IBM Tivoli Identity Manager V5.1 Fundamentals

Practice Test
Version: 4.0
IBM 000-038: Practice Exam

Sponsored and Created by ChIpDiGiT
Exam A

QUESTION 1
Which operation is valid when a user’s identity is suspended given properly configured automatic provisioning policies and roles in IBM Tivoli Identity Manager V5.1?

A. The user's accounts are suspended on managed targets.
B. The user's identity is suspended and the accounts are deleted on the managed target.
C. The user's accounts will be modified in order to grant access rights to managed targets.
D. The user's accounts are added to the suspended group on the Enterprise Directory Server.

Correct Answer: A
Section: (none)
Explanation

Explanation:

QUESTION 2
Where does JavaScript defined with IBM Tivoli Identity Manager (ITIM) execute?

A. browser
B. database
C. directory server
D. application server

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 3
What can be achieved by IBM Tivoli Access Manager for e-business protecting IBM Tivoli Identity Manager?

A. data sync
B. access control
C. roles management
D. federated identity management

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:

"Certification Depends on Only One Thing" - www.actualanswers.com 2 IBM 000-038: Practice Exam

QUESTION 4
JavaScript is used in which IBM Tivoli Identity Manager V5.1 task?

A. ACIs
B. Reports
C. Data Synchronization  
D. Provisioning Policy Entitlements

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 5**  
Which task can be done using the IBM Tivoli Identity Manager V5.1 (ITIM) Self-Service User Interface application?

A. manage service profiles  
B. manage password changes  
C. export text files through the FTP transport  
D. send e-mail notifications to the ITIM administrator

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 6**  
What is one purpose of IBM Tivoli Identity Manager V5.1 adapters?

A. to send SMTP alerts  
B. to provision VMware images  
C. to send text files by FTP action  
D. to provision and de-provision accounts

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 7**  
What configuration option is provided by the Middleware Configuration Utility?

A. create and configure the directory server  
B. create and configure the application server

http://www.gratisexam.com/
C. create and configure the HTTP Server plug-in
D. create and configure the directory integrator server

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 8
Which attribute is required for an IBM Tivoli Identity Manager custom person entity?

A. cn
B. uid
C. mail
D. eraliases

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 9
What is an IBM Tivoli Identity Manager V5.1 (ITIM) service?

A. It represents a custom tool used to create an adapter using IBM Tivoli Directory Integrator.
B. It represents an instance of a resource such as an operating system or mail server that ITIM can manage.
C. It represents an instance of a manage resource in order to provision identity policy to the federated identity server.
D. It represents a user repository which a user can be provisioned and have access to modify XML; it also represents SOAP 2.0

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 10
What is a function of an IBM Tivoli Identity Manager adapter?

A. to log access activities on the managed resource
B. to provide reporting capability on a managed resource
C. to create and modify accounts on a managed resource
D. to create and modify password rules on a managed resource

Correct Answer: C
Section: (none)
Explanation
QUESTION 11
Which product can be configured with IBM Tivoli Identity Manager for auditing requirements?

A. IBM Tivoli Security Operation Manager  
B. IBM Tivoli Compliance Insight Manager  
C. IBM Tivoli Compliance Operation Manager  
D. IBM Tivoli Access Manager for e-business  

Correct Answer: B  
Section: (none)  
Explanation:

QUESTION 12
Which policy type allows accounts and accesses to be validated periodically?

A. Identity  
B. Adoption  
C. Provisioning  
D. Recertification  

Correct Answer: D  
Section: (none)  
Explanation:

QUESTION 13
What are two output formats generated by IBM Tivoli Identity Manager V5.1 reports? (Choose two.)

A. XML  
B. PDF  
C. CSV  
D. DSML  
E. Microsoft Word  

Correct Answer: BC  
Section: (none)  
Explanation:

QUESTION 14
What is available to define the User ID for account provisioning in IBM Tivoli Identity Manager V5.1 (ITIM)?

A. HR Feed
B. ITIM Adapter
C. Identity Policy
D. Adoption Policy

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 15
Which activity should be included during the requirements gathering phase for automating account provisioning?

A. document reverse password synchronization
B. document challenge and response questions
C. document Self-Service Console requirements
D. document relationships between roles and accounts

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 16
Where are persons added in an organization tree if no placement rule is defined?

A. users will not be added
B. under the root container
C. under the people container
D. under the orphan container

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 17
What is created when objects are exported from an IBM Tivoli Identity Manager V5.1 system?

