's printers.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 16
The eDirectory _____ defines the types of objects that can be created in your tree and what attributes they will have.

A.
B.
C.
D.

Correct Answer:
Section: (none)

Explanation

Explanation/Reference:
A. SCHEMA

Answer: A

QUESTION 17
Which firewall type operates at the Network layer of the OSI model and can filter data by port, interface address, source address, and destination address?

A. Caching Proxy
B. Packet Filtering
C. Application Proxy
D. Circuit-Level Gateway
E. Network Address Translation

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 18
You need to make a configuration change to the DNS services running on DA3, a NetWare 6.5 server. To do this, you need to access iManager. DA3's DNS name is da3.d a.com. Which URL will let you access iManager on this server?

A. http://da3.da.com:8008
B. https://da3.da.com:8009
C. http://da3.da.com/iManager.html
D. https://da3.da.com/iManager.html
E. http://da3.da.com/nps/iManager.html
F. https://da3.da.com/nps/iManager.html

G. https://da3.da.com:443/iManager.html

Correct Answer: F
Section: (none)
Explanation

Explanation/Reference:

QUESTION 19
In your eDirectory tree, user DCoughanour is given an explicit trustee assignment to the IS .SYD .DA Organizational Unit object. He is granted Browse and Rename rights to this container. DCoughanour has no explicit assignments anywhere higher in the tree. User JJackson is given an explicit trustee assignment to the SYD .DA Organizational Unit. He is granted Browse, Create, and Rename rights to the container. You make DCoughanour security equivalent to JJackson. What effective rights does DCoughanour have to IS.SYD .DA?

A. Browse
B. Supervisor
C. Browse and Rename
D. Browse, Create, and Rename
E. Supervisor, Browse, Create, and Rename
F. DCoughanour has no rights to the container.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 20
You're configuring Virtual Office on your NetWare 6.5 server to provide secure access to eGuide services hosted on a different server, fs2.em a.com. What URL should you enter in the eGuide tab
in the Services Administration task?

A. https://fs2.ema.com/eGuide
B. http://fs2.ema.com:389/eGuide
C. http://fs2.ema.com/nps/eGuide
D. https://fs2.ema.com:636/eGuide
E. https://fs2.ema.com/nps/eGuide

F. http://fs2.ema.com/eGuide/home.html

Correct Answer: A

Explanation/Reference:

QUESTION 23
Click the Point and Click button to begin. Click the directory that contains the NetWare 6.5 system files.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 24
Click the Point and Click button to begin. You need to configure logging options for Virtual Office on your server. Click the option in iManager you would use to do this.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 25
Click the Point and Click button to begin. While configuring your iFolder server, you have configured the global server policy such that user data is encrypted as it is

transferred between the iFolder client and the iFolder server. Management is concerned that users may inadvertently disable this option. You need to remove this option from visibility in the users' iFolder client so they won't have the ability to disable it. Click the iFolder Management Console option you would use to do this.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 26
Given that your NetWare 6.5 server's DNS name is da3.d a.com, what is the iManager URL on your server?

A. http://da3.da.com/nps
B. http://da3.da.com/nds
C. http://da3.da.com:8008
D. http://da3.da.com/iManager.html
E. http://da3.da.com/nps/iManager.html
F. http://da3.da.com:8008/iManager.html

Correct Answer: E
Section: (none)
Explanation

Explanation/Reference:

QUESTION 27
Which property right allows a trustee of an object to modify, add, or delete a property value of the object?

A. Read
B. Write
C. Modify
D. Delete

E. Add Self
F. Inheritable

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 28
You are planning login scripts for users in your eDirectory tree. Your company uses a commandline database application that is installed in DA1\APPS:\DB. Your users need to have a drive mapped to this directory every time they log in. Management wants users to be able to execute the application by simply typing the executable name, no matter where they are in the file system, without knowing its full path . Which command will accomplish this? (Choose 2.)

A. MAP G:\DA1\APPS:\DB
B. MAP G:=DA1\APPS:\DB
C. MAP S16:=DA1\APPS:\DB
D. MAP S G:\DA1\APPS:\DB
E. MAP INS S1:=DA1\APPS:\DB
F. MAP G1:=DA1\APPS:\DB SEARCH
G. MAP SEARCH G1:=DA1\APPS:\DB

Correct Answer: CE
Section: (none)
Explanation

Explanation/Reference:

QUESTION 29
Click the Exhibit button to begin. While working on your NetWare 6.5 server, you need to display a list of current console screens available; as shown in the Exhibit. Which keystroke combination will display this menu?

A. Alt + Esc
B. Ctrl + Esc
C. Ctrl + Alt
D. Shift + Esc
E. Ctrl + Alt + Esc

F. Shift + Ctrl + Alt

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 30
Given that your workstation's CD drive is assigned drive letter D, which is the correct path and filename for the NetWare Deployment Manager utility?

A. D:\NWDEPLOY.EXE
B. D:\NWDEPMAN.EXE
C. D:\DEPLOYMAN.EXE
D. D:\INSTALL\NWDEPLOY.EXE
E. D:\INSTALL\NWDEPMAN.EXE
F. D:\INSTALL\DEPLOYMAN.EXE
G. D:\PRODUCTS\INSTALL\NWDEPLOY.EXE
H. D:\PRODUCTS\INSTALL\NWDEPMAN.EXE
I. D:\PRODUCTS\INSTALL\DEPLOYMAN.EXE

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 31
The NDPS _____ translates NDPS queries or commands into commands that a specific printer make and model can understand.

