Exam A

QUESTION 1
Which describes the role of the Novell Distributed Print Services (NDPS) printer agent?

A. It downloads the correct print driver to the workstation.

B. It responds to queries from clients about the status of a print job.

C. It provides a platform for printer objects that reside on the server.

D. It allows NDPS clients to sent print jobs to printers that are not NDPS-aware.

E. It redirects print jobs to directory on the server while waiting for the printer to become available.

F. It takes application-specific data from the application creating the print job and reformats it to work with the printer it is being sent to.

Correct Answer: B
Section: (none)

QUESTION 2
You're implementing a NetWare 6.5 network for a small business client: Jessica's Bakery. There is only one server in the network. You've named the server BAKERY1 and installed it into an eDirectory tree named JESSICASBAKERY-TREE . You've used a random password generator to create a password for the tree's Admin user. To ease administration, you've located the server next to the Point of Sale system in the customer area of the bakery. You deployed Universal Password on the server. All workstations have Novell Client 4.9 installed on them. You created a NFAP share on the server for the SHARED and the FINANCE directories on the server's DATA volume. Does this configuration meet Novell's security recommendations?

A. Yes, all Novell security guidelines have been met.

B. No, the server should be placed in a locked closet or room.

C. No, you shouldn't use Universal Password with Novell Client version 4.9.

D. No, you shouldn't use the business name in the server or eDirectory tree names.

E. No, you shouldn't create NFAP shares for directories containing financial information.

F. No, you shouldn't use a random password generator for the Admin password. It's easy to hack.

QUESTION 4
During the installation of NetWare 6.5, the server files are installed on the _____ volume.

A.
B.
C.
D.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:
A. SYS

Answer: A

QUESTION 5
You've just finished configuring an iPrint system on your NetWare 6.5 server. The server's DNS name is iprint.widget.com. The Manager object is named IPP-Printer in the SLC .WIDGET container. The Broker object is named IPP-Broker and is also in SLC .WIDGET. You've used the Maptool.htm file to configure a map named slcoffice.htm for location-based printing. What URL should you enter in your browser's Address field to test the iPrint map?

A. http://iprint.widget.com/slcoffice.htm
B. http://iprint.widget.com/Ipp/slcoffice.htm
C. http://iprint.widget.com/Ippdocs/Maptool.htm
D. http://iprint.widget.com/iPrint/slcoffice.htm
E. http://iprint.widget.com/Ippdocs/slcoffice.htm
F. http://iprint.widget.com/Ipp/slcoffice.htm -b=IPP-Broker.SLC .WIDGET
G. http://iprint.widget.com/Ippdocs/slcoffice.htm -m=IPP-Printer.SLC .WIDGET

Correct Answer: E

QUESTION 6
Click the Exhibit button to begin.

Given the explicit right assignments shown, what rights does CGrayson have to the MHoffmann user object?

A. Supervisor
B. Browse
C. Browse, Create
D. Browse, Create, Delete
E. Browse, Create, Delete, Rename, Inheritable
F. Supervisor, Browse, Create, Delete, Rename
G. Supervisor, Browse, Create, Delete, Rename, Inheritable

H. CGrayson has no rights to the MHoffmann user object.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 7
Your company specializes in the production of digital video products. Your company has been recently awarded a very large contract that has a very short deadline.
Your NetWare 6.5 server currently uses a single 80 GB IDE hard disk drive. The new contract will require considerably more hard disk storage. You've purchased and installed a 400 GB RAID5 disk array designed specifically for non-linear video editing. The array came with a diskette containing NetWare drivers. Which file on your server should you edit to load these drivers?

A. RAID.NCF
B. SERVER.EXE
C. CONFIG .SYS
D. STARTUP.NCF
E. STARTUP.CFG
F. STORAGE.NCF
G. AUTOEXEC .BAT
H. RAID5 array drivers can only be loaded manually from the server console.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 8
Which utilities can you use to manage directory and file attributes on a NetWare 6.5 server? (Choose 2.)