A. a Java archive (JAR) file
B. a Comma Separated Value (CSV) file
C. an LDAP Data Interchange Format (LDIF) file
D. a Service Provisioning Markup Language (SPML) file

Correct Answer: A
Section: (none)
Explanation
QUESTION 18
Which statement best describes the IBM Tivoli Identity Manager Administrative Console?

A. It provides an advanced set of administrative tasks for managing Python, Ruby, Tcl and JavaScript.
B. It provides an advanced set of administrative tasks for managing Active Directory, UNIX, and IBM WebSphere Deployment Manager.
C. It provides an advanced set of administrative tasks for managing Oracle databases, HTTP servers, and IBM Tivoli Directory Integrator.
D. It provides a basic and an advanced set of administrative tasks for managing identities, accounts, policies, roles, reports, and system configurations.

Correct Answer: D
Section: (none)
Explanation

QUESTION 19
What is a valid method of communications between IBM Tivoli Identity Manager and an adapter?

"Certification Depends on Only One Thing" - www.actualanswers.com 7 IBM 000-038: Practice Exam

A. TCP
B. DSML
C. SNMP
D. SOAP

Correct Answer: B
Section: (none)
Explanation

QUESTION 20
Which design elements are available for customization in an IBM Tivoli Identity Manager (ITIM) adapter?

A. ITIM Workflows
B. ITIM Service Profile
C. ITIM Adapter Policy Flow
D. ITIM Profile Audit Reports

Correct Answer: B
Section: (none)
Explanation

QUESTION 21
When is a service selection policy evaluated?
A. when a service is created  
B. when a service is modified  
C. when a user’s attributes are modified  
D. when an account is added to the system

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 22**
Which IBM product generates SSL certificates?

A. GSKit  
B. IBM Tivoli Directory Server  
C. IBM Tivoli Identity Manager  
D. IBM Tivoli Directory Integrator

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 23**
How are permissions set using ACIs?

A. Grant, Deny, None  
B. Read, Write, Ignore  
C. Execute, Deny, Grant  
D. Allow, Operation, Prevent

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 24**
Which process gathers data from the IBM Tivoli Identity Manager V5.1 directory information store and prepares it for the reporting engine?

A. Data Auditing  
B. Data Collection  
C. Data Authorization  
D. Data Synchronization

**Correct Answer: D**

**Section: (none)**
QUESTION 25
Which option allows IBM Tivoli Identity Manager to communicate with IBM Tivoli Access Manager for Enterprise Single Sign-On?

A. a defined service
B. an adoption policy
C. a provisioning policy
D. a single sign-on workflow

Correct Answer: A

QUESTION 26
What two functions does IBM Tivoli Identity Manager V5.1 provide for managed resources? (Choose two.)

A. user provisioning
B. authorization service
C. authentication service
D. password management
E. recording of user actions

Correct Answer: AD

QUESTION 27
What role does IBM WebSphere Application Server play in IBM Tivoli Identity Manager V5.1 (ITIM)?

A. It provides the presentation layer.
B. It enables ITIM to extend customization to multiple Windows domains.
C. It provide direction to other applications and allows ITIM to operate by itself.
D. It manages ITIM adapters, account administration, and Web access gateways.

Correct Answer: A

QUESTION 28
Which operation is valid when a user’s identity is restored given properly configured automatic provisioning policies and roles in IBM Tivoli Identity Manager V5.1 (ITIM)?
QUESTION 29
Given proper access to preview a provisioning policy in an IBM Tivoli Identity Manager V5.1 system, which categories are in the Preview Policy Summary page?

A. Compliant Accounts, Disallowed Accounts, Enforcement Accounts
B. Enforcement Accounts, Non-compliant Accounts, Allowed Accounts
C. Disallowed Accounts, Non-compliant Accounts, Compliant Accounts
D. Non-compliant Accounts, Enforcement Accounts, Disallowed Accounts

Correct Answer: C
Section: (none)
Explanation:

QUESTION 30
A brokerage company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing a financial application must have approval from their manager. When the financial application account is suspended it must be placed in a special location within the ITIM directory to ensure that it is auditable. What must be modified to move the account?