A. Broker
B. Gateway
C. Manager
D. Print Queue
E. Print Server
F. Printer Agent

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 32
You're designing NSS volumes that will be implemented on a NetWare 6.5 server you're going to install. Your server has one 200 GB IDE hard disk drive. You want to create one NSS partition that encompasses the entire drive. You also want to create two storage pools that will be associated with this partition: SYS_POOL and DATA_POOL. In the SYS_POOL, you want to place the default NSS SYS volume that will be created during installation. In the DATA_POOL, you want to create two NSS logical volumes: DATA and SHARED. Will this design work?

A. Yes, all NSS requirements have been met.
B. No, NSS doesn't support IDE hard disk drives.
C. No, NSS disk partitions can be no larger than 80 GB in size.
D. No, SYS must be a traditional volume on a NetWare 6.5 server.
E. No, you can't create two NSS storage pools on the same server.
F. No, you can't create multiple NSS logical volume in the same NSS storage pool.
G. No, you can't associate two NSS storage pools with the same NSS disk partition.

Correct Answer: G
Section: (none)
Explanation

Explanation/Reference:

QUESTION 33
Click the Point and Click button to begin. While configuring your iFolder server, you decide that you want users' iFolder client to wait 120 seconds after a synchronization occurs before it checks the iFolder server to determine if there are any changed files it needs to automatically download. Click on the iFolder Management Console option you would use to configure this.

A.

B.

C.

D.

Correct Answer:
Section: (none)

QUESTION 34
One of your clients owns a company that runs three shifts of employees each day. To save money, the client has purchased only enough workstations for a single shift of employees. Each employee shares his or her computer with two other employees who work different shifts. In addition, the client has a very high employee turn-over rate. The average employee only works there for 6-9 months. Based on this information, which of the following security policies should you consider implementing? (Choose 2.)

A. Force periodic password changes.

B. Use a volume other than SYS for home directories.

C. Restrict user logins times to the user's shift hours.

D. Avoid assigning rights through the All Properties option.

E. Assign file attributes in addition to trustee assignments.

Correct Answer: AC

QUESTION 49
You're designing your company's eDirectory tree. You've named the tree WIDGETCORP-TREE . Below the tree root, you want to create six Organizational Units that represent each American state and Canadian province where your company has an office. Beneath those Organization Units, you want to create additional Organizational Units that represent each location's functional groups. Each office has its own network administrator. To ease administration, you want to create an Admin User object within each location's Organizational Unit. Will this design work?

A. Yes, all eDirectory rules have been observed.

B. No, hyphens aren't allowed in eDirectory tree names.

C. No, User objects can't reside within Organization Units.

D. No, Organizational Units can't reside directly below the tree root.

E. No, you can't use Organizational Units to represent geographic locations.

F. No, you can't create Organizational Units within other Organizational Units.

G. No, you can't mix Organizational Units that represent geographic locations with Organization Units that represent functional groups.

QUESTION 53
You are planning the network file system for your NetWare 6.5 server. You want to create two NSS volumes on your server: SYS for operating system files and DATA for user files. Your server has two 100 GB SCSI hard disk drives. You want the SYS volume to be 8 GB in size and DATA to be about 190 GB in size. Will this design work?

A. No, NSS doesn't support SCSI hard disk drives.
B. Yes, all NetWare file storage requirements have been met.
C. No, you can't implement multiple volumes on the same server.
D. No, you can't span an NSS volume across multiple hard disk drives.
E. No, NetWare 6.5 requires a SYS volume that is at least 10 GB in size.
F. No, NSS doesn't support hard disk drives that have more than 1024 cylinders.

QUESTION 56
You're configuring Novell Distributed Print Services (NDPS) for your organization. Your organization has four divisions, each located in a different city (different WAN regions). Each division has its own NetWare 6.5 server. You have purchased 7 printers for each location: One for management, two for administrative assistants, and four for engineers, sales representatives, and other employees. Two of the printer models purchased have embedded printer agents, the rest do not. You have created and loaded a Broker and a Manager on the server at your office on the local server. These will service all printers in the organization. Does this configuration meet Novell recommendations?

A. Yes, all Novell recommendations have been met.
B. No, you should avoid using printers that don't have embedded agents.
C. No, you shouldn't manage 28 printers with the same Broker and Manager.
D. No, you should create and load Brokers and Managers at each location so print jobs don't have to cross WAN links.
E. No, you should create two Brokers and two Managers: One for printers with embedded agents and one for printers without embedded agents.

Correct Answer: D

QUESTION 58
Your company specializes in non-linear video production. Raw digital footage is stored on the DATA volume of your NetWare 6.5 server. You have configured near-line storage on your server. All volumes on your server have migration enabled on them; allowing infrequently-used files to be migrated from the server volumes to the near-line media until they are needed again. However, the raw footage files on DATA are much too large for the near-line storage device. Which file attribute can you apply to these files to keep them from being migrated?

A. A
B. P
C. Dc
D. Di
E. Dm
F. Ds
G. Ic

Correct Answer: E