A. ICE
B. FLAG
C. iManager
D. iMonitor
E. NDS Manager

F. Remote Manager

Correct Answer: BF
Section: (none)
Explanation

Explanation/Reference:

QUESTION 9
Your company's business procedures require the use of triplicate forms. To accommodate this, you have secured an older dot-matrix printer to deploy in your network. It doesn't have a network interface. It will be connected directly to one of your server's LPT ports using an IEEE 1284 parallel cable. You use Novell Distributed Print Services (NDPS) to provide print services to your users. This printer doesn't have an embedded printer agent. Can you use it with NDPS?

A. Yes, all prerequisite requirements have been met.
B. No, the NDPS manager doesn't support older dot-matrix printers.
C. No, the NDPS broker is incompatible with the IEEE 1284 standard.
D. No, NDPS doesn't support printers that don't have an embedded printer agent.
E. No, a printer agent can't be created for printers that connect to the server with a parallel cable.

Explanation/Reference:

QUESTION 11
You're designing the eDirectory tree for your company. Your company is composed of four distinct subsidiary organizations. You decide to create four Organization objects at the root of your tree to represent each. Each subsidiary has its own Vice President who is in charge of the organization. You decide to create a user object for each Vice President in their respective Organization object. Will this design work?

A. Yes, all eDirectory rules have been observed.
B. No, user objects can't reside in an Organization object.
C. No, Organization objects can only reside within Country objects.
D. No, there can only be one Organization object within a given tree.
E. No, Organization objects should not be used to represent subsidiaries. Organizational Unit objects should be used instead.

QUESTION 21
Click the Exhibit button to begin.

The user object RTracy is a member of the FlightOps group. This group has been assigned Read, Write, Create, Erase, and File Scan file system rights to the SHARED folder. FLIGHTOPS is a subdirectory of SHARED that contains confidential data. An IRF has been placed on this directory that blocks the Write, Create, Erase, Modify, and Access Control rights. However, user RTracy needs limited access to these files. His object has an explicit rights assignment to FLIGHTOPS for the Write, Modify, and Access Control rights. What are RTracy's effective rights to the contents of the FLIGHTOPS directory?

A. Supervisor
B. Read, File Scan
C. Read, Write, Modify, Access Control
D. Read, Write, Create, Erase, File Scan
E. Read, Write, Modify, File Scan, Access Control
F. This object has no rights to the directory or its contents.

Correct Answer: E

Explanation/Reference:

QUESTION 24
You're planning the network file system for a NetWare 6.5 server you are going to install. Your server has a mirrored 40 GB SCSI-3 hard disk drive array. On the array, you've decided to create one NSS volume named SYS. In addition to the default operating system directories created when NetWare is installed, you want to create a directory named USERS off the volume root where each user will have his or her home directory. You also want to create a directory named SPOOL off the volume root where print jobs waiting to be printed on the network printer will reside. Finally, you want to create a directory named APPS off the volume root where networkdistributed applications will reside. Does this design meet with Novell guidelines?

A. Yes, all Novell guidelines have been met.
B. No, NSS doesn't support mirrored drive arrays
C. No, NSS doesn't support SCSI-3 hard disk drives.
D. No, the user's home directory should be named HOME.
E. No, only the NetWare operating system should reside on volume SYS.
F. No, volume SYS should be a traditional volume on a NetWare 6.5 server.
G. No, the users' home directories should be placed immediately beneath SYS:\PUBLIC.

Correct Answer: E

QUESTION 30
You have just finished configuring a Novell Distributed Print Services system for your organization on your NetWare 6.5 server. You've created a Broker object, a Manager object, and configured a Printer Agent and gateway for your organization's printer. You've loaded the broker and manager services on your server. You configured the Remote Printer Management service to automatically download the correct printer driver to your client Windows XP Professional workstations. When you log in from the workstations using the Novell Client 4.83, the drivers are not downloaded. You've tried logging in from every workstation and it doesn't work on any of them. What's causing this problem?

A. You need to upgrade to the Novell Client version 4.9.
B. You must load the Printer Agent software (PRAGENT.NLM) on the server.
C. You need to download and install the latest Support Pack on the server.
D. Remote Printer Management isn't compatible with Windows XP Professional.
E. The NDPS component of the Novell Client hasn't been installed on the workstations.