A. Modify Node under Design Workflows
B. Suspend Node under Design Workflows
C. Modify Operation under Manage Operations
D. Suspend Operation under Manage Operations

Correct Answer: D
Section: (none)
Explanation:

QUESTION 31
A health care company is deploying IBM Tivoli Identity Manager V5.1 (ITIM) to automate their user provisioning process in their environment. During the role discovery process, they determined: all the doctors need access to the Ambulatory application- only the radiologist needed access to the RIS/PACS application- only cardiologist needed access to the Cardiology EMRWhat is the simplest way to ensure that the doctors receive the
appropriate accounts on the managed resources?

A. Define the specialist roles, then configure the provisioning policies so that each grants both the Ambulatory and the specific specialist application to the appropriate role.

B. Define the doctor role, then configure a single provisioning policy that grants access to all applications to the doctor role. Only install the client application on the appropriate specialist's desktop.

C. Define the doctor role and the appropriate specialists roles. Make the specialists roles a child role of the doctor role, then configure the provisioning policies so that each grants only the specific application to the appropriate role.

D. Create one provisioning policy that grants access to all applications and define a custom workflow that will check for the doctor's specialization to determine which application(s) should be provisioned. Only install the workflow application on the appropriate specialist's desktop.

Correct Answer: C
Section: (none)
Explanation/Reference:
Explanation:

QUESTION 32
Which two LDAP directory servers are supported by IBM Tivoli Identity Manager V5.1 as middleware components? (Choose two.)

A. OpenLDAP
B. Novell Directory Server
C. IBM Tivoli Directory Server
D. Sun Enterprise Directory Server
E. Microsoft Active Directory Server

Correct Answer: CD
Section: (none)
Explanation/Reference:
Explanation:

QUESTION 33
Which prefix is found in front of most IBM Tivoli Identity Manager property files?

A. IdM
B. ITIM
C. tivoli
D. enRole

Correct Answer: D
Section: (none)
Explanation/Reference:
Explanation:

QUESTION 34
Where is a custom person entity created?
A. using the Self-Service User Interface
B. using the IBM Tivoli Directory Integrator Configuration Editor
C. using the IBM Tivoli Identity Manager Administrative Console
D. using the IBM WebSphere Application Server Integrated Solutions Console

**Correct Answer:** C
**Section:** (none)
**Explanation**

**Explanation/Reference:**
Explanation:

**QUESTION 35**
Which policy type defines how a user account can be assigned an owner in IBM Tivoli Identity Manager V5.1?

A. Identity
B. Adoption
C. Provisioning
D. Account Recertification

**Correct Answer:** B
**Section:** (none)
**Explanation**

**Explanation/Reference:**
Explanation:

**QUESTION 36**
Which IBM Tivoli Identity Manager Web interface creates provisioning policies?

A. Self Register Interface
B. Administrative Console
C. Self-Service User Interface
D. Provisioning Policy Designer

**Correct Answer:** B
**Section:** (none)
**Explanation**

**Explanation/Reference:**
Explanation:

**QUESTION 37**
What is a direct benefit of a hierarchical organization tree?

A. identity policy
B. password rules
C. delegated administration
D. reporting data synchronization

**Correct Answer:** C
**Section:** (none)
**Explanation**
QUESTION 38
Which IBM Tivoli Identity Manager service can process user information in real time?

A. IDI data feed
B. DSML identity feed
C. AD OrganizationalPerson identity feed
D. Comma Separated Value file (CSV) identity feed

Correct Answer: A

Explanation/Reference:

QUESTION 39
What is an advantage of the IBM Tivoli Identity Manager (ITIM) Self-Service User Interface?

A. It is easy to view the organizational tree.
B. It is easy to integrate with a customer portal.
C. It provides an interface to manage multiple users.
D. Error handling can be customized for the customer environment.

Correct Answer: B

Explanation/Reference:

QUESTION 40
Which type of user has access to all functions in the IBM Tivoli Identity Manager system and is not governed by access control items?

A. Manager
B. Root User
C. Domain Administrator
D. System Administrator

Correct Answer: D

Explanation/Reference:

QUESTION 41
Which statement is true when using dynamic roles?

A. They update user profile information.
B. They can only be used for defining access to the reporting interface.
C. They can only be used for assigning membership to provisioning policies.
D. They affect the performance of the overall IBM Tivoli Identity Manager system.

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

**QUESTION 42**
What is the main function of an IBM Tivoli Identity Manager adapter?

A. to manage UNIX root accounts only
B. to reconcile common reports in WSDL format
C. to change, modify, and delete virtual operating systems
D. to act as a trusted virtual administrator for managing resources "Certification Depends on Only One Thing" - www.actualanswers.com 15 IBM 000-038: Practice Exam

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

**QUESTION 43**
A retail company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing the Customer Relationship Management (CRM) application must have approval from their manager. What needs to be done in ITIM to facilitate the necessary approval process?

A. Create a new Account Request Workflow using the Simple selection.
B. Create a new Manage Operations Workflow using the Simple selection.
C. Create a new Access Request Workflow using the Advanced selection.
D. Create a new Manage Operations Workflow using the Advanced selection.

**Correct Answer:** A  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

**QUESTION 44**
If an approval needs to be generated during account provisioning, what must be configured in IBM Tivoli Identity Manager V5.1?

A. Roles
B. Adapters
C. Provisioning Policies
D. Account Request Workflows

**Correct Answer:** D
QUESTION 45
What service does IBM Tivoli Identity Manager V5.1 provide for the user?

A. session management
B. lifecycle management
C. authorization management
D. authentication management

Correct Answer: B

QUESTION 46
What is used to define membership for a Dynamic Role in IBM Tivoli Identity Manager V5.1?

A. LDAP filter
B. VBScript code
C. PerlScript code
D. JavaScript code

Correct Answer: A

QUESTION 47
A customer would like to upgrade the IBM Tivoli Identity Manager (ITIM) production environment from ITIM V4.6 to ITIM V5.1. Which reference document contains key information concerning this process?

A. Adapter and Profile Installation
B. Installing the Incremental Data Synchronizer
C. Separate System Upgrade and Migration Guide
D. Configuring the IBM Tivoli Identity Manager Server

Correct Answer: C
QUESTION 48
Which password policy security settings is available in IBM Tivoli Identity Manager V5.1?

A. Password Complexity
B. Password Minimum Age
C. Password Arrival Expiration Period
D. Maximum Number of Incorrect Login Attempts

Correct Answer: D

QUESTION 49
Which policy enforcement setting ensures that the accounts managed by IBM Tivoli Identity Manager V5.1 are compliant?

A. Alert
B. Mark
C. Correct
D. Suspend

Correct Answer: C

QUESTION 50
What benefit do the IBM Tivoli Directory Integrator adapters provide when managing target resources?

A. enforce adoption policies
B. enforce password policies
C. password synchronization
D. secret question synchronization

Correct Answer: C

QUESTION 51
A utility company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing the billing application must have approval
from the service owner. When the billing application account is modified, a notification must be sent to the user's manager. In the ITIM workflow designer, which node type must be used to send the notification?

"Certification Depends on Only One Thing" - www.actualanswers.com 18 IBM 000-038: Practice Exam

A. RFI
B. Mail
C. Script
D. Extension

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 52
New identities or changes to existing identities are performed in the database repository. Which IBM Tivoli Directory Integrator input connector type is required while feeding data to IBM Tivoli Identity Manager?

A. CSV
B. JNDI
C. JDBC
D. SOAP

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 53
What is the purpose of a placement rule in IBM Tivoli Identity Manager V5.1 Feed Services?

A. to assign specific roles to a person
B. to assign specific groups to a person
C. to create specific accounts for a person
D. to determine the container where the person will be created

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 54
Which two activities are typically performed during the requirements gathering phase? (Choose two.)

"Certification Depends on Only One Thing" - www.actualanswers.com 19 IBM 000-038: Practice Exam

A. document a entity design
B. document a migration plan
C. document a workflow design
D. document the communications plan
E. document the lifecycle management rules

Correct Answer: AE
Section: (none)
Explanation

QUESTION 55
What are two common ways to use IBM Tivoli Directory Integrator with IBM Tivoli Identity Manager (ITIM)? (Choose two.)

A. to manage SOAP V2.0 and WSDL V5.1 protocols
B. to produce XML format files to import into the Windows registry
C. to provide identity feeds from databases, applications, or other directories into the ITIM server
D. to extend custom password rules and synchronization provisioning policies with mainframe servers
E. to allow IBM Tivoli Directory Integrator to act as an adapter via the Remote Method Invocation (RMI) dispatcher

Correct Answer: CE
Section: (none)
Explanation

QUESTION 56
What must occur in order to move a provisioning policy from an IBM Tivoli Identity Manager V5.1 (ITIM) test environment to a production environment?