Correct Answer: E

Explanation/Reference:

QUESTION 33
You're troubleshooting a problem with file system rights on your WIDGET1 NetWare 6.5 server. WIDGET1 is in the .SLC .WIDGET context. The RHugie.LON.WIDGET user object has the Supervisor effective right to every file and directory on every volume on WIDGET1. You've checked the trustee list for the volume and directories and RHugie does not have an explicit rights assignment granted. What is the cause of his excessive rights?

A. RHugie has the Supervisor right granted to WIDGET1's volume objects in eDirectory.

B. RHugie has the Supervisor right to the LON organizational unit object in eDirectory.

C. RHugie has the Supervisor effective right to the WIDGET1 server object in eDirectory .

D. The NetWare server needs to have the latest Support Pack installed to fix this known bug.

E. RHugie has Browse, Create, Rename, and Delete rights to the SLC organizational unit object in Directory.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 34
You've just completed installing a new NetWare 6.5 server in your network. It's the only NetWare server currently in your network. You've installed the Native File Access Protocols (NFAP) product on the server and configured a share for the SHARED directory on your DATA volume. When you log in with Novell Client version 4.9, everything seems to work correctly. However, when you try to access the share from workstations that don't have the Novell Client installed using the Microsoft Client for Microsoft Networks, you are unable to authenticate to the server to access the share. What is the cause of this problem?

A. You can't use the text "SHARED" in an NFAP share name.

B. You can't create an NFAP share on a NetWare volume other than SYS.

C. You must have more than one NetWare server in the eDirectory tree to use NFAP .

D. Universal Password is disabled, you need to enable it on the server or configure the user accounts with a Simple Password.

E. NFAP is incompatible with the Microsoft Client for Microsoft Networks. You must use the Microsoft Client for Novell Networks.

F. You are using an outdated version of the Microsoft Client for Microsoft Networks. You need to download the latest version.

G. You must have the Novell Client version 4.83 or later installed to access a NFAP share using the Microsoft Client for Microsoft Networks.

Correct Answer: D

A. UNLOADNAMED.NLM

Answer: A

QUESTION 36
You're designing your organization's eDirectory tree. You have decided to name your tree ACME_CORP-TREE . You've created a Country object below the tree root and named it US . Within C=US, you've created four Organization objects for each of your organization's functional divisions. To ease administration, you've decided to place your Admin user object directly below the tree root. Will this design work?

A. Yes, all eDirectory rules have been observed.
B. No, you can't use an underscore in the tree name.
C. No, User objects can't reside directly below the tree root .
D. No, Country objects can't reside directly below the tree root.
E. No, Country objects must use the full name of the country they represent, not its abbreviation.
F. No, if you use Country objects, the next level down the tree must represent geographic locations, not organizational divisions.

QUESTION 51
You're designing your organization's eDirectory tree. You want to create Country objects at the top of your tree for each country where your organization has an office. Each of these offices has a regional network administrator. You decide to create an object named Admin in each respective Country object for each regional administrator. Will this tree design work?

A. Yes, all eDirectory rules have been observed.

B. No, eDirectory object names must be unique within the tree.

C. No, user objects can't reside in Country container objects.

D. No, eDirectory must be managed centrally. You shouldn't use distributed administrators.

E. No, the name of Admin is reserved for the user object that's created during the first server install.

F. No, eDirectory requires that trees be designed by departmental organization, not by geographic region.

Correct Answer: C

QUESTION 56
You're planning to install your NetWare 6.5 server into an existing tree. There are three servers already installed in the tree. They communicate with each other using the IPX protocol. One is a NetWare 4.1 server, one is a NetWare 4.2 server, and one is a NetWare 5.0 server. The NetWare 4.1 server has Support Pack 6 installed. The NetWare 4.2 server has Support Pack 6a installed. The NetWare 5.0 server has Support Pack 4 installed. Will the installation of the NetWare 6.5 server into this tree be successful?

A. Yes, all prerequisite requirements have been met.

B. No, Support Pack 7 or later must be installed on the NetWare 4.2 server.

C. No, Support Pack 5 or later must be installed on the NetWare 5.0 server.

D. No, NetWare 6.5 can't communicate with older servers using the IPX protocol.

E. No, the version of eDirectory included in NetWare 6.5 is not compatible with NetWare 4.1 servers.

F. No, the version of eDirectory included in NetWare 6.5 is not compatible with NetWare 4.2 servers.