A. A full export must be generated using the ITIM Documentation Tool.
B. A partial export must be generated from the ITIM Administrative Console.
C. A partial export must be generated from the ITIM command line interface.
D. The provisioning policy must be manually created in the production system.

Correct Answer: B
Section: (none)
Explanation

QUESTION 57
What is evaluated during an identity feed if the Use Workflow checkbox is checked in the IBM Tivoli Identity Manager V5.1 Feed Service?

A. service
B. passwords
C. supervisor attribute
D. provisioning policies
Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 58
Which statement is true about the person entity feature available in IBM Tivoli Identity Manager V5.1 (ITIM)?

A. The custom objectclass can be updated in the ITIM GUI.
B. When a BPPerson is registered in ITIM, a sponsor can be selected.
C. InetOrgPerson and BPPerson are categories that are built into ITIM.
D. The person with the attributes corresponds to the standard LDAP object class itimPerson.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:

QUESTION 59
What is the next activity after creating a custom person in IBM Tivoli Identity Manager V5.1?

A. customize the person form
B. customize the account form
C. create a custom person attribute
D. customize the Self-Service User Interface

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:

"Certification Depends on Only One Thing" - www.actualanswers.com 21 IBM 000-038: Practice Exam

QUESTION 60
The Self-Service User Interface allows employees to perform basic management and provisioning functions. Which content is included in the personalized view?

A. policies
B. services
C. organization structure
D. accounts and accesses

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:
QUESTION 61
What scripting language can be used within IBM Tivoli Identity Manager Workflows?

A. Perl
B. Python
C. Javascript
D. VisualBasic

Correct Answer: C
Section: (none)
Explanation

QUESTION 62
Which upgrade activity is performed by the IBM Tivoli Identity Manager installer application?

A. upgrade the database tables
B. update the Operating System to the latest fixpack
C. upgrade the IBM Tivoli Directory Integrator RMI adapter
D. update the IBM WebSphere Application Server to the latest fixpack

Correct Answer: A
Section: (none)
Explanation

QUESTION 63
"Certification Depends on Only One Thing" - www.actualanswers.com 22 IBM 000-038: Practice Exam
Where does the Help Desk reset user passwords in IBM Tivoli Identity Manager?

A. Help Desk Console
B. Self Register Interface
C. Administrative Console
D. Self-Service User Interface

Correct Answer: C
Section: (none)
Explanation

QUESTION 64
Where are objects defined that are available for JavaScript environments in IBM Tivoli Identity Manager V5.1 (ITIM)?

A. browser
B. database
C. ITIM adapters
D. JavaScript extensions
QUESTION 65
Which policy type looks at account data to match it to a user according to a specification rule?

A. Adoption  
B. Provisioning  
C. Service Selection  
D. Account Recertification

Correct Answer: A
Section: (none)
Explanation

QUESTION 66
IBM Tivoli Identity Manager V5.1 (ITIM) provides two types of request based provisioning, account based and access based. How can an access be defined in ITIM?

A. by the ability to manage a critical resource  
B. by permissions assigned to manage resources  
C. by the ability to use a specific resource such as a shared folder  
D. by the ability to use a single shared resource such as access entitlements

Correct Answer: C
Section: (none)
Explanation

QUESTION 67
Which SSL implementation is used by IBM Tivoli Identity Manager and IBM Tivoli Directory Integrator?

A. JSSE  
B. GSKit  
C. OpenSSL  
D. Java2SSL

Correct Answer: A
Section: (none)
Explanation

QUESTION 68
When previewing a modified provisioning policy, there are two available options: enforce changes only, enforce entire policy. Which statement describes these two options?

A. Compute the entire recertification policy on all users, or compute only the impact of the changes to all recertification policies.
B. Compute the entire policy on all users on managed targets, or compute only the impact of the changes to all identity policies.
C. Compute only the impact of the changes made to the policy, or compute the impact of the entire policy on all users belonging to policy memberships.
D. Compute only the impact of the changes made to the adoption policy, or compute the impact of the entire policy on all users belonging to the adoption policy.

Correct Answer: C
Section: (none)
Explanation

"Certification Depends on Only One Thing" - www.actualanswers.com 24 IBM 000-038: Practice Exam

QUESTION 69
Which three databases are supported by IBM Tivoli Identity Manager V5.1? (Choose three.)

A. Oracle
B. MySQL
C. Sybase
D. IBM DB2
E. InterBase XE
F. Microsoft SQL Server

Correct Answer: ADF
Section: (none)
Explanation

QUESTION 70
What is true when two provisioning policies apply to the same attribute?

A. The policy that was evaluated first will apply.
B. The policy with the lowest priority is processed.
C. The policy with the highest priority is processed.
D. The policies are not applied and the administrator is notified.

Correct Answer: C
Section: (none)
Explanation

QUESTION 71
How is the field type modified on a Person form?
A. using Workflows  
B. using Form Designer  
C. using Manage Users  
D. using the Advanced Provisioning Parameters  

Correct Answer: B  
Section: (none)  
Explanation

QUESTION 72  
Which adapter is required to integrate IBM Tivoli Identity Manager with IBM Tivoli Access Manager for Enterprise Single Sign-On?

A. IBM Tivoli Directory Server Adapter  
B. IBM Tivoli Access Manager Combo Adapter  
C. IBM Tivoli Directory Integrator Combo Adapter  
D. IBM Tivoli Access Manager Enterprise Single Sign-On Adapter  

Correct Answer: D  
Section: (none)  
Explanation

Explanation/Reference:  
Explanation:

QUESTION 73  
IBM Tivoli Identity Manager V5.1 provides centralized management of which function?

A. user accounts  
B. access control  
C. user monitoring  
D. federated identities  

Correct Answer: A  
Section: (none)  
Explanation

Explanation/Reference:  
Explanation:

QUESTION 74  
A health care company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing the Pharmacy application must submit justification which will be stored in the account, and it will require approvals from their manager and the chief of staff. What must be done in ITIM to facilitate the justification and necessary approvals?

A. Create a new Access Request Workflow using the Simple selection.  
B. Create a new Manage Operations Workflow using the Simple selection.  
C. Create a new Account Request Workflow using the Advanced selection.  
D. Create a new Manage Operations Workflow using the Advanced selection.
QUESTION 75
Which type of report is available within IBM Tivoli Identity Manager V5.1?

A. Access Activity
B. Password Policies
C. Audit and Security
D. System Availability

Correct Answer: C
Section: (none)
Explanation

QUESTION 76
Which statement is true for SSL communication between IBM Tivoli Identity Manager (ITIM) Application Server and the ITIM adapter?

A. SSL is supported with custom adapters only.
B. SSL is supported with RMI-based adapters only.
C. SSL is supported with ADK-based adapters only.
D. SSL is supported with both RMI and ADK-based adapters.

Correct Answer: D
Section: (none)
Explanation

QUESTION 77
New identities or changes to existing identities are performed in the database repository. Which IBM Tivoli Directory Integrator input connector type is required while feeding data to IBM Tivoli Identity Manager?

A. CSV
B. JNDI
C. JDBC
D. SOAP

Correct Answer: C
Section: (none)
Explanation
QUESTION 78
Which entity can be an element in the organizational tree in IBM Tivoli Identity Manager?

A. a person's manager
B. a listing of a person's workflows
C. a listing of a person's accesses
D. the work location for all Europe employees

Correct Answer: D  
Section: (none)  
Explanation:

Explanation/Reference:
Explanation:

QUESTION 79
A utility company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing the billing application must have approval from the service owner. When the billing application account is modified, a notification must be sent to the user's manager. What must be modified to send the notification to the user's manager?

A. Add Node under Design Workflows  
B. Modify Node under Design Workflows  
C. Add Operation under Manage Operations  
D. Modify Operation under Manage Operations

Correct Answer: D  
Section: (none)  
Explanation:

Explanation/Reference:
Explanation:

QUESTION 80
In IBM Tivoli Identity Manager V5.1 (ITIM), what is the purpose of a child role in role hierarchy?

A. to simplify provisioning through policy inheritance  
B. to aid in the configuration of Policy Join evaluation  
C. to aid in the configuration of Separation of Duty policies “Certification Depends on Only One Thing”  
D. to provide a viewable organizational tree of the enterprise

Correct Answer: A  
Section: (none)  
Explanation:

Explanation/Reference:
Explanation:

QUESTION 81
What are two ways to update static organizational role memberships in IBM Tivoli Identity Manager V5.1 (ITIM)? (Choose two.)

A. modify the person's ITIM account  
B. modify the person's dynamic role
C. add the organizational role to the person's identity record
D. add a person to the member list under the organizational role
E. transfer the person to the appropriate branch in the organization tree

Correct Answer: CD
